Among the nine durable-goods groups, only iron and steel and furniture showed declines over the month. The largest increase was in the transportation-equipment group, as a result of continued expansion in aircraft and shipbuilding. Employment in this group was 2,270,000, an increase of 29,000 over May 1943 and of 827,000 from June 1942.

Among the non-durable groups, only the food group showed a sizable increase in employment over the month. Seasonal increases in canning, the beverage industries, baking, and slaughtering and meat packing raised employment in the food group to 951,000, a little more than 4 per cent above May.

Both the anthracite and bituminous-coal mining industries reported declines in employment in June, owing to the strike situation. Employment in both these industries was below the June 1942 level. The anthracite industry employed 3,300 fewer wage earners, and the bituminous-coal mining industry, 56,000 fewer workers than in June 1942. The total number of wage earners employed in both coal-mining industries in June was almost 453,000.

Labour Law

Labour Legislation Enacted by the Parliament of Canada in 1943

THE Parliament of Canada, during its session which opened on January 28 and closed on July 24, passed an Act to provide for appointment of a Council to promote Physical Fitness, amended laws relating to unemployment insurance and the deduction of income tax from wages and made provision for a special war supplement to old age pensions.

Unemployment Insurance

Amendments in the Unemployment Insurance Act 1940, which came into force on Proclamation, September 1, 1943, include within the scope of the Act all workers employed by the month or year whose remuneration does not exceed \$2,400 a year and also all workers, not otherwise excepted, who are employed by the hour, day, week or on piece rates, regardless of their rate of pay. A number of changes were made to facilitate operation of the Act. These amendments are dealt with on p. 1268 of this issue.

Income Tax

The Income War Tax Act amendments provide for a "pay-as-you-earn" plan and continuation of deduction of the tax from wages and salaries at the source. Provision is made for collecting 95 per cent of the 1943 tax in this manner. One-half of the 1942 tax on income of taxpayers other than corporations is to be forgiven, except income from investments exceeding \$3,000. The remaining half of the 1942 tax is to be collected this year but income and National Defence Tax payments made in 1942 are to be credited against the revised tax liability for that year.

Old Age Pensions

The Minister of Finance announced in the House of Commons on July 24, that an Order in Council would be issued under the War Measures Act to provide for a special war supplement not exceeding \$5 per month to old age and blind pensioners. The Order was

passed on August 10. The supplement is to be paid by the Dominion and the Provinces on the same basis as the pensions, 75 per cent and 25 per cent respectively.

Council to Promote Physical Fitness

The National Physical Fitness Act, which will come into force on Proclamation, is based on a recommendation of the Select Committee on Social Security and provides for a Council of not less than three nor more than ten members to be appointed by the Governor in Council and charged with the duty of promoting the physical fitness of the people of Canada. For this purpose the Council may assist in the extension of physical education in educational institutions, encourage, develop and correlate all activities relating to physical development through sports and athletics, train teachers, lecturers and instructors, organize activities to promote physical fitness and provide facilities for them, and co-operate with provincial organizations, established for the purpose, in ameliorating physical defects which can be remedied by exercise. Where a province establishes such an organization and undertakes to develop a plan for promoting physical fitness satisfactory to the Minister of Pensions and National Health, the Minister may, with the approval of the Governor in Council, give financial assistance in carrying out the plan, the amount in any year not to exceed an amount which bears the same proportion to \$250,000 as the population of the province bears to the population of Canada, or one-half the money actually expended by such province, whichever is less. Payments to the provinces and expenses of the Council are to be paid out of a special account in the Consolidated Revenue Fund to be known as the National Physical Fitness Fund. The Minister may refer to the Council, for inquiry and report, any matter relating to the operation of the Act. Annual reports are to be made by the Council to the Minister and by the Minister to Parliament.

Recent Regulations under Dominion and Provincial Legislation

Housing—Old Age Pensions—Seamen and Pilots—Minimum Wages in British Columbia, Nova Scotia and Quebec—British Columbia Workmen's Compensation—Steam Boilers in Saskatchewan

A NUMBER of Orders in Council relating to labour supply have been passed recently and are summarized in the Manpower Section. They are listed below. Two regulations concerning unemployment insurance have been rescinded following proclamation of the recent amendment in the Unemployment Insurance Act. A wartime increase in old age and blind pensions has been authorized. The Government's scheme for converting large houses into apartments in crowded areas has been extended to Hamilton, St. Catharines, Brantford, Montreal and Quebec and its scope has been expanded in Ottawa. The Orders in Council governing the payment of war bonuses to persons serving on Government vessels in war zones have been amended. Candidates for a mate's certificate may now count training at St. Margaret's Sea Training School in Hubbards, Nova Scotia, as sea

service. Changes have been made in the pilotage rates of the British Columbia and Sydney, Nova Scotia, Pilotage Districts.

In the provincial field, British Columbia has revised its minimum wage orders governing men and women in the shingle industry and provided for overtime rates. Nova Scotia has revised the minimum wage orders applying to women in laundries, dry-cleaning and dyeing establishments and in hotels and restaurants, and Quebec has renewed the order relating to the manufacture of wooden boxes and other wooden objects. Poisoning from certain specified processes involving the use of a volatile solvent has been added to the list of compensatable diseases in British Columbia. Saskatchewan has reissued its regulations governing steam boilers and refrigeration plants.

Dominion

Housing

The Government's scheme for meeting the housing shortage in certain areas by converting large houses into apartments has been extended to Hamilton, St. Catharines, Brantford, Montreal and Quebec and the municipalities contiguous to these cities by Order in Council P.C. 6812 passed August 30 under the War Measures Act. In addition the Minister of Finance has been authorized to acquire additional houses for conversion in Ottawa. Earlier Orders in Council put the scheme in effect in Ottawa, Vancouver, Victoria and Toronto (L.G., June and July, 1943, pp. 859, 1031).

Old Age Pensions

Order in Council P.C. 6367 passed August 10 under the War Measures Act authorizes the Dominion Government to enter into supplementary agreements with the provinces to provide for a special wartime increase not exceeding \$5 a month in old age and blind pensions (L.G., Aug., 1943, p. 1068). The maximum pension payable has been raised from the \$240 a year stipulated in the Old Age Pensions Act to \$300 and the amount of income which old age and blind pensioners may have before deductions are made from their pensions has been reduced by \$60 in all cases. A blind pensioner who marries a

blind person may now receive a maximum pension of \$150 instead of \$120 but deductions will be made if his income exceeds \$170 a year.

Seamen

War Bonuses.—Two Orders in Council of August 4 modify the policy regarding the payment of war bonuses to officers and men of vessels operated by Government departments. Orders in Council of August 19, 1942, and January 13, 1943 (L.G., 1942, p. 1045; February, 1943, p. 267), authorized the payment of such bonuses to personnel of vessels of the Department of Transport and of the Fisheries Protection Service of the Department of Fisheries while these vessels are operating in areas designated as war zones. The amount of the bonus was fixed at 25 per cent of the basic wage of the officer or rating concerned.

The bonus payable to unlicensed personnel on Department of Transport vessels has now been raised by Order in Council P.C. 310/6181 to \$1 per day with a maximum of \$25 per month, effective August 1, 1943. Another Order in Council provides for the payment of a bonus equivalent to that now paid to personnel of the fisheries protection vessels to the officers and crew of fisheries patrol vessels of the Department of Fisheries. This bonus is to be paid from April 1, 1943.

Mates' Certificates.—To overcome the shortage of certificated mates, a new regulation (P.C. 6214), passed August 6 under the War Measures Act permits trainees at St. Margaret's Sea Training School in Hubbards, Nova Scotia who obtain a Certificate of Training to count each 13 weeks' period of training as six weeks' sea service. The Masters' and Mates' Regulations relating to examinations for certificates (L.G., 1936, p. 1134) require candidates for a Mate's Home-Trade Certificate to have 36 months' sea service and for a Second Mate's Foreign-Going Certificate they must have four years in foreign-going ships and six years in home-trade voyages. The new regulation also declares that trainees will be eligible, on completion of their training period, for examination for a lifeboatman's certificate without additional sea service.

Pilots

British Columbia Pilotage District.—The Order in Council fixing special pilotage rates for war services not covered by the regular schedule of rates in the British Columbia Pilotage District (L.G., 1942, p. 1301) was amended by Order in Council P.C. 5998 passed July 28 under the War Measures Act. Under the original Order pilots on war service were paid \$25 for each day away from their base plus a 25 per cent surcharge. The amendment fixes a rate of \$30 a day for pilots actually engaged in piloting a vessel and \$15 a day for those on "standby" while away from their base. As before they also receive reasonable subsistence and travelling expenses. A second clause provides that pilots serving during the war outside the British Columbia Pilotage District with the permission of the Pilotage Authority may receive remuneration at the rates fixed by the Pilotage Authority for the district in which they are serving, but such remuneration must be paid directly to the British Columbia Pilotage Fund.

Sydney Pilotage District.—Due to war conditions, move and detention rates for the Sydney Pilotage District in Nova Scotia have been increased by an Order in Council (P.C. 5743) passed July 19 under the War Measures Act. General move rates remain at \$10 per move but a new rate of \$25 each way has been

set for movages to and from ballasting grounds. Pilots on vessels detained for any cause other than adverse weather conditions were formerly paid detention rates of \$3 for the first three hours and \$1 for each additional two hours or part thereof. The new Order fixes a flat rate of \$10 for all detentions over one hour.

Other Orders in Council

Manpower.—The following Orders in Council are summarized in the Manpower section of this month's LABOUR GAZETTE, p. 1211: P.C. 5819, August 6 and P.C. 6433, August 13, amending the National Selective Service Civilian Regulations (L.G., January, 1943, p. 19) in regard to employment on flue-cured tobacco farms, and authorizing the transfer to essential employment of all men between 16 and 41; P.C. 6387, August 10, providing for the reorganization of National Selective Service; P.C. 5708, August 9, authorizing a proclamation under the National Selective Service Mobilization Regulations (L.G., January, 1943, p. 153) calling out new classes of men; P.C. 6180, August 3, providing for camps to house workers producing wood fuel; P.C. 6434, August 13, making further arrangements for employing soldiers on farms; P.C. 6549, August 17, providing for the payment of costs of transporting harvesting equipment within the Prairie Provinces; Compulsory Employment Order No. 6, August 25, applying to men between 16 and 41 in specified employments and occupations; National Selective Service Orders No. 8, August 20, revoking an Order concerning the employment of members of the Armed Forces on leave (L.G., February, 1943, p. 265) issued under the repealed National Selective Service Regulations (P.C. 7595); and No. 9, August 26, respecting longshoremen in the Port of Saint John, New Brunswick.

Unemployment Insurance.—Two Orders in Council extending the coverage of the Act to persons whose remuneration temporarily exceeded \$2,000 a year due to war conditions (P.C. 10156, L.G., 1942, p. 4) and to certain persons resident in the United States (P.C. 2555, L.G., May, 1943, p. 688) have been repealed by P.C. 6798, August 30, and P.C. 6950, September 3.

The persons affected are now covered by the recent amendment in the Act, p. 1268.

Provincial

British Columbia Male and Female Minimum Wage Acts

Revisions of Orders 62 (LABOUR GAZETTE, 1941, page 959) and 77 (LABOUR GAZETTE, 1942, page 1303) governing men and women in the shingle industry were gazetted July 29 and

went into effect August 2. New clauses relating to the payment of overtime have been added but the rates and all other provisions are unchanged. The overtime provisions are similar in many respects to the provisions recently added to the Orders governing the

logging, wood-working, sawmill and box-manufacturing industries (LABOUR GAZETTE, August, 1943, page 1173).

The overtime provisions only apply west of the Cascade Mountains. With the exceptions noted below, all workers in the industry, including those covered by other minimum wage orders, must now be paid one and one-half times their regular rate for all hours in excess of eight a day and 48 a week. These are the maximum hours permitted in industrial undertakings by the British Columbia Hours of Work Act but overtime is allowed in emergencies and in cases where it has been specially authorized by the Board of Industrial Relations.

Special provisions regarding overtime pay apply to three groups. Men employed as stationary engineers, pumpmen, operating millwrights, firemen, turbine operators or oilers may work nine hours a day and 50 a week before overtime rates are required. In establishments where by arrangement or agreement between employers and workers, as provided for in the Hours of Work Act, a special system of hours has been established under which daily hours up to nine are worked on certain days and less than eight hours on other days, the weekly hours not exceeding 48; overtime rates are not to be paid until the worker has completed the hours fixed by the arrangement or agreement. The same stipulation applies to male workers in establishments taking advantage of the regulation under the Hours of Work Act permitting night shifts of 10 hours in shingle-mills, planing-mills and sawmills if weekly hours do not exceed 48 (LABOUR GAZETTE, 1934, page 641). The following classes of workers are exempt from the provisions regarding overtime pay: shingle sawyers and packers, persons holding positions of management and supervision, cook- and bunk-house employees and workers in the transport industry covered by minimum wage Orders 52, 26, 26A or 26B (LABOUR GAZETTE, 1936, page 291; 1940, pages 1147, 1258; 1941, page 1110), women office workers governed by Order 34 (LABOUR GAZETTE, 1936, page 236) and men employed as watchmen, caretakers, storekeepers, and as first-aid attendants to whom Order 39 applies (LABOUR GAZETTE, 1940, page 1147).

The provision in Order 77 governing women in the industry which required the payment of wages semi-monthly has been omitted from the revised Order but the British Columbia Semi-monthly Payment of Wages Act covers this class of worker.

British Columbia Workmen's Compensation Act

By a regulation gazetted August 26, the Workmen's Compensation Board has made an addition to the list of industrial diseases for which compensation is payable. Poisoning in any process involving the use of a volatile solvent in the manufacture or repair of airplanes, assembling or repairing motor-vehicles, or in the making of paints, paint-removers, or in water-proofing fabrics, printing, dry-cleaning, welding or gasoline blending is now covered by the Act.

Nova Scotia Minimum Wage for Women Act

Revisions of Orders 1 and 3 were gazetted August 4 and are to be effective from July 1, 1943. Both apply only to women workers in cities and incorporated towns in Nova Scotia.

Order 1 (LABOUR GAZETTE, 1941, page 1270) governs women employed in laundries, dry-cleaning establishments, pressing parlours and dye-works. In the revision, the learning period has been reduced from nine to six months but the rates and other provisions are unchanged. Experienced workers must be paid \$12 in cities and towns with a population over 17,000 and \$11 in towns under 17,000 in population. Inexperienced workers are to receive \$10 for the first three months and \$11 for the second three months in cities and towns over 17,000, and \$9 and \$10 for two similar periods in towns under 17,000.

Order 3 as amended by Order 10 (LABOUR GAZETTE, 1937, page 50; 1941, page 1110) has been revised. It applied to women working in hotels, restaurants, refreshment rooms, boarding or rooming-houses, tea-rooms, ice-cream parlours and light lunch stands and has now been extended to women workers in hospitals and other institutions with the exception of student and graduate nurses. Order 10 had raised by \$1 the rates fixed by all Orders in effect when it was passed, and in certain Orders, including Order 3, reduced from 50 to 48 the maximum hours for which the minimum weekly rates were to be paid, so that the weekly rates now apply to a work-week of between 44 and 48 hours. A clause has been added providing that the weekly minimum rates are to apply to a work-week of less than 44 hours if the normal working hours of the establishment are less than 44. In addition, the rates for inexperienced workers have been altered in revised Order 3 and a fixed minimum hourly rate set for part-time and overtime work. Previously, the overtime hourly rate was computed by dividing the regular rate by 48 and the part-time rate by taking the number of hours normally worked in the

establishment as the divisor. Another new provision declares that the authorized deductions for board and lodging may not be made unless the worker actually receives the meals and occupies the room provided, except that deductions are legal in the case of a worker who clearly understands, to the satisfaction of the Minimum Wage Board, that the provision of board or lodging is part of the conditions of employment, and who voluntarily chooses to eat and sleep elsewhere. Workers are not to be charged for more than one meal in each three hours worked. The rates fixed by revised Order 3 are as follows: experienced workers, \$12 a week in cities and towns over 17,000 in population, \$11 a week in towns under 17,000; part-time and overtime hourly rate, 25 cents in cities and towns over 17,000 and 23 cents in those under 17,000; inexperienced workers, three periods of one month each at \$9, \$10 and \$11 in cities and towns over 17,000 and three periods at \$8, \$9 and \$10 in towns under 17,000. Under the former Order as amended by Order 10 learners were paid \$10, \$10.50 and \$11 in cities and towns

over 17,000 and \$9, \$9.50 and \$10 in towns under 17,000.

Quebec Minimum Wage Act

Order 30 relating to the manufacture of wooden boxes and other wooden objects (LABOUR GAZETTE, 1939, page 1112; 1941, page 1383) was renewed to October 1, 1944 by a notice gazetted September 4.

Saskatchewan Steam Boilers Act

A new edition of the three sets of regulations passed under this Act was gazetted August 7, rescinding regulations issued in 1941 (LABOUR GAZETTE, 1941, page 436). Included are regulations concerning the construction and inspection of boilers and pressure vessels and a mechanical refrigeration code, both of which conform to the standards of the Canadian Engineering Standards Association, and regulations for the inspection of refrigerating systems and governing refrigerating engineers. The new regulations are identical with the ones they replace. A maximum penalty of \$50 is prescribed for breaches of the regulations.

Recent Legal Decisions Affecting Labour

Alberta Judgment in Dominion Government Employee's Case Reversed by Supreme Court of Canada

Reversing a judgment of the Appellate Division of the Alberta Supreme Court, the Supreme Court of Canada on June 29 held that a railway mail clerk employed by the Dominion Government who received compensation through the Alberta Workmen's Compensation Board did not thereby lose his right of action against the Canadian Pacific Railway Company whose employees were responsible for his injury. Sec. 24 of the Alberta Workmen's Compensation Act stipulates that where an accident occurs which would entitle the workman to an action against some person other than his employer he may either claim compensation or sue the employer responsible for the accident unless the latter is also covered by the Act. In that case there is no right of action but the Board may order that the compensation awarded be charged to the class to which the employer responsible for the accident belongs. The point at issue was whether the Dominion Government Employees Compensation Act had made sec. 24 of the provincial Act applicable to federal employees in Alberta. The Government Employees Compensation Act provides for the payment of compensation to Dominion employees according to the scale fixed by the Workmen's

Compensation Act of the province in which the accident occurs and permits the provincial Workmen's Compensation Board to determine the Government's liability for and the amount of such compensation.

The Alberta Supreme Court dismissed the worker's action on the ground that the Crown "in its capacity as master" had submitted itself to the provincial Act as completely as any other employer (L.G., 1942, p. 648). This decision was upheld by the appeal court which pointed out that the right to compensation had been substituted for the civil right of action by the provincial legislation which it considered applicable to the case (L.G., Feb., 1943, p. 268).

Mr. Justice Rand, in giving judgment for the Supreme Court of Canada, held that the Dominion Government was not bound by the provincial Act and that sec. 24 applies only to cases where both the workman and his employer are bound by the Act. He pointed out that although "Employment by Dominion Government" was listed in the schedule of employments to which the Act applied, sec. 2 (h) declared that the Act was applicable to the Crown in the right of the Dominion only "insofar as the latter, in its capacity as master, may submit to the operation of the Act." The Court did not consider that the terms of the Government Employees Compensation Act

amounted to a complete submission to the provincial law. The Dominion Act only gave the provincial workmen's compensation boards authority to determine the Crown's liability to pay compensation and to assess the amount of the compensation, but did not give them the right to determine "the resulting effects upon collateral rights against third parties".

In regard to the contention that the provincial Board had exclusive jurisdiction under sec. 10 of the Act to determine whether the appellant was a workman under the Act, the Court held that the provincial Board, in this case, was not acting under the provincial Act but as an administrator of the Dominion law. It also rejected the claim that the worker, by applying for and receiving compensation through the provincial board, had so brought himself within the provincial Act as to lose his right of action. In the Court's opinion, the procedure followed by the appellant was clearly in accordance with the Dominion Act, and the provincial Board was wrong in assuming that because the same procedure was followed as in cases under the provincial Act, all the provisions of the provincial Act applied. The Appeal was allowed with costs. *Ching v. Canadian Pacific Railway Company*, (1943) Canada Law Reports, Supreme Court, 451.

*Alberta Appeal Court Dissolves Injunction
Restraining Union from Enforcing Closed
Shop Agreement*

On June 10 the Appellate Division of the Alberta Supreme Court dissolved an injunction obtained against the Canadian National Printing Trades Union by a group of printers who had been expelled from the union. The injunction restrained the officers of the union from interfering with the contractual rights of the printers and causing their dismissal through the operation of a closed shop agreement (L.G., 1942, p. 1226).

The union, which consisted of employees of both the *Calgary Herald* and *Albertan*, had negotiated separate agreements with the two publishing companies. The employees of the *Albertan* were dissatisfied with the agreement applying to them but, being in a minority in the union, they were unable to defeat the motion endorsing the agreement. Shortly before the agreement was signed, a group of the dissatisfied printers joined the International Typographical Union and notified their employer that they would not recognize any agreement between the company and the Canadian National Printing Trades Union. The latter expelled this group of printers and two of its officers removed their names from the slip-board in the *Albertan* composing room on which was kept a list of all union members

in order of seniority who served as regular and substitute staff for the *Albertan*. The company was also notified that the expelled printers were no longer members of the union and would be replaced as soon as union members became available.

The lower court held that the purpose behind the union's actions was not to advance the interests of the trade but to injure the plaintiffs in their trade. Such an act was a wrongful violation of the plaintiffs' right to personal freedom of action. It referred to the judgment of the House of Lords in *Sorrel v. Smith* where it was stated that a combination of two or more persons for the purpose of injuring a man in his trade is unlawful, but when the real purpose of the combination is to forward the members' trade, no wrong is committed even if damage to another ensues.

The appeal court, dividing three to two allowed the appeal with costs holding that the predominant purpose behind the defendants' actions was to protect the rights of the union members and that they had used lawful means to pursue a lawful end. Moreover, it considered that there was no evidence that the defendants had intended to injure the plaintiffs or that the latter had suffered damage.

In giving judgment for the majority, Chief Justice Harvey rejected the lower court's view that a combination is legitimate only if its sole purpose is to protect the interests of its members. He cited the recent *Crofter Hand-Woven Harris Tweed Company v. Veitch* case (L.G., 1942, p. 499) in which the House of Lords held that a combination is legitimate if its *predominant* purpose is to promote the interests of the combiners even though it causes damage to another person. In the same case it was pointed out that to establish a tort the plaintiff must prove not only malevolence but actual damage. In seeking an injunction the printers were merely attempting to prevent anticipated damage and had not, in the opinion of the court, suffered actual damage. Nor did the court consider that their contractual rights had been interfered with since it could not be assumed that the *Albertan* had made contracts with the plaintiffs contrary to the terms of the collective agreement which provided for a closed shop.

The Chief Justice pointed out further that there was no evidence of intent to injure in the defendants' acts. That the minority was unable to protest at the union meeting which endorsed the agreement was not due to the unreasonableness of the officers but to the commotion resulting from the meeting breaking up immediately after the vote. Moreover, at the time of the meeting the plaintiffs were

already members of the International Typographical Union and had no right to vote or be present at the meeting. Further, the union officials were merely carrying out the rules of the union when they removed the plaintiffs' names from the slip-board.

The two dissenting judges contended that there was nothing in the agreement with the *Albertan* which authorized the officers of the trade union to remove the names of the plaintiffs from the slip-board and that the acts of the officers constituted a wrongful interference with the plaintiffs' rights and resulted in damage to them. In the words of Mr. Justice Ford:—

I doubt that the agreement is one which the courts can enforce by injunction or otherwise, or that "Trade Union Law" in Canada has developed so far as to give complete power to a trade union to induce or bring about the dismissal from their employment of workmen who at the time their employment commenced were members of the union, except within the limits of a constitution by which they have bound themselves.

He also challenged the validity of the agreement on two grounds: (1) the union had never been authorized to conduct the collective bargaining in accordance with the Alberta Industrial Conciliation and Arbitration Act which declares that bargaining shall be conducted "through a negotiating committee or a trade union duly appointed by a majority vote of the employees affected"; and (2) that the procedure required by the union's constitution for ratifying alterations in the Scale of Rates had not been complied with. The union president had ruled that this was unnecessary as no change was made in the Scale of Rates by the new agreement.

Mr. Justice Ford did not consider that the *Crofter* case was relevant as this was not a "trade war" but "a fight by a group of printers to maintain themselves in jobs which they have held for many years against unlawful and unjustifiable acts of the union". Even if it was regarded as a "trade war", he held that the unjustifiable violation of a legal right is a cause of action and if illegal means are used the question of justification need not be considered. He considered that it was an illegal act for the union officials to alter the plaintiffs' priorities by removing their names from the slip-board. *Corbett et al v. Canadian National Printing Trades Union et al* (1943) Western Weekly Reports, 401.

Conviction in Quebec for Inciting Workers to Continue Illegal Strike

Found guilty of inciting workers employed by Canadian Vickers Limited to continue in an illegal strike, David Côté, a union organizer,

was fined \$500 and costs by the Montreal Court of Sessions of the Peace on August 18. The charge was laid under sec. 61 of the Dominion Industrial Disputes Investigation Act which declares it an offence for anyone to incite or encourage workers to strike or employers to declare a lock-out before a board of conciliation and investigation has reported on the dispute. The application of the Act was extended to all war industries early in the war.

The offence occurred during a strike involving two rival unions and affecting about 4,000 men in shipyards in Montreal between July 14 and 23 (L.G., Aug., 1943, p. 1122, 1126). By July 21, the date of the offence, one union was in favour of going back to work but Côté's union had decided to establish a picket line to prevent a return to work. The evidence in regard to the words used by the defendant in addressing the workers was contradictory but the Court considered that, whatever the words, the result was incitement to remain on strike. The defence claimed that Côté had simply recalled to the workmen that they themselves had decided to stay on strike until the dispute was settled, but the Court was of the opinion that Côté had adopted this indirect method of speaking in an attempt to escape prosecution. The fact that Côté was well aware both that the strike was illegal and that an attempt was being made to end it when he spoke to the workers was considered of some importance by the Court.

Referring to the fact that the dispute arose chiefly from the rivalry between the unions, the judge remarked:—

These wars of prestige do not in any way follow from the right of association. They constitute means of exercising, or rather, of abusing this right, converging much more towards its annulment than towards its principle and towards the genuine interests of labour . . . this was far from the rational, sane and legal application of the right of association, a sacred right which has no other object than to assure employees obtaining from the employer just and equitable labour conditions and remuneration. . . . The abuse of a right is the greatest threat to the very existence of a right.

Mr. Justice Cloutier commented that this was the first case of its kind, and referred to the difficulty of proving a charge of incitement. There were, however, similar cases in Nova Scotia and Ontario some years ago. (*Rex v. Neilson*, Annual Report of the Department, 1912-13, p. 187, and *Rex v. McGuire* (L.G., 1907, p. 413; 1908, p. 1093). *Le Roi v. David Côté*, Montreal Court of Sessions of the Peace, August 18, 1943.

Quebec Court Rejects Wage Claims based on Decree under Collective Labour Agreements' Act after its Repeal

On May 29 the Quebec Court of King's Bench granted with costs the appeal of an employer against a judgment ordering her to pay \$231.75 in wages and damages to the Building Materials Joint Committee for Quebec. The Committee, which was established under the Collective Agreement Act to administer a decree regulating wages and hours in the industry, brought the action on behalf of a number of stonecutters employed by the appellant. It claimed that they were not paid the rates prescribed in the decree of June 25, 1940, which extended the provisions of a collective agreement to the industry and made them retroactive to April 1, 1940.

In her defence the appellant submitted that the statements made by the Committee in regard to the hours worked by the stonecutters were incorrect. She also contended that the decree did not apply to her because it was approved by an Order in Council passed under the Quebec Collective Labour Agreements Act, 1937, three days after the Act had been repealed by the Collective Agreement Act of 1940. The Committee claimed that the decree was passed under the authority of both the old and the new Acts. A section of the new Act declared that all decrees passed under the old Act were to remain in force as if passed under the new Act.

The Court pointed out, however, that the reference in the decree to the 1937 Act and the fact that it contained retroactive provisions which were permissible under the old Act but not under the new one, clearly indicated that the decree was promulgated under the 1937 Act. Since the Order in Council approving it was dated June 25 and the Act was repealed June 22, the decree was null. The Court held, then, that the decree was of no effect in relation to the appellant because the Lieutenant-Governor in Council had no power to approve a decree under the 1937 Act after its repeal.

Mr. Justice St. Jacques and Mr. Justice Bissonnette dissented on this point, holding that the decree was valid under the 1940 Act insofar as it conformed to that Act. However, they would allow the appeal on the grounds that the Committee had not proved its statement as to the hours worked and that the retroactive provisions on which part of the wages claim was based could have no effect under the new Act.

The Joint Committee also argued that the Attorney-General of the province should have been notified because the validity of an Order

in Council, was at issue. The Court held, however, that it had not been asked to determine if the decree was ultra vires but merely to interpret the statutes and decide what the law was at the time the decree was passed and whether it made the appellant subject to the decree. In the words of Mr. Justice Bissonnette:

there was no necessity to question the nullity of the Order in Council nor to plead its illegality for, in the actual case, the Order in Council is nothing but the legislative complement of the Collective Agreement Act and it is the sphere of this Court to interpret the Order in Council as if it were a legislative provision.

Saumare v. Building Materials Joint Committee (1943) Rapports Judiciaires de Québec, Cour du Banc du Roi, 426.

Quebec Court holds Employers Responsible for Accidents where they Failed to Warn Workers of Danger

Two actions for damages by workers who were injured through ignorance of the hazards in their machines were allowed by the Quebec Superior Court on July 11, 1940, and December 5, 1942. In neither case was the industry covered by the Workmen's Compensation Act since restaurants and wholesale establishments are exempt.

The first case involved a woman operating a new tea-bagging machine. She had been accustomed to remove blockages which occurred frequently in the waste pipe of her old machine by inserting her hand through a door in the pipe. The new machine had no such door so when the first blockage occurred after three months' operation she called the foreman to disconnect the pipe. After he had done so, he told her to stand clear but she put her hand into the pipe and her fingers were injured by an exhaust fan.

The Court did not consider that the defendant company had admitted liability when it paid the medical and hospital expenses of the worker and granted six weeks' wages in accordance with a long-established company practice. However, the Court held that the foreman should have anticipated the possibility of the worker attempting to remove the blockage in the same way as she had in the past and should have warned her against it and given her positive instructions not to put her hand near the fan. The worker, on her part, was aware that the fan was running and it should have been obvious to her that she could only insert her hand in the pipe safely for a very short distance. Consequently the Court held company and worker equally

guilty of negligence and awarded half the damages suffered.

The second case concerned a restaurant cook who was severely burned when a gas stove which she was attempting to light exploded. The Court held that the employer was responsible and awarded damages amounting to \$4,600. It considered that the stove was defective and that the worker had not been sufficiently warned of the dangers inherent in its operation. In the words of the Court:

An employer owes to his employees maximum protection; it is his duty to eliminate from their work-places all element of danger and to give them all the information and instructions necessary to their maximum security, and all negligence on his part in this respect, renders him responsible for injuries sustained by his employees.

In this case the Court held that the employer had implicitly recognized his responsibility for the accident by paying the worker's hospital expenses and promising monthly payments.

Boutin v. Salada Tea Co. of Canada, Ltd., and Mlle. Lachappelle v. Poitras, (1943) *Rapports Judiciaires de Québec*, Cour Supérieure, 219, 287.

Montreal Court Dismisses Action of Company for Damages Allegedly Suffered during Strike

A further aspect of the case between the Ideal Dress Company, Montreal, and the International Ladies' Garment Workers' Union was decided by Mr. Justice O. S. Tyndale in Montreal Superior Court on September 10. The proprietors of the company failed in an action for recovery from ten officers and members of the union of \$10,000 damages allegedly resulting from a strike in 1937-38 and for revival of an injunction which had been suspended.

The dispute between the two parties first reached the courts in 1938 when the company was granted an interlocutory injunction restraining officers and members of the union from interfering with its business (L.G., 1939, p. 236). In June, 1942, the injunction was modified by the Court of King's Bench to uphold the right of the union members to attend at the company premises in reasonable

numbers to give or secure information (L.G., 1942, p. 873). The injunction was suspended in March, 1943, since the company then no longer needed protection and the present action was pending. (L.G., April, 1943, p. 529).

In dismissing the claim for damages, Mr. Justice Tyndale set forth certain general principles which, he said, "may now, apparently, be accepted as part of the law applicable in this province (all special wartime regulations being, of course, disregarded)". First, individual workers and unions are entitled to bring about a strike by peaceful persuasion in order to induce the operators of establishments to raise wages or otherwise improve conditions. Second, it is not in itself illegal for a union to declare a strike for the purpose of inducing an employer or a group of employers to enter into an agreement. Third, individual workers and representatives of unions are entitled, for the purposes of obtaining and communicating information, to picket in reasonable numbers a plant where there is an industrial dispute. Fourth, neither individuals nor unions are entitled to use threats, intimidation or violence. Fifth, employers engaged in the same trade are entitled to form associations for the protection of their interests.

In summing up the evidence, the Court noted that during the period of the strike more illegal acts had been committed by the strikers than by the plaintiffs and their agents, although the latter had acted with excessive zeal, and that the union officials had failed to exercise sufficient control over the pickets and strikers. It was added, however, that in industrial disputes some disorder is almost inevitable and should be regarded somewhat leniently. In any case, it was held that under Quebec law—at least as it was in 1937—officials of a union are not responsible for the illegal acts committed by their members during a strike, even if the strike was admittedly the outcome of their efforts. None of the illegal acts which had been proved, therefore, could be attributed to the six defendants who were union officials. The other four defendants were found guilty of threats and intimidation in one incident, but that by itself was not sufficient to establish the plaintiffs' claim. *Lupovitch et al. v. Shane et al.*, Montreal Superior Court, September 10, 1943.

Decisions of the Labour Court of Ontario

THE Labour Court of Ontario was set up under an amendment of 1943 in the Judicature Act as a branch of the High Court of Justice of Ontario. It has been given the duty of administering the Collective Bargaining Act 1943 (LABOUR GAZETTE June 1943, page 701).

Under this Act an employer is required to enter into negotiations with representatives of any association of workers which is certified by the Court as a "collective bargaining agency." In considering an application for certification, the Court is empowered to determine the unit—whether a firm, plant, craft or

part of a plant—which is appropriate for collective bargaining and to determine the will of the employees by means of a vote or in any other way it sees fit. An association which is dominated or improperly influenced by an employer may not be certified.

The Act also makes it unlawful for employers to discharge or otherwise discriminate against workers because of trade union activity or to make it a condition of employment that workers must belong or refrain from belonging to any particular association. Any worker who is discharged for union activity may be ordered reinstated by the Court. The Court may also restrain any person from violating the Act or may issue any other order which it considers necessary.

Under a procedure which was decided upon when the Court was set up, the Judges of the High Court sit in rotation in the Labour Court, each occupying the bench for a period of two weeks. The Court commenced hearings in July with Mr. Justice Gillanders presiding.

Members of Grievance Committee Established Under Collective Agreement must be Union Representatives

During the negotiation of an agreement a dispute had arisen between the company and union concerned as to whether the members of the committee which it was proposed to establish to deal with grievances should be elected by all the employees in the company or should be representatives of the union. The dispute was referred to the Labour Court and was settled by Mr. Justice Gillanders in favour of the union on July 7.

The respondent company admitted that the applicant union represented a substantial majority of the employees in the unit. The union had not yet been certified as the proper collective bargaining agency and it was now applying both for certification and for an order directing the respondent to bargain with its representatives. The Court considered that the second application should normally wait until a reasonable time had elapsed after the granting of the first. In the present case, however, both parties requested the Court to treat the applicant as if a reasonable time had already elapsed after certification. They stated that attempts had been made without success to reach an agreement on the matter in dispute.

In April, 1943, the respondent company had entered into negotiations with the union and substantial agreement had been reached on all points except the one before the Court. The union argued that the functions of the

grievance committee for which the draft agreement provided were to attempt to settle any differences over the application or interpretation of the agreement or any other difficulties arising during its currency. It was, therefore, an integral part of the machinery of collective bargaining and for that reason its members should be representatives of the union.

The Court pointed out that the case was within its jurisdiction only if the union's contention was valid. If the function of the Committee was, in fact, to bargain collectively then the choice of representatives was determined by the Act and thus was a matter on which the Court could issue an order. If, on the other hand, the committee was not part of the collective bargaining machinery, the selection of representatives was a matter which had to be settled purely by negotiation between the parties.

In the judgment the union's argument was accepted. The Court noted that "bargain collectively" is defined in the Act to include not only negotiating with a view to the conclusion of an agreement but also "to so negotiate from time to time during the term and in accordance with the provisions of a collective bargaining agreement." The company urged that this clause referred only to matters which by the terms of the agreement arose for revision during its currency. Such matters affected all the employees and disputes or grievances affecting individuals or only a limited number of employees were not in the same category. The Court held that

Such a construction would be too restricted to give proper effect to the plain wording of the Act. The negotiations leading to a written agreement with the employer and the negotiation of the settlement of disputes and grievances of employees arising from day to day would seem to be all part of the general process of collective bargaining.

One other point was dealt with by the Court. The union was alleged to have stated that its grievance committee would not be prepared to deal with the grievances of employees who were not union members. The union denied this allegation but the Court in any case stated that if certified it should act on behalf of all employees. *Local 2853, United Steelworkers of America v. Welland-Vale Manufacturing Corp., Ltd.*, (1943) Ontario Weekly Notes 490.

Workers Engaged in Union Activity Who Violate Terms of Employment not Eligible for Re-instatement

On July 14, Mr. Justice Gillanders decided a case involving secs. 7 and 19 of the Act which provide respectively that an employer

may not dismiss a worker for union activity and that the Court may order the reinstatement, with compensation for wages lost, of any worker so dismissed. The case arose in connection with a dispute between a local of the United Steelworkers of America and the Toronto Shipbuilding Company. The applicant union had reached the point where it wished to press its claim for recognition and it asked the federal Department of Labour to take a vote. That Department, however, had no authority to conduct a vote without the consent of all the parties, and the company refused its consent.

By an arrangement decided upon at a meeting of the local, some of the employees began to gather in front of the superintendent's office about twenty minutes before the day shift went off. By the time the shift went off or shortly after, there were about 250 men assembled. On informing the superintendent that they wanted a ballot taken to determine if they had a majority, they were told that he had no authority in the matter. Subsequently, the men concerned were discharged.

The union then applied to the Court for the reinstatement of the men but its application was dismissed. The Court pointed out that the very statute under which the application was made provided a proper method for obtaining union recognition. The employees, by assembling on the premises in working hours, had with full knowledge broken the terms of employment. It would be an improper construction to hold that the statute permitted employees to commit such a breach in the terms of their employment merely because they were at the time engaged in union activity. Moreover, another section of the Act applied, i.e., sec. 4 which provides that nothing in the Act may be construed as permitting employees to carry on union activity during their working hours. The application of the union for the reinstatement of the employees was, therefore, dismissed. *Local 2999, United Steelworkers of America v. Toronto Shipbuilding Coy., Limited*, July 14, 1943.

Workers Illegally on Strike Disqualified from Voting for Bargaining Agency

In a case involving Babcock-Wilcox and Goldie-McCulloch, Limited, Galt, two rival associations, a local of the United Steelworkers of America (applicant) and the Babcock-Wilcox and Goldie-McCulloch, Limited, Employees' Association (intervener), both applied for certification as the collective bargaining agency for the plant. Mr. Justice Gillanders ordered a vote to be held and directed that certain employees who previously struck in

violation of the Industrial Disputes Investigation Act should not be allowed to vote. The case was also interesting in that each of the rival associations claimed that the other could not qualify as a collective bargaining agency under the Act.

The dispute dated back to November, 1942, when the applicant union began organizing the plant. On February 16, 1943, it applied for a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act, and a Board was constituted. Before the Board made its report a considerable body of the workers went out on strike, allegedly in protest at the delay in the proceedings of the Board. Subsequently at least 60 of the workers returned but 204 did not do so. The latter were given notices of separation in accordance with the Selective Service Regulations. The Industrial Disputes Investigation Act provides that it is illegal to go on strike during the reference of a dispute to a Board.

In the argument before the Court, counsel for the intervener argued that the applicant union was not a collective bargaining agency within the Act because it was merely a branch of the union and was not allowed by its constitution to sign an agreement without the approval of the union. On the other hand, the union's counsel submitted that the intervener itself had no status because it was company-dominated and was thus excluded by the Act from the definition of the term "collective bargaining agency." On the first point, the Court stated:

The applicant is a trade union, having collective bargaining within its objects. I refer, of course, to the local union which is the applicant; and whatever might be said at some other stage of the proceedings, for other purposes, I think it should be viewed as a proper applicant at this stage.

With regard to the status of the intervener, the Court held that no evidence had been brought forth to disqualify it.

Since both associations, therefore, could qualify as collective bargaining agencies, the question was to determine which should be certified. The Court granted a point made by the company's counsel that if the evidence is sufficient to lead to a clear conclusion the Court should determine the matter without recourse to a ballot. In the present case, however, it was held that the facts were so confused that a vote was necessary.

On the question of who should be allowed to vote, the applicant union argued that the proper time to test the rights of the parties was as of the date of the strike, since after that the employment list was, so to speak,

purged. The Employees' Association argued in rebuttal that those who had gone on strike and had not returned had ceased to be employees. The Court accepted the latter argument because of the clear statutory prohibition of the strike. It pointed out, however, that the circumstances were "rather special" and that

It may well be that under proper circumstances the fact that a man has gone on strike does not disqualify him from expressing his opinion in a matter of this kind, in selecting a bargaining agent.

Two other points regarding the conduct of the vote were dealt with. After canvassing the opinion of counsel the Court directed that in the vote the workers should be given three rather than two choices, i.e., they should be allowed to signify that they did not want to be represented by either association. It was also directed that there should be no electioneering or organizing activity pending the taking of the vote, since all employees were now familiar with the issues and electioneering would have a disturbing influence on production. This second decision has been made in all cases heard so far in which a vote has been ordered, and the first has been given in most of them. *Local 2859, United Steelworkers of America v. Babcock-Wilcox and Goldie-McCulloch, Ltd.*, July 16, 1943.

Existence of Agreement Concluded by Association Not Clearly Acting for Employees Held not to Preclude Certification of Another Union

In a case in which a local of the International Union of Mine, Mill and Smelter Workers applied for certification as the collective bargaining agency in the Port Colborne plant of the International Nickel Company, the question arose as to whether an agreement which had been entered into with the company by the Port Colborne "Inco" Employees' Welfare Association prevented the company's employees from entering into a new agreement and thus stood in the way of the application.

The Welfare Association had been organized in 1937 and its grievance and safety committees had been active since then. In addition, Mr. Justice Gillanders stated that in the minds of its directors at least, matters which are normally within the scope of collective bargaining were also among the Association's objects. Its constitution provided that it would "advocate the maintenance of adequate remuneration of the employee" and that it would "maintain and advance the social and economic welfare of the membership." During its first year of activity it had submitted a brief to the management regarding holidays

with pay, overtime pay and other matters and in 1941-2 there was some discussion among the members of the Board of the desirability of negotiating an agreement with the company. No serious efforts were made, however, by either the Association or the company to conclude an agreement until the latter part of 1942. On November 10 of that year, after the applicant union had started to organize the plant, the company recognized the Welfare Association as the bargaining agency for the plant and entered into an agreement with it. The agreement was not submitted to the employees as a whole before it was signed, but it was claimed that the officers of the association had power to enter into it without submitting it to the membership.

The Court expressed the opinion that

if employees in an appropriate unit properly appoint and authorize representatives to negotiate an agreement on their behalf with employers, or if they, by proper means, approve of a draft agreement before execution, or ratify it after execution, they should be stopped, for a reasonable time, from seeking through some other agency to negotiate another agreement.

In the present case, however, it was held that

keeping in mind the history of the Association's activities, and particularly the fact that there is no specific provision in the constitution for entering into a written agreement which would affect the rights of the parties in the future, and that this was the first occasion on which the Association had ventured into this field, I must conclude that the directors of the Association did not possess authority themselves to bind all their members, and certainly not employees who were not members of the Association, in the future, by the execution of the agreement in the circumstances in this case.

The Court rejected, however, the union's claim that the Welfare Association had no status as a collective bargaining agency, holding that there was no evidence to show that it was dominated by the Company.

The Court decided that a vote should be held to obtain further evidence regarding the validity of the union's claim for certification. The usual direction prohibiting electioneering and organizing activities was made. In addition, it was ordered that one of the supporters of the applicant Union, who had previously been a director of the Welfare Association and had assisted in negotiating the agreement of November 10, should be personally stopped from recording his vote in favour of the applicant. It was held that all those who had executed the agreement and were still employees of the company should be regarded as supporting the agreement they had signed and that therefore their votes should be counted against the applicant Union at the present

time. *Local 637, International Union of Mine, Mill and Smelter Workers v. International Nickel Coy. of Canada, Ltd.*, (1943) Ontario Weekly Notes 528.

Where Agreement Made with One of Two Rival Agencies, Will of Workers Must be Determined

A point similar to that in the *International Nickel* case arose in connection with an application by a local of the United Steelworkers of America for certification as the collective bargaining agency in the plant of the Canada Machinery Corporation Ltd., in Galt. The Company had on February 25 entered into an agreement with the Canada Machinery Corporation Limited Employees' Association (the intervener) and argued that this precluded for the time being the recognition of any other organization.

As on previous occasions, Mr. Justice Gillanders rejected, on the ground of insufficient evidence, an argument of the union that the Employees' Association was dominated by the company. He also refused, however, to accept the company's contention that the agreement of February 25 stood in the way of recognition of the Union. The evidence showed that at the time the agreement was concluded, it was known that both the union and the association were organizing in the plant. Nevertheless, no effort was made to determine which of the two organizations the employees preferred, and no effort was made to secure their approval of the agreement before or after its execution. The Court, therefore, decided that a vote was necessary.

In the directions regarding the vote, the ruling in the *Babcock-Wilcox* case regarding employees illegally on strike was followed. The applicant union in the present case had

applied for a Board of Conciliation and Investigation and one had been constituted. Before it brought down its report, however, 102 employees of the company struck in protest at the delays which had been encountered. Of these, 51 had been discharged and 11 others had not been formally discharged only because their whereabouts were unknown. The Court decided that none of these workers was entitled to vote. *Local 2905, United Steelworkers of America v. Canada Machinery Corp., Ltd.*, July 22, 1943.

Workers Striking while I.D.I. Board Still Sitting Denied Vote even though I.D.I. Act Later Found not to Apply

In directing a vote in the Galt Brass Company, Ltd., the Court had to decide a point connected with workers on strike which differed somewhat from that in the *Babcock-Wilcox* and *Canadian Machinery Corporation* cases. A Board of Conciliation and Investigation had been established to deal with the dispute, and before it had arrived at any decision, a number of employees had gone on strike. Some of them had not been re-employed. There was some doubt, however, whether the plant came within the scope of the Industrial Disputes Investigation Act as extended, and the Board eventually reported that it had no jurisdiction in the matter. Counsel for the applicant union therefore argued that under the circumstances the workers had not participated in an illegal strike. The Court held, however, that at the time the strike occurred, nothing had been done to set the Board aside or question its jurisdiction, and that for that reason the strikers who had not been re-employed had no right to vote. *Local 2903, United Steelworkers of America v. Galt Brass Coy., Ltd.* (1943) Ontario Weekly Notes 526.

Prices and Price Control

Price Control in Canada During August, 1943

Rationing of Preserves—Control of Food Prices Extended to Certain Fresh Fruits—New Rental Regulations

IN accordance with the Wartime Prices and Trade Board's policy of securing an equitable distribution of goods in short supply, rationing of preserves was introduced in August. At the same time, however, the tea and coffee ration was increased, reflecting improved shipping conditions. Another measure designed to promote equitable distribution was the prohibition of the practice of requiring customers to make additional purchases when buying goods or services in short supply. This prohibition does not apply where such a condition of sale is an established trade practice or is required by law.

Extending its control of food prices the Board set ceiling prices on fresh peaches, pears, plums and grapes. Ceiling prices will be maintained on the 1943 pack of canned peaches, pears and plums, as well as tomatoes, peas, corn and beans, as a result of subsidy arrangements announced in August. Maximum wholesale prices were fixed for lamb cuts, and a flexible ceiling devised for retail beef prices, which will ensure that consumers benefit from any seasonal decline in cattle prices. As a result of meat rationing, standard prices had to be set for unrationed fancy meats, and standard prices were also established for sausages. Various varieties of canned Atlantic Coast fish were brought under the price ceiling.

Lumber subsidies paid to producers and retailers were replaced by consumer subsidies. Other pricing orders set maximum prices for used electric motors and equipment and regulated the pricing of women's and misses' suits and coats. Restrictions were introduced in the manufacture of construction equipment, stove and furnace pipe, and shipping cartons. A new order governing the termination of leases and maximum rentals for housing and rooming accommodation was designed to simplify and clarify regulations and to remedy grievances of both landlords and tenants.

Food Rationing

Preserves.—Rationing of preserves was introduced, starting September 2, owing to the

restricted supply of jams, jellies and canned fruits. The supply of these goods has been greatly reduced owing to the small fruit crop.

The ration for each two weeks' period consists of one half pound of jam, jelly, marmalade, apple butter, maple butter, honey butter, honey or sugar, or ten fluid ounces of canned fruit, molasses or maple syrup, or twelve fluid ounces of cane syrup or corn syrup. An alternative ration of sugar is provided, since there may still be occasional shortages of jams and preserves and since some housewives prefer additional canning sugar to a ration of preserves. When preserves are sold in standard containers, the nearest available size, *not exceeding* the value of the coupons presented, may be bought. Where more than one container is bought the total quantity of the contents must not exceed the value of the coupons used. Sugar may not be used as a make-weight.

Rationing regulations are similar to those for other rationed commodities. Hotels, restaurants, etc., will receive quotas from the Ration Administration, and industrial users will receive permits. In general, honey, maple sugar and syrups will not be available to industrial users.

In order to prevent excessive buying of preserves by consumers before the beginning of rationing and to enable retailers to stock up, sales of honey, jams, jellies and marmalades to consumers were suspended between August 22 and September 2. Sales of other preserves were suspended from August 29 to September 2. In order to provide for replenishment of their inventories, retailers and wholesalers are permitted to buy preserves without surrendering ration documents for a period of one month and two months, respectively, from the beginning of rationing (B-309, Aug. 20 and B-311, Aug. 28).

Tea and Coffee.—The tea and coffee ration was increased, starting September 2, as a consequence of improved shipping conditions. There is no change in the coupon value, but two coupons will become valid every three weeks, instead of every four weeks as formerly.

General.—Both the rationing of preserves and the increases in the tea and coffee ration were introduced in a new general rationing order, replacing the previous orders dealing with the rationing of sugar, tea and coffee, butter and meat. The new order established general rationing regulations governing present and future rationed foods, and specified the dates on which coupons in Ration Book No. 3 become valid (B-308, Aug. 17, effective Sept. 2).

Food Prices

Fresh Fruits.—The ceiling on the prices of fresh peaches, pears and plums, plans for which were announced in July, was implemented by an order fixing maximum prices on sales by country shippers, including growers, and setting wholesale and retail markups, to be added to the cost of fruit and transportation charges, for domestic and for imported fruits.

Maximum prices to country shippers were fixed for sales in three different zones, consisting of (1) the chief fruit-growing districts of Ontario, (2) the island of Montreal, (3) the rest of Canada.* The maximum prices set were considerably above last year's level, since owing to the severe winter this year's crop is much reduced (A-850, Aug. 12).

Maximum prices were also fixed for domestic and imported grapes, prices of British Columbia grapes being set three and four cents per basket higher than those established for Ontario grapes. The ceiling on imported grapes is based on the importer's cost in the United States, which is under O.P.A. ceiling (A-873, Aug. 31).

In spite of the administrative difficulties involved in setting maximum prices for fresh fruits, these steps were taken to protect consumers, in view of the limited supply of fresh fruit this year.

Canned Fruits and Vegetables.—A subsidy to canners on the 1943 pack of certain fruits and vegetables was arranged in order to enable them to pay the higher prices to growers and to meet other increases in their costs, without raising their selling prices above last year's level. The subsidy is paid by Commodity Prices Stabilization Corporation, on canners' sales of the 1943 pack of peaches, pears and plums, as well as tomatoes, peas, corn and beans. Canners' maximum prices for these products are fixed at the same level as last year, except in the case of peas, where prices are set slightly higher. Canners whose basic period prices were above the standard prices

set, are no longer permitted to sell at their basic period prices, since this provision gave such canners an advantage over the others in bidding for the scarce supplies of fruits and vegetables, and thus led to an inequitable distribution of these supplies and tended to raise the cost of living by increasing the proportion of high priced products.

The order includes a provision that after December 1, 1943, canners may sell portions of their pack of approved quality to C.P.S.C. In the case of canned vegetables and tomato juice, prices paid by canners in 1943 for the raw vegetables used, have to equal or exceed the prices paid in 1941. The price at which any product may be sold to the Corporation will equal the maximum price fixed on sales to other buyers, plus the subsidy, minus certain discounts (A-851, Aug. 12).

Meat.—During the month a flexible ceiling for retail beef prices was introduced, and maximum prices were set for wholesale lamb cuts, fancy meats, and sausages.

Beef.—A new order replaces all previous orders dealing with the wholesale and retail prices of beef. The system of standardized retail cuts that had been in operation in a number of Canadian cities was extended to all areas, and the order established a flexible ceiling for retail prices; prices of retail cuts are adjusted weekly on the basis of the weighted average carcass cost of beef of the same quality bought by the retailer in the previous week. Maximum wholesale prices for the different zones remained at the level that has been in force since last May. The new system of retail prices involves a reduction in retail markups, and compels retailers to lower prices when wholesale prices are below the ceiling. In this way consumers will benefit from any decline that may occur in cattle prices or wholesale beef prices (B-307, Aug. 23).

Lamb.—The Board has established maximum wholesale prices for lamb cuts. Previously the prices of lamb cuts were governed by the provision that they should bear a "proper and normal relationship" to the maximum prices established for carcasses and sides, but this provision has been open to too much variation in interpretation (B-304, Aug. 5).

Fancy Meats, etc.—The Board set standard wholesale prices and retail markups for a variety of fancy meats and meat by-products, such as liver, heart, tongue and sweetbreads. As these products are not rationed, the demand for them has increased greatly since the introduction of meat rationing, and this has in many instances resulted in price increases. Price control by reference to the basic period was in many cases ineffective, owing to the

*Zones eliminated by A-874, September 6, except for the purpose of allowing shrinkage of not more than 2 per cent in Zone 3 (except B.C.).

great variety and uncertainty of maximum basic period prices (A-849, Aug. 10). Similar difficulties in enforcing the basic period price ceiling led the Board to fix maximum prices for fresh sausages, bologna style sausages and wieners (B-305, Aug. 12).

Fish.—In order to keep prices of Atlantic Coast canned salmon in line with those established for the Pacific Coast product (by A-723, May 12, and A-807, July 12), the Board fixed canners' prices, and wholesale and retail mark-ups. Canning of Atlantic Coast salmon has been stimulated by the virtual disappearance of Pacific Coast canned salmon from the domestic market. There had been practically no canning of Atlantic Coast salmon in the basic period, so that prices were uncontrolled and had risen considerably (A-839, Aug. 6).

Standard canners' prices were fixed for Atlantic Coast canned chicken haddies, finnan haddies and mackerel. These products had also been exempt from the price ceiling, and their prices had increased in line with U.S.A. prices. The ceiling was imposed at approximately the current level of prices in line with O.P.A. ceilings (A-867, Aug. 28).

Prices of Other Goods

Lumber.—Subsidies paid to producers and retailers of certain types of softwood lumber were cancelled and replaced by consumer subsidies. Effective August 16, producers and retailers were authorized to increase their maximum prices by the amount of the subsidy previously paid. Retailers were also authorized to increase their prices to offset various other increases in manufacturers' and wholesalers' prices that had been allowed since January 1, 1942, and had been absorbed at the retail level.

Individual consumers of softwood lumber are to be compensated for these price increases by a subsidy temporarily set at 10 per cent of the invoice price, which came into effect on September 1. The subsidy is payable on retail sales to farmers, fishermen, growers of fruits and vegetables, trappers and other individual civilian users who purchase lumber for use in their personal occupation or for maintenance and repair purposes. Subsidized sales do not include lumber for the building or improvement of any dwellings, nor those to contractors or industrial users. Essentiality certificates must be filled out and signed by the purchaser before a subsidy will be paid.

Women's, Misses' and Juniors' Coats and Suits.—Under the Consumers' Goods Order, No. 214, manufacturers can sell products for which no maximum price has been fixed at the

same price as similar products for which maximum prices have been established, conditional on the administrator's subsequent approval. This provision was found to be unsuitable for the industry producing women's, misses' and juniors' coats and suits, owing to the great variety of styles and materials used.

These goods were therefore exempted from the provisions of B-214 and new regulations were passed requiring that manufacturers obtain the administrator's approval as to style and prices of their products before selling them. The new regulations also require the labelling of all garments by the manufacturer (A-859, Aug. 13).

Used Electric Motors and Equipment.—Maximum prices for "rebuilt" electric equipment and motors were set at 70 per cent of the basic period prices of similar new equipment and regulations were passed governing the sale and pricing of all used electric equipment. The price of used equipment that is not rebuilt must be fair and reasonable and must not exceed the maximum price of rebuilt equipment, less the cost of rebuilding. These regulations were passed in view of the increasing shortage of essential materials used in electric equipment (A-838, Aug. 5).

Simplification and Conservation

In order to conserve labour and materials restrictions were introduced during the month, covering the manufacture and use of construction equipment, the manufacture of stove and furnace pipe, inventories of book and writing paper and shipping cartons.

Construction Equipment.—Regulations were passed covering new and used construction machinery and equipment. They parallel limitations in force in the U.S.A., which is the principal source of the materials used in the manufacture of such equipment.

While production is not specifically curtailed by the order, the manufacturer must submit his proposed manufacturing program for new equipment which the Administrator may change. The manufacture of certain articles is prohibited and sales are placed under permit.

Control of used equipment established by A-246, June 29, 1942, was extended considerably. Such equipment is to be registered with the Administrator and he is to be informed of any changes in its location, use or ownership. Permission is required before certain critical articles may be sold, leased or rented. The order also fixed prices and rentals for used equipment. It was expected that these regulations, designed to secure more effective use of existing equipment,

would somewhat reduce the need for new equipment (A-843 and A-845, Aug. 7).

Heating Equipment.—Restrictions were placed on the manufacture of stove pipe, furnace smoke pipe, warm air pipe and furnace ducts with a view to saving both steel and manpower. The order prohibits the use of galvanized metal in the manufacture of various types of pipe. "Canada plate", used in the manufacture of stove pipe, may be employed in "B" weight only. It was found that both "A" weight and "C" weight were wasteful, the first because it is unnecessarily heavy, and the second because it wears out too quickly (A-844, Aug. 7).

Book and Writing Papers.—Prospects of a further reduction in the supply of paper made it necessary to reduce inventories of book, writing and specialty papers, and to enforce stricter control. By an order of the Administrator of Book and Writing Papers, covering all papers under his jurisdiction, inventories of processors and others who buy from manufacturers and wholesalers were limited to one fifth of the total amount of such papers used by each purchaser in 1942. Under the order previously in force inventories of each type of paper had been limited to 90 days' normal supply of the same type of paper. Owing to the great variety of types and grades of paper this method of inventory control was found to be less effective than control of total inventories (A-835, Aug. 14).

Shipping Cartons.—In the manufacture of solid fibreboard and corrugated paper cartons the Board prohibited printing or stamping on both sides of the sheet, and the cutting of holes where this requires an extra operation. These restrictions will go some way to offset the critical labour shortage in the industry, which has accumulated a backlog of highly essential orders. It is expected that by eliminating the time wasted in adjusting the machines for different types of slitting and scoring a manpower saving of 20 to 35 per cent can be obtained. The minimum number of cartons that may be produced in one lot was specified, in order to eliminate frequent stoppages. This provision was also expected to encourage those who require small lots to re-use old cartons (A-846, Aug. 7).

Rents

New regulations were issued governing housing of a county court or district court judge, order goes into effect on October 1, and is designed to clarify and simplify regulations and to remedy grievances. The main changes made by the order are the following:—

Administrative

1. The Rentals Committees, each consisting of a county court or district court judge, are replaced by qualified Rentals Appraisers, appointed by the Board, who fix rents and consider applications for changes in rent. This provision relieves judges of a considerable burden of work which does not require a great deal of legal knowledge.

2. The machinery for appeals is improved by substituting several local Courts of Rental Appeals for the single Administrator of Rental Appeals appointed under the previous system. These courts each consist of one judge, judicial officer or barrister, and in small communities, where no Rentals Appraiser is appointed, they directly replace the Rentals Committee. Their decisions are not subject to appeal.

Housing Accommodation

1. A landlord may not reduce heating, lighting or hot or cold water services supplied to his tenant, without a permit from the Rentals Appraiser. Where services are reduced, application for a reduction in the maximum rental is to be made.

2. An increase in the maximum rental may be applied for, among other cases, where the tenant is sub-letting more than two rooms and was not doing so at the time the maximum rental was last fixed. In this case the maximum rental is increased by ten per cent.

3. New regulations were made governing the termination of leases. In the case of a landlord who requires the accommodation for the use of his family, six months' notice to vacate is now necessary instead of twelve months in some cases and three months in others as provided in previous regulations. The requirement of one year's notice had caused considerable protests, and was said to deter potential purchasers of housing accommodation. Landlords planning to sub-divide accommodation so as to house more persons may give three months' notice to vacate. In the case of monthly and weekly leases tenants are protected by the provision that a notice to vacate must not terminate a lease in the winter i.e., between September 30 and the following April 30. Landlords are relieved of much legal procedure by the elimination of the tenant's right to challenge the landlord's notice to vacate in court. Once a landlord has given the notice, provincial law governs the rights of the parties.

4. Where tenants are ill-behaved, or fifteen days in default of rent, or in a number of other special cases mentioned in the order, they are disqualified from the protection

against eviction provided by the order, and their leases are governed by provincial law.

Rooming Accommodation

The order included regulations for rooming accommodation but only for the areas not covered by previous orders (A-421, Oct. 5, 1942 and A-488, Nov. 22, 1942).

1. Rooming accommodation ("shared accommodation") is clearly defined so as to distinguish it from self-contained accommodation.

2. Rooms may only be let on a "per person" basis if bedding, linen, and the laundering thereof is provided by the landlord for each occupant. Per person rates are frozen at the level charged on July 1, 1943.

3. Where rents are not charged on a "per person" basis but for the accommodation, irrespective of the number of tenants, they are governed by the regulations for housing accommodation.

4. The regulations protecting tenants of self-contained housing accommodation from eviction are not applicable to tenants of rooming accommodation, so that their leases are governed by provincial law (B-294, July 16, effective Oct. 1).

Other Price Orders

Maximum Prices of Eastern White Beans (Pea Beans). Sets maximum processors' prices of eastern white beans, and wholesale and retail markups (A-865, Aug. 27). *Maximum Price of Canned Pineapple Pulp.* Sets maximum prices for canned pineapple pulp sold by importers and wholesalers, at a level that facilitates imports from Mexico and Cuba (A-848, Aug. 10). *Cane Molasses.* Amplifies A-55 which set maximum prices for imported cane molasses. Also fixes ceiling prices for blackstrap, produced in Canadian refineries from raw cane sugar. Restricts canning of molasses to two grades for each packer and restricts wholesale sales of canned molasses (A-869, Aug. 30). *Soft Drinks.* Replaces A-531 and revises price structure of soft drinks so that most prices cover basic period

price plus any excise taxes not included in this price. Reduces minimum deposit charges and prohibits deterioration of quality (B-303, Aug. 4). *Maximum Prices for Ice in the Montreal District.* Replaces A-400 and sets higher maximum prices for ice for the period Aug. 8, 1943-Oct. 16, 1943, in order to permit customary seasonal price increase (A-847, Aug. 9). *Maximum Prices for Fuelwood.* Adjusts maximum prices of fuelwood in a number of areas in Northern Ontario in order to increase supplies and to regulate movements of fuelwood between the different areas (F-72, F-73, F-74, F-75, Aug. 3). *Prices of Fertilizers.* Amends A-601 as amended by A-684, setting maximum prices for fertilizers in the Central Provinces and the Maritimes. Reduces price of ammonium nitrate and sets prices for new grades of mixed fertilizers with reduced potash content (A-868, Aug. 30). *Fruit and Vegetable Packages.* Amplifies A-29, as amended by A-95 and A-354, setting prices and trade discounts for fruit and vegetable packages, and prohibiting certain types (A-836, Aug. 3).

Other Simplification and Conservation Orders

Incandescent Lighting Fixtures. Replaces A-401 and A-423 with respect to industrial and residential incandescent lighting fixtures. Removes restrictions on sale and installation and on the number of finishes. Modifies other restrictions and provides for further standardization (A-840, Aug. 5). *Fluorescent Lighting Fixtures.* Replaces A-401 with respect to fluorescent fixtures. Extends restrictions on sales, removes restrictions on finish, modifies other restrictions and provides for further simplification and standardization (A-841, Aug. 5). *New electric Stoves and Ranges.* Amends A-701 by permitting in the Province of Manitoba, the installation of a new electric range even though a gas, coal or wood range can be installed, in view of the fuel situation in the province (A-842, Aug. 6). *Used Steel Drums.* Exempts farmers from the provisions of section 13 of A-604 which requires the return of used steel drums within 30 days to the persons from whom they were acquired (A-858, Aug. 16). *Metal Containers and Closures.* Amplifies and modifies A-425 as amended by A-473, which restricted manufacture and use of metal containers. Permits additional metal containers for evaporated milk and whole milk, and provides containers for honey, jams, and baby foods (A-860, Aug. 23). *Salt.* Restricts sizes and types of salt packages. Eliminates pockets and barrels (A-866, Aug. 28).

Prices, Retail and Wholesale, in Canada, August, 1943

Cost of Living, Prices of Staple Articles and Index Numbers

COMMENCING with last month's issue the two tables on retail prices of certain staple foods, fuel and rent which have appeared hitherto in each issue of the LABOUR GAZETTE are being presented in a different way.

These tables formerly included certain data collected by the Dominion Bureau of Statistics and certain other data collected by correspondents of the LABOUR GAZETTE. The latter

have been discontinued, so that the prices included in the current issue are entirely those collected by the Dominion Bureau of Statistics.

The prices of the staple food items included in Tables III and IV are all used in the calculation of the index of the food group in the official index of the cost of living and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They

are the averages of prices of delivered goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices is almost identical with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

These rental figures are not comparable with the figures published hitherto because they show the usual or most common rates actually

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

Rental figures currently published in Table IV are typical of rents being paid by tenant households in each city. In some cities flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941

being paid in each of the various cities regardless of the size of the dwellings or of the number of rooms or the type of conveniences whereas the previous figures were for six-roomed workmen's dwellings with modern conveniences. In many of the cities dwellings of four and five rooms are much more numerous than those of six rooms and the rent for the smaller dwellings would, other things being equal, be lower than for the larger.

Cost of Living, August, 1943

An unbroken rise extending over the past six months brought the Dominion Bureau of Statistics cost-of-living index to a new wartime peak of 119.2 for August 2 (1935-1939=100). Taking August, 1939, as 100, the wartime increase to August, 1943, totalled 18.3 per cent, as against an advance of 47.7 per cent in the corresponding period of the first world war.

The latest advance in the index shows an increase of 1.3 points over the July, 1942, index upon which the last previous cost-of-living bonus was authorized. However, no further action concerning the bonus is to be expected until the October, 1943, index is published, since adjustments can be made only at quarterly intervals according to Order in Council P.C. 5963.

Further increases in foods accounted for most of the August advance. Sharply higher prices for eggs coupled with lesser advances for beef, veal, lamb, onions, raisins and lemons moved the food series up 1.4 points to 133.2. Two other sub-groups, viz., clothing and home furnishings were also higher, each being up 0.1 at 120.6 and 117.9 respectively. Fuel and lighting at 113.4, rentals at 111.5 and miscellaneous items at 108.2 were all unchanged between July and August.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G. 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October-11, except under the regulations of the Wartime Prices and Trade Board. In each issue of the *LABOUR GAZETTE* the activities of the Board in the operation of the price control policy are summarized under the title, "Price Control in Canada."

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Wholesale Prices

Wholesale prices in August showed a further rise, the composite index for 526 commodity price series gaining a further 0.3 points to 100.4. While animal products continued to advance, the most important increase was for wood, wood products and paper group, which moved 1.7 points higher to 109.5. This rise followed the removal of subsidies on western lumber. Vegetable products eased 0.1 to 92.4, while the remaining five major groups were unchanged at July levels. Among the more important advances during August were wheat, canned salmon, calves, eggs, British Columbia fir and cedar, lemons, rosin and bricks. Decreases were recorded for steers, lambs, certain fresh meats, butter at Regina, codfish, oranges, potatoes at certain centres, onions at Toronto, and calcium carbide.

There was no net change in Canadian farm products in August, the composite index holding steady at 96.4. Field product prices were stronger at 83.1 compared with 82.6 in July, due to firmer quotations for wheat which overbalanced further seasonal weakness in potatoes, onions and hay. However, lower live-stock quotations outweighed strength in eggs, and the animal products index fell 0.8 to 118.6.

TABLE I—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

	Adjusted to base 100.0 for August, 1939	On base of average prices in 1935-39 as 100*

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

† Commodities in the cost-of-living index excluding rents and services.

TABLE II—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF AUGUST, 1943

(c) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the change indicated by these reports (see text, para. 4 and 5).

(d) Rents marked (d) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Workmen's Compensation in Ontario and British Columbia

THE Annual Reports for the year 1942 of the Workmen's Compensation Boards of Ontario and British Columbia have recently

been issued. A brief summary giving the more important features of each of these reports appears below.

Ontario

Accidents reported to the Workmen's Compensation Board of Ontario in 1942 numbered 133,513. This included accidents not serious enough to involve payment of either compensation or medical aid and for which no claim was made, as well as others for which claims were made but not allowed by the Board. The comparative figure for 1941 was 113,822 and for 1940 it was 81,116. This progressive increase in the number of accidents is attributed to the rapid rise in industrial activity during the years 1940-1942. This industrial activity is also reflected in the increased annual pay rolls which had risen to \$999,769,000, in 1942, which is the largest covered by the Board in any single year of its existence.

The total benefits awarded during the year amounted to \$10,936,963.27, compared with \$9,898,893.75, in 1941 and \$7,282,877.57, in 1940. Of the total benefits awarded during the year, \$8,959,109.51 was for compensation and \$1,977,853.76 was for medical aid.

The provisional assessments in Schedule 1 for 1942, including estimated adjustments amounted to \$10,897,193.16 as compared with \$9,034,812.39, provisionally estimated, and \$9,458,811.62 actually assessed for 1941. For

1942 the average rate was \$1.10 for each \$100.00 of pay roll, as compared with \$1.08 for 1941 and \$1.02 for 1940. The Dominion Government (including Defence Industries), the Provincial Government, and employers in Schedule 2 pay for accidents as they arise, on the adjudication of claims by the Board. Hence while accidents from these sources are included in the above totals, there is no inclusion of wage roll or assessment figures as these industries do not pay assessments to the Board on a percentage of their pay roll.

The total amount of compensation awarded in Schedule 2 industries and Crown companies during 1942 was \$1,733,376.40. Of this amount \$207,327.51 was for workmen of municipal corporations; \$340,922.22 for steam railways; \$29,689.33 for electric railways; \$121,820.67 for navigation companies; \$7,980.81 for express and sleeping car companies; \$7,283.36 for telephone and telegraph companies; \$908,142.30 for Dominion Crown cases and \$110,158.92 for Provincial Crown cases. Of the total amount awarded, \$918,154.19 was for pensions in pension cases and \$815,222.21 was for cases other than pension cases and for compensation not pensions in pension cases. Total administration expenses in 1942, including contributions to staff pension funds were \$724,536.85.

British Columbia

The Annual Report of the British Columbia Workmen's Compensation Board for 1942 shows a sharp increase in the number of industrial accidents. In 1941, there were 46,496 and in 1942 there were 65,475. However, the difference in the number of fatal accidents was not so marked—200 in 1941 and 212 in 1942. The increase was attributed mainly to the greater number of men employed in 1942, coupled with the fact that many workmen unaccustomed to industrial occupations were employed in wartime plants and other hazardous tasks.

The percentage of accidents resulting in three or more days loss of time arose out of the various industries as follows: Lumber industry, 35 per cent; steel-ship building, 19 per cent; general manufacturing and delivery classes, 10 per cent; construction other than steel-ship building, 8 per cent; metal mining, 7 per cent; servicing and repairing, 6 per cent; railroading groups, 3 per cent; coal mining, 3 per cent; all other classes, 9 per cent.

Revenue of the Board during 1942 amounted to \$10,602,356.40, of which \$6,797,935.02 was collected from employers on account of 1942 payroll assessments. Medical aid contributions amounted to \$1,181,969.28; assessments collected on account of 1941 and prior years totalled \$1,072,895.14; and medical aid dues from workmen \$412,673.13. The balance of revenue accruing to the Board in 1942 amounting to \$1,136,883.83 was on account of penalties, interest on investments, premium on United States funds and profits realized on sales.

Disbursements during 1942 totalled \$9,832,625.19, the major component items being: compensation to workmen, \$2,972,371.62; medical aid, \$1,135,462.58; pension payments, \$1,577,529.05; investments purchased less sales, \$3,900,218.48; general administrative expense, \$247,043.46. A cash balance of revenue over expenditure in 1942 of \$1,695,120.45 therefore resulted.

Notes of Current Interest

**Mutual Aid
insignia symbolizes
war contribution
of Canadian
workers to
United Nations**

Reproduced on the cover of this issue of the LABOUR GAZETTE is an insignia which is to appear on all war supplies manufactured in Canada and shipped abroad to members of the United Nations.

The insignia was designed according to the specifications of Canada's Mutual Aid Board. It is centred on a maple leaf, and bears the name "Canada" in three languages, English, Russian and Chinese. The colouring is red, blue and gold.

Products of Canadian workers are being shipped under the Mutual Aid program to Great Britain, Russia, China, the French Committee of National Liberation, Australia, New Zealand, India, South Africa, and other allied nations. Canada has become the fourth producing member of the United Nations, and is dispatching a huge and sustained supply of foodstuffs, metals, weapons, and armament for use in every part of the world.

Although a great deal of Canadian war material and supplies has already found its way to the fighting fronts of the world, shipments to Russia, China and other countries were formerly made through Great Britain and the United States. There was no mechanism, prior to Mutual Aid, whereby Canada could make a direct contribution to these countries.

On May 20 of this year, however, such mechanism was created when Parliament authorized the setting up of a Mutual Aid Board, headed by the Minister of Munitions and Supply, Honourable C. D. Howe. An amount

of \$1,000,000,000 was placed at its disposal to purchase war materials and supplies for allocation to Great Britain and other United Nations on the basis of strategic need. Canada will thus deal directly with the countries concerned; and the Mutual Aid insignia will be a symbol of the contribution of Canadian workers and workmanship to the war effort of the United Nations.

**Appointment of
J. L. Cohen
revoked**

of the National War Labour Board. Mr. Cohen had been a member of the Board since it was reconstituted in February, 1943.

**J. A. Bell
becomes member
of National
War Labour
Board**

J. L. Cohen, K.C.

Mr. Bell is Chairman of the General Committee of Adjustment, Order of Railroad Telegraphers, C.P.R. (Eastern Lines). He had already been a member of the National War Labour Board Advisory Committee and of the National Selective Service Advisory Committee. He was formerly a member of the National War Labour Board as it was originally constituted. A native of Utopia, Ontario, he is a resident of Toronto.

The appointment is made by Order in Council P.C. 7264, September 16.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

An increase in industrial activity at the beginning of August was again indicated by the Dominion Bureau of Statistics index of employment which recorded an increase of 1.2 per cent as compared with the

previous month and 4.5 per cent as compared with August 1942. The latest figure was fractionally lower however than the all time peak of 186.5, reached at December 1, 1942.

Aggregate weekly payrolls were 1.3 per cent greater than at July 1 and 12.1 per cent greater than at August 1, 1942. Per capita weekly earnings at \$30.98 were practically unchanged from the previous month but increased from

(7) Figure for four weeks ended September 25, 1943, and corresponding previous periods.

(8) MacLean's Building Review.

\$28.62 for August 1942, and \$25.69 for August 1941.

The index of the physical volume of business reflecting activity in the production and distribution of goods advanced to a new high point in August being 241 as compared with 236.3 in July and 205.7 in August 1942. The sub-indexes indicating the trend of mineral production, manufacturing and construction each recorded substantial advances as compared with the previous month. Minor advance was also shown in the index of distribution based on the movement of railway freight, retail and wholesale trade and the volume of trade with other countries. In manufacturing important increases were recorded in the slaughterings of sheep and hogs, in the production of factory cheese, boots and shoes and pig iron.

Factors indicating the trend of economic conditions averaged higher for the first eight months of 1943 than for the similar period of the preceding year reflecting the continued advance in business operations since the outbreak of war. The business index averaged 233 for the former period as compared with 198 for the corresponding period in 1942 an advance of 17.6 per cent. Manufacturing production advanced 23.5 per cent in this comparison, and mineral production 24 per cent in spite of a decline in receipts of gold at the mint of 21.1 per cent and in coal production of 6.3 per cent. In manufacturing flour production was 24.7 per cent higher, the number of cigarettes released 19.3 per cent higher, the production of creamery butter 15.1 per cent higher, and hog slaughtering 6.5 per cent higher while the production of cheese declined 26.8 per cent, newsprint production 8.7 per cent, and pig iron production 9.5 per cent.

Cost of living index again advances

The Dominion Bureau of Statistics cost-of-living index advanced from 119.2 on August 2 to 119.4 on September 1, 1943. Small increases for foods, home furnishings, and in the miscellaneous group accounted for this further rise. The food index increased from 133.2 for August to 133.5 for September as advances for eggs, beef and pork outweighed declines for potatoes and lemons. The home furnishings index moved up from 117.9 to 118.2 on scattered increases for furniture and hardware. An advance in the transportation section caused the miscellaneous group index to rise from 108.2 to 108.3. Other groups remained unchanged, rents at 111.5, fuel and light at 113.4, and clothing at 120.6.

Industrial Disputes Investigation Act

Ten applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of September. One board submitted its report; five boards were established, and the constitution of seven boards was completed during the month. Seven disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in five cases. The settlement of four disputes was reported, agreements having been reached between the parties. Four applications were withdrawn during the month and one application rejected. In one case the Board was re-convened.

Guaranteed wage for Halifax longshoremen

Arthur MacNamara, Director of National Selective Service, announced that the guaranteed wage for longshoremen at the port of Halifax, provided by Order in Council of June 25, was put into operation from September 7. The first weekly payment was made on September 17.

The Order in Council provides that longshoremen regularly employed at the port of Halifax shall be paid wages for a minimum working week of 48 hours. The measure was put into effect to stabilize the working force for the unloading of ships at that port (L.G., July, 1943, p. 901).

Appointment of Chief Registrar for Canada

The Department of Labour announced on September 30 the appointment of Mr. J. K. Houston as Chief Registrar for Canada under the National Registration, 1940.

Mr. Houston will succeed Harry Hereford, M.B.E., formerly Chief Registrar, who recently became Director of Planning for National Selective Service.

Mr. Houston was formerly Assistant Chief Registrar for the National Registration.

Quebec sets up organization to study post-war problems

An Economic Advisory Council has been set up in the Province of Quebec to study the resources of the province and plan for the utilization of labour in the post-war period. The establishment of such a Council was authorized at the last session of the Quebec legislature (L.G., July, 1943, p. 1026), and the Premier of the Province, Honourable Adelard Godbout, has now announced its composition, consisting of 15

members under the presidency of Honourable Jules Brillant of Rimouski. Labour is represented on the Council by Mr. Gerard Picard, General Secretary of the Canadian and Catholic Confederation of Labour and Mr. Charles Masse, Provincial Vice-President of the Canadian Legislative Board, Brotherhood of Locomotive Firemen and Engineers.

The purpose of the Council is to conduct an inquiry into the agricultural, forestry, mineral and industrial resources of the Province and to suggest methods for their fullest development. It is to pay particular attention to the needs of farmers, fishermen, artisans, small industrialists and small traders, and is to draw up, in collaboration with the Dominion and the other Provincial Governments, a program for the utilization of the labour which will be made available at the end of the war.

Organizations to work on post-war problems have now been set up by most of the provinces. One of them, the British Columbia Post-War Rehabilitation Council has issued an interim report, which was summarized in the LABOUR GAZETTE for May, 1943, p. 589.

Commission of employers established in Quebec

A commission of employers has been set up in the Province of Quebec. Operating in conjunction with the Quebec Superior Council of Labour (LABOUR GAZETTE, Jan., 1942, page 7) the commission will study relations between employers and employees of the province. It consists of eight members, headed by Antonio Garneau, K.C., of Montreal, with Jean-Pierre Despres, Secretary-Treasurer of the Superior Council of Labour, acting as secretary.

A first sitting was held in Quebec on August 26, when the Honourable Adelard Godbout, Premier of the province, welcomed the committee. Subsequent meetings will be held in Montreal.

Educationalists urge restrictions on employment of young persons

Among the resolutions adopted by the Canada and Newfoundland Education Association at its 21st convention in Quebec was one urging the incoming board of directors to devise a plan and seek legal means to prevent boys and girls under 18 from "taking employment incompatible with their age, their moral formation and their school work". The Association considered that many young persons were taking undesirable full and part-time jobs and school attendance was suffering as a result. Another resolution suggested that each province should establish regional vocational

schools which would include agricultural courses in their curriculum, and would be under the direct control of the central educational authority in the province.

At the 1942 convention of the Association, a survey committee was set up to submit recommendations to the Dominion Government's Advisory Committee on Reconstruction. Among the educational needs listed by various departments of education for the survey were counselling programs and part-time education for young persons from 16 to 18 years of age. In its report, published last spring, the Survey Committee recommended that the school-leaving age in all provinces should be raised to 16 and that part-time attendance should be required up to the age of 18. It urged that special classes should be set up in disused factories for demobilized men and women to prepare them for employment or higher education, and suggested that the schools attempt to keep boys and girls at school during the post-war period, when their opportunities for employment will have diminished, "by offering instruction in subjects that appeal and train for future living". Other recommendations of the committee dealt with the need for raising teachers' salaries, for larger administrative units, for health services, school lunches, guidance programs, and adult education.

Publications on collective bargaining in Canada

Two bulletins, entitled *Recent Canadian Collective Bargaining Agreements* (No. 7) and *The Right to Organize* (No. 8), were published recently by the Industrial Relations Section of the School of Commerce and Administration of Queen's University.

Recent Canadian Collective Bargaining Agreements reproduces the full text of 15 agreements covering 62,200 workers. The following industries are represented: asbestos, aircraft, steel, automobile, tobacco, brewing, soap, office supplies and gold mining. An agreement entered into between a "Crown Company" and an international union is included. The various agreements were signed on behalf of the workers by a union affiliated to the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Confederation of Catholic Workers of Canada or, in two cases, by an association whose membership is confined to a single plant. This bulletin may be regarded as supplementary to *Trade Union Agreements in Canadian Industry* (Bulletin No. 6), published in September, 1942, which contains a detailed analysis of the terms of 150 agreements but does not reproduce any agreements in full.

The Right to Organize contains the text of the provincial statutes relating to freedom of association and collective bargaining. The Acts are printed in eight columns with the parallel provisions in the various statutes being placed side by side to facilitate comparison. A bulletin of the same title (No. 2) was published in 1938 but is now out of date because the Ontario Collective Bargaining Act was passed in 1943 and all the other provinces but one have amended their legislation (in some cases substantially) since 1938.

Accidental falls prove costly

In a memorandum issued recently by the office of the Industrial Accident Prevention Association in Toronto it was stated that:

"in each 24-hour day there were three falls every two hours—falls of sufficient severity to justify some money payment by the (Ontario) Workmen's Compensation Board".

Of the 12,352 claims resulting from falls for which the Board paid out money in one year, 6,472 were made for falls on the level. Many of these accidents were attributed to the wearing of poor footwear by workmen, to defective floors and to "bad housekeeping".

Precautions recommended against carbon bisulphide

Precautions against the dangers of poisoning, fire and explosion from the use of carbon bisulphide (carbon disulphide) in industrial operations are discussed in

a recent memorandum published by the Factory Department of the Ministry of Labour and National Service in Great Britain. The substance is used in the manufacture of artificial silk and "dipped" rubber goods and in the vulcanizing of rubber.

Carbon bisulphide, besides being very poisonous, vaporizes readily at ordinary temperatures and has an extremely low auto-ignition temperature. The minimum explosive mixture in air is .063 grammes per litre. Inhalation of the vapour can cause chronic poisoning with symptoms varying from nausea to mental disturbances, and may result in complete paralysis. In 1924 poisoning from carbon bisulphide was added to the list of industrial diseases, which it is compulsory to report to the Chief Inspector of Factories. Since that date 19 cases have been recorded, 9 in artificial silk plants, 4 in viscose paper works, and 3 each in india rubber works and plants manufacturing carbon bisulphide.

Measures recommended to prevent carbon bisulphide poisoning include the provision of efficient exhaust ventilation to carry off the vapour, monthly medical examinations for

workers exposed to the vapour and alternation and limitation of employment in processes using the substance. It is suggested that workers in artificial silk plants should alternate a week in the churn room where carbon bisulphide is exhausted from the churn by pumps with one or more weeks in other processes. In india rubber works, which are governed by special regulations issued in 1922, monthly medical examinations are compulsory and employment is forbidden for more than 2½ hours at a time or 5 hours a day in rooms in which carbon bisulphide is used. A rest period of at least an hour must be granted after each spell. Moreover young persons under 18 may not work in any process in which carbon bisulphide is used and no child under 16 may be employed in any room in which such a process is carried on.

Detailed recommendations are made in the memorandum concerning safe methods of storing and conveying carbon bisulphide and the precautions necessary against fire and explosion. Diagrams of approved equipment are included. It is urged that workers should not be allowed to enter tanks which have contained carbon bisulphide until they have been thoroughly cleansed by hot caustic soda solution and hot water and then allowed to stand for three days. Unless the air in a tank has been tested and found free of vapour, no one should be permitted to enter it unless he is wearing breathing apparatus and a rescue belt and is attended by another worker outside the tank. Most of these precautions are already required by the Factories Act for all work in tanks and other confined places where dangerous fumes are liable to be present.

Agreement on employment of women in British building industry

The Ministry of Supply has recently signed an agreement with the National Federation of Building Trades Operatives in Great Britain providing for the extended employment of women in the building industry during the war. The agreement stipulates that women may only replace skilled men with the approval of the union and to enable the men to be transferred to other work. A record must be kept of all such replacements. Women doing the entire job of a building trade craftsman without special assistance, guidance or supervision are to be paid the standard basic rate and bonus applicable to the job. When special assistance is required or jobs have to be broken down for women, they are to be paid from 75 to 85 per cent of the men's basic rate and bonus. The agree-

ment does not affect the employment of women on work formerly performed by women or by boys under 21 years of age.

United States ruling regarding colour or race of employees in collective bargaining

A recent ruling of the United States National Labour Relations Board sets down the principle that the colour or race of employees is an irrelevant consideration in determining appropriate collective bargaining units.

The case was brought about by a local of a certain union which was seeking to obtain recognition as the bargaining agency for all of the workers at the company's plant at Memphis, Tennessee, in place of the local of another union with which the company had a contract. In opposing the action of the new union, the company and the other union argued, first, that because of a shift during the past two years from a large preponderance of skilled workers at the plant to a preponderance of unskilled workers, a single collective bargaining unit would no longer be appropriate, and, second, that since the new union's membership was composed entirely of Negro employees, almost all of whom were unskilled workers, certification of that union as the sole bargaining agency at the plant would give the unskilled coloured workers control over bargaining for the skilled white workers.

In answer to the first argument the Board ruled that a shift from a preponderance of skilled to a preponderance of unskilled workers is not alone "sufficient to render an industrial unit inappropriate" in a plant in which an industrial unit has previously functioned effectively. In reply to the second argument the Board said that "the colour or race of employees is an irrelevant and extraneous consideration in determining in any case the unit appropriate for the purposes of collective bargaining", and that since the record "refuted any claim" that the new union had discriminated against white employees in membership or otherwise, the circumstances that its membership was exclusively coloured was "equally irrelevant".

Escape period provided when "maintenance of membership" clause renewed in U.S.A.

The United States War Labour Board Shipbuilding Commission recently made a significant ruling dealing with the "escape" clause of a "maintenance of membership" provision in a union agreement. The "maintenance of membership" provision, as devised by the Board, sets forth that after a specified date no existing members of the union con-

cerned may terminate their membership for the duration of the contract without losing their jobs. Before this clause of the contract comes into effect, however, union members are given a 15-day "escape period" during which they can resign from the union if they do not want to be required to maintain their membership in good standing as a condition of employment for the duration of the contract.

A recent ruling by the Shipbuilding Commission deals with the renewal of a contract containing a maintenance of membership clause. In this case the issue was raised for the first time as to whether the contract if renewed must contain a 15-day escape clause. The Commission ruled that it must. In this particular case the original maintenance of membership provision had not contained an escape clause.

In an opinion supporting the Commission's decision (against which the labour members dissented) the Chairman, Mr. William E. Simkin, declared:

It is conceivable that all employees who voluntarily assume the rights and obligations of membership in this union should be required to remain members at least for the duration of the war if that would strengthen the hand of responsible union leadership. But the fact remains that the maintenance-of-membership provision clearly provides that it is for the duration of the agreement. It is believed that more harm would be done if the WLB through its Shipbuilding Commission should, in effect, nullify that condition under which maintenance of membership was granted that can result from any possible loss of membership as a result of the escape clause. Moreover, there is something to be said for the idea that, in the long run, the union itself will be in a stronger position if it begins this new agreement with members who are really members in fact.

Survey showing results of union security clauses in U.S. agreements

The United States War Labour Board has recently issued a report covering a survey of the experience of thirty-one plants with maintenance of membership clauses written into union contracts as a result of Board action. The survey was conducted by the Bureau of Labour Statistics at the Board's request. The selection of plants to be studied was designed to give a representative picture of the effects of maintenance of membership clauses in different war industries and different geographical areas. Among the findings set forth in the report are the following:

1. A considerable degree of stability in union strength resulted from the maintenance of membership clauses. Although most unions awarded such clauses have increased their

membership, the relative union strength shows no marked increase, because total employment has also increased since adoption of the clauses.

2. With minor exceptions, very few members withdrew from unions during the escape periods and very few were discharged because of failure to maintain their union membership.

3. Difficulties from dues delinquency were alleviated but not removed.

4. There was some evidence that unions were better able to prevent or terminate work stoppages after securing maintenance of membership clauses.

5. Improvements in employer-union relations, as reflected in the effectiveness of the grievance program, were noted in a number of cases.

6. The great majority of employers seemed to be reconciled to maintenance of membership, at least as a war-time measure, but three were so strongly opposed to it "that they were obviously trying to prevent the union from making its security effective".

7. In most cases unions expressed considerable satisfaction with the maintenance of membership clause, but the majority made plain that they would prefer a stronger clause, and in four instances the unions said they had received almost no benefit from their maintenance of membership clause.

8. In general, the reaction of rank and file workers to maintenance of membership clauses depended upon the degree of their sympathy for the unions concerned.

State laws on labour matters held superseded by federal war powers in U.S.A.

In a recent ruling the United States War Labour Board stated that the war powers of the President and Congress of the United States supersede, during the war, acts of state legislatures in labour relations matters.

The ruling involved a law of the State of Wisconsin which provides that an agreement for union security is invalid unless it has been approved by three-fourths or more of the employees.

The Board directed a leather manufacturing company in Wisconsin to grant a maintenance of membership clause to the union representing its employees, rejecting the company's argument that the Board did not have authority to grant maintenance of membership under the state law.

Referring to the authority given the Board under the recently enacted federal War Labour Disputes Act (L.G., July, 1943, p. 1037) Dean

W. L. Morse, public member of the Board, said that in time of war emergency the powers of the states in certain matters must give way to the war powers of Congress. He declared that maintenance of membership is awarded fundamentally in the interests of a nation at war.

"A union which has some appreciable degree of security to replace the loss of economic power consequent upon its no-strike pledge is certain to be more responsible and more co-operative with management than it could without some form of union security," he said.

Recording of absenteeism in U.S. firms

"Auditing Absenteeism" is the title of a bulletin recently published by the United States Division of Labour Standards. It is a

supplement to an earlier bulletin entitled "Controlling Absenteeism" (L.G., June, 1943, p. 759) and contains copies of absence record forms in use by representative firms in war industries. The procedure adopted by both large and small plants for compiling absence statistics and dealing with returning absentees is described.

The importance of keeping records to determine the nature and extent of absence from work is stressed in the bulletin. In an effort to ensure comparability of absence statistics it is suggested that the term "absenteeism" should not include absences due to holidays, strikes or termination of employment, but should be defined as "the failure of workers to report on the job when they are scheduled to work".

To amplify the definition it is explained that "an employee is to be considered *scheduled to work* when the employer has work available and the employee is aware of it, and when the employer has no reason to expect, well in advance, that the employee will not be available at the specified time".

The form used by the United States Bureau of Labour Statistics in its nation-wide survey of absenteeism last March is included in the bulletin. This study revealed an average absence rate of over 6 per cent for the 3,000 firms which submitted returns. Information requested in the form included absence rates for day and night shifts, the day selected as pay-day, the number of hours and days worked each week and any unusual factors such as weather conditions affecting attendance during the week covered by the report. The bulletin also gives examples of cards used by various companies to impress on workers the necessity of regular attendance. In this respect, one company commented in its report that the

final answer to absenteeism will be found in working with the employee to correct the causes of his absence, and teaching the necessity for working steadily rather than trying to shame and drive the American worker into doing the thing he already wants to do whenever he can.

Labour turnover in United States Labour turnover in manufacturing industries in the United States in July was 7.3 per 100 workers. As reported by the Bureau of Labour Statistics at Washington this is not only the highest rate since the war began, but the highest on record in the United States.

In January, 1942, the average quit rate for all manufacturing industries was 2.36 per 100 workers and in July, 1942, it was 4.02. The Bureau stated that, in general, the quit rate is lower in war industries than in other industries and in every industry it is higher among women than men. It is highest in the food processing, furniture and tobacco industries for which rates averaging 8.7, 8.2 and 8.7 respectively were reported for July.

Training courses in safety for supervisors and foremen in the United States In June, 1940, the United States Secretary of Labour set up the National Committee for the Conservation of Man-power in Defence Industries to inaugurate a campaign against industrial accidents. The Committee contains representatives of labour, management, insurance companies, safety councils and State and Federal governments. It publishes popular and technical literature on safety questions, arranges safety-training courses for supervisors and has organized a flying squad of over 550 safety engineers from private industry who donate 20 per cent of their time to provide a field consultative service on safety for all plants with war contracts.

The latest pamphlet published on behalf of the Committee by the United States Division of Labour Standards calls the attention of employers to the facilities it has made available for safety training. Standard courses of 96 hours on the principles and technique of industrial safety and health are offered to supervisors and to both union and management members of safety committees. The cost is borne by the Office of Education and much of the instruction is provided by local engineering colleges. The supervisors are coached to conduct 20-hour courses in safety for foremen who, in turn, train the individual

workers in safe practices. Specialized courses in particular safety problems may be organized at the request of the employer for key supervisory staff. The United States Division of Labour Standards prepares training aids and pamphlets for the use of persons taking the course and the National Safety Council has made a series of ten films with lectures accompanying them to train foremen in methods of teaching safety.

Other pamphlets issued by the Committee deal with the control of welding hazards, the computation of industrial injury frequency-rates, industrial sanitation and hygiene, guards for machines, the safe handling of nitric acid and other topics. In addition leaflets have been published calling on both workers and employers to join in the safety campaign of the Committee.

Industrial accidents and war production Under the title "Accident Prevention a War Necessity" it is pointed out in the Annual Report for 1942, Division of Statistics and Research of the State of Illinois, that:—

"For the successful carrying on of the country's war effort, when the loss of even a single man-hour of production cannot be spared, the prevention of the time loss due to work accidents is more important than ever before.

"Every fatal accident, every eye lost, every hand or foot lacerated, crushed or amputated, every hour spent in the first-aid room—in a word every injury incurred by a worker—is just as much a victory for the enemy as if these workers...had been disabled by enemy guns... Safety-conscious employers have found that an efficient plant is a safe plant, that accident prevention pays dividends."

In these critical days, the report affirms, everything possible must be done by employer and worker alike to halt the inroads into our man-power by the accident evil. The building of planes and other war materials is being delayed because too many production man-hours that are required to build them are spent in first-aid rooms and hospitals by men who are unnecessarily injured.

Accidents and Absenteeism.—In referring to the causes and remedies for "absenteeism" and "industrial accidents", T. P. Kearns, Superintendent of the Division of Safety and Hygiene for Ohio, states in the "O.I.C. Monitor" for September:—

"Clean, sanitary working conditions, proper illumination, dispensary interest in minor ail-

ments, pure water and nutritious food where cafeterias are maintained, reasonable rest periods and a common appeal to the patriotic impulses of the individual worker, should go a long way in improving conditions that lead to absenteeism, both voluntary and involuntary. In brief, by doing those things which contribute to the morale of the worker, his mental attitude will be brought to the point where he will make cheerful sacrifices in the interests of greater production as well as greater safety."

Textbook on industrial and labour relations

The first state-sponsored textbook on industrial and labour relations has just been issued by the New York State Joint Legislative

Committee on Industrial and Labour Conditions. The book is entitled: "The American Story of Industrial and Labour Relations" and presents an economic history of the United States from 1790 to the present time. The compilation of the volume involved more than five years of study by the Chairman of the Committee. It is asserted that great care was exercised in the preparation of the book to "avoid prejudice and propaganda". State schools are expected to require about 300,000 copies during the present academic year. The plan is to issue revised editions every year to keep the book up to date.

Labour-management committees in New Zealand

Although "workshop", or labour-management committees have been established in a number of industrial centres in New Zealand, the practice has

not been given general application, according to the fifty-second Annual Report of New Zealand Department of Labour, which covers the financial year, April 1, 1942, to March 31, 1943. The report discusses trends in the work of these committees and suggests lines that they could follow to obtain better results in that Dominion.

The report makes it clear that some of these committees have done good work, and expresses the view that the following matters are such as could be discussed by a "workshop" committee representative of the management and the workers: (1) health and safety of the workers; (2) greater efficiency; (3) increased production; (4) prevention of wastage in the industry; and (5) cleanliness of the factory.

It warns against the committees being used for the ventilation of complaints, stating that such matters should be dealt with through the appropriately provided channels.

Reference is made in the report to the joint Production Consultative and Advisory Committees that have been set up in the Royal Ordnance factories in Great Britain and that are being organized in the British engineering and allied industries. Examples given of the matters to be discussed by the British committees are: "maximum utilization of existing machinery; upkeep of fixtures, jigs, tools and gauges; improvement in methods of production; efficient use of the maximum number of productive hours; elimination of defensive work and waste; efficient use of material supplies; efficient use of safety precautions and devices". In short, the British committees are consulted "on many matters that have normally been regarded as essentially the responsibility of management". (L. G., March, 1943, p. 306; April, p. 466.)

New Zealand and Australia arrange for reciprocity in pension benefits

Australia and New Zealand have recently concluded a reciprocity agreement in regard to the payment of invalid and old age pensions. For a number of years New Zealand has

been granting to Australians resident in New Zealand certain pension benefits which Australia was denying to New Zealanders living in Australia. Under the reciprocity agreement, residence in either Australia or New Zealand is now sufficient to establish eligibility for a pension in either country provided that the other conditions of eligibility are fulfilled. In addition, a person who becomes permanently incapacitated for work in either Australia or New Zealand is eligible for an invalid pension in whichever country he resides. In no case, however, may the pension paid to such persons exceed the maximum rate of the country which has the lower maximum rate. The agreement also stipulates that persons who are recognized as British subjects in either country will be considered British subjects in both countries for the purposes of the pension Acts. The agreement may be terminated by either country upon six months' notice, and will not come into effect until ratified by the Parliaments of the Commonwealth and the Dominion.

**Swedish collective
agreement
implements anti-
inflation policy**

In an effort to check inflation, Sweden has extended its price-control policy and employers' and workers' organizations negotiated in December, 1942, a national agreement adjusting wage bonuses to changes in the cost-of-living index. This is the fourth such agreement since the outbreak of war, and both the Swedish Confederation of Trade Unions and the Employers' Federation have undertaken, as in the case of previous agreements, to incorporate the terms of the agreement in collective agreements signed by all affiliated organizations in individual industries. Over a million Swedish workers and employers are affected by the agreement.

The first national agreement, signed in October, 1939, provided for a sliding scale of wage bonuses based on anticipated variations in the cost-of-living index. The scale was designed to compensate workers for approximately three-fourths of the increase in the cost of living. Subsequent agreements negotiated each year for incorporation in collective agreements coming up for annual renewal have reduced the compensation to about half of the increase as the general economic situation of the country has deteriorated radically with the virtual elimination of its export and import trade. The latest agreement provides that the existing war supplement amounting to 20·7 per cent of the 1938 basic wage rates is to remain unchanged unless the cost-of-living index which stood at 239 (base: July, 1914=100) at the time of the agreement rises by 10 points. In that case a further supplement of 5 per cent would be payable. Should the index reach 257, the agreement would be terminated and negotiations reopened.

The new agreement was negotiated shortly after the Government had issued a sweeping price-freezing order in the fall of 1942 and had convened a conference of economic experts, including representatives of workers' and employers' organizations, to plan a campaign against inflation. The conference recommended that all further increases in income must be prevented, the rise in cost-of-living bonuses checked and price increases confined to very exceptional cases. It suggested that the basis on which the cost-of-living index is calculated should be investigated and that tax increases should not be allowed to affect the index. An earlier study of the index had been made in 1941 when the Government appointed a special "Index Board" on which

workers and employers were represented to consider changes in the basis for calculating the index necessitated by the disappearance or extreme shortage of certain goods. The index was 178 in October, 1939, and had risen to 239 by October, 1942. Between that date and March, 1943, however, there was little change in the index, indicating that the price-control campaign was meeting with success.

The President of the Swedish Confederation of Trade Unions, in commenting on the new agreement, declared:

The leaders of the trade union movement gave their full support to the Government's efforts to bring about the price stop. All experience shows that it is the wage-earners who lose most when prices rise. . . . To bring about a price stop, there also had to be a wage stop. . . . A certain margin for rising prices has been allowed before compensation is granted. This must be regarded as a sacrifice which the workers make once and for all.

And the organ of the Swedish Employers' Federation commented:

The Confederation of Trade Unions has shown no small measure of self-control and insight into the danger to real wages of a general rise in prices even if there is a race between nominal wages and prices. The social sense which has thus found expression is all the more valuable in that a shortage of labour is usually an incentive to press general wage demands.

**Trade unions
make progress
in Switzerland**

Trade union membership in Switzerland has increased steadily since 1940, according to an article in the September 1 *Bulletin* of the International Federation of Trade Unions. Membership in unions affiliated with the National Trade Union Centre of Switzerland has varied as follows in the last four years:

1939	223,073
1940	212,602
1941	217,251
1942	231,277

The population of Switzerland is approximately 4,300,000.

The largest gains in membership are reported by unions in war industries, ranging from 24·6 per cent for textile and factory workers to 7·3 per cent for transport workers. The biggest organizations are the metal-workers and watchmakers with over 75,000 members, the building and woodworkers with over 35,000, the railwaymen with nearly 34,000, and the commercial, transport and food and drink workers with over 25,000.

Manpower

Workers in Essential Industry "Frozen" in Employment

Control of Labour Turnover—Other Manpower Orders Relating to Military Rejects, Coal Delivery Men and Soldiers on Farm Duty

A FURTHER step in the Government's manpower control policy was taken recently by an order in council "freezing" workers employed in industries of high essentiality.

Under the order (P.C. 6625, September 1, 1943), employers in "A" or "B" priority industries may not release employees without the written permission of a Selective Service Officer. Similarly, employees in the same industries may not give notice of separation to their employers without first having secured the written permission of a Selective Service Officer.

The order applies to both male and female employees, but for the present female workers are not to be included in this control. (Special order number 10 under National Selective Service Civilian Regulations.)

By order of the Minister of Labour, Honourable Humphrey Mitchell, the order became effective on September 20.

"A" and "B" are the two highest priorities and include all war industries and essential civilian services, including the delivery of fuel in cities, food processing and meat packing plants and many other services.

Local Employment and Selective Service Offices were authorized to notify employers whose establishments are designated as in the two top priorities. Employers whose establishments are so designated were thereupon required to notify their employees by posting a notice.

Selective Service Officers were instructed to issue permits to change employment in cases where obvious hardship or unfairness would result from a refusal to grant permission.

"Many thousands of firms," the Minister of Labour explained, "fall in categories 'A' or 'B'. While every effort will be made to avoid imposing hardship on any individuals, the need of preventing avoidable labour turnover in industries highly important to the war effort is greater than ever, and the new rules are expected to give substantial assistance in that direction."

The Minister further pointed out that the principles involved in the new regulation, before being approved by the Governor in Council, were carefully considered by the National Selective Service Advisory Board, and were unanimously approved by that Board. The Board has representation from organized labour, employers, farmers, returned soldiers, and Government departments.

The standard penalties, contained in National Selective Service Civilian Regulations, will apply in the case of failure to comply with the new regulation regarding separation from employment in categories "A" and "B."

The new control on employment in "A" and "B" priorities does not constitute any interference with men joining the Armed Forces voluntarily, nor with men required to report for medical examination or military training under Mobilization Regulations.

In cases where a "designated establishment" is working only part of the normal working week and there seems to be likelihood of this condition continuing, managers of local offices have been instructed to notify immediately the Regional Office, so that consideration may be given to withdraw the arrangements regarding "freezing" from that particular establishment.

Most Construction Not Covered

In regard to the construction industry, Mr. Arthur MacNamara, Director of National Selective Service, later announced that although most of the construction industry across Canada at the present time calls for high labour priority, because of the working conditions peculiar to the construction industry the order will not apply to most building and construction projects. The order will apply only to long term projects, on high priority work, where the Regional Superintendent of the Unemployment Insurance Commission issues a ruling that the particular undertaking is covered by the control order. (Special Order Number 11 under Selective Service Regulations.)

The text of the order is as follows:

Text of P.C. 6625

His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to amend the National Selective Civilian Regulations (Order in Council P.C. 246, January 19, 1943) and they are hereby further amended by adding the following Section 202A immediately after Section 202:

- "202A-(1) (a) Every establishment which has been given an 'A' or 'B' labour priority rating pursuant to these regulations shall be classified as a 'designated establishment.'
- (b) The Director may classify any establishment which has not been given an 'A' or 'B' labour priority rating as a 'designated establishment.'
- (c) The Director may at any time except any establishment or group or class of establishments from the provisions of this section.
- (2) (a) Every employer whose establishment is classified as a 'designated establishment' pursuant to this Section shall notify his employees that the establishment is a 'designated establishment' by posting a notice on bulletin boards or in such other manner as may be approved by a Selective Service Officer.
- (b) A notice posted pursuant to paragraph (a) of this subsection shall be substantially in a form approved by the Director.
- (c) A specimen copy of the form of notice approved by the Director may be obtained on application to a Selective Service Officer.
- (3) On application of an employer a Selective Service Officer shall inform the employer whether his establishment is a 'designated establishment' pursuant to paragraph (a) of subsection (1) of this section.
- (4) (a) Subject to the provisions of Section 203 of these Regulations, no employer whose establishment has been classified as a 'designated establishment' may give notice of separation to an employee pursuant to Section 202 of these Regulations without the permission in writing of a Selective Service Officer.
- (b) No employee whose employer's establishment has been classified as a 'designated establishment' may give notice of separation to his employer pursuant to Section 202 of these Regulations without the permission in writing of a Selective Service Officer.
- (c) Where an employee applies for permission to give notice of separation to his employer in order to take similar employment in the same industry the Selective Service Officer shall, in accordance with directions and instructions issued by the Director, grant such permission unless special circumstances exist.
- (d) Application for permission to serve notice of separation shall be made in such form and such manner as the Director may prescribe.

This Section shall take effect on a date to be designated by the Director."

Military Rejects Subject to Employment Transfer

Persons subject to military call-up who have been found medically unfit for military service may now be directed into specified employment by a Selective Service Officer. Authority has been given Selective Service Officers to issue an order in writing to any male person who has been served with an "Order—Medical Examination" and who because of his physical condition has been found unfit for military training or for special duty in the Royal Canadian Mounted Police, directing such a person to accept and enter specified employment. If the person is not employed at the date of direction the order may become applicable immediately; otherwise at the end of seven days.

This authority is given under Order in Council P.C. 7260, September 16, 1943, which enlarges the scope of Section 210 of National Selective Service Civilian Regulations (LABOUR GAZETTE, April, 1943, page 450). As previously, it is stipulated that a Selective Service Officer shall not direct any person to apply for employment available in consequence of a stoppage of work due to a labour dispute; and that any person failing to comply with an order of a Selective Service Officer becomes liable to Alternative Service.

Coal Delivery-Men Retained in Present Employment

Mobilization boards have been authorized to grant postponement from military training to coal delivery-men in cities with a population of 50,000 or more. Honourable Humphrey Mitchell, Minister of Labour, announced on September 23 that provision for this action had been made by amending National Selective Service Mobilization Regulations. The purpose of the amendment was to provide, as adequately as possible, for the retail delivery of coal during the coming winter.

The authorization was given in the form of an Order embodied in P.C. 6632, dated September 7, 1943. The text of the Order reads in part as follows:

"1 (b)¹ Coal delivery-man means a person who as his sole or principal occupation is engaged or employed in physically handling coal in the unloading, storing or distribution thereof in any incorporated city having a population of 50,000 persons or over and has been continuously so engaged since June 1, 1943, but shall not include any person employed in a clerical or office capacity.

2. A mobilization board upon the application of a coal delivery-man, or upon the application of the employer of any such person,

¹The definition of coal delivery-man here given is as amended by P.C. 7261, September 16.

shall grant to such coal delivery-man a postponement order until February 1, 1944, and no Order—Military—Training to report before February 1, 1944, shall be sent to any such coal delivery-man unless a National Selective Service officer has given his consent in writing to the sending of such notice.

3. If an Order—Military—Training is sent contrary to this Order it shall be null and void if the person to whom it is sent delivers it to his employer, and the employer returns the notice to the Registrar by whom it was sent.

4. No coal delivery-man shall be accepted prior to February 1, 1944, for enlistment in any branch of the armed forces of Canada unless such person has first obtained a permit to enlist furnished by a National Selective officer."

Soldiers Employed on Farms

A review of the plan for assigning soldiers to temporary work on farms was given in the August issue of the *LABOUR GAZETTE* (page 1075). In the September issue (page 1213) reference was made to the Order in Council (P.C. 6434) that was designed to give practical effect to the plan. A further Order in Council (P.C. 6797, Sept. 15, 1943) modifies the terms of employment as prescribed under P.C. 6434.

Subsection one of Section seven of the latter order was revoked and the following substituted therefor:

"7. (1) Except for such days or parts thereof as rain or inclement weather prevents such person from utilizing the soldier's services, any person to whom a soldier is assigned for farm service shall pay remuneration in respect of the services of the soldier for each week day during which the soldier is assigned to perform such services the following rates in accordance with the place where the soldier is assigned to perform such farm service, namely:

four dollars for each week day or part thereof, in any part of Canada west of the dividing line between Military Districts No. 2 and No. 10; three dollars and fifty cents for each week day or part thereof in the Province of Ontario east of the dividing line between Military Districts No. 2 and No. 10; three dollars for each week day or part thereof in the Provinces of Quebec, New Brunswick, Nova Scotia and Prince Edward Island

or at such revised rates for each week day or part thereof as the Minister may, after consultation with the Government of the Province in which the soldier is assigned and the Minister of National Defence, fix as the rate to be paid in that province or any part thereof."

Labour Priority System in Canadian Industry

Outline of Government Policy in Regard to Classification of Industries

THE following statement contains an outline of the workings of the priority system in Canadian industry. It traces the development of the system from its inception in the spring of 1942, and describes its present operation.

Development of Labour Priority Schedule

Under authority of Clause (f) of Section 505 of Order in Council P.C. 246, January 19, 1943, National Selective Service Civilian Regulations, "The Minister may in consultation with the Department of Munitions and Supply and the Wartime Prices and Trade Board, classify, in such manner as he deems expedient, occupations, industries, firms or establishments according to essentiality in the prosecution of the war."

It was realized in the spring of 1942 that such classification is absolutely essential for the allocation of manpower to its most effective use in the war effort. At that time, representatives of the Wartime Prices and Trade Board, Department of Munitions and Supply, and National Selective Service consulted and commenced to build up a labour priority schedule on a broad industrial classification based on relative essentiality.

Also at this time, a selected list of Department of Munitions and Supply contracting firms was used as a nucleus group of establishments upon which to build a "Named List" of companies. Many firms are engaged in manufacture of essential articles outside of their normal production, and although these establishments are required to curtail their less essential work to supply manpower to maintain production of war materials, in many instances it is necessary to assign a special priority rating.

For this first classification the Dominion Bureau of Statistics employment breakdown and the industrial census breakdown were used. Late in 1942, a carefully worked out analysis of Canadian industries was prepared as an Industrial Classification Manual, which provided an indexed and much more detailed and complete classification of all industries, services, etc. This manual serves as the basis on which industries are selected for designation with respect to essentiality, and each of some 350 activities, classified on an establishment basis, has been assigned a relative priority rating for men and women.

Operation of Priorities

The Minister's authority to classify industries, etc., is exercised by the Labour Priorities Division in the Labour Supply Branch of the Department of Labour. Consultation with the Department of Munitions and Supply, Wartime Prices and Trade Board and the Employment Service and Unemployment Insurance Branch of the Department of Labour is provided by regular meetings of an informal committee on labour priorities. This committee meets once a week and has become known as the Interdepartmental Labour Priorities Committee. The Chief of the Priorities Division acts as Chairman and Secretary.

All industries are given one of four labour priority ratings, "A", meaning very high; "B", meaning high; "C", meaning low; and "D", meaning no labour priority. Occasionally the priority rating of an industry for men is different than for women.

On application to the Priorities Division and on recommendation of various associations and Governmental departments, individual firms are considered by the Priorities Committee for special ratings. Members of the Committee investigate and the authenticity of claims and, where justified, the firms are specially named with a rating other than that of their ordinary industrial classification, depending on the proportion of essential production carried on by the firm.

Each Local Employment and Selective Service Office is provided with:

- (a) *An Industrial Card Index*, which consists of a card for each industrial classification, showing the labour priority rating for the industry, and in some instances key occupations in the industry.
- (b) *List of Named Firms*, which includes those establishments and construction projects which are considered individually by the Priorities Committee and are

assigned special ratings other than those of the industries under which the firms are classified.

- (c) *An Industrial Classification Manual*, with which the classification and priority may be established by reference to the Industrial Card Index.

Local Offices are advised at once of priority revisions by the Labour Priorities Division, after consultation with interested departments. Each Local Office concerned with a change in priority is notified by means of a Revision List forwarded to these Offices each week.

On receiving an order for labour, Local Office officials decide the applicant's priority rating by reference to the Priority Records.

Available labour is referred to the highest priority vacancy for which it is suitable or qualified, subject to exceptions of an emergency nature.

The movement of manpower between and within priority groups can be and is being checked by the Quarterly Employment Survey Report. The Industrial Classification Manual is used as the basis for these reports.

Construction projects are independently authorized in eight separate Government offices. Reports from each of these sources are received regularly by the Priorities Division, so that consideration may be given to each project for labour priority rating. A temporary priority is assigned to the contractors and this rating expires when the job has been completed. At present, approximately 1,000 such current construction projects are on file. In many instances, special priority ratings are given to specific occupations or activities within an industrial classification. Priority rating for multiple production firms producing a wide range of commodities is difficult to determine accurately and decisively. The whole system is therefore continually being revised.

Use of Part-time Workers Expanding

Campaign for Women Workers in Ottawa, Halifax and Toronto

THE success attending the initial campaign for recruitment of women for part-time employment in essential services (L.G., Aug., 1943, p. 1077) has led to an investigation of this source of labour by other industries. Started in Toronto during July, to relieve critical labour shortages in such essential services as laundries, hospitals and restaurants, the recruitment of part-time workers has now spread, with equally successful results, to other centres.

One result of the part-time campaigns undertaken in Toronto, Ottawa and Halifax has been that an additional number of full-time workers has been uncovered, whose recruitment has brought welcome relief to many industries and offices where war services are carried on.

Ottawa

During September, the Civil Service Commission made an appeal to Ottawa housewives and women not otherwise employed to take

part-time work in Government offices. The campaign, following the pattern of the original plan, was sponsored by the Ottawa Local Council of Women, and run under the joint direction of the Local Employment and Selective Service Office and the Civil Service Commission.

Registration was taken over a period of four days commencing Wednesday, September 15. The evening period only was used for registration during the first three days and applicants were allowed to register all day Saturday. Campaign headquarters were located in an Ottawa collegiate institute. Applicants were advised by radio and advertisements in the newspapers of the dates and the order in which to apply. Under the direction of Mr. S. J. Daly of the Civil Service Commission, the registration of hundreds of women was handled in a smooth and efficient manner which avoided waiting lines and speeded up the work of the various examiners. Applicants were taken in alphabetical order commencing A to C during the first day. Close to 500 women registered during the first day and the total number for the four days of the campaign was 2,240.

Of this number 1,656 new workers were obtained for Government Services, including 175 who were willing to work full time. An analysis of registrants compiled by the Civil Service Commission showed the standard and number of successful applicants to be higher than the average percentage in open competition.

The campaign uncovered some excellent talent, including several dietitians who were immediately sent through National Selective Service to relieve the shortage of local hospitals, a woman camouflage expert, a professor of languages, women who had held executive secretarial positions and much other good material.

The objective set for the campaign was 800 workers but it was agreed between the Civil Service Commission and National Selective Service that any surplus of workers obtained for the Civil Service Commission or any number of workers found unsuitable through lack of sufficient training for Government offices should be referred to National Selective Service for placement with local firms.

Advertisements during the campaign called for junior full-time clerks, stenographers and typists at a salary of \$70.20 a month including bonus. Part-time workers were offered \$50 a month for Grade 2, \$35 for Grade 1, with an age limit of 18 to 55.

The Civil Service Commission was well satisfied with the high content and good calibre of registrants.

Halifax

The campaign in Halifax opened September 22 and appealed to all Halifax housewives to register for part-time paid work in bakeries, restaurants, laundries, dry-cleaning establishments, hospitals, hotels, the needle trades, stores and offices.

Directed by the Halifax Employment and Selective Service Office, the campaign was also sponsored by the Local Council of Women.

Orders from local firms totalled 1,235 and during an eight-day campaign the number of women registered—1,020—almost equalled the demand. 179 women registering expressed willingness to take full-time employment. At the time this issue goes to press indications point to the satisfaction of about 90 per cent of local needs.

Toronto

During the first week of September a war industry exhibition was staged in the Eaton Auditorium, Toronto, to inaugurate a local campaign through Employment and Selective Service Offices to obtain women for industrial jobs. About 123 industries set up booths in which girls from the factories carried out various plant operations for the benefit of visitors. Pictures of industries, which were shown during the exhibition, were provided by the National Film Board.

The campaign extended over 11 days and provided a total of 4,798 workers, 4,330 of whom were referred directly to war industries, 1,434 were placed in the first three days. Of the remainder 300 registered only for part-time work and have since been placed. In addition, 168 were married women awaiting arrangements for the day care of their children.

Campaigns for other centres throughout Canada are being planned and will be based upon the needs of the local situation. Advisory Committees are working in all districts where shortages are apparent and the details of the campaigns will be set up in accordance with their findings, with emphasis on employment of full-time workers in all districts where the supply has not been exhausted. Where full-time workers cannot be obtained, the part-time program will be put into effect.

Mrs. Rex Eaton reports that approximately 10,000 women have been recruited for industry since July in these campaigns and of this number about 5,000 have taken on full-time work.

Changes in Policy Under Military Call-Up Regulations

Position of University Students, Hockey Players and U.S. Citizens in Canada—Change in Procedure for Medical Examinations

THE Government has recently made announcements of policy in regard to the status of certain groups under the National Selective Service Mobilization Regulations. The groups affected include university students, hockey players, and United States citizens residing in Canada. A change has also been announced which is expected to expedite the procedure to be followed in regard to the medical examination of men called up for military training.

Change in Procedure for Medical Examination under Mobilization Regulations

An Order in Council (P.C. 6990) was passed on September 7 amending the National Selective Service Mobilization Regulations (P.C. 10924) in respect of procedure for medical examinations for men subject to military call-up and of certain other matters.

According to a statement by Mr. Arthur MacNamara, Director of National Selective Service, every effort is being made to speed up the work of medical examinations under the Mobilization Regulations. However, due to the scarcity of physicians in certain localities, considerable discretion is being allowed to the Registrars as to whether or not men will be ordered to report for medical examination to Army Reception Centres, to designated civilian physicians belonging to panels, or to the nearest civilian physician of their own choice.

Army Reception Centres are located at Halifax, Fredericton, Quebec, Montreal, Kingston, Toronto, London, Winnipeg, Regina, Calgary and Vancouver. Men within convenient distance from these Centres will be ordered to report there for medical examination.

Men who are not required to report at Army Reception Centres will be required to go for medical examination to one of the designated civilian examining physicians located conveniently nearby. The panels of civilian physicians will be arranged after consultation with the Canadian Medical Association.

Where there is neither an Army Reception Centre nor one of the designated civilian physicians within a convenient distance from the man's home, he will be ordered to report for examination to the nearest civilian physician of his own choice.

After the change is made, the civilian doctors belonging to the panels will carry out any further medical examinations of men in low

categories: these were previously carried out by the Army Medical Boards.

Mr. MacNamara pointed out that the new procedure, the effective date of which will be announced shortly, would tend to simplify matters for both the Mobilization Boards and for the men concerned. With most of the examinations conducted by a smaller number of doctors it will be possible to effect a greater standardization of examination. Also, in the case of those who receive their initial examination after the change has been made, further medical examinations should be required in relatively few cases.

University Students Under the Military Call-Up

In regard to university and college students liable for military training under National Selective Service Mobilization Regulations a policy was arrived at following a national conference of Canadian Universities, held at Ottawa on August 30, at which Selective Service and the Universities discussed in detail the application of the regulations to University students. Mobilization Boards across Canada have now been notified of the policy with a request from A. MacNamara, Director of National Selective Service, that it be followed when considering applications for postponement from University students or prospective University students.

The policy reads as follows:

1 (a) No male student of the age of 18½ years or more who is subject to call under the National Selective Service Mobilization Regulations, and who has not attained a standing in education which is equal to that recognized by the appropriate Provincial Department of Education as one which should have been attained by a person of his age, shall be considered eligible for postponement to permit him to continue his studies. (See 2 (a) and 2 (b) below.)

1 (b) Any male student of the age of 18½ years or more who is subject to call under the National Selective Service Mobilization Regulations and who has attained a standing in education which is equal to that recognized in the appropriate Provincial Department of Education as one which should have been attained by a person of his age, shall be considered eligible for postponement to permit him to continue his studies at the discretion of the Mobilization Board concerned. (See 2 (a) and 2 (b) below.)

1 (c) No male student of the age of 18½ years or more who is subject to call under the National Selective Service Mobilization Regulations and who has completed the requirements for admission to a university more than twelve months before the date of his application for admission to a university, shall be

admitted to such university without the consent of the Mobilization Board concerned.

2 (a) Any male student who has completed requirements for admission to a university at an age approved by the appropriate Provincial Department of Education shall be permitted to enter the university and receive postponement of his call under the National Selective Service Mobilization Regulations for not more than one academic session upon the report of the university. Such postponement will be cancelled in the event of failure at examination or failure to comply with military training.

2 (b) Any male student of the age of 18½ years or more who is subject to call under the National Selective Service Mobilization Regulations, who has been admitted to a university, and who has completed satisfactorily the work of at least one academic session in the University shall be served with an Order—Medical Examination in accordance with the National Selective Service Mobilization Regulations, unless he is enrolled in a course defined from time to time by the Director of National Selective Service on the recommendation of a University Advisory Board as essential to the national interest or contributing to the prosecution of the war; a student enrolled in a course so defined shall be granted a postponement of his call and shall continue his enrolment in the course until graduation. Such postponement, however, will be cancelled in the event of failure at examination or failure to comply with military training.

3. A bona fide candidate or student for the ministry of a religious denomination eligible to supply chaplains to the Armed Forces, who is certified as such by the appropriate ecclesiastical authority, shall be granted postponement.

4. The Conference re-affirmed its resolution of January 9, 1943, to "weed out incompetent students" and adopted the following resolution:

That any student, either man or woman, of the age of 18½ years or more who fails to pass any term or yearly examination required by his or her university or college be refused permission to continue his or her studies in the university or college concerned until he or she presents a permit so to do issued by the appropriate National Selective Service Officer.

"The policy as outlined", Mr. MacNamara stated, "meets with the approval of the heads of the Universities. We have endeavoured to be fair to all interests concerned. Continuation of University courses essential to the war effort, and of candidates for the ministry of recognized religious denominations will not be interfered with. Otherwise, encouragement will be given to young men to start on their educational courses—but where those courses do not have a direct bearing on the war effort, we could not very well grant postponements to students to continue them, when their services are so urgently needed by the Armed Forces."

Professional Hockey Players

Within certain limits Selective Service will not interfere with the release of hockey play-

ers during the forthcoming winter season. However, limitations will be placed on players who have been engaged in high priority employment, unless the consent of the employer is obtained. Moreover, postponement of military call-up is not contemplated in the case of those players who are in age or marital classes that are subject to mobilization regulations.

The principles and procedure to be observed follow:

1. Selective Service Permits to enter employment of a professional hockey club in Canada or the United States will be granted to any person who is not in the age groups designated under the Mobilization Regulations, or to any person in those age groups who has been rejected for military service, unless the applicant is employed by an establishment which has been given an A or B labour priority rating.

2. If the person is engaged by an establishment which has been given an A or B labour priority rating, a permit will not be granted without the consent of the employer and on the understanding that any time lost playing hockey will be made up in order that production will not suffer.

3. Labour Exit Permits will be granted under Section 400 of the Civilian Regulations and authorizations to leave Canada will be given under Section 23 of the Mobilization Regulations, to any person to whom a Permit to enter employment may be issued under items 1 or 2 above.

Procedure Affecting U. S. Citizens Resident in Canada

An important change has been made in the procedure for dealing with citizens of the United States residing in Canada under Mobilization Regulations.

In future, after three months' residence in Canada, an American citizen in a category liable to compulsory military service in Canada will be required to report either for service with the Canadian Armed Forces or with the United States Forces.

This action was taken on order of the Minister of Labour, who was authorized under Mobilization Regulations (P.C. 10924 as amended by P.C. 6990, September 7) to fix the time during which an American citizen may live in Canada without becoming subject to compulsory military service. Previously the rule had brought an American under the Regulations only after 12 months' residence in Canada.

After six weeks' residence in Canada, citizens of the United States are required to register under the National Registration, through the local Postmaster.

Proof Required of Army Rejection

ARTHUR MacNAMARA, Director of National Selective Service, announced on September 1 that active consideration is being given by the Minister of Labour to issuing an order under authority of National Selective Service Civilian Regulations, requiring employers to satisfy themselves that all male employees in age and marital classes designated under Mobilization Regulations, are in possession of papers to show that they have been rejected by the Army or discharged from the Forces, or otherwise that they have complied with Mobilization Regulations.

"While it may be some little time before an order to this effect is actually issued," Mr. MacNamara said, "the delay will be due largely to the necessity of giving the men an opportunity of securing the necessary documents, if they do not already possess them."

Mr. MacNamara pointed out the several types of documents which are involved. Men who tried to enlist voluntarily in the Army but were rejected because of medical unfitness, should apply to the district military Headquarters where they had applied for enlistment in order to obtain a rejection form if they do not already possess one. Men discharged from

the Navy, the Army, or the R.C.A.F., who may have lost their discharge certificates, should make application to the District Officer Commanding in the district where they were discharged. Unless the men have been granted a postponement of military training, men who were medically examined as a result of a Notice or Order—Medical Examination from a Divisional Registrar of a Mobilization Board, and who do not hold a Medical Unfitness Certificate, should immediately apply for such a Certificate to the Registrar for the Division in which they now live.

"In any event," Mr. MacNamara said, "under the employment permit system most men require sooner or later to go to an Employment and Selective Service Office. Before being dealt with at one of these offices, a man requires to have his documents."

Mr. MacNamara added that in any case where a man may be of military age, but is not in a class designated under the military call-up by reason of being a married man, he should be able to produce a copy of his marriage certificate proving marriage before July 15th, 1940.

Campaign for Farmers to Take Off-Season Work

A campaign to secure the services of farm workers for transfer to essential industries during the slack season on the farm is being carried out by the Department of Labour, in co-operation with the Provincial Departments of Agriculture, it was announced recently by Mr. Arthur MacNamara, Director of National Selective Service.

"To a considerable extent," Mr. MacNamara said, "fuel wood cutting and other woods operations have always depended upon the assistance of workers from agriculture during the Fall and Winter months, in order to secure their production. Similarly, in some parts of the country, coal mining, base metal mining and fish packing establishments have also in the past leaned heavily upon the farmer during his slack season. Due to the war, the large numbers of workers available for these seasonal industries—a regular feature of the Canadian employment situation—have virtually disappeared. Many have gone into the Forces, while others are now steadily engaged in essential industries. In view of this fact, we must depend to an even larger extent upon securing men from the land while they

are not needed at home. Moreover, due to labour shortages, additional industries now look for men off the land: railway track maintenance and packing plants are among the industries now asking the services of farmers for the Fall and Winter."

Mr. MacNamara said that it was impossible to form a close estimate of the number of farmers sought by industry, but probably it would exceed 150,000 across Canada.

The Department of Labour points out that workers in agriculture who have secured postponement of military training by reason of their occupation, will be allowed to continue on postponement if they accept approved essential employment during the slack season.

"There is no thought of interfering with farm production," Mr. MacNamara explained. "We do not want men while they are still required on the land for Autumn work, nor do we want to take away from the farm any man who is needed there for year round work. Nevertheless, there is a substantial margin of men who may be spared during the next few months, and those are the men whose services we wish."

The agreements between the Dominion and the Provinces for farm labour recruitment provide that Provincial Field Organizations will assist the Dominion in locating farmers for other essential industries in the off-season, and all the Provincial Organizations have

been approached and are co-operating with Selective Service in the present campaign. Also, several hundred local Farm Production Committees, organized by the Provinces have undertaken to participate in the campaign.

Further Control of Labour Turnover in Great Britain

STEPS have recently been taken in Great Britain to control the movement from job to job of workers not covered by Essential Work Orders. Transfers of the eight million workers subject to the Essential Work Orders are already controlled through the obligation on both employers and workers to obtain the permission of a National Service Officer before terminating any employment. The Essential Work Orders apply to designated industries of vital importance to the war effort or the life of the community such as munitions, shipbuilding, iron and steel, coal mining, etc.

The Control of Employment (Notice of Termination of Employment) Order which went into effect on August 20 is designed to prevent labour wastage through workers failing to register at an employment office or delaying their entry into new work immediately after leaving their job. It applies to both paid and unpaid work, and to full-time and part-time work of at least twenty hours a week. Under it, employers of men between 18 and 64 and of women from 18 to 59 are

required to notify a local office of the Ministry of Labour and National Service whenever a worker gives notice of his intention to leave his employment or leaves without notice. The worker is still free to seek new employment himself, provided he is not covered by any order which requires him to seek employment through a local office. However, if the local office finds that he has not taken up work of national importance, it may use its powers of compulsory transfer. These powers will not normally be exercised in respect of men and women who have not yet been called on to register for employment unless they have special skill or are being withdrawn from a concentrated industry. At present men up to 51 and women up to 45 have been registered. Exempt from the Order are groups such as dockers whose movements between jobs are already controlled through other administrative arrangements, persons directed into employment or called up for military service, casual workers, seasonal workers in agriculture, and clergymen, doctors and dentists.

Manpower Mobilization in Great Britain

THE following information recently published by the British Ministry of Labour gives an indication of the remarkable extent to which the men and women of Great Britain are mobilized for the war effort.

At mid 1942 the total male population in Britain between the ages of 14 and 64 numbered 15,900,000. Of these 15,200,00 were engaged in full-time paid service or employment for the country.

There were 17,230,000 women in the same age group. Of these 7,100,000 were in full-time paid service or employment, this figure including 2½ million married women. There

are in Great Britain over nine million children under 14 to be looked after.

Of single women between the ages of 18 and 40 over 90 per cent are engaged in the war effort.

The number of women in part-time employment is about 650,000.

Women have taken a large share of the munitions work in Great Britain. In engineering and allied industries 34·4 per cent of the workers are women; while in chemicals and explosives 50·0 per cent are women.

Over one million more men are employed on munitions than at the end of the last war.

Decisions of National War Labour Board

THE National War Labour Board has in recent months issued decisions in the following cases:—

In the matter of Ford Motor Company of Canada, Limited, and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 200.

Re Outboard, Marine and Manufacturing Company of Canada, Limited, and the Employees' Association of Outboard, Marine and Manufacturing Company of Canada, Limited.

In the matter of the Canadian Bank of Commerce and the rank of its junior managers in the Province of Nova Scotia.

Re United Mine Workers of America, Dist. 18—application for increase in basic rates and for overtime payments in domestic coal fields of Alberta and British Columbia.

In the matter of Lake of the Woods Milling Company, Limited, and the inauguration of a group life insurance plan for its employees.

In the matter of Viceroy Manufacturing Company Limited (West Toronto) and the extension of its group life insurance plan.

Re McKinnon Industries Limited, St. Catharines, Ontario.

Re United Steel Workers of America and Dominion Steel and Coal Corporation Limited, Sydney, N.S., and Algoma Steel Corporation, Limited, Sault Ste. Marie, Ontario.

Re National Maritime Federation, National Seamen's Association of Canada and various shipping companies.

In the matter of C. Beck Co., Limited, appeal from the Ontario Regional War Labour Board direction of payment of full cost-of-living bonus.

In the matter of International Harvester Company of Canada, Limited (Lethbridge, Alta.).

In the matter of Canadian Car Munitions, Limited, and Ammunition Workers' Union of Cherrier (Local 23216 AFL).

Re International Brotherhood of Firemen and Oilers, Round House and Railway Shop-workers and Canadian Pacific Railway Company.

In the matter of Rothwell Mine Workers' Union and W. Benton Evans.

Re Hamilton Construction Association and Builders' Exchange and United Brotherhood of Carpenters and Joiners of America Local 18.

Re Rogers Majestic Limited.

Re Safeway Stores Limited (Alberta).

Re Dominion Fire Brick and Clay Products Ltd., Claybank, Sask., and Clay Products Workers' Union C.C.L.

Re Metal Trades Section of the Canadian Manufacturers' Association at Vancouver, B.C., and Moulders and Foundry Workers' Union, Local No. 1, Vancouver, B.C.

Re Employing Printers' Association of Montreal, Inc., and L'Association des maîtres-imprimeurs de Montreal, Inc., and Federation of International Printing Trades Unions of Quebec and La Fédération des métiers de l'imprimerie du Canada, Enrg.

In the matter of Ford Motor Company of Canada, Limited, and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 200

Reasons for Decision

This is an appeal from the Ontario Regional Board, and, in effect, is a rehearing of the parties' application to obtain approval of a new working condition provided in their agreement dated December 31, 1942, as follows:—

"The Company will pay all hourly rated employees, when commencing their work between the hours of 1 p.m. and the following 5 a.m., an extra five cents (5c.) per hour for time worked."

The National Board first dealt with this case on reference by the Regional Board and on April 19, 1943, it advised that a premium payment should be made but only "for the time worked between the hours of 7 p.m. and

the following 7 a.m." The Regional Board issued a decision accordingly and the parties have taken this appeal on the ground that the restriction placed upon the scope of the clause has made the premium payment very difficult from a practical point of view. With the exception of 187 men of the 6,822 affected by the ruling, it would mean a splitting of each shift worked into two parts for payroll purposes; in some cases the fractional shift one way or the other would be as low as 15 minutes.

While it may be said in a general way that the Company operates three distinct shifts, it was disclosed on this hearing that the starting times are by no means uniform. Because

of transportation difficulties and for other reasons, large numbers of men begin work at odd hours in advance of the normal starting times of 8 a.m., 4 p.m. and midnight. This evidently provides the explanation for the wording of the clause in question—a fact on which no evidence was offered on the previous hearing.

In the light of this evidence it seems clear that to apply the 7 p.m. to 7 a.m. formula rigidly in these circumstances would result not only in grave difficulties in accounting from the Company's viewpoint but also in a great deal of confusion and perhaps suspicion on the part of the workers.

Having in mind the necessarily complicated system of times of starting work in this particular Company's operations—a matter on which both parties were silent unfortunately when the matter was dealt with before, we

feel that from a practical viewpoint we should allow the appeal and approve the clause as originally drafted.

The Union contends that the effect of this decision should be retroactive to the date of the agreement. We believe that effect should be given to this contention. Because, however, of the large labour turnover in the plant, we do not think that the Company should be called upon to pay the retroactive premium to employees who have left prior to June 30, 1943, unless they have gone into the Armed Forces.

The premium is not to exceed five cents (5c.) for overtime. In other words, for the purpose of calculating overtime, the wage rate without premium is to be the base with the premium subsequently added.

The appeal is, therefore, allowed in the terms above-mentioned. September 2, 1943

Re Outboard, Marine & Manufacturing Company of Canada, Limited, and the Employees' Association of Outboard, Marine & Manufacturing Company of Canada, Limited

Reasons for Decision

The parties join in an appeal from a decision of the Ontario Regional Board denying their application for permission to inaugurate payment of a 5 per cent premium for time worked on the night shift.

The Company is engaged in the manufacture of war supplies and operates two shifts: a day shift beginning at 7 a.m. and a night shift beginning at 6 p.m.

The evidence establishes that comparable employers representing approximately 85 per cent of industrial employment in the Peterborough area were paying a night shift differ-

ential prior to the effective date of the Wages Control Order. The applicant Company now finds itself at a disadvantage when it must increase its night shift personnel considerably to meet production schedules.

Having regard to the circumstances, we find it consistent with the principles of the Order to permit payment of the 5 per cent premium on straight time worked between the hours of 6 p.m. and the following 7 a.m.

The appeal is therefore allowed and the application granted as of January 16, 1943.

September 2, 1943

In the matter of the Canadian Bank of Commerce and the rank of its junior managers in the Province of Nova Scotia

Reasons for Decision

The appeal is taken from a decision of the Nova Scotia Regional Board. The application was made to have the junior managers employed by the Bank receiving a salary within the range of \$2,000 to \$3,000 per annum declared to be of or below the rank of foreman or comparable rank and therefore subject to P.C. 5963. The Regional Board decided that employees of this classification earning more than \$2,100 were not under the Wartime Wages Control Order because the "discretionary powers" which they exercised placed them above the rank of a foreman.

Under Section 13 of the Order the question turns on whether the duties and responsibilities

of these branch managers, earning between \$2,100 and \$3,000 per annum, are of an "executive character." The fact that they have certain discretionary powers, for instance in the making of small loans or in managing the day to day routine of the branch, does not in our opinion make them executives in the ordinary business sense of that term. They are, as the appellant's brief discloses, under the constant supervision of a Superintendent of branches and in our opinion, it would be more appropriate to classify them, for the purposes of P.C. 5963, as being not above the rank of foremen.

The appeal should therefore be allowed.

September 4, 1943

Re United Mine Workers of America, Dist. 18—application for increase in basic rates and for overtime payments in domestic coal fields of Alberta and British Columbia

Reasons for Decision

In this matter the Board following hearings on May 18 and May 19, 1943, issued an interim directive dated July 2, 1943, by which upward adjustments of wages in the Edmonton and Carbon areas were authorized. The question of adjustments in other areas and further adjustments, if any, in the Edmonton and Carbon areas was referred to Mr. W. H. Ley for investigation and report. (LABOUR GAZETTE, September, 1943, page 1257.)

Mr. Ley's report, after a considerable amount of time spent going into the situation in the coalfields with representatives of the Union and the operators, has now been received. We feel that we can proceed to dispose of the matter of wage adjustments on the basis of that report, without further hearings.

The application was to have the basic rates in the domestic coal mines made uniform and brought to \$5.78 per day, the rate prevailing in the bituminous coal mines. It was also requested that contract rates should be increased in certain mines.

It must be kept in mind that our authority to grant increases in wages is contained within the limits of section 25 of P.C. 5963. This limitation was paid little attention to by the applicant union in presenting the case before us. Hence the necessity of appointing a referee.

From the report submitted by Mr. Ley we have reached the following conclusions as to dated rates:

(1) In the Coal Branch District where the existing rate is presently \$5.51 per day the conditions of mining and proximity of the mines to the bituminous mine area justifies us in advancing the rate to \$5.78 as requested.

(2) In the Saunders and Alexo District where the existing rate is \$5.59 per day, on the same evidence and reasoning we think the rate should be increased to \$5.78 per day.

(3) In the Drumheller and East Coulee District and the Lethbridge District where the rate presently paid is \$5.51 per day we

find that the 1926-29 rate was \$5.57 per day and on a comparative basis the present rate may be said to be to some extent depressed. Accordingly we think that an increase to \$5.57 per day is justified.

(4) In the Edmonton and Carbon Districts where the rate was increased by our former interim directive to \$5 per day we are of the opinion that the conditions of mining are sufficiently similar to those in the Drumheller and Lethbridge Districts that it should be increased to \$5.57 per day.

(5) In the Princeton District where the rate is \$5.51 per day we feel that it should be increased to \$5.78 per day, the rate now in effect at one of the mines on Vancouver Island.

As to contract rate increases applied for we have reached the following conclusions:

(1) The application for increase in mine contract rates and timbering at East Coulee Mines cannot be given effect to under Section 25.

(2) Timbering rates at Rosedale Collieries should be increased to the level of those prevailing at Drumheller, viz.:

	Per set
Entries and rooms notched and lagged	\$1.13
Entries and rooms round timber lagged75
Bridge sticks not notched.....	1.70
Needle sets42½

(3) In Edmonton and Carbon Districts contract mining rates should be increased by 12½ per cent.

(4) There should also be 12½ per cent increases in mining contract rates at the Chester Mine, the J. J. Hamilton Mine and the Strickland and Tenant Mine in the Lethbridge coal field.

All increases should be retroactive to the 16th day of May, 1943. The question of ability to pay is of importance and also we think that uniformity in retroactivity is desirable.

When formal finding and direction is issued a schedule of all rates involved will be attached.

September 4, 1943

In the matter of Lake of the Woods Milling Company, Limited, and the inauguration of a group life insurance plan for its employees

Reasons for Decision

The applicant company appeals from decisions of the Regional Boards for Ontario and Manitoba with respect to an application for permission to inaugurate a group life insurance plan. The plan provides coverage, scaled to

employees' earnings, for amounts ranging from \$750 to \$5,000. Premiums are to be paid by the company without contribution by the employees. The plan has been approved by all of the Regional Boards with the exception of Prince Edward Island and the two Boards whose decisions are now under review.

The Ontario Board withheld its approval on the ground that the plan did not provide for contribution by the employees to the extent of at least 30 per cent of the premiums. As a rule, plans such as this are on a contributory basis and we agree that they should be examined with particular care when the entire cost is to be borne by the employer. However, this is a case where there is more or less seasonal employment in many of the company's establishments and at wages which are perhaps not as high as those prevailing in many industries. The appellant operates none of the usual employee welfare plans which have become a common practice for many employers. Under these circumstances, we are of the opinion that the appeal from the Ontario Board should be allowed.

The Manitoba Board has approved the application but with the qualification that the limit of coverage for any one employee be \$2,500. The material filed in support of the

appeal discloses that there are only seven (7) employees affected by the restriction. We are in agreement with the Regional Board's view that for the higher-paid brackets, plans of this kind should be scrutinized with perhaps greater caution. However, we do not think that any inflexible level can be set. The company is of course desirous to have uniformity throughout the eight (8) provinces in which its business is conducted and the small number of employees involved here would seem to us to make it unnecessary to disturb the appellant's over-all plan. It may be that some of the higher-paid employees are "salaried officials" and therefore outside our jurisdiction. In so far as we have jurisdiction, we think the appeal should be allowed.

It should be understood that our decision is no assurance that the expense involved will be approved by the taxation authorities as a deduction from the company's income.

September 8, 1943

In the matter of Viceroy Manufacturing Company Limited (West Toronto) and the extension of its group life insurance plan

Reasons for Decision

The appeal is from a decision of the Ontario Regional Board. The Company in 1924 inaugurated a contributory group life insurance plan. The application was for permission to increase the coverage for certain employees, at the Company's expense and on the basis of length of employment. The Regional Board refused permission on the ground that the employees benefitting would make no contribution to the cost of the extended insurance.

It appears that the additional premium is little more than 10 per cent of the present cost of the plan of which the employees pay approximately one-half. If the extension be

allowed, the contribution of the employees will still be quite substantial. Also because the purpose of the extended coverage is one which, if possible, should not be discouraged and because it is confined within reasonable limits, we think the appeal should be allowed. Of course, we have no jurisdiction with respect to employees who fall under the wartime salaries order.

It should be understood that our decision is no assurance that the expense involved will be approved by the taxation authorities as a deduction from the company's income.

September 9, 1943

Re McKinnon Industries Limited, St. Catharines, Ontario

Reasons for Decision

The above named Company made application dated May 8, 1943, to the Ontario Regional Board for authorization to pay foremen and other salaried employees overtime at the rate of time and one-half, the prevailing rate paid production workers on hourly wages. The Regional Board declined to grant the authorization in the terms applied for but did authorize the Company to pay such employees at pro rata rates for all time worked beyond the standard work week. The Regional Board has granted the necessary leave to appeal under date of July 16, 1943.

As the subject matter of this appeal is one that is causing considerable confusion at the

present time, we feel it advisable to deal with the question in writing.

As regards the foremen in this particular plant, it appears that shortly before the application was made to the Regional Board some of them were paid on an hourly basis and for that reason were entitled to overtime payment on a time and one-half basis. Others were on a salaried basis. As a matter of policy all foremen were put on a salary basis just prior to the application to the Regional Board.

It would seem clear that under the Regional Board's ruling those foremen who had been working on an hourly basis have suffered a reduction in pay. This we deem contrary to

the principles of P.C. 5963. To this extent at least the decision of the Regional Board cannot be sustained.

However, the matter should be regarded on even broader principles. In these days of man-power shortage it is extremely difficult for an employer to obtain additional help. The one logical way to compensate for the difficulty is to ask the existing staff to work longer hours. If salaried workers are willing to do so and there is no evidence that their salaries are fixed on the assumption that overtime work will be required without extra remuneration we see no reason why they should not receive the same treatment as production workers on an hourly basis. In this particular case we understand the normal work week for foremen is 48 hours. Therefore we feel that a finding and direction should go authorizing the Company to pay time and

one-half for all hours worked in excess of 48 hours weekly.

The case of other salaried employees may be somewhat different. We assume that among the salaried employees in question are office workers. The standard week of office workers varies with different plants. It may be that war production necessitates an extension of the office worker's work week. Accordingly, in these cases we think that workers in this class should receive pro rata rates for the excess time worked over the normal work week up to 48 hours. If they work over 48 hours weekly they should be entitled to payment at the rate of time and one-half for time worked over the 48 hours.

The appeal should be allowed and finding and direction issued accordingly.

September 9, 1943

Re United Steel Workers of America and Dominion Steel and Coal Corporation Limited, Sydney, N.S., and Algoma Steel Corporation Limited, Sault Ste. Marie, Ontario

Reasons for Decision

This is an application under P.C. 689 and our former judgment dated 31st March, 1943, for restoration of differentials which obtained prior to increase of the base rate to 50 cents an hour. The application also in substance asks for a further increase in the base rate to 55 cents an hour.

With regard to the application for increase of the base rate to 55 cents an hour it seems quite evident that the jurisdiction given us under P.C. 689 has been exhausted by our judgment of the 31st day of March, 1943, which completely adjudicated on this matter. Accordingly, we must dismiss the application for any increase in the base rate without prejudice to any further application to the proper Regional Boards.

The question of restoration of differentials was dealt with in our former judgment with a view to having the matter cleared up reasonably promptly after an opportunity for negotiation had been given. However, the Union did not elect to file its application in this respect until the 14th of July, 1943. Since shortly after the 1st of August the Union has been putting on a great deal of pressure to have the matter heard and disposed of. Finally after the Union had signified its willingness to have the case heard by a quorum of the Board, September 8th was set as the date of hearing. On that day a further adjournment was requested until to-day, September 9th. At the opening of the case this morning counsel for the Union, in spite of the agreement, elected a further adjournment until it was arranged that the full Board would be available to deal with the matter. His application was granted.

However, since the adjournment, we have had an opportunity to examine carefully the written briefs filed. We feel we can proceed to dispose of this branch of the case without further argument. Furthermore, in the interest of the workers concerned, we are of opinion that this should be done without subjecting them to further delays.

We can understand and sympathize fully with the position of the more skilled workers whose differential was taken away when the base rate was increased to 50 cents per hour. There has been no valid reason why their case should not have been dealt with long ago.

Accordingly, in the case of Dominion Steel and Coal Corporation Limited, we have reached the conclusion that in the case of workers receiving more than the former base rate of 43½ cents per hour as at March 23, 1943, there should be a general increase of 6½ cents per hour. In the case of Algoma Steel Corporation Limited, workers receiving more than the former base rate of 45½ cents per hour as at March 23, 1943, should be entitled to a general increase of 4½ cents per hour. It should be understood that the increases hereby directed apply to maintenance men as well as to production workers. All increases should be retroactive to the first pay period commencing subsequent to March 23rd, 1943.

In view of the long delay in presenting the case the Companies should not be obliged to make retroactive payment to persons not presently in their employ except those who have become members of the Armed Forces.

There will be finding and direction accordingly.

September 9, 1943

Re National Maritime Federation, National Seamen's Association of Canada and various shipping companies

Reasons for Decision

This is an application for upward revision of salaries and wages for both licensed and unlicensed personnel.

As regards Captains and Chief Engineers, we have already decided (Canadian Navigators Federation Incorporated and National Association Marine Engineers of Canada Incorporated) that we have no jurisdiction, these coming under the Salaries Order.

This is in reality a renewal of a former application which was refused and in this type of case we have given the opinion that there is an unusual onus on the applicant to show that there has been a change in conditions or new evidence to justify a reversal of the former decision. See Brotherhood of Railway and Steamship Clerks, Freight Handlers,

Express and Station Employees at Port McNicoll. (LABOUR GAZETTE, September, page 1262.)

Far from trying to establish that new and different conditions now prevail, the applicant unions did not even try to put the case on a comparative basis as required by Section 25 of P.C. 5963. The only comparison offered was that with American rates, which, under P.C. 5963, is irrelevant.

Since the hearing took place we have made a careful analysis of comparative rates paid similar occupations by other Canadian shipping companies. This has led to the conclusion that we cannot raise rates as applied for.

Accordingly the application is denied.

September 9, 1943

In the matter of C. Beck Co. Limited appeal from the Ontario Regional War Labour Board direction of payment of full cost-of-living bonus

Reasons for Decision

This is an appeal from a decision of the Ontario Regional Board of March 27, 1943, by which the Regional Board increased the cost-of-living bonus to \$4.25 from 60 cents, which has been paid by the company prior to that date.

When it comes to a question of adjusting the cost-of-living bonus, the boards obtain their sole authority to do that under a proviso at the end of section 34, subsection (3) of order in council 5963; and in adjusting the cost-of-living bonus the board is limited to an adjustment within an industry. It is not the same principle that applies in connection with the matter of an increase in wages.

It appears quite clear that this company operates three plants, one at Toronto, one at New Toronto and one at Penetanguishene, and that in Toronto and in New Toronto the cost-of-living bonus paid to adult male employees is at the rate of \$3.50 weekly, while in Penetanguishene before the decision of the Ontario Regional Board, which is now appealed from, the cost-of-living bonus paid was 60 cents.

The Company's position in connection with this matter is one of inability to pay, and examination of the financial statements that have been filed—although they are rather unsatisfactory for the purposes of the Board—do indicate that the ratio of current assets to current liabilities is on the wrong side, and the company probably would be in a great deal of difficulty were it not for advances made to it by Mr. Beck personally.

However, I think we must reach the conclusion that in spite of the plea of inability to pay, the company has very recently, and since the decision of the Ontario Regional Board, increased wages by 5 cents an hour to men and by 2½ cents an hour to boys under eighteen, which to us seems to indicate that the company now finds itself in a position on prospects where it deems it advisable to grant those increases, although evidently the increases have been made without authority from the Regional Board.

In the circumstances here we have no comment to make in that regard, although the company may find itself in an awkward position in respect to the step which it has taken.

Therefore we feel that on the issue, the sole issue before us, which is the question of the cost-of-living bonus, there was no ground upon which the Ontario Regional Board could increase the cost-of-living bonus from 60 cents to \$4.25 weekly; but under order in council P.C. 2370 it would appear that there was authority, in adjusting the cost-of-living bonus within an industry, to increase the amount to \$3.50 a week, which is the cost-of-living bonus being paid in the Toronto and New Toronto plants.

Accordingly we will allow the appeal to the extent of reducing the \$4.25 weekly to adult male employees to \$3.50, with the ordinary adjustments in respect of male employees under 21 and female employees, if there are any.

What the company is going to do in the circumstances about the five cents and 2½

cents increases which it has recently given is a problem for it to adjust with the men.

So to that extent the appeal will be allowed, and the direction and finding will issue on

these terms. This will be effective from the same date that the judgment appealed from became effective, namely, December 15, 1942.

September 10, 1943

In the matter of International Harvester Company of Canada, Limited (Lethbridge, Alta.)

Reasons for Decision

This is an application for leave to appeal from a finding and direction of the Regional Board for Alberta. The Company had made application for permission to establish the following occupational classifications and basic wage rates:

Secretary	\$135.00
Senior stenographer.....	96.00
Junior stenographer.....	78.50

The Regional Board authorized increases to two stenographers from \$80 to \$85 and in

effect did not deal with the application as made, but reviewed a previous decision on an application for increases to two named employees. It appears that one of the two stenographers has left the employ of the appellant.

Leave to appeal should be granted and on the merits our opinion is that on the principle of comparison in section 25 of the order, the rates applied for are not enhanced and should be approved.

The appeal is therefore allowed with effect from March 22, 1943.

September 10, 1943

In the matter of Canadian Car Munitions, Limited, and Ammunition Workers Union of Cherrier (Local 23216 AFL)

Reasons for Decision

Leave is granted to the Union to bring this appeal from the Quebec Regional Board involving four issues with which we shall deal separately:—

1. *Allocation of occupational classifications to rated categories A, B, C and D.*—There is a contract between the employer and the Union, dated August 3, 1942. It does not specify rates of pay but clause 10 provides that the wages to be paid to the various occupational classifications would be "as directed and approved by the Government". The parties at the time were negotiating with respect to both rates of pay and occupational classifications and the contract merely noted that any wage increases would have to be either approved or directed by the Regional Board, depending upon the outcome of the negotiations. No agreement having been reached, an application was made by the Union to the Regional Board for a general 25 per cent wage increase. By finding and direction dated August 25, 1942, a 15 per cent increase was directed to all hourly-rated employees with the exception of skilled tradesmen and their helpers. The parties then proceeded to negotiate with respect to classifications. The workers affected, both male and female, were divided into four categories and a range of rates, within the increase authorized, was set by the Regional Board for each category. It was then left to the parties to allocate individual job classifications to one or other of the four categories.

As a result, grievances arose and the parties agreed to resort to the arbitration clause of their collective contract. The written submission is dated April 19, 1943, and states that "the question of categories at Cherrier will be arbitrated following the routine laid down in the agreement". It was further agreed that the decision of a majority of the Board of Arbitration would be final and binding upon all parties concerned. By unanimous report dated April 29, 1943, the Arbitration Committee under the chairmanship of Mr. Bernard Rose, K.C., dealt with the various complaints and allocated job classifications to the wage categories.

The appeal is in effect against the report of the Arbitration Committee. That being the case, we cannot overlook the presumption existing in favour of the validity of an arbitration award. It is a well established principle in arbitration matters that, in the absence of fraud or its equivalent, an award should not be interfered with unless it be shown that the arbitrators failed to give the parties a fair hearing or that they went outside the terms of the submission to arbitration. After a careful reading of the elaborate brief presented by Mr. Jodoin, we have come to the conclusion that the evidence submitted does not warrant interference on those grounds. To set aside the report of the arbitrators in this case would be doing violence to the fundamental purpose of the process of arbitration. We must therefore dismiss this branch of the appeal.

2. *Inauguration of wage rate for new category "E".*—On September 21, 1942, the Union applied to the Regional Board for the establishment of a new wage category "E" for certain classifications, with hourly increases, over category D, of 5 cents for women and 10 cents for men. By finding and direction dated October 14, 1942, the Regional Board refused the application on the ground that no case had been made out within the terms of section 25 of the order in council.

We are now asked to approve the new category and to direct hourly increases of 5 cents to both men and women classified within it, because of the more difficult or more hazardous nature of their work.

Our duty is to interpret and apply the wartime wages control order. The powers given to us by that order in the matter of wage increases are dependent upon a finding that the rate applied for is comparable with the rates generally prevailing for similar classifications in a comparable locality. The Union has not made out a case on that basis; and we have no alternative but to confirm the Regional Board's decision.

3. *Fifteen per cent wage increase to guards.*

—This issue is related to the decision of the Regional Board dated August 25, 1942, directing the general 15 per cent wage increase to all workers paid on an hourly basis with the exception of certain named tradesmen and their helpers. The question to be decided is whether the plant guards were included in the over all 15 per cent wage increase. The claim on behalf of the employees is that the Quebec Board's decision applied to all hourly rated workers and that the guards were not excepted. The company says that the application which brought down the decision was made on behalf of the "production workers" and that the company's police force were not meant to be within that description. It is also said that the guards did not participate in the representation vote by which the Union became the bargaining agency of the employees. By a finding and direction dated April 14, 1943, the Regional Board interpreted its previous decision and excluded the guards from the coverage of the general increase. The decision is based upon the terms of the application and upon the fact that the guards were given what amounted to more than a 15 per cent increase in January of 1942. The Regional Board also found that the present rate of pay for this classification at Cherrier was equal to or higher than that paid to similar classifications at other munition plants. Such a finding having been made by the Regional Board and no evidence offered to

show that the finding was erroneous, we cannot interfere.

4. *Transportation allowance.*—The Union's application is for a maximum daily transportation allowance of 40 cents to workers not enjoying the benefit of free train service from the city of Montreal. The allowance is computed on the basis of 2 cents per mile up to 20 miles per day. A considerable number of employees are unable to use the transportation service provided by the company, because in the main they reside east of Cherrier. This differential between workers is a source of dissatisfaction in the plant. The Union's proposal, on account of varying distances, does not appear to be one which can be put into effect without a good deal of difficulty and risk of confusion and we are not disposed to direct its adoption. However, we do think that the employer would be well advised to provide free transportation from Joliette and we are prepared to give the necessary authorization to that effect on application being made.

Findings and directions will go on in accordance with the above disposition of these four issues.

The Union introduced on this appeal a new matter which was not dealt with by the Quebec Regional Board—namely the enforced collection of Union dues by the Company. We are of course dealing with the matters presented in an appellate capacity and cannot undertake any original jurisdiction. Moreover we are quite definitely of opinion that this is a subject with which neither this Board nor the Regional Boards have any powers under the governing orders in council. Accordingly this application must be dismissed.

Before parting with the matter we should state that in our opinion a great deal of the difficulty has resulted from the manner in which Allied War Supplies Corporation has intervened in the negotiations and before the Regional Board and this Board as well. We can quite understand, in view of the contractual relationship between Canadian Car Munitions Limited and Allied War Supplies Corporation, that matters concerning labour relations should be subject to the approval of the latter Company. The continual intervention in these matters by Allied War Supplies Corporation has, however, quite evidently had an unnecessary and upsetting effect on the relationship between Canadian Car Munitions Limited and its employees. The question of whether a specific matter arising in the process of collective bargaining meets with the approval of Allied War Supplies Corporation is surely a matter between the two com-

panies. Any difficulties arising should not be given the appearance of an issue between Allied War Supplies Corporation and the

Union representing the employees of Canadian Car Munitions Limited.

September 17, 1943

Re International Brotherhood of Firemen and Oilers, Round House and Railway Shopworkers and Canadian Pacific Railway Co.

Reasons for Decision

This is an application for vacations with pay for employees represented by the applicant union.

In a recent decision (June 4, 1943) vacation with pay was granted to the Federated Trades Employees in the locomotive and car departments of the Canadian Pacific Railway upon the same terms and conditions as those enjoyed by like classes of employees of the Canadian National Railways. In that case (Division No. 4 case) it was pointed out that the most important consideration leading to the decision was the fact that some 60 per cent of the workers involved already enjoyed the privilege. It was also carefully pointed out that that decision was not to be construed as any precedent for establishing vacations with pay for other classes employed on the railways in time of war.

It appears that the employees, upon whose behalf the application is made, to a large extent work in the round houses where the Federated Trades (Division 4) work as well, although the corresponding classes on the Canadian National Railways do not enjoy vacations with pay.

As was pointed out in the Division 4 decision, there is manifest a growing tendency to

allow vacations with pay in industry. In the United States we believe the privilege is enjoyed by all railway classes except the running trades. It may be that the time has come when vacations with pay should be recognized as a general principle, subject to exceptions of course.

However, it appears that this Union has served notice of termination of its existing agreement and desires to renegotiate the same. In other words, the agreement is now open for bargaining on all its terms. We feel that it should be the policy of the Board to interfere as little as possible in the bargaining field, particularly when the Union alleges that the field is now wide open as a result of the notice served.

Accordingly, we refrain from making any direction on this question at this time but recommend that this matter be considered by the parties in the process of negotiating any new agreement. We do not shut the door to the applicant union when it is able to establish that it has a valid subsisting agreement. In the meantime, however, we do not think it fitting that we should deal with the case.

Finding and Direction accordingly.

September 17, 1943

In the matter of Rothwell Mine Workers' Union and W. Benton Evans

Reasons for Decision

We think we can dispose of this matter without reserving the question.

Somewhat the same principle that is involved here was involved in the case of the Malagash Salt Mines, which we dealt with some time ago. It is quite evident to us, that the wage level in the mine concerned here is low, compared with operations in Nova Scotia, which is perhaps the nearest point. As Mr. Evans has quite freely stated, mining coal in this mine is as difficult, or perhaps more difficult, than is the average in other mining operations, in this country at least.

The whole question from the point of view of the employer is his ability to pay with a price ceiling on his product. Accepting that statement as a correct view of the matter, it becomes quite apparent that any increase in wages has got to be found, in some way, from the office of the Coal Administrator.

Of course, this is a problem between the company and the Coal Administrator, and it appears plain from the material presented that the Coal Administrator has full knowledge of the company's financial position.

We feel that effect has got to be given to the application of the miners under section 25 of the Act, on a comparative basis, and since the employer, Mr. Evans, has taken the position that any increase awarded should apply also to the foremen and office staff, and any others who are not in the same category as belong to the union, we think we should grant an increase to all of the employees of the mine of 20 per cent over their present rates.

We may say it seems quite clear to us, that the relationship between the company and the union is one in which they are on the best of terms. We think the union will understand that, in view of the fact that the owner has to arrange to make recovery in some way or

other for the increase granted, through the office of the Coal Administrator, that the award cannot be made retroactive. We have dealt with the same situation in the same

way in the Malagash Salt Mines case. Accordingly the award now given will be effective from the 20th September, 1943.

September 24, 1943

Re Hamilton Construction Association and Builders' Exchange and United Brotherhood of Carpenters and Joiners of America Local, 18

Reasons for Decision

This is an appeal from a decision of the Ontario Regional War Labour Board granting an increase in wages to carpenters in the City of Hamilton from 90 cents to 95 cent per hour. Leave to appeal was granted by the Regional Board.

The case presented by the employers' association was founded largely on the proposition that the Joint National Conference of the Construction Industry of Canada held in February of 1941, composed of some thirty representatives of labour and some thirty representatives of employers, made the declaration that "wage levels in effect throughout the Industry at the outbreak of war were generally accepted as fair and equitable". They also relied on the wording of a resolution of the National Joint Conference Board of the Construction Industry dated May 3, 1943, to the effect that "any application to justify approval of any increase in basic wage rates would necessarily have to show exceptional conditions".

Since the hearing we have examined carefully the proceedings of the Joint National Conference and the National Joint Conference Board referred to. We are of opinion that these are both bodies of the nature of voluntary associations of employers and employees in the Industry and do not pretend in any way to exercise any rigid control of wage rates over and above the controls established by

Orders in Council of the Government. The fact is that in the resolution the right to individual members and labour bodies to invoke their rights under the Orders in Council of the Government is carefully preserved.

The Board has a great deal of confidence in the Joint National Conference and believes that the unions under its jurisdiction as well as the employers should fully subscribe to the principles of policy which it lays down. Undoubtedly this would be in the best long term interests of employer and labour alike. This is particularly the case in the matter of wages.

But we feel that we must decide this appeal not on the basis of the resolution referred to, but purely on that laid down in P.C. 5963. Viewing the matter this way, in order to allow the appeal we should have to reach the conclusion that the Regional Board was clearly wrong in its finding. Had the matter been before us originally we might have taken a different view. However, there was evidence on which the Regional Board's finding could be substantiated—particularly evidence to the effect that the rate of 95 cents per hour was already being paid in Hamilton to carpenters on war projects.

Accordingly, we have reached the conclusion that the finding and direction of the Ontario Regional Board cannot be disturbed in this particular case. The appeal must be dismissed

September 25, 1943

Re Rogers Majestic Limited

Reasons for Decision

This is an appeal from a decision of the Regional Board for Ontario declining approval of the appellant's application to extend from one to two weeks the paid vacation period of hourly-rated employees who had completed five years' continuous service with the company. Leave to appeal was granted by the Regional Board.

Prior to November 15, 1941, these employees were allowed a one-week paid vacation. The application to the Regional Board was to obtain permission to grant the one week vacation to all hourly-rated employees having completed one year's continuous service and for the extension of the vacation period for employees having five years' continuous service. The Regional Board has authorized the

first part of the application within the limits of the Board's decision bulletin No. 17, but has refused the extension. The result is that the older employees are now on the footing of employees who have been in the company's employ for one year, except possibly that they are not subject to certain of the bulletin's provisions, for example, with respect to absences from work. Under the circumstances, it is reasonable that the appellant should wish to restore a differential in the matter of paid vacations in favour of its older employees and we are of opinion that the appeal should be allowed. The appellant, however, should apply the conditions stated in decision bulletin No. 17 to the hourly-rated employees who will be receiving the two-week vacations.

September 29, 1943

Re Safeway Stores Limited (Alberta)

Reasons for Decision

The Company operates twenty-five retail meat and grocery stores in the Province of Alberta. On the effective date of the wartime wages control order, the basis of calculation of the wages paid to store managers and head meat cutters was the volume of business done in the particular store and, in the case of the other store employees, it was length of service and experience. In other words, on November 15, 1941, there was being paid to these occupational classifications a range of wage rates.

The Company applied to the Regional War Labour Board for permission generally to increase the wages of these employees, within the limits of the range, on the basis of calculation prevailing at the effective date. The Regional Board took the position that it could not deal with the matter broadly, and that increases would have to be viewed with reference to the rates prevailing in a given locality.

With due deference, we are of opinion that section 25 is not applicable here, because this is not an application for an increase in wage rates. The appellant is not asking for permission to alter the *basis* upon which it was remunerating its store employees. If it were, then we agree that section 19 would apply and that the yardstick of comparison prescribed by section 25 would have to be resorted to. The problem here finds its solution in the definitions of "wage rate" and "range of wage rates" provided by section 15 (1) (v) and section 17 (1) of the Order, and in the blanket authority given by section 24 (1).

What the Order stabilized was the basis of calculation of wage rates and the appellant is not seeking to alter the basis from what it was on November 15, 1941.

We take it that there is no question of new establishments or sites of operation, otherwise section 22 would have to apply.

The appeal is therefore allowed.

September 29, 1943

Re Dominion Fire Brick and Clay Products Ltd., Claybank, Sask., and Clay Products Workers' Union C.C.L.

Reasons for Decision

This is an appeal from a finding and direction of the Regional War Labour Board for Saskatchewan dated April 18, 1943, refusing to adjust cost-of-living bonus to \$4.25 weekly as applied for.

The only jurisdiction for adjustment of cost-of-living bonus is to be found in the proviso at the end of section 34. The adjustment must be one that is made *within an industry*. Comparison of the cost-of-living bonus paid by other industries in the locality is irrelevant under the proviso and no effect can be given to it in order to make the adjustment.

The case before the Regional Board and before us was based on the erroneous assumption that the adjustment could be awarded on the basis of comparison with other and different industries in the locality.

When the case came before us, some attempt was made to bring the matter within the proviso by examination of the cost-of-living bonus paid by other firms in substantially the same industry no matter where located. An examination of the wage data, however, in our opinion did not establish any inequitable combination of wage rates and cost-of-living bonus justifying any alteration in the decision of the Regional Board. To understand the intention of the proviso in question it is advisable to read the preamble to P.C. 2370 which brought about the amendment now incorporated in P.C. 5963.

Accordingly, we have no alternative but to dismiss the appeal.

September 29, 1943

Re Metal Trades Section of the Canadian Manufacturers' Association at Vancouver, B.C., and Moulders and Foundry Workers Union, Local No. 1, Vancouver, B.C.

Reasons for Decision

This is an appeal from a finding and direction of the British Columbia Regional War Labour Board dated the 24th day of March, 1943, in so far as it denied increases to moulders and coremakers, electric furnacemen, acetylene burners and welders, electric welders and machine moulders. As to increase granted

other classifications by the same finding and direction, there is no appeal.

The Metal Trades Section of the Canadian Manufacturers' Association represents a number of foundry operations in Vancouver, B.C., affected by the finding and direction.

From the record it is impossible to know whether there was before the Regional Board

certain evidence which was by admission before us on the appeal. The finding and direction of the Regional Board is in the usual form conforming with Section 25 of P.C. 5963, indicating that the comparative basis was used in finding that the increases asked should be denied. It appears that the rate paid moulders and the other classifications was 90 cents per hour in general. However, it was admitted before us that one of the companies concerned was already paying 92½ cents per hour and two others were paying 96 cents per hour. Besides this it was also admitted in evidence that certain firms were paying production bonuses in addition to the 90-cent hourly rate.

This is another example of where individual employers in their anxiety to retain or attract certain classes of workmen upset the wage structure throughout the industry, which in this case is substantial, and thereby produce unrest and dissatisfaction among the workers in other plants. It is regrettable that when all belong to the one representative organization they could not deal with the question in uniform fashion.

We feel in the circumstances and in conformity with Section 25 that part of the

increase requested should be granted. To grant the full increase asked for would quite evidently throw the whole wage structure out of line. When it comes to fixing the amount the only definite evidence we have are the present rates of 92½ cents and 96 cents presently being paid by some of the companies. What the net amount payable to these classes was under production bonus schemes, was not brought out in evidence. It would be a mere guess on our part to fix a wage at any figure higher than 96 cents per hour.

Accordingly, we are prepared to allow the appeal to the extent of an increase of 6 cents per hour bringing the hourly wage to 96 cents for the classifications concerned. However, in the case of the workers presently in receipt of a production bonus, the increase allowed is conditional upon them renouncing any right to a production bonus. To us this seems necessary to obtain peace in the industry as far as the workers are concerned.

Finding and direction accordingly.

September 29, 1943.

Re Employing Printers' Association of Montreal, Inc., and L'Association des maitres-imprimeurs de Montreal, Inc., and Federation of International Printing Trades Unions of Quebec and La Federation des metiers de l'imprimerie du Canada, Enrg.

Reasons for Decision

This appeal is from a decision of the Quebec Regional Board dated April 19, 1943, on an application by the unions for an increased minimum cost-of-living bonus to employees of the commercial printing industry in the Montreal area. Leave to bring the appeal was granted by the Regional Board.

The respective status of the parties in the industry was the subject of some discussion at the hearing. That these federations of trade unions and syndicates and associations of employers are representative of the employers and employees concerned, must, we believe, be taken as sufficiently established by the collective labour agreement governing employer-employee relationships in the industry and trades concerned. The parties before us were the parties to the collective agreement and their representative status was acknowledged by the provincial authorities when their contract was rendered obligatory and extended to non-parties under the terms of the Quebec Collective Agreement Act.

There is no provision in the agreement for payment of cost-of-living bonus. The evidence disclosed that a small minority of em-

ployers are paying the full bonus and that some of these operate private printing plants in conjunction with other businesses; a few others pay a bonus varying in amount between the high and low levels. By and large, however, the bonus paid in the industry is the 60 cents (2.4 points) made mandatory by general order of the Board on August 4, 1942.

Our jurisdiction with respect to the subject matter of this appeal is laid down in section 34 (3) of P.C. 5963, as follows:

"The National Board may direct any employer to pay a cost-of-living bonus calculated on the rise in the cost-of-living index number above the index number for such month prior to the month of October, 1941, as such Board finds fair and reasonable, but not, in any event, earlier than the effective date of the last general increase in wage rates paid by such employer and not earlier than August, 1939, whichever is the later."

A general increase of wages took place in January, 1940. It was an automatic 5-cent hourly increase flowing from an agreement made in 1937 providing increases for each of the years 1938, 1939 and 1940. These in-

creases were not specifically intended to indemnify workers against a rise in the cost of living and we cannot give effect to the contention of the employers that the 1940 increase should of necessity be considered as an instalment of \$2.20 (on the basis of a 44-hour week) on account of the full bonus. As far as the section in question is concerned, the effect of an increase since August, 1939, is merely to set a date for the calculation of the rise in the cost of living.

The employers have urged that the reduction of the work-week from 45 hours to 44 hours, effected in January, 1941, with maintenance of the prior weekly pay, was equivalent to a general wage increase. To reduce hours of work and maintain an over-all pay is undoubtedly to increase wages, although in the view we take of the matter it is unnecessary to decide that it is an increase of the type contemplated by the section.

We have come to the conclusion that in the circumstances of this case it would be fair and reasonable to direct payment of a cost-of-living bonus calculated on the rise of the 117.0 cost-of-living index number above the index number for January, 1941 (107.4 points), that is, a weekly bonus of \$2.40 or 9.6 per cent of basic weekly rates as the case may

be. This should be a minimum bonus and the higher bonuses being paid should not be disturbed.

The Regional Board apparently declined the general application, because it considered that any increase could be directed only upon applications concerning individual employers. We are, of course, faced with the same difficulty, but in reality it is one of enforcement only. Should it be necessary in the case of a particular employer, the usual finding and direction will issue on application to the Regional Board. However, in view of the apparently satisfactory collective bargaining relationship existing between the employer and employee associations, we are confident that our decision will be put into effect without difficulty.

Increases up to the \$2.40 or 9.6 per cent weekly bonus should be paid beginning with the first payroll period ending after September 1, 1943, in all of the commercial printing industry, contained in the zone to which we understand the appellants restricted their appeal, namely the Island of Montreal and the surrounding 10-mile area.

To that extent the appeal will be allowed.

September 30, 1943

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the *LABOUR GAZETTE* for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings Under the Industrial Disputes Investigation Act

DURING the month of September the report was received from the Board of Conciliation and Investigation established to deal with the dispute between the Peck Rolling Mills and its employees members of Local 2174, United Steelworkers of America.

* By P.C. 5963, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

Applications Received

Ten applications* for the establishment of Boards of Conciliation and Investigation were received in the Department during the month of September. These were:

(1) From employees of the Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ont., members of Local 189, United Rubber Workers of America. The dispute, which concerns the granting of a union shop and the failure of the company and the union to agree on the inclusion of certain employees under the agreement, was said to

affect 269 employees directly and 78 indirectly. On September 3, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(2) From employees of the Toronto Terminals Railway Company, Toronto, Ont., members of Division No. 123, Canadian Brotherhood of Railway Employees and Other Transport Workers. The dispute, which was said to affect 260 employees, concerns the negotiation of a collective labour agreement. Mr. J. P. Nicol, Toronto, Ont., was authorized on September 7, as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

(3) From employees of the Butterfly Hosiery Limited, Drummondville, P.Q., members of the Full-fashioned Hosiery Association, Inc. The dispute, which developed out of a request for union recognition, was said to affect 355 employees.

(4) From employees of the Canadian Pacific Railway Company, Montreal, P.Q., members of the Brotherhood of Sleeping Car Porters. The dispute, which concerns union recognition, was said to affect 600 employees. On September 8, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner advised on September 22 that the parties to the dispute had agreed on the taking of a representation vote to determine the bargaining agency desired by the employees concerned. Accordingly the Commissioner was requested to proceed with the making of arrangements for balloting, which it was expected would be concluded about October 25.

(5) From employees of the Clare Shipbuilding Company, Meteghan, N.S., members of Local No. 6, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.). The dispute arose out of the alleged lockout of the employees and the refusal of the management to re-hire all employees on the termination of the lockout. The dispute was said to affect 380. On September 8, the Honourable Mr. Justice M. B. Archibald, Halifax, N.S., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dismissal of employees by the company. The commissioner reported on September 18, that he had secured a mutually satisfactory settlement of the dispute without finding it necessary to make a formal inquiry. Consequently, the application for the establishment of a Board of Conciliation and Investigation was

withdrawn on the request of the applicant union.

(6) From employees of the Scott Tool and Machine Company, Montreal, P.Q., members of Lodge 712, International Association of Machinists. The dispute, which developed out of the alleged refusal of the company to re-hire two employees who had been released, and to negotiate a collective labour agreement similar to that in effect in the large aircraft plants, was said to affect 39 employees.

(7) From employees of the Canadian Marconi Company, Limited, Montreal, P.Q., members of Division No. 59, Canadian Marconi System, Commercial Telegraphers' Union. The dispute was said to affect 36 employees, and concerns the refusal of the company to agree to the inclusion of a provision for a "closed shop" in the renewal of the agreement, alleged violation of seniority provisions and discrimination against shift engineers employed by the company. On September 23, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Investigation Commissioner to make an inquiry into the case.

(8) From employees of the General Engineering Company (Canada), Limited, Scarborough, Ont., members of Local No. 1, Chemical Workers of Canada (C.C.L.). The dispute which developed out of a desire on the part of the union to negotiate a collective labour agreement with the company, was said to affect 3,945 employees. At the end of the month the Company's statement in reply to the application was awaited.

(9) From employees of Dominion Textile Company, Limited, (Mount Royal, Colonial and Hochelaga Mills) Montreal, P.Q., members of the United Textile Workers of America. The disputes which arose out of the union's request for recognition and the negotiation of a collective labour agreement, was said to affect 2,050 employees. On September 30, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(10) From employees of the Dominion Rubber Company, Limited, St. Jerome, P.Q., members of Local No. 144, Rubber Workers Federal Union (T. & L.C.). The dispute, which concerns union recognition and the negotiation of a closed shop agreement, was said to affect 893 employees. On September 29, Mr. Frank LaFortune was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. During July an application in this case was received and referred to Mr.

Bernard Rose, K.C., for investigation as Industrial Disputes Inquiry Commissioner. (LABOUR GAZETTE, Aug., 1939). On August 23 a representation vote was conducted under the supervision of Mr. A. Pepin, Industrial Relations Officer, Department of Labour, Montreal, which resulted in a substantial majority in favour of the Rubber Workers Federal Union as the bargaining agency between the employees. Subsequent negotiations between the union and the company broke down and a new application was submitted to the Department.

Boards Established

On September 24, a Board of Conciliation and Investigation was established to deal with a dispute between the Collingwood Shipyards, Limited, Collingwood, Ont., and its employees, members of Local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.) (LABOUR GAZETTE, August, 1943, page 1091.) Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been unsuccessful in his efforts to bring about a settlement of the dispute and recommended a Board be established. Messrs. L. A. Forsyth, K.C., Montreal, P.Q., and Drummond Wren, Toronto, Ont., were appointed members of the Board on the nomination of the employer and employees respectively, and in the absence of a joint recommendation from them, the Minister of Labour appointed His Honour Judge Ian M. Macdonell, Toronto, Ont., as third member and chairman of the Board.

A Board of Conciliation and Investigation was established on September 23, to deal with a dispute between Ayers, Limited, Lachute, P.Q., and its employees, members of Local No. 9, United Textile Workers of Canada (LABOUR GAZETTE, August, 1943, page 1089). On September 22, Mr. Bernard Rose, K.C., Montreal, P.Q., who was authorized as Industrial Disputes Inquiry Commissioner, to investigate the dispute, recommended the establishment of a Board of Conciliation and Investigation as he had been unable to effect a settlement. Mr. Frank Querat, Cornwall, Ont., was appointed a member of the Board on the nomination of the employees, and at the end of the month the employing company had been requested to nominate a person to be appointed to the Board.

On September 1, a Board of Conciliation and Investigation was established to deal with a dispute between the Canadian Kellogg Construction Company, Limited, Sarnia, Ont., and its employees, members of Local B530, Inter-

national Brotherhood of Electrical Workers (LABOUR GAZETTE, Sept., 1943, page 1225). The personnel of the Board is as follows: His Honour Judge James Parker, Toronto, Ont., chairman, appointed on the joint recommendation of Messrs. J. J. Robinette and Cecil M. Shaw, both of Toronto, Ont., the employer's and employees' nominees on the Board.

On September 9, a Board of Conciliation and Investigation was established to deal with a dispute between United Shipyards, Limited, Montreal, P.Q., and its employees, members of Local 12, Boilermakers and Iron Shipbuilders' Union of Canada (C.C.L.) (LABOUR GAZETTE, Sept., 1943, page 1224). Mr. Bernard Rose, K.C., Montreal, P.Q., who was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been unable to effect a mutually satisfactory settlement of the dispute and recommended that a Board be established. The personnel of the Board is as follows: His Honour Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members: Messrs. D. A. Paterson and G. M. Desaulniers, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

A Board of Conciliation and Investigation was established on September 10, to deal with a dispute between Dominion Textile Company, Limited (General Machine Shop and Merchants Branches), Montreal, P.Q., and its employees, members of Local 102, United Textile Workers of America (LABOUR GAZETTE, August, 1943, page 1091). Mr. Bernard Rose, K.C., Montreal, P.Q., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been unsuccessful in his efforts to bring about a settlement and recommended that a Board of Conciliation and Investigation be established. The personnel of the Board is as follows: His Honour Mr. Justice Alfred Savard, Quebec, P.Q., chairman, appointed on the joint recommendation of the other two members; Messrs. Walter A. Merrill, K.C., and Paul Fournier, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

Boards Fully Constituted

The Board of Conciliation and Investigation established on August 11, to deal with a dispute between Montreal Cottons, Limited, Valleyfield, P.Q., and its employees, members of Local 100, United Textile Workers of America (LABOUR GAZETTE, Sept., 1943, page 1224) was fully constituted on September 10.

The personnel of the Board is as follows: His Honour Justice Alfred Savard, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. D. A. Paterson and Edouard Larose, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The constitution of the Board of Conciliation and Investigation established on August 26, to deal with a dispute between the Paton Manufacturing Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 101, Textile Workers Organizing Committee (C.I.O.) (LABOUR GAZETTE, Sept., 1943, page 1225) was completed on September 17. The personnel of the Board is as follows: His Honour Mr. Justice Alfred Savard, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from Messrs. D. A. Paterson and Guy M. Desaulniers, both of Montreal, P.Q., the employer's and employees' nominees on the Board.

The Board of Conciliation and Investigation established by the Minister of Labour on August 30, to deal with a dispute between the Consolidated Plate Glass of Canada Limited; Hobbs Glass Limited; J. P. O'Shea Company, Limited; Pilkington Bros. (Canada), Limited; and Star Glass Company, all of Montreal, P.Q., and their employees, members of Local 1135, Brotherhood of Painters, Decorators and Paperhangers of America (LABOUR GAZETTE, Sept., 1943, page 1224) was fully constituted on September 14. The personnel of the Board is as follows: His Honour Mr. Justice Wilfrid Lazure, Montreal, P.Q., chairman, appointed on the joint recommendation of the other two members; Messrs. Auguste Mathieu, K.C., and Isidore Ballon, K.C., both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

On September 2, Mr. H. R. Pettigrove, Industrial Relations Officer, Dominion Department of Labour, Fredericton, N.B., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute between the Atlantic Sugar Refineries, Limited, Saint John, N.B., and its employees, members of Local 20, Sugar Refinery Workers' Union (T. & L.C.) (LABOUR GAZETTE, Sept., 1943, page 1224).

Other Reports of Industrial Disputes Inquiry Commissioner

A report was received on September 3, from Mr. Bernard Rose, K.C., Montreal, P.Q., who had been authorized as Industrial Disputes

Inquiry Commissioner to investigate the dispute between the Torrington Company, Limited, Bedford, P.Q., and its employees, members of the National Union of Needleworkers (C.C.L.) (L. G., Sept., 1943, p. 1224). The Commissioner recommended against the establishment of a Board of Conciliation and Investigation in view of the fact that the company was not engaged in war work and consequently the dispute did not come within the provisions of the Industrial Disputes Investigation Act as extended by Order in Council P.C. 3495.

Settlements

On September 22, at the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between Electric Steels, Limited, Cap de la Madeleine, P.Q., and its employees, members of Local 409, International Moulders and Foundry Workers' Union of North America (L.G., July, 1943, p. 923), was withdrawn, the parties to the dispute having concluded a collective labour agreement. The agreement is summarized in the article entitled "Recent Collective Agreements" appearing elsewhere in this issue.

The Department was also advised during the month of September, that the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Saint John Dry Dock and Shipbuilding Company, Limited, Saint John, N.B., and its employees, members of Local 3, Industrial Union of Marine and Shipbuilding Workers of Canada (L.G., July, 1943, p. 923) was withdrawn, as an agreement had been concluded between the parties concerned.

During September a Collective labour agreement was concluded between the Aluminum Company of Canada, Limited, La Tuque, P.Q., and its employees, members of Local 23435, International Union of Aluminum Workers (A.F. of L.) (L.G., Aug., 1943, p. 1091). In view of the agreement reached the applicant union was requested to withdraw its application for the establishment of a Board of Conciliation and Investigation.

On September 29, the Department was advised that an agreement had been signed between Sydney Foundry and Machine Works, Limited, Sydney, N.S., and its employees, members of Local 1, Industrial Union of Foundry and Machine Workers (C.C.L.) (L.G., Sept., 1943, p. 1224). Accordingly the application for the establishment of a board was withdrawn. The agreement between the company and the union is summarized in the

article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

Board Re-Convened

The Board of Conciliation and Investigation which dealt with the dispute between Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 2982, United Steelworkers of America was reconvened on September 9. It will be recalled that the Board had submitted a report during August (LABOUR GAZETTE, Sept., 1943, page 1227) in which it was recommended that a representation vote be conducted to determine the organization through which the employees desired to negotiate with their employer. The vote was conducted on August 12 under the supervision of Mr. L. Pepin, Industrial Relations Officer of the Dominion Department of Labour, Montreal, which resulted in 837 votes being cast; 399 of which were in favour of Local 2982, United Steel-

workers of America; 324 in favour of the Circo Employees Association; 110 voting in favour of "no union"; and four spoiled ballots. Subsequently the Company maintained that the result of the ballot indicated that no agency was qualified to represent its hourly rated plant employees for the purposes of collective bargaining and therefore refused to recognize or negotiate with the United Steelworkers of America or any other organization. The United Steelworkers maintained that it was the duly accredited bargaining agency of the employees and on that assumption had proceeded to make application to the Quebec Regional War Labour Board for certain wage adjustments. Whereupon the Company requested that the Board be reconvened under Section 28 of the Industrial Disputes Investigation Act to clarify the present status of Local 2982 United Steel Workers of America and its right, if any, to represent the Company's hourly rated employees.

Report of Board in Dispute between Peck Rolling Mills, Limited, Montreal, P.Q., and its Employees

On September 30, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Peck Rolling Mills, Limited, Montreal, P.Q., and its employees members of Local 2174, United Steelworkers of America (LABOUR GAZETTE, Aug. 1943, page 1090).

The personnel of the Board was as follows: The Honourable Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members: Messrs. Robert T. Ferguson and Guy M. Desaulniers, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Desaulniers. Mr. Robert T. Ferguson submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a dispute between Peck Rolling Mills, Limited, Montreal, P.Q., Employer, and its employees, members of Local 2174, United Steelworkers of America, Employees.

TO THE HONOURABLE THE MINISTER OF LABOUR
OF CANADA

By an order of the Minister the undersigned have been appointed members of a Board of

Conciliation and Investigation to deal with the above stated matter; they have taken the oath prescribed by the Act and have sat, on August the 30th and 31st, in Room 24 of the Court House of Montreal, courteously placed at their disposal by the Sheriff of the District of Montreal. They now beg to report as follows:

THE DISPUTE

In the application of Local 2174 U.S.A. for the establishment of a Board which is dated the 26th June, 1943, the grievance of the employees is stated as follows:

"Refusal of Peck Rolling Mills Ltd. to meet representatives of the United Steel Workers of America for the purpose of negotiating a collective bargaining agreement, covering hours of work, seniority, grievance procedure, and other working conditions."

As an effort to adjust the dispute, the employees declare that on June 12, 1943, they wrote the General Superintendent of the employer and that their letter remained unanswered. The letter was in the following terms:—

"June 12, 1943.

Mr. S. Gardham,
General Superintendent,
Pecks Rolling Mills Ltd.,
851 Mill St.,
Montreal, Que.

Dear Sir:

The majority of the employees of the Pecks Rolling Mills Company have recently become members of Local 2174 United Steelworkers of

America and it is their desire to meet the Company at the earliest possible date with a view to securing a collective bargaining agreement.

It is our sincere desire to secure the co-operation of the management of your Company in this matter and the members of Local 2174 United Steelworkers of America take this opportunity of assuring the Company of their full co-operation.

Sincerely yours,

W. H. Shields, Representative
United Steelworkers of America."

The reply of the employer to the Local's application challenges the contention that it represents the majority of the workers of the plant. It reads as follows:—

"MONTGOMERY, McMICHAEL, COMMON & HOWARD
Barristers and Solicitors

P.O. Box 250 Place d'Armes
The Royal Bank Building,
Montreal.

24th July, 1943.

M. M. MacLean, Esq.,
Director of Industrial Relations & Registrar,
Department of Labour,
Ottawa, Canada.

Your File 720:1417.

Re: Industrial Disputes Investigation Act
and re dispute between the Peck Rolling
Mills, Ltd., Montreal, P.Q., and its em-
ployees, members of Local 2174, United
Steel Workers of America.

"Dear Sir,

In reply to your letter of the 19th instant I am directed, on behalf of Peck Rolling Mills, to inform you that in reply to the application for a Board of Conciliation and Investigation mentioned in your letter of the 29th ultimo to Mr. S. Gardham, General Superintendent of the above mentioned Company, the Company states as follows.

United Steel Workers of America, Local 2174, does not represent the employees of Peck Rolling Mills Limited and has no authority to do so.

Yours very truly,
(Sgd.) L. A. Forsyth"

This is, therefore, the dispute in respect of which the Minister declared that the provisions of the Act applied and which he referred to the Board by order of the 19th July, 1943 (D annexed).

THE SITUATION

The Board has heard evidence on behalf of Local 2174 U.S.A. on behalf of the employer and on behalf of the Shop Committee which was set up in the circumstances hereafter outlined. This evidence discloses the following situation.

Local 2174 United Steelworkers of America was first organized in 1939 in the plant of Peck Rolling Mills Limited, but remained more or less inactive until May and June of this year when, at the request of the employees of the plant, it was reconstituted by

the local organizers of the Union. It is claimed that within that period 161 workmen of the Peck plant signed joining cards by which they gave authority to the United Steelworkers of America to act for them in dealing collectively with the employer. This engagement is in the following terms:—

"UNITED STEELWORKERS OF AMERICA
Affiliated with the Congress of Industrial
Organizations (in Canada—Affiliated with
Canadian Congress of Labour)
Local Union No.

I hereby request and accept membership in the UNITED STEELWORKERS OF AMERICA, and of my own free will hereby authorize the United Steelworkers of America, its agents or representatives, to act for me as a collective bargaining agency in all matters pertaining to rates of pay, wages, hours of employment, or other conditions of employment."

The signers of this card have not yet been regularly initiated in accordance with the Constitution of the United Steelworkers of America. They have not, therefore, paid any initiation fees, have not started paying the regular monthly dues and have not been issued regular membership cards. They have been dispensed of paying the initiation fees by C. H. Millard, National Director, under paragraph 2 of article XIV of the Constitution, and the start of the collection of monthly dues has been deferred until such time as the Local could enter into negotiation with the employer. Local 2174, however, has functioned as a union, as it will be shown further, under the supervision of the local union organizers and is administered by the International Office until it can proceed independently on its own; it has held regular meetings the minutes of which have been recorded and have been exhibited to the Board. The meeting held on June 8 to decide to apply for a Board and to declare a strike failing the adjustment of the dispute was attended by 38 members. The members of Local 2174 in their present status would be entitled to strike pay.

On June 12 last, Local 2174, in the name of the workers of the Peck plant, made a request for negotiations to the employer. Their proposition was not acknowledged and further efforts to communicate with the Management of the plant also failed.

On June 13 last, Local 2174 for the employees presented to the Regional War Labour Board a petition for a wage increase and other improvements of working conditions. The petition has been held in abeyance pending the investigation of this Board.

On June 12, when Local 2174 attempted to enter into relations with the employer, and on June 26, when it made its application for a

Board, the number of employees at the Peck plant was 318 and 317 respectively and the average number for the period June 1 to August 21 was 317. But from the above totals 21 foremen, watchmen and storemen must be deducted as not eligible to become members of a labour union. Account must also be taken of absentee workers whose number average perhaps 40 in a month.

In the latter part of June and in the beginning of July last, after Local 2174 had been reorganized, a Shop Committee was set up in the plant to act for the employees in their relations with the employer. We were told that the plan originated spontaneously in the general labour Department and soon was made applicable to all Departments of the plant.

The Shop Committee claim the adherence of the majority of the employees of the plant. They base their assertion on the result of a vote to select the executive representatives or spokesmen of the Committee which took place at the plant on July 23 last, according to a plan which was posted beforehand in the plant and a copy of which was furnished to the Board by Mr. Romeo Pichette, one of the Shop Committee. It reads as follows:—

"PLAN DE REPRESENTATION

Ce plan est maintenant en force et reconnu par la Compagnie qui lui donne plein support et coopération.

C'est maintenant à nous employés d'élire un représentant pour chaque dépt.

Les employés élus, discuteront avec le représentant de la compagnie à une assemblée mensuelle, toute dispute ou malentendu.

Les employés élus le seront pour une année, après quoi il y aura élection.

De vos comités qui vous représentent actuellement, vous avez à vous choisir un représentant pour votre département.

Une boîte à scrutin sera placée dans le département Shear Shed. La votation aura lieu vendredi le 23 juillet 1943, de 9.00 a.m. à 6.00 p.m. pour l'équipe de jour et de 7.00 p.m. à 9.30 p.m. pour l'équipe de nuit.

Les noms de vos représentants vous seront donnés et vous n'aurez qu'à marquer un "X" au non de votre candidat.

S.V.P. votez sagement comme nous tenons que ce plan soit un succès.

Minutes de chaque assemblée seront prises et affichées dans chaque département."

On July 23, therefore, each Department elected a representative from a ticket of 6 or 7 names. The ticket of the 14" Mill on which Mr. Pichette was elected, may serve as an example. It reads thus:—

14" MILL

Clock No. 408—	Hawkes—2
" 468—	Pichette—31
" 480—	Hogue—0
" 475—	Durocher—5
" 429—	Binnette—7
" 425—	Cunningham (withdrew)"

As a result of this vote a General Governing Body or Executive was elected to speak for the Shop Committee. The result of the vote was communicated to the employees by the following notice:—

"Le 26 juillet, 1943.

AVIS

Le comptage des votes de l'élection tenue vendredi le 23 juillet a donné comme résultat:

14" Mill.....	N° 468 Pichette
14" Mill.....	" 439 Binette
9" Mill.....	" 405 Demoulin
9" Mill.....	" 166 Perron
Gen. Labour.....	" 304 Boileau
Bending.....	" 363 Berrard
Machine Shop.....	" 17 McDonald

Ces hommes seront vos représentants pour tout sujet que vous désirez discuter avec la compagnie qui nommera un ou deux représentants pour assister aux délibérations.

Si vous avez quelque problème ou idée que vous voudriez soumettre à la compagnie n'hésitez pas voyez votre représentant de département qui vous présentera à la personne autorisée.

According to the evidence, 288 employees of the Peck Mills took part in the vote of July 23. Although the question to be decided by that vote was not as to whether Local 2174 U.S.A. or the Shop Committee should be chosen as agent of the employees to negotiate with the employer, the Shop Committee contend nevertheless that the vote shows that the majority of the employees favour the Shop Committee as against Local 2174. They argue that the employees who cast their votes did so because they wanted a Shop Committee to look after their professional interests and that those who abstained themselves did so because they preferred the Local of the U.S.A. to a Shop Committee. The members of the executive of the Shop Committee whom he heard further stated that, in their opinion, the majority of their fellow workers do not want in the plant the C.I.O. to which the United Steelworkers of America are affiliated. The Shop Committee did not seek incorporation under the Professional Syndicates Act (R.S.Q. 1941, Ch. 162); they hold when necessary informal meetings the minutes of which are not recorded. The Shop Committee has not developed into an employees-employer joint council as far as we are aware.

The Shop Committee made an application to the Regional War Labour Board for an increase in the remuneration of the employees and Mr. Adeodat Boileau, one of the executive, even went to Quebec at his own expense to press their demands. They secured an increase of 10 cents an hour for the general labour, a re-arrangement of the basis of pay for the piece workers and a change on the rate of the cost-of-living bonus from \$1.95 to \$4.25 a

month. An application for holidays with pay is still pending.

It might be useful to mention as showing the rivalry between the two organizations claiming the control of the majority of the employees of the Peck Mills, that at least three Departments: the Machine Shop, the Piece Workers and the Bending Plant, wrote the Regional War Labour Board to pay no attention to the demands made by Local 2174 on behalf of the employees. The letter of the piece workers is quoted as illustration.

PECK ROLLING MILLS LIMITED

MONTREAL, QUE.

July 21, 1943.

Secretary,
Regional War Labour Board,
d'Aiguillon Street,
Quebec City, Que.

DEAR SIR,—The undersigned Committee representing the Piece Workers of the Peck Rolling Mills Limited hereby applies with the concurrence of Peck Rolling Mills Limited, for approval by the Regional War Labour Board of rates of wages agreed upon between the Committee, on behalf of the employees and the above named employer. The change of rates for which approval is asked are: (Retroactive to June 21, 1943).

(1) That piece workers be paid on a basis of a net ton of 2,000 lbs. instead of the gross ton basis of 2,240 lbs.

(2) Piece work guaranteed rates that have not been increased beyond common labour rate of 45 cents shall be increased by the same margin that existed before June 21, 1943.

The undersigned have been in negotiation with the Management of the Company for these rates since the 22nd day of June, 1943, and have now reached an agreement upon them.

We understand that an application has been made to your Board, under date of July 13, 1943, by the United Steel Workers of America, Local No. 2174, for approval of wages rates for the employees whom they represent. Please be advised that such application is not made with the authority of the workmen concerned and should be disregarded.

It is in evidence that during the summer at least three walkouts, strikes or suspension of work have taken place at the Peck Mills. Local 2174 U.S.A. claim that they have had nothing to do with them.

Before concluding this review of the situation it may be proper to say that the Peck Rolling Mills prepare structural steel and plates for the building industry and for ship-building and are, therefore, engaged to a good extent in war work.

CONCILIATION

The representatives of Local 2174 handed the Board a written statement in which they request a vote to decide the question of representation. It follows:—

UNITED STEELWORKERS OF AMERICA
In Canada affiliated to the Canadian Congress of Labour

Room 114, Coronation Building
Montreal, Canada

Aug. 24, 1943.

To the Chairman and Members of the Board of Conciliation and Investigation

DEAR SIRS,—The United Steelworkers of America Local Union 2174 representing the majority of the employees of Peck's Rolling Mills Limited desire to secure a collective bargaining agreement with the Company.

We further desire the establishment of a government conducted vote among the employees of this company as proof of the desire of these employees to be represented by Local 2174 United Steelworkers of America.

Yours sincerely,

(Sgd.) IVAN J. CAMPBELL,
Int. Representative.

(Sgd.) W. H. SHIELDS,
Representative.

The members of the Executive of the Shop Committee who have been heard by the Board, although claiming that they control the majority, would not be averse to a vote to make sure of it and to put a stop to the agitation.

The employer takes the position that Local 2174 U.S.A. has no standing, no legal status and no real existence as a properly constituted labour body and refuse to recognize it and to deal with it, claiming further that the Local does not represent their employees, that there is no dispute between the employees and the employer and that there is no real strike impending. The employer submits, therefore, that the Board, in the terms and limits of the reference have nothing to adjudicate and report upon.

FINDINGS

1. The refusal of the employer even to recognize the existence of Local 2174 U.S.A. and to have anything to do with them, obliging them to have recourse to strike to force recognition, constitutes a dispute in the sense of the definition of the Act (art. 2 (d)). And, besides, the point has been settled by the Minister, according to article 7 of the Act, after a preliminary report by Departmental Investigator Wilson.

2. It is evident that the employees of the Peck Rolling Mills desire to deal collectively with their employer either through Local 2174 U.S.A. or the Shop Committee.

3. Both Local 2174 U.S.A. and the Shop Committee are de facto organizations of the Peck Mills employees, even if their legal status is not yet absolutely complete, and both have been working as agents of the employees in their relations with the employer.

4. The evidence does not permit the Board to decide with any degree of certainty which, the Local or the Committee, control the majority of the Peck employees, the Local claiming 161 adherents and the Committee 288 out of a possible total of 297 plant workers eligible to become members of a labour union.

5. The two groups in opposition have expressed through their representatives heard by the Board the desire of settling for themselves in the democratic way the question of representation by a vote of all the plant workers.

6. The indecision as to which group shall be the agent of the employees to bargain collectively with the employer is creating unrest, agitation and friction in the plant.

This state of things is prejudicial to the good relations which should exist between employer and employees, to the morale of the workers and to the output of the plant which is urgently required for war needs.

RECOMMENDATIONS

Therefore, the Board, taking a practical view of the situation and interpreting liberally the terms of the reference, beg to make the following recommendations for the settlement of the dispute, "according to the merits and substantial justice of the case".

1. That as soon as possible after the receipt of this Report a vote by secret ballot under the supervision of the officers of the Department of Labour be taken among all the employees of the Peck Rolling Mills, in order to determine which organization, Local 2174 of the United Steelworkers of America or the Shop Committee, shall represent those employees and act for them in bargaining collectively with the employer regarding wages, conditions of labour and other matters of interest to them.

2. That both the employer and the employees do abide by the result of the vote and do conduct their mutual relations in a proper spirit of understanding and co-operation, in accordance with the wish of the majority, for their own good and the good of Canada.

Respectfully submitted,

(Sgd.) O. L. BOULANGER,

(Sgd.) GUY MERRILL DESAULINIERS.

Montreal, September 21, 1943.

Minority Report

I have the honour to present to you, through the courtesy of Mr. Justice J. O. L. Boulanger, the Chairman of the Board of Conciliation

and Investigation appointed to deal with the matter of a dispute between Peck Rolling Mills Limited, Montreal, Employers and its Employees, members of Local 2174, United Steelworkers of America. My report, which since it differs from that of my colleagues, becomes a minority report. You will observe that while we have drawn inferences and conclusions and made recommendations which prevent unanimity, there is little or no difference between the other members of the Board and myself as to what may be called our findings of fact. To cover again this particular aspect of the matter, which has been so well and carefully done by Mr. Justice Boulanger, seems, in the circumstances, superfluous and except insofar as it has appeared necessary, I have refrained from doing so.

In the letter annexed to the application it is stated that "a majority of the employees have recently become members of Local 2174 United Steel Workers of America" which, if a fact, places the Union on strong ground. On investigating this claim, however, it did not appear to me that it had much substance. In the course of evidence, it was stated that the Union had a membership in this plant of one hundred and sixty-one and, at the request of the Board, there was produced a bundle of cards which it was claimed proved this membership. These cards were all signed in pencil and practically all undated, although a space is provided on them for that purpose, but we were informed that they had been obtained during a period comprising May and June of this year. The body of the card is as follows:—

Name Ledger No.....
Address
Street or Rural Route City Province

UNITED STEELWORKERS OF AMERICA

Affiliated with the Congress of Industrial
Organizations (In Canada—Affiliated with
Canadian Congress of Labour)
Local Union No.....

I hereby request and accept membership in the UNITED STEELWORKERS OF AMERICA, and of my own free will hereby authorize the United Steelworkers of America, its agents or representatives, to act for me as a collective bargaining agency in all matters pertaining to rates of pay, wages, hours of employment, or other conditions of employment.

Date..... Signature

Address
Employed by:
Company
Plant Department
Address of Plant
Initiation fee \$..... Paid.

Much stress was placed on the words "and accept" as establishing membership. It was

admitted that neither initiation fees nor monthly dues were collected or paid and no membership cards or other evidence of membership was given to the signers of cards but it was offered in explanation of this that a special dispensation had been granted by Union Headquarters covering these omissions. A perusal of the Constitution of International Union United Steel Workers of America C.I.O., however, carries convincing proof that membership is a serious and formal matter.

While provision is made for granting dispensation from payment of initiation fees (Art. XIV. Sec. 2) there is none for granting dispensations from payment of monthly dues. Art. XI (which deals with membership) specifically states that no applicant for membership shall be regarded as being a member in good standing until the full amount of his initiation fee has been paid and the obligation has been administered, except in such cases where the applicant has religious scruples against taking the obligation.

Leaving the matter of initiation fee to one side because of the explanation given, it is important to note that not one of the one hundred and sixty-one signers of cards had, at the time of the hearing, taken the obligation of membership and it was not alleged that all or any of them had failed to do so because of religious scruples. The Article further continues to say that a member shall pay his dues promptly commencing with the month following that during which he shall have been admitted and shall continue to pay these when due in order to be and remain in good standing.

Formal admission to the Union is governed by a ritual such as is commonly found in fraternal societies (which, of course, the Union actually is) and the candidate does not become a member until he has taken the prescribed obligation and been declared a member by the presiding officer.

The Board ordered the production of the minutes of the meeting at which, according to the application, authority was voted to the officers of the Local to take the necessary steps to secure a Board of Conciliation to adjust the dispute and, failing such adjustment, to declare a strike. Three days' notice of this meeting was given by distribution of circulars throughout the plant and the invitation to attend was extended not only to those workmen who had signed cards but to all the workmen generally. The voting, however, was confined to those who had signed cards.

One would reasonably suppose that a momentous occasion like this would have brought out an impressive showing of the strength of the Union adherents but, while the result showed unanimity of decision, only thirty-eight workmen voted. Certain other circumstances create doubt as to whether even these thirty-eight would have passed the resolution had there been no representations made to them other than those in the resolution.

The minute book contains the statement that the workmen were told that the part of the resolution dealing with a strike was "a formality," the obvious meaning being that the statement that a strike would, failing adjustment, be declared was without substance and that no workman need fear that a strike would follow his vote.

To me, at least, such procedure is calculated not only to win otherwise unobtainable assent to the proposal to ask for the appointment of a Board but, more important, it is an abuse of the offices of the Department of Labour.

The Act under which the Board was appointed (Chap. 112, R.S. 1927) was passed for the purpose of aiding in the prevention of strikes, which I assume can only mean bona fide threatened and impending strikes, and not merely rhetorical material in the category of a formality to influence the Department regarding the appointment of a Board to determine who is or is not to be considered as representing workmen for the purposes of collective bargaining with employers.

The Board was told that in the event of a strike being called, the signers of cards would be eligible for strike pay and benefits as members of the Union, but it developed that this was conditional on the strike being approved by Union Headquarters. Since no strike was contemplated, the statement has little significance except in so far as it might have been an inducement to workmen to sign cards and vote in a particular way. So far from adding to the value of the vote, it in my view, detracts from its worth and leaves me quite unconvinced that even thirty-eight of the workmen conscientiously favoured the application in the exact terms in which it was forwarded to the Department of Labour and were entirely uninfluenced by the facts that their membership, such as it was, cost them nothing, imposed on them no present obligations and that there was little probability of their being involved in a strike.

A consideration of the whole position leads to the conclusion that what occurred in this

plant was simply that the workmen who, like workmen in other plants, are legitimate material to have in the ranks of Unions, were approached by Union officials who expounded the benefits of Union membership, one of these being the power which would accrue to them in dealing with the plant management. To be placed, however, in the position of having a right to represent the men in such bargaining, it was necessary to have some authority conferred on the Union. There can be little doubt that, if there had been any considerable number of the men ready and willing to become members of the Union in the ordinary way, their applications would have been accepted and the prescribed routine followed and that the present method of obtaining the necessary authority would not have been adopted. Apparently, however, the men had to be convinced that, all things being taken into account, the Union was a better bargaining agency than the means they themselves had developed for dealing with disputes, and so we find the Union virtually asking for a chance to demonstrate its worth on the basis that, if it did not do so, it would cost the workmen nothing, but pointing out that, unless the Union had something to show the Department of Labour in the way of substantiating its claim to represent the workmen, it was powerless to make the demonstration. Hence the signing of cards, the waiving of initiation fees, the dispensing with collection of monthly dues, the absence of membership cards and the failure to conduct any ceremony of initiation. To put it briefly, the whole affair was speculative and tentative and was so considered both by the Union and the workmen themselves.

It should be noted that the only dispute or matter of contention contained in the application is one of recognition of Local 2174 by the employers and that the only ground urged to compel such recognition was the claim that Local 2174 embraced within its membership a majority of its workers.

As the hearing progressed, it became evident, for reasons stated, that the claim could not be substantiated. There was then presented to us a letter dated August 24, or six days before the hearing, of which the following is a copy:—

“Aug. 24, 1943

To the Chairman and Members of the Board of Conciliation and Investigation

Dear Sirs:

The United Steelworkers of America, Local Union 2174 representing the majority of the

employees of Peck's Rolling Mills Limited desire to secure a collective bargaining agreement with the Company.

We further desire the establishment of a government conducted vote among the employees of this company as proof of the desire of these employees to be represented by Local 2174 United Steelworkers of America.

Yours sincerely,

(Sgd.) Ivan J. Campbell, Int.
Representative

(Sgd.) W. H. Shields,
Representative”

As will be seen, the claim to represent a majority of the workmen is included, but a new application is made, viz: to have a government conducted vote taken among the employees as proof of these employees' desire to be represented by Local 2174.

The conclusion I draw is that the Union officials themselves knew before the hearing—very probably at the time the application was made to the Department of Labour—that their allegation of having a majority of the employees in the Union's membership was just as nebulous as their declaration regarding a strike if the dispute was not adjusted to their satisfaction.

We have, however, to deal with the request contained in this letter on its merits. I conceive that the only justification for granting the request would be such a state of indecision in the minds of Board Members as to whether the applying party or the opposing party had conclusively established its case—for instance, where there seemed to be almost a balance between the Union membership and non-union employees. In such a circumstance, a government conducted vote would seem to be indicated, and should be recommended by the Board, as the only way of settling the matter. That circumstance does not exist here. There is no question whatever in my mind that there is no considerable number of the employees who are bona fide members of Local 2174, and I have grave doubts if even the thirty-eight employees who voted in favour of the application for the establishment of a Board can be so regarded.

These doubts are further increased by the statement made about the strike being only a formality. With every desire to meet the views of the other two members of the Board, I simply cannot see any justification for recommending such a vote.

The Union had at the hearing the widest possible latitude in producing proof of its allegations, and in my opinion it not only failed to do so but signally failed as, I suspect,

the officials themselves rather anticipated. A vote now will not only cost the Union nothing, but it gives it another chance by means of organization and propaganda—not open to anything like the same extent to its opponents and decidedly undesirable, even if it were—to effect a change in the sentiments of the workmen.

It is true that if a coin be tossed sufficiently often it is bound at some time to show the side desired. I admit that in ordinary times this would not be a matter of major importance, and probably if these were normal days I would bow to the opinion of my colleagues. The times, however, are not normal. It is of the first importance to the Nation that people everywhere should go about their tasks without interference, friction or diversion of any kind and that anything which foment unrest or dissatisfaction should be promptly and effectively stopped. Moreover, complacency towards the outcome of efforts to make workmen alive to grievances real or imaginary, may well be encouragement of conduct culminating in a strike, which otherwise would not occur. I know it was contended that, in this particular plant, there was considerable unrest, that recently there had been cases of walking out and absenteeism on the part of employees, but investigation showed that these contentious matters had, with one exception, been amicably settled by joint action of employer and employees, and the one exception is under advisement and the award, which is expected soon, will be accepted by both parties.

There is at present no active or serious dispute between employers and employees, but human nature being what it is, there is every likelihood that if the employees are subjected to the propaganda of Unionism, that condition will change. It is practically impossible to find anywhere a plant where the working conditions of the employees are not susceptible of improvement. It is, therefore, not difficult, even for the inexpert, to uncover grievances and to make workmen feel that something must be done about remedying them, especially on the easy terms indicated as being offered in this case. I wish it to be understood that, in saying this, I am not criticizing the aspirations and objectives of any Union or its representatives. On the contrary, I am keenly alive to, and appreciative of, the good work which Unions have done for workmen and through them for employers also.

My point is that this is not the time for continuous and heavy pressure for or against

Unionism to be brought to bear on employees and that is, in my view, exactly what a vote would involve.

Some emphasis has been laid on the fact that, at the hearing, the workmen who appeared before the Board expressed willingness to have a vote, but since they represented a method of negotiating with the employers which the Union desires to have abolished, they could hardly say anything else without admitting that they did not represent a majority of the employees and that the bargaining method they exemplified was not successful and satisfactory. The important and pertinent part of their testimony was that they did not ask for a vote or indicate one was necessary.

If, however, the Department of Labour considers that there is any merit in the application for a government conducted vote, then it seems to me that the least the Department can do before granting the application, is to insist on having presented to it indisputable evidence that an apparent majority of the employees are bona fide members of Local 2174 and are in good standing in the Union. By this I mean that they have paid initiation fees (or been properly excused from doing so) and monthly dues; have been duly initiated into membership and accepted as members in the manner prescribed in the Constitution of the Union; and have been made the recipients of membership cards. There should be no objection to this on the part of Union supporters, and anything short of it would be unsatisfactory to everyone else. After all, it is giving the Union—with what appears to me little or no justification—another chance to prove that it is in the position it claimed to be in when the application was made for the appointment of this Board. I must repeat, however, that my strong view is that, in all the circumstances here present and keeping in mind national considerations, there should be no government conducted vote granted.

With very great respect to my colleagues and with sincere regret at finding myself at variance with them, I would dismiss the application that Local 2174 be recognized as the collective bargaining agency in Peck Rolling Mills Limited, and I would refuse the request made on its behalf that the Board recommend the taking of a government conducted vote among the employees of this Company, as set out in letter dated August 24, 1943.

Respectfully submitted by

(Sgd.) ROBERT T. FERGUSON
Montreal, P.Q. 18th September, 1943.

Conciliation Work of the Department of Labour During September, 1943

NEW industrial disputes to the number of 45 were handled by the Industrial Relations Branch during August, under the provisions of the Conciliation and Labour Act, while 24 "old" cases also received attention. These disputes were distinct from, and in addition to, those dealt with under the Industrial Disputes Investigation Act, which are described on previous pages. In the previous month of August, 84 new Conciliation cases and 34 others received attention.

The disputes were dealt with by Industrial Relations Officers or, in Ontario, by the additional services of the Provincial Conciliation Officers. Those of chief interest or importance are summarized in the statement below.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Sydney, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North Western Ontario; four officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Sydney, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

FREIGHT HANDLERS AND LONGSHOREMEN, LAKEHEAD, SARNIA AND TORONTO, ONT., MONTREAL, P.Q., AND HALIFAX, N.S.—During September and early October a series of strikes involving freight handlers and longshoremen on the Great Lakes, St. Lawrence and at Halifax, N.S., hampered the movement of war materials and other commodities towards sea-board and overseas, and, to a lesser extent, interfered with the provisioning of Labrador, the Gaspé Coast and North Shore and the Magdalen Islands. The object of the strikes was to secure prompt and favourable action by the National War Labour Board upon a group of applications of the International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, involving, in various degrees and at different points, increases in basic wage rates and cost-of-living bonuses, vacations with pay, overtime rates and conditions to conform with those extended to longshoremen, and wage

differentials for handling certain commodities. The applications covered members of the Union employed by Canada Steamship Lines Limited at the Ports of Quebec, Montreal, Toronto, Hamilton, Windsor, Point Edward and Sarnia, Fort William and Port Arthur; Montreal wharf freight handlers employed by the Canadian National Railways and Canadian Pacific Railway Company and C.P.R. freight handlers at Saint John, N.B.; and in the Port of Halifax freight handlers employed by Eastern Canada Stevedoring Company, Limited. Trouble arose first at the Lakehead where about 477 freight handlers and longshoremen quit work the morning of September 9, demanding "definite action" by a fully constituted National War Labour Board. (At that time no appointment had been made by the Government to replace Mr. J. L. Cohen, K.C., former representative of organized labour on the Board.) On September 10, Mr. R. H. Hooper, Industrial Relations Officer, Winnipeg, arrived at the Lakehead and conferred with a "joint emergency committee" representing the two local lodges of the Union. This joint committee had agreed to call a mass meeting and try to get the employees to return to work when word was received that similar strike action had occurred at Sarnia, Ontario, and Montreal, P.Q. The prospects of an immediate settlement evaporated at once and at mass meetings the two following days the employees voted to remain on strike. On Monday morning, September 13, another joint meeting was convened at the instance of Mr. Hooper, and after appeals by the secretary of the Port Arthur Trades and Labour Council and the Mayor of Fort William, the employees decided to resume work at noon, but went on record that further direct action would be considered unless the National Board rendered a favourable decision by Wednesday, September 15. As intimated, strikes had developed at Sarnia and Montreal where some 90 and 250 freight shed and wharf employees walked out, respectively, on September 10. At Montreal about 50 employees of Clarke Steamships Limited were involved as well as those of Canada Steamship Lines. These workmen all resumed work on September 14, but not before a statement the previous evening by Mr. F. H. Hall, Vice-President, International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, to the effect that the Union would not "recognize" a two-man quorum of the National War Labour Board,

nearly upset the Lakehead situation a second time. Meanwhile the strike sentiment had spread to Halifax where approximately 350 freight handlers employed at the Ocean and Deep Water Terminals by Eastern Canada Stevedoring Company ceased work at 6 p.m., September 13, and to Toronto where about 63 employees of Canada Steamship Lines walked out for two and a half days. The National War Labour Board held a "quorum" meeting on September 15, but adjourned when no union representatives appeared to present the case of the employees. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., met a Union Committee at Halifax but met with no success in having the men resume work. Difficulty was experienced at that point by the Canadian National Railways in having its freight cars iced, owing to the shortage of men, and numerous cars containing important quantities of bacon for overseas had to be re-routed to Truro, N.S., for icing. On September 17, the Director of Industrial Relations, Ottawa, notified Union headquarters that a third member, representing Labour would be appointed to the National Board by September 20. The Halifax freight handlers resumed work at noon on the 18th, and the Lakehead men decided the same day to continue at work pending the outcome of the Board's hearings. On September 24, the Lakehead dock workers staged a half-day strike in an endeavour to force the Board to release its decision at once. The Board issued Reasons for Decision in the various applications on September 30. Employees of Canada Steamship Lines from Quebec City to the Lakehead were granted increases in basic rates from 50 cents to 55 cents per hour and increases in the night differential, for hours worked between 7 p.m. and 7 a.m., from 2 cents to 5 cents per hour. The cost-of-living bonus was increased from 6½ cents to 9 cents per hour. At Halifax, the freight handlers of the Eastern Canada Stevedoring Company received increases in basic wage rates from 52 cents to 56 cents per hour, but were denied an increase in the night differential which already stood at 10 cents per hour. Railway freight handlers at Montreal and Saint John had their basic rates increased to 57 cents per hour, with the existing 5 cents night differential remaining unchanged. At all points upward adjustments for workers presently receiving more than basic wage rates were permitted in order to maintain existing differentials. Demands for vacations with pay and the authorization for freight handlers of certain working conditions now enjoyed by longshoremen were denied. Dissatisfaction with the amount of the increase authorized for employees of Eastern

Canada Stevedoring Company led to a further strike on October 1 by about 350 freight handlers at Halifax. This cessation of work was not sanctioned by either the local or international officers of the Union who asked the men to resume work without success. Various appeals for a termination of the strike were made in vain by the Minister of Labour and on October 4 uniformed men drawn from the Navy, Army and Air Forces were sent to the Ocean and Deep Water Terminals to move perishable goods from the dock sides to waiting vessels. On October 4 and 5 progressively larger groups of longshoremen, acting in sympathy with the freight handlers, refused to handle goods transferred to them by the armed Forces. This work was then taken over by the three Services, whose men were increased to a total of over 1,700. Loading of the vessels proceeded without incident. Following representations from the Minister of Labour, the International President of the International Longshoremen's Association ordered the members of his organization to resume work at once or to give up the Charter of their local union. The longshoremen decided at a mass meeting on October 6, to resume work. Further conferences took place between the Minister of Labour and the head of the Freight Handlers' Union and following a strong warning from the Minister, the freight handlers resumed work on the morning of October 9.

COAL MINERS, SYDNEY MINES, N.S.—On September 2, 30 employees of the Indian Cove Coal Company, Limited, and Sullivan Coal Company, Limited, Sydney Mines, N.S., members of the United Mine Workers of America, Local 5659, went on strike demanding that rates of wages be levelled up by the company to the rate paid similar employees of the Dominion Coal Company, as authorized by the National War Labour Board. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., investigated the situation. The strike lasted one day, and at a joint conference on September 9, it was agreed that the men would remain at work subject to a joint application being made to the Emergency Coal Production Board, for an increase in the price of coal of fifty cents per ton. On September 15, 125 employees of the Tomson, Greener and Sullivan Mines of the Indian Cove and Sullivan Coal Companies went on strike protesting the delay of the National War Labour Board in dealing with the wage adjustments, but on September 20, Mr. Allan MacDonald was successful in having the men return to work for a two-week period. The employees set this time limit in the belief that

the Emergency Coal Production Board needed to grant a specific subsidy. Actually this board had already advised the Company and the Union that should the company's financial position be such that it was unable to absorb the wage increases which had been directed to the National War Labour Board, the Emergency Coal Production Board would be prepared to pay whatever production subsidy might be necessary. The parties were advised that they had failed to understand the meaning of the finding and direction of the National War Labour Board, and that all that was necessary to secure favourable action on the rates which had not been adjusted was for the parties to get together and adopt occupational classifications identical with those of the Dominion Coal Company for comparable work, or alternatively, to change the authorized rates so that existing classifications will receive remuneration comparable to similar Dominion Coal Company classifications.

CARPENTERS, MALTON, ONT.—From September 25 to 27, about 100 carpenters, employed by the Russell Construction Company, Limited, on the erection of dormitories for Wartime Housing Limited, at the plant of Victory Aircraft, Malton, Ontario, were involved in a strike which concerned a delay in meeting their demands for a 25-cent per day transportation allowance. The men were members of two trade unions, the United Brotherhood of Carpenters and Joiners of America and the National Union of Carpenters, Bricklayers and Painters. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, investigated the situation, and was informed by the Company that they could not pay the allowance unless authorized to do so as it was not in their contract with the Department of Munitions and Supply. The men had an application for this allowance before the Regional War Labour Board, and they agreed to Mr. Nicol's proposal that they return to work and give the Board an opportunity to render a decision, with the proviso that they would not work after October 1 without a decision.

COAL MINERS, BELLEVUE, ALBERTA.—About 100 employees of the Hillcrest-Mohawk Collieries, Bellevue, Alberta, staged a pit-head strike on September 13, which indirectly affected 290 miners and caused No. 1 mine to shut down. The cause of the dispute was that certain employees were denied motor transportation from the wash house to the upper portal on the mountain side. The trucks were out of order, having broken down while negotiating the steep incline. The dispute lasted one day and was settled when the Company

agreed to secure a truck as soon as possible and transport the men as far as possible whenever the road was passable. Mr. F. E. Harrison, Western Representative, Department of Labour, investigated on behalf of the Department.

ELECTRICAL WORKERS, TORONTO, ONTARIO.—A sit-down strike by approximately 60 employees, members of Local 512 of the United Electrical, Radio and Machine Workers of America, took place on September 1, at General Dry Batteries of Canada Limited, Toronto, in protest against alleged "stalling" tactics of the management in negotiating an agreement. The dispute arose after a representation vote had been conducted by the Department of Labour, as reported in the September issue of the *LABOUR GAZETTE*. The Company discharged the 60 demonstrators. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, investigated the situation and reported a settlement of the dispute which followed the management's undertaking that collective bargaining would commence and that there would be no discrimination in reinstating the workers who had been dismissed. The employees agreed that there would be no more stoppages of work.

CARPENTERS, CAMPBELLTON, N.B.—In early August a dispute arose between the J. and D. A. Harquail Company, Limited, Campbellton, N.B., and its employees, members of Local Union 2539, United Brotherhood of Carpenters and Joiners of America, concerning the alleged refusal of the company to sign a proposed collective bargaining agreement. Mr. H. R. Pettigrove investigated the situation, and after conferences with the parties, made a check of union records and the company's list of employees. The check disclosed that 61.5 per cent of the 320 employees who were eligible for union membership were union members in good standing. Subsequently the manager of the company agreed to sign the proposed agreement with a few minor amendments. The agreement was signed, effective as of September 1, 1943.

COAL MINERS, NANAIMO, B.C.—The Department was advised on September 10 by the secretary of Local 7355, United Mine Workers of America, that difficulty had arisen in connection with the transportation of men living in the Extension and Cedar districts near Nanaimo and employed at No. 10 Mine of the Canadian Collieries (Dunsmuir), Limited, Nanaimo, B.C. The men had requested that the Company furnish a bus for the 25 or 30 employees involved, because the men had experienced difficulty in securing approval for new tires for their own cars. The Company

refused this service because the existing agreement provided that men living off the established bus routes should make their own transportation arrangements. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, investigated the situation. Although the company refused to provide the bus service, the union itself decided to proceed with the organization of a bus line which would serve the district in question.

COAL MINERS, MINTO, N.B.—On September 28 a strike began among 68 unorganized employees of the Newcastle Coal Company, Limited, Minto, N.B., concerning the demand of employees for wage increases similar to that granted employees of the Rothwell Coal Company by the National War Labour Board. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., held joint conferences with the parties concerned. After being on strike one day the employees agreed to return to work and submit an application to the National War Labour Board.

COAL MINERS, SPRINGHILL, N.S.—The Department was informed on September 16 that 1,500 employees of the Cumberland Railway and Coal Company, Springhill, N.S., members of the United Mine Workers of America, Local 4514, stopped work on that date. The strike arose out of a previous dispute over the docking of wages of employees, engaged on other than a "task performance" basis, for leaving work before the end of their shift. (An earlier strike for the same cause was reported on page 1244 of the *LABOUR GAZETTE* for September, 1943). Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., investigated the situation. The union was advised that the men should resume work and negotiate any grievances with the company in accordance with established procedure. The miners returned to work on September 29 and investigations concerning the cause of the strike are at present being carried on by mine representatives and the company.

COAL MINERS, GLACE BAY, N.S.—A strike which involved about 200 employees of No. 1B Colliery of the Dominion Coal Company, Limited, Glace Bay, N.S., members of the United Mine Workers of America, Local 4520, began on September 29. It concerned wages for the loading of coal left on the longwall. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., investigated and conferred with the parties concerned. Work was resumed on October 4.

RAILWAY SHOP EMPLOYEES, MONTREAL, P.Q.—In the August issue of the *LABOUR GAZETTE* (page 1121) reference was made to a strike during July of certain employees of the Angus

Shops of the Canadian Pacific Railway in Montreal. Following the strike an employee named Rosaire Dubuc was charged in court with inciting the employees to go on strike. He pleaded guilty on September 22 and was sentenced to a fine of \$100 and costs, or in the default of payment, three months in jail. The accused did not belong to any union.

PAPER MILL WORKERS, MERRITTON, ONTARIO.

—On September 23, 330 employees, including 33 female workers, of the Alliance Paper Mills, Limited, Merritton, Ontario, went on strike in protest against a supposed delay in the hearing of an appeal from a Finding and Direction of the Regional War Labour Board. The strike action was strongly opposed by officers of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, of which the employees involved were members of Local No. 77. When renewing a collective agreement which expired on May 1, 1943, the Company and the Union were unable to agree on increased wage rates for some occupational classifications and the adjustments proposed by each side were submitted to the Regional War Labour Board, which directed payment of the rates put forward by the Company. The Union took exception to this decision and on September 14 the Regional Board granted its permission for an appeal to the National War Labour Board. On the afternoon of the day the strike occurred, Mr. H. Perkins, Industrial Relations Officer, of the Toronto office of the Dominion Department of Labour, and Mr. J. B. Metzler, Chief Executive Officer, of the Regional War Labour Board, addressed a mass meeting of the strikers and explained that, although many employees believed that appeal proceedings were in progress, no formal appeal from the Union had been submitted to the National Board. Regardless of this misunderstanding, the employees declined to resume work. Further negotiations took place and the number of disputed classifications was reduced to thirteen. At another mass meeting on September 24, with Mr. Perkins in attendance, the employees decided to resume work on Monday, September 27. It was reported that the Company later agreed to make a joint application with the Union to the Regional Board, and it was understood that the Board would grant a re-hearing of the case within a fortnight.

HOTEL EMPLOYEES, QUEBEC, P.Q.—During the early part of September the Department was informed of a dispute which arose between employees of the Chateau Frontenac, Quebec City, members of the Hotel and Restaurant Employees International Alliance, and the hotel management, which concerned union recognition, the negotiation of a collective

agreement, and matters affecting wage rates. In connection with the last problem, the union was referred to the National War Labour Board. Mr. Raoul Trepanier and Mr. L. Pepin, Industrial Relations Officers, Montreal, investigated the situation. The union stated that it was in favour of a representation vote, but the hotel manager was not. The union postponed strike action voted on September 18, pending an application for the establishment of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act.

COAL MINERS, RIVER HEBERT, N.S.—On September 21, 13 longwall men went on strike at the Standard Coal Company, River Hebert, N.S., over working conditions, and on September 22, the entire working force remained idle in support of the longwall men. The union involved was Local 741, United Mine Workers of America. The extension by the Company of the length of the wall from 276 feet to 300 feet and the payment of rates therefor was source of the trouble. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., investigated the dispute. The company agreed to meet the union demands.

COAL MINERS, MINTO, N.B.—Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B. investigated on September 28, a dispute between the Miramichi Lumber Company, Limited, Minto, N.B., and its employees, 124 in number, members of the Miramichi Mine Workers' Union (C.C.L.). The employees demanded a 20 per cent wage increase similar to that granted employees of the Rothwell Coal Company by the National War Labour Board. After discussion, both parties agreed to submit a joint application for wage adjustments to the National War Labour Board, and the employees agreed to continue work pending the application.

CHEMICAL WORKERS, NIAGARA FALLS, ONTARIO.—Following receipt of a complaint from the field representative of the United Gas, Coke and Chemical Workers of America Organizing Committee (C.I.O.), that an employee had been dismissed by the North American Cyanamid Company of Niagara Falls, Ontario, for union activity, and a preliminary investigation, on behalf of the Department by Mr. James Hutcheon, of the Ontario Conciliation Service, the Minister of Labour appointed His Honour Judge J. G. S. Stanbury, of St. Catharines, Ontario, as an Industrial Disputes Inquiry Commissioner to investigate the case under the provisions of Order in Council P.C. 4020. The Commissioner reported that the charge laid by the Union was not sustained by the evidence.

COAL MINERS, EDMONTON, ALBERTA.—Eighteen miners and two surfacemen went on strike at the Ottewell Coal Company, Edmonton, Alta., on September 21, because of a mistaken belief that the Company was not authorized to pay an increase of 59 cents in basic wage rates for which it had applied. On September 16, the National War Labour Board had issued a finding directing the Company, with effect not earlier than July 2, to increase basic wage rates of its occupational classification by 59 cents. The Company wired the National War Labour Board on the day of the strike asking it to approve an additional 57 cents per day but the Board was unable to regard this as a sufficient application. Mr. F. E. Harrison, Western Representative, Department of Labour investigated the situation. The strike lasted one day only, the company agreeing immediately to put into effect the basic wage increase approved by the Board and to file a formal application in respect of the secondary adjustment.

TEXTILE WORKERS, MILLTOWN, N.B.—On September 13, 1943, the Department received a complaint from Local 10 of the United Textile Workers of Canada, that one of their members had been dismissed by an overseer of Canadian Cottons Limited (St. Croix Mill), Milltown, N.B. Alleged grievances in regard to bad warps and fillings were also involved in the dispute. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., investigated the situation. The dismissed employee was reinstated and reported for work on September 16. The other matters were left for further discussion between the local mill committee and the Company.

COAL MINERS, ALBERTA AND BRITISH COLUMBIA.—By an overwhelming majority coal miners affiliated with District No. 18, United Mine Workers of America, employed in the bituminous coal mines of Alberta and British Columbia voted in favour of strike action to secure wage increases and overtime pay after a five-day work-week in a strike vote conducted on September 21 under the auspices of the District Officers of the Union. The ballot, which read: "Are you in favour of taking strike action to enforce Convention demands and policies on wage increases?" arose out of a special Convention of District No. 18 of the Union which met at Calgary from August 2 to 6. Resolutions were adopted at that time demanding flat wage increases of \$2 per day for all day-wage and contract miners, with time and one-half and rate and one-half for the sixth working day of the week. Instructions were given by the Convention to the District Officers and the District Executive Board to

proceed with negotiations with the coal operators and with "Government authorities" and secure "the best possible agreement" and submit same to a referendum vote of the District membership. In the event of negotiations being unsuccessful the union officers were instructed to take a strike vote of the entire membership on or before October 14. In addition, the Convention demanded two weeks' holidays with pay at basic wage rates after twelve months' employment with the respective coal companies, and a revision of the present cost-of-living index prepared by the Dominion Bureau of Statistics. Mr. F. E. Harrison, Western Representative, Department of Labour, Vancouver, attended the Convention as an observer, and, because of the critical situation which appeared to be developing, remained in Calgary afterwards, where he was in almost continuous daily consultation with representatives of the Union and of the Western Canada Bituminous Coal Operators' Association. The Operators' Association refused to negotiate in regard to the Union's demands, informing the District officials that authority for the adjustment of wages, etc., lay with the Dominion Government, that the life of the contract between the Union and the operators was for the duration of the war and that no good purpose could be served by meeting to discuss the matters at issue. The Union, on its part, refrained from making application to the National War Labour Board, which constitutes the only Governmental body capable of dealing with the demands of the men. Instead it made representations to the Coal Controller, and to the Emergency Coal Production Board, the main function of which is not to deal with wage increases but to grant subsidies to coal companies to ensure full production in cases where wage increases directed by the National War Labour Board are beyond the financial capacity of an operator to meet. Every effort was made by officials of the Department of Labour to have the operators meet union officials with a view to negotiation of the differences between them, and also to have the district officers file a proper application with the National War Labour Board. No success attended these efforts, and, notwithstanding the resolution of the Calgary Convention that the District Officials should "proceed with negotiations with the . . . Government authorities" before taking a vote, the officers of the union proceeded with the strike vote, as mentioned, on September 21. It resulted in 7,849 miners voting in favour of strike action, with 399 opposed, and 53 spoiled ballots. On September 27, the Minister of Labour appointed the Honourable Mr. Justice G. B. O'Connor, of Edmonton, who is Chairman of the Western War Labour

Board, and Mr. F. E. Harrison, as Industrial Disputes Inquiry Commissioners, under the provisions of Order in Council, P.C. 4020, to investigate the dispute in view of the seeming imminence of a general strike. The Commissioners brought representatives of the operators and the Union together but were unable to initiate negotiations between the parties or to persuade the Union that it should properly have recourse to established procedure through the National War Labour Board. As this issue of the LABOUR GAZETTE went to press, the Department was still endeavouring to avert a stoppage of production but a strike was reported to have been called for October 15.

Union Representation Votes

EXPLOSIVES WORKERS, NOBEL, ONTARIO.—On September 1 and 2, by joint consent of the parties, Mr. H. Perkins, Industrial Relations Officer, Toronto, supervised a representation vote among the employees of Defence Industries Limited, Nobel, Ontario. The ballot read as follows: "In your dealings with the management of Nobel Works of Defence Industries Limited, do you wish to be represented in collective bargaining by Defence Workers Union, Local No. 1, an affiliate of Canadian Congress of Labour?" A total of 797 employees voted "yes" and 177 voted "no" and there were 2 spoiled ballots.

AIRCRAFT WORKERS, WINNIPEG, MANITOBA.—By joint consent of the parties, a representation vote was conducted in September 22 among the employees in the engine division of Mid-West Aircraft Limited, Winnipeg, by H. S. Johnstone, Industrial Relations Officer. The text of the ballot was as follows: "Are you in favour of being represented for the purpose of collective bargaining with Mid-West Aircraft Limited, Winnipeg by:—Mid-West Employees Association or a Committee affiliated with Lodge 764, International Association of Machinists?" The results were as follows: For Mid-West Employees Association, 154; for union affiliation, 199. There were 399 eligible voters and 7 of the 360 votes cast were spoiled ballots.

PACKING PLANT EMPLOYEES, WINNIPEG, MANITOBA.—Following the expiration on August 15, 1943, of an agreement between the employer and the Western Packing Employees' Federal Union No. 122 (TLCC), a consent ballot was conducted on September 14 among the employees of the Western Packing Company of Canada, Limited, Winnipeg, Manitoba, to determine if they were in favour of being represented for the purpose of collective bargaining with the company by Local 228, United Packinghouse Workers of America. There were 142 persons eligible to vote and 126 ballots were cast. A total of

112 employees voted "yes" and 11 voted "no". There were 3 spoiled ballots.

ALUMINUM WORKERS, BEAUHARNOIS, P.Q.—On September 1, the Department of Labour received a request from Mr. Rene Harnegnies, Organizer of the National Syndicate of Aluminum Workers of Beauharnois, Inc., that immediate steps be taken to institute a vote among employees of the Aluminum Company of Canada, Beauharnois, P.Q., to ascertain whether the employees favoured the National Syndicate of Aluminum Workers or the International Union of Aluminum Workers agreed to such a vote and Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, was asked by the Department to make the necessary arrangements. The vote took place on September 28, the balloting among production workers and office employees being held separately. There were 589 eligible voters among the production workers, of whom 490 cast votes. In this group, 260 voted in favour of the International Union of Aluminum Workers; 214 voted in favour of the National Syndicate of Aluminum Workers of Beauharnois, Inc.; 12 voted against representation by any union; and there were 4 spoiled ballots. Among the office staff 46 out of 55 eligible employees cast their ballots. A total of 43 voted in favour of representation through the National Syndicate, while 3 voted in favour of the International Union.

ELEVATOR EMPLOYEES, SARNIA, ONTARIO.—On August 13 the Brotherhood of Railway and Steamship Clerks informed the Department of its difficulties in securing a conference with

the Sarnia Elevator Company for the purpose of negotiating an agreement covering the employees, members of the Brotherhood. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, investigated the situation, and secured the joint consent of the parties to a representation vote. The vote was held on September 22 on the question. "Do you wish Lodge 856 of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees to act as your collective bargaining Agency in dealing with the Sarnia Elevator Company, Limited?" The results were as follows:—Number of eligible voters, 20; number of votes cast, 15; number voting "yes", 12; number voting "no", 3; spoiled ballots, 0. In view of the result of the vote, Mr. Nicol advised the parties to meet together without delay.

AIRCRAFT WORKERS, STONEY CREEK, ONTARIO.—A representation vote was taken on September 27 at the Noury Aircraft Limited, Stoney Creek, Ontario, on whether the employees wished to be represented in collective bargaining by the International Association of Machinists or the United Automobile and Aircraft Workers of America. The results were as follows: Number of eligible votes, 47; number of votes cast, 40; number voting for International Association of Machinists, 18; number voting for United Automobile and Aircraft Workers of America, 22; number of spoiled ballots, 0. The President of the Company agreed to enter into negotiations with the United Automobile and Aircraft Workers of America upon receipt of a draft agreement.

Strikes and Lockouts in Canada During September, 1943

THE number of strikes and lockouts recorded for the month of September was 42, involving 11,076 workers, with a time loss of 36,896 man working days, as compared with 50 strikes in August, with 35,201 workers involved and a time loss of 236,948 days. In September, 1942, there were 43 strikes, involving 13,357 workers with a time loss of 37,808 days.

During the month under review twelve strikes in the coal mining industry, involving more than 3,000 workers, and seven strikes involving about 2,000 freight handlers and longshoremen caused about 60 per cent of the time loss. In August the large number of workers involved and the high time loss recorded were caused mainly by a strike of aircraft workers at three plants in Montreal.

The following table gives information for September and August, 1943, and September, 1942:—

Date	Number of strikes	Number of workers involved	Time loss in man working days
*September, 1943.....	42	11,076	36,896
*August, 1943.....	50	35,201	236,948
September, 1942.....	43	13,357	37,808

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Three strikes, involving 463 workers, were carried over from August and 39 commenced during September. Of these 42 strikes, 40 were terminated during the month. Seven resulted in favour of the workers, one in favour of the employer, thirteen were compromise settlements and 19 were indefinite in result, work being resumed pending final settlement of each strike. At the end of the month, therefore, there were two strikes recorded as un terminated, namely: coal miners at Glace Bay, N.S.,

and clothing factory workers at Marieville, P.Q.

The record does not include minor strikes such as are defined in another paragraph, nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to one dispute of this nature, namely: fur factory workers, Quebec, P.Q., one employer, May 12th, 1943, to August 31st, 1943.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		

Strikes and Lockouts in Progress Prior to September, 1943.

MANUFACTURING—				
<i>Textiles, Clothing, etc.—</i>				
Clothing factory workers, Quebec, P.Q.	2	413	5,000	Commenced August 27, 1943; for a week's vacation with pay and against agreement signed with another union; terminated September 21; conciliation (federal); return of workers pending determination of bargaining agency; indefinite.
SERVICE—				
<i>Business and Personal—</i>				
Laundry and dry cleaning plant workers, Waterloo, Ont.	1	(a) 11	99	Commenced August 27, 1943; for a closed union shop agreement providing for increased wages; terminated September 11; negotiations; return of workers pending settlement; indefinite.
Laundry and dry cleaning plant workers, Kitchener, Ont.	1	(b) 39	350	Commenced August 27, 1943; for a closed union shop agreement providing for increased wages; terminated September 11; negotiations; return of workers pending settlement; indefinite.

Strikes and Lockouts Commencing During September, 1943.

MINING—				
Metal miners, Black Lake, P.Q.	1	(c) 40	75	Commenced September 1; for payment of bus fare for transportation to mine; terminated September 2; negotiations and reference to NWLB†; compromise.
Coal miners, Sydney Mines, N.S.	3	125	150	Commenced September 1; for wage adjustments as approved by NWLB; terminated September 2; conciliation (federal); return of workers pending settlement; indefinite.
Coal miners, Bellevue, Alta.	1	(d) 250	250	Commenced September 13; for transportation from wash-house to working place on mountain side; terminated September 13; conciliation (federal); (truck to be used while weather permits) compromise.
Coal miners (brushers), Glace Bay, N.S.	1	125	125	Commenced September 14; against change in width of brushing; terminated September 14; negotiations; return of workers pending settlement; indefinite.
Coal miners, Sydney Mines, N.S.	3	125	500	Commenced September 15; for adjustment of occupational classifications following award of NWLB re wage adjustments; terminated September 18; conciliation (federal); return of workers pending settlement; indefinite.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *Labour Gazette* from month to month, bringing down to date that given in the July issue; in the review of "Strikes and Lockouts in Canada and Other Countries, 1942." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and

lockouts, as noted in the *Labour Gazette*, August, 1940, page 760.

The number of disputes beginning in July was 103 and 14 were still in progress from the previous month, making a total of 117 disputes in progress during the month; 34,300 workers were involved in the disputes in progress during the month and the time loss was 97,000 working days.

Of the 103 disputes beginning in July, 19 arose out of demands for increased wages and 41 over other wage questions; 2 on questions as to hours; 12 over questions as to employment of particular classes or persons; 26 over other questions as to working arrangements; one on a question of trade union principle; 2 were sympathetic stoppages. Final settlements were reached in 90 disputes, of which 13 were settled in favour of the workers, 56 in favour of employers and 21 resulted in compromises; in 18 other disputes, work was resumed pending negotiations.

United States Conciliation Service Considers Wide Range of Disputes

ACCORDING to the *Monthly Labour Review*, for September, the United States Conciliation Service "disposed of 17,559 situations, involving 10,974,611 workers", during the (American) fiscal year ending June 30, 1943. Of these "situations", 1,701 were strikes and lockouts involving 799,465 workers; 9,457 were threatened strikes and controversies involving 4,905,237 workers. During the fiscal year 2,539 disputes were certified to the National War Labour Board. Jurisdiction was assumed by other agencies in 647 others. The remaining 3,215 situations included investigations, technical services, arbitrations, requests for information, consultation, etc.

The facilities of the Conciliation Service were used in 29 major industrial fields, such as

building trades, and the manufacture of food, iron and steel, textiles, transportation equipment, etc., and were utilized by employees and employers in 48 states, the District of Columbia, Alaska, Puerto Rico, Hawaii and the Virgin Islands.

Of the total situations disposed of, 1,532 cases, involving 800,197 workers were adjusted, subject to the approval of the wage provisions of the National War Labour Board.

During the month of July, 1943, the Service disposed of 1,744 situations, involving 852,136 workers. Of these situations, 168 were strikes and lockouts involving 55,862 workers; 893 were threatened strikes and controversies involving 392,892 workers.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec and a schedule under the Industrial Standards Act of Alberta are summarized in a separate article following this.

Manufacturing: Pulp, Paper and Paper Products

LA TUQUE, P.Q.—BROWN CORPORATION AND THE NATIONAL SYNDICATE OF PULP EMPLOYEES OF LA TUQUE, No. 16, AND THE NATIONAL CATHOLIC FEDERATION OF EMPLOYEES OF PULP AND PAPER MILLS, INC., PORT ALFRED.

Agreement to be in effect from May 5, 1943 to May 15, 1944, and thereafter from year to year, subject to notice. The company recognizes the union and will not discriminate against employees because of union membership.

Hours: for day workers, 8 per day, 48 per week; for shift workers, 8 hour shifts, 48 per week. Overtime for day workers is payable at time and one half; all work on Sundays and holidays by both day and shift workers is payable at time and one half. There are four recognized mill holidays. Vacation: one week with pay to employees with more than a year's continuous service if the plan is acceptable to the Regional War Labour Board. The wage scale was agreed upon and submitted to the Regional War Labour Board for approval. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Printing and Publishing

MONTREAL, P.Q.—PUBLISHERS OF TWO ENGLISH DAILY NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 176.

Agreements to be in effect from November 1, 1941, to October 31, 1942, which were renewed to October 31st, 1943. One of these agreements was signed and the other verbally accepted. Only union members to be employed.

Hours: 8 per day, a 5-day week, 40 hours per week, for both day and night work. When necessary to work split shifts running from day into night hours or vice versa, shifts to be 7½ hours with pay at night rates. Wages: journeymen \$38.94 for day work, \$42.68 for night work; the same minimum rates are also payable to machine operators, machinist-operators and machinists; foremen to receive at least 15 per cent over regular rates. Overtime is payable at time and one half for the first three hours and double time thereafter; double time for work on shifts beginning on Sundays or holidays. Provision is made for apprentices, for seniority rights, and for the settlement of disputes.

Manufacturing: Metal Products

SYDNEY, N.S.—SYDNEY FOUNDRY AND MACHINE WORKS, LTD. AND INDUSTRIAL UNION OF FOUNDRY AND MACHINE WORKS LTD. LOCAL No. 1.

Agreement reached with the assistance of an Industrial Disputes Inquiry Commissioner, as noted on page 1358. Agreement to be in effect from September 24, 1943, to September 23, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agency for all employees who are eligible for membership. No discrimination against employees because of their union affiliations.

Hours: 8 per day, a 48-hour week; overtime is payable at time and one half; double time for work on Sundays and six specified holidays. The wage scale was not included in the agreement. The cost of living bonus to be paid in accordance with federal government legislation. Charge hands to be paid 10 cents per hour extra; men performing work recognized as "dirty work" also receive 10 cents per hour extra. Arrangements are made for seniority rights and for the settlement of grievances.

CAP DE LA MADELEINE, QUEBEC.—ELECTRIC STEELS LTD. AND INTERNATIONAL MOULDERS' AND FOUNDRY WORKERS' UNION, LOCAL 409.

Agreement reached after an application had been made for a board under the Industrial Disputes Investigation Act (see page 1358 of this issue). Agreement to be in effect on or about September 16, 1943, to September 17, 1944, and thereafter subject to notice. The company agrees that if they are unable to settle any dispute with a union committee of employees, they will meet the representative chosen by the employees to discuss the matter.

Hours: 54 per week of 6 days. Overtime is payable at time and one half; if a man works seven consecutive days he shall receive double

time for the seventh day. Double time for work on seven holidays. Vacation: one week's vacation with pay each year.

PETERBORO, ONTARIO.—GENELCO LTD. AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 524.

Agreement to be in effect from April 29, 1943 to April 28, 1944, and thereafter from year to year, subject to notice. The Company recognizes the union as the bargaining agency for hourly rated employees and will not discriminate against any employee on account of union membership; the union agrees not to intimidate or coerce employees.

Hours: 9 per day, 5 on Saturdays, a 50-hour week. Overtime: for day shifts, time and one half for work over 9 hours Monday to Friday and over 5 hours on Saturday and for all work on Sundays; for night shifts, time and one half for all work over 9 hours per night, Monday to Friday, and for all work on the night shifts of Saturday and Sunday nights. Time and one half for all work on Statutory holidays. Wages: it is the policy of the company to pay wage rates equal to or better than the average of rates paid in the community for comparable work. A cost of living bonus is paid in accordance with government regulations. Night shift: a bonus of 5 per cent to be paid for recognized second and third shifts. Provision is made for seniority rights and for the settlement of grievances.

A supplementary agreement also dated April 29, 1943, provides: that the membership of this local union will consist only of employees of this company; that if unable to agree on a rate for an occupation either party may make a submission to the Regional War Labour Board; if unable to agree on a vacation policy, this also may be submitted to this board.

Manufacturing: Shipbuilding

NANAIMO, B.C.—NEWCASTLE SHIPBUILDING Co. LTD. AND AMALGAMATED BUILDING WORKERS OF CANADA, NANAIMO UNIT NO. 1.

Agreement to be in effect from January 14, 1943, for the duration of the war and wartime contracts. If the union is unable to supply competent mechanics, other men may be hired and will be accepted into the union, but the company agrees not to hire any man who has been unfair to the union.

Hours: 8 per day, 44 per week for day shift; for second shift $7\frac{1}{2}$ per shift, with pay for 8 hours; for third shift, 7 hours per shift, with pay for eight hours; for second and third shifts, 40 hours per week except for a second shift employed on emergent war work when they may

work 44 hours. For tide work, 8 hours' pay for each tide worked. Overtime is payable at time and one half for first four hours and double time thereafter; double time for work on Sundays and holidays. Time and one quarter allowed for all dirty work. Hourly wage rates: carpenters, joiners and shipwrights 90 cents, caulkers 93 cents, leading hands \$1, painters 85 cents, electricians \$1, improvers 80 cents, mechanics' helpers with no tools 72 cents, general labourers 55 cents. These rates to be subject to adjustment quarterly in accordance with the cost of living as ascertained by the Dominion Department of Labour.

Construction: Buildings and Structures

CANADA.—ELEVATOR MANUFACTURERS AND INTERNATIONAL UNION OF ELEVATOR CONSTRUCTORS.

The terms of this agreement covering all locals of this union in Canada were summarized in the LABOUR GAZETTE, February, 1940, p. 169. The 1941 wage rates were noted in the issue of December, 1941, p. 1567, and the 1942 rates in the issue of December, 1942, p. 1484. The hourly wage rates reported by various locals for mechanics and helpers on construction work as at June 1, 1943, were: Halifax, N.S. and Saint John, N.B.—\$1 for mechanics, 70 cents for helpers; Quebec City 90 cents for mechanics, 63 cents for helpers; Ottawa \$1 for mechanics, 70 cents for helpers; Toronto \$1.10 for mechanics, 77 cents for helpers; Hamilton, St. Catharines, Kitchener and London \$1 for mechanics, 70 cents for helpers; Windsor \$1.12 for mechanics, 78 cents for helpers; Edmonton, \$1.04 for mechanics, 73 cents for helpers; Vancouver, \$1.12 for mechanics (78 cents for helpers). The rates for mechanics and helpers on maintenance work is 10 per cent less than the above construction rates.

VANCOUVER, B.C.—THE GENERAL CONTRACTORS' ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCALS 452 AND 1251.

Agreement to be in effect from August 4, 1943, to August 3, 1944, and thereafter from year to year, subject to notice. This agreement is similar to the ones previously in effect and summarized in the LABOUR GAZETTE, April, 1941, p. 471, with these exceptions:

The minimum wage rate for journeymen carpenters is \$1 per hour (an increase of 10 cents per hour) plus a cost of living bonus as prescribed and changed from time to time by the National War Labour Board; the rate of such bonus is now \$4.25 per week. All carpenters in charge of work to be paid at least \$1 per day of 8 hours over the minimum rate.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN QUEBEC, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have

the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of

such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement and the amendment of nine others, all of which are noted below. A request for the amendment of the agreement for the paint manufacturing industry throughout the province was published in the *Quebec Official Gazette* of September 4, and for the amendment of the agreement for the shoe manufacturing industry throughout the province, in the issue of September 25.

Manufacturing: Fur and Leather Products

TANNERY INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated September 23, and gazetted September 25, amends the previous Orders in Council (*LABOUR GAZETTE*, March, 1940, p. 282; February, 1941, p. 183; August, p. 1008, October, p. 1313; March, 1942, p. 353, September, p. 1097, December, p. 1490; April, 1943, p. 489) by increasing the minimum wage rates shown in the agreement by 10 per cent; this 10 per cent increase also applies to all employees governed by this agreement and is computed on the wages in force on April 1, 1943.

Manufacturing: Printing and Publishing

PRINTING TRADES, QUEBEC CITY AND DISTRICT.—

An Order in Council, dated August 27, and gazetted September 4, extends the period of this agreement (*LABOUR GAZETTE*, April, 1940, p. 388; October, 1941, p. 183; April, 1943, p. 490, July, p. 989, August, p. 1131) to October 15, 1943.

Manufacturing: Metal Products

SHEET METAL MANUFACTURING INDUSTRY, MONTREAL.

An order in Council, dated August 27 and gazetted September 4, amends the previous Orders in Council for this industry (March, 1943, p. 340). Welders are classified into classes "A," "B" and "C," with hourly wage rates of 90 cents, 80 cents and 70 cents respectively; production welders to be paid from 50 cents per hour during first six months to 65 cents during fourth six months, after which they became

eligible for class "C" welder if they qualify. For female workers (whose rate is 40 cents per hour after six months) increases may be granted based on ability within the limit prescribed by the Regional War Labour Board.

Another Order in Council, dated September 23, and gazetted September 25, corrects the wording of the August 27, Order in Council.

Trade

RETAIL STORES, CHICOUTIMI.

An Order in Council, dated September 10, and gazetted September 25 makes obligatory on all employers and employees in retail stores in Chicoutimi and within five miles of it (except Arvida) the terms of an agreement between the Retail Merchants Association of Canada, Chicoutimi branch, and Les Syndicats Nationaux et Catholiques des Employés de magasins de détail de Chicoutimi, inc. (The National Catholic Unions of Retail Store Employees of Chicoutimi). Agreement to be in effect from September 18, 1943, to July 1, 1944, and thereafter from year to year, subject to notice.

Hours: 51 per week for female employees, 54 for male employees. Eleven holidays are observed during the year and employees are paid for such holidays. Overtime is payable at time and one half. Minimum weekly wage rates: for men and women from \$8 during first six months to \$15 during fourth year; after four years' experience, minimum for men is \$20, for women \$18; departmental managers and assistant managers—men \$35, women \$20, managers—men \$45, women \$25, delivery boy with bicycle (furnished by employer) \$7; part time workers—men 35 cents per hour, women 25 cents. The cost of living bonus is payable in accordance with federal government regulations. Vacation: one week's vacation with pay after one year's service; after two years' service, one week annually and an additional day for each year of service up to a 15 day vacation.

HARDWARE AND PAINT STORES, QUEBEC.

An Order in Council, dated September 10, and gazetted September 18, amends the previous Orders in Council for these stores (*LABOUR GAZETTE*; April, 1940, p. 391, Dec., p. 1312; January, 1941, p. 70, June, p. 705; June, 1942, p. 739, September, p. 1097, Dec., p. 1490). Delivery men and helpers and any employees receiving \$26 per week or more may occasionally work 3 hours overtime in a week without pay.

DAIRY EMPLOYEES, QUEBEC.

An Order in Council, dated August 27, and gazetted September 4, amends the previous Orders in Council for these employees (*LABOUR GAZETTE*, July, 1938, p. 799; July, 1939, p. 729, August, p. 862; Dec. 1940, p. 1312; April, 1941, p. 473) by providing for a cost of living bonus in accordance with federal government regulations.

Another Order in Council, dated September 16, and gazetted September 25, makes a further amendment by changes in the definition of classes of employees.

GROCERS AND BUTCHERS, SHERBROOKE.

An Order in Council, dated September 8, and gazetted September 11, amends the previous Orders in Council (LABOUR GAZETTE, July, 1940, p. 734, August, p. 868; June, 1941, p. 706). Weekly hours are reduced from 63 to 54 per week.

Service: Public Administration

MUNICIPAL EMPLOYEES, SHERBROOKE.

An Order in Council, dated September 10, and gazetted September 18, amends the previous Orders in Council for these workers (LABOUR GAZETTE, December, 1942, p. 1490) by increasing the hourly wage rates in the agreement by 4 cents per hour. Another holiday is added to the holidays to be observed.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, QUEBEC.

An Order in Council, dated September 10, and gazetted September 18, amends the previous Orders in Council (LABOUR GAZETTE, August, 1941, p. 1013; May, 1942, p. 631, August, p. 978; May, 1943, p. 639). The amendment does not affect the summaries previously given.

BARBERS AND HAIRDRESSERS, HULL.

A correction to the previous Orders in Council (LABOUR GAZETTE, October, 1941, p. 1316; December, p. 1573; September, 1942, p. 1098; March, 1943, p. 341) reduces the hours barber shops are open by 1½ per week.

Industrial Standards Acts, Etc.

Schedule of Wages and Hours Recently Approved by Provincial Orders in Council in Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a

conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the LABOUR GAZETTE, October, 1940, page 1077. A schedule of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Alberta*Trade*

DAIRY INDUSTRY, CALGARY.

An Order in Council, dated September 9, and gazetted September 15, makes binding the terms of a schedule of wages and hours for the dairy industry in Calgary, to be effective from September 25, 1943 to September 24, 1944, or thereafter "during pleasure."

Maximum hours: for male workers, 10 per day, 54 per week; for female workers, 9 per day, 48 per week; one day's rest in seven which may be computed on a semi-monthly or monthly basis. Overtime is payable at time and one half. Vacation: one week's vacation with pay for employees who have one year's service at May 1 of each year; for those with less service

at this date, one day's vacation allowed for each 50 days worked. Minimum monthly wage rates: plant—store (female, experienced) \$54.16, store (male) \$78, shipping \$95, machinery and maintenance \$108 for experienced, \$78 for inexperienced workers, butter department \$54.16 for experienced female workers and \$105 for experienced male workers, ice cream department \$60 for experienced female workers, \$95 for experienced male workers, unclassified \$85, unclassified helper \$80, janitors \$78; stable \$95, temporary \$3.50 per day, garage \$78; delivery—retail drivers \$92 plus commission, wholesale driver \$119, spare driver \$125 plus commission, route helpers \$92, other truck drivers \$85 for male and \$80 for female. Commission rates are specified.

War Emergency Training

Summary of Program—Progress of Enrolment during August— Additional Plant Schools Approved—Changes in Per Capita Cost of Training

THE War Emergency Training Program provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the up-grading of persons already employed;
- (3) Training in plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health.
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

War Emergency Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

From the beginning of the program up to August 31, 1943, gross enrolment has been as follows:—

Training for Industry.....	174,913
Army	34,225
Navy	5,869
R.C.A.F.	51,733
Rehabilitation (discharged persons from the forces).....	1,711
University students.....	2,906
	271,357

The accompanying tables give detailed statistics showing the progress of the various branches of the Program. Table 1 records the training given in vocational schools to men and women taking pre-employment classes, part-time classes and rehabilitation classes; table 2 shows the number enrolled in vocational schools from the Armed Forces; and table 3 gives the figures for those engaged in plant schools and part-time classes in industry.

Progress of Enrolment during August

Enrolment during August showed a further decrease of industrial trainees in the full-time pre-employment classes and in the part-time classes for persons already employed. This decrease applied equally to both men and women. There was also a decrease in the placements made from the full-time pre-employment classes during the month of August as compared with the months of June and July.

New Plant Schools

Approval was given to six new plant schools during this period, four of them in Ontario, one in Manitoba and one in British Columbia. This brought the total number of plant schools approved up to August 31 to 107. During the month there was a substantial increase in the number of trainees enrolled in plant schools, particularly in the case of women where the enrolment increased over 50 per cent in the course of the month.

Training in Armed Forces

In the classes provided to train members for the armed forces there was a substantial decrease in the enrolment of R.C.A.F. personnel. This was due to the termination of the special training centres opened during the summer months only for pre-aircrew personnel.

The enrolment of Army Tradesmen showed a very slight increase during the month. The enrolment in the classes for the Navy increased nearly 25 per cent during the month.

Per Capita Cost of Training

The smaller enrolment in many of the industrial classes has been attended by an increase in the cost of operations as compared with the previous fiscal year. The cost per trainee per day, less allowances for capital expenditures, has been \$1.14 from the 1st of April to end of August, 1943, as compared with \$1.09 for the fiscal year ending March 31, 1943. The cost of instructors and supervisors per trainee day has shown an increase in the same period from 73 cents to 84 cents. The cost of materials, supplies and small tools, on the other hand, has decreased from 17 cents to 15 cents per trainee per day. In the Air Force classes, on the other hand, due to an increase in the enrolment, the cost per trainee per day, less allowances for capital expenditures, has decreased from 82 cents in the previous fiscal year to 67 cents for the period April 1 to August 31, 1943.

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to August 1, 1943, were not so reported until after August 1, 1943.

Recent Activities of the Unemployment Insurance Commission

Contributions and Benefit Regulations—Vocational Rehabilitation of Handicapped Persons—Staff Training in Employment Offices—Insurance Registration—Claims for Benefit—Unemployment Insurance Fund

FOLLOWING the recent amendments in the Act (L.G., Sept., 1943, p. 1268), the unemployment insurance regulations relating to contributions were completely revised and minor amendments were made in the benefit regulations. The contribution regulations are now arranged under five headings: Coverage, Computation of Contributions, Payment of Contributions, Records of Contributions and General. New tables have been added for calculating the amount of contributions payable in respect of each worker and for determining the deductions which may be made from workers' wages for their share of the contributions. A full summary of these regulations and of the changes in the benefit regulations is given in the Labour Law section of this month's *LABOUR GAZETTE*, p. 1414.

Vocational Rehabilitation of Handicapped Persons

In an effort to utilize further every available source of manpower in the promotion of the war effort, intensive study is being given to the enrolment and placement of physically handicapped workers. With a view to determining the most efficient means of achieving this purpose, particularly in Ontario and Quebec, a conference was held in Toronto on September 27, 28 and 29, under the auspices of the Employment Service and Unemployment Insurance Branch of the Department of Labour. Mr. H. C. Hudson, Supervisor of Special Placements, acted as General Chairman.

Included in the organizations represented at the Conference were: National Selective Service, Department of Labour; Department of Pensions and National Health; Department of Public Health, Ontario; Ontario Workmen's Compensation Board, Ontario; Quebec Workmen's Compensation Clinic; Canadian National Institute for the Deaf and Hard of Hearing; Society for Crippled Civilians; The Samaritan Club; University of Toronto; Local Council of Women; Children's Aid Society; Toronto Board of Trade; Civil Service Commission; Rotary Club, Kiwanis Club; Royal Canadian Air Force; Y.W.C.A.; Hydro-Electric Power Commission; Post-War Rehabilitation Com-

mittee; and the Canadian Manufacturers Association. In addition, a number of leaders in education and industry were present and the Government of Mexico sent its representatives.

Addresses were given by expert authorities on such subjects as Vocational Rehabilitation in Great Britain and the United States; the Rehabilitation Service of the Ontario Workmen's Compensation Board; Psychological Testing of Handicapped Persons; Occupations for the Handicapped; The Employers' Point of View Regarding the Placement of Handicapped Workers; the Need for a Program of Civilian Rehabilitation; Day to Day Problems in the Placement of Handicaps; The Deaf and Hard of Hearing in the Occupational World; Special Services for Handicaps in Montreal; Employability of the Blind; Specialized Employment Services for the Blind; Techniques and Procedures in Handicap Placement Work and the Rehabilitation Program of the Department of Pensions and National Health.

Careful and detailed discussions followed the pronouncements of the experts. In this way, a fund of information was brought together which it is expected will be of great value not only to physically handicapped persons, but to the employment services throughout Canada.

The conference formally went on record as urging the immediate development of a comprehensive plan for the more efficient registration and effective utilization of handicaps. It also recommended the formation of an advisory committee to guarantee that the needs of handicapped persons could be adequately met and the interest and co-operation of employers broadened.

Staff-training in Employment Offices

What has the employer of labour and the applicant for employment a right to expect from the Employment Service, is the question that motivates the staff training program of the Unemployment Insurance Commission. For several months instruction has been given in Regional and Local Employment and Selective Service offices across Canada, and

the success attained thus far warrants its continuance. (L.G., June, 1943, p. 820.)

Zone conferences in the Ontario region have disclosed a general similarity in the problems confronting the staffs in all of the offices and provide a guide to the nature and quality of the instruction required.

At the present time, training is being given to staffs in a number of offices to equip them for interchangeability of work, so that one section can assist another which may have a temporary rush of work. Emphasis is also being placed in two of the largest offices on "Coverage" problems and on procedure in the women's division, including induction training for new members of the staffs. This "on-the-job" instruction is proving of great practical value and apparently achieves the desired purpose more quickly than class-room work.

The Regional staff training advisors have completed their surveys of almost all the offices in their respective regions and will henceforth devote their energies to the development of programs of instruction that these surveys have demonstrated are particularly necessary.

Claims for Benefit

The amount paid in claims for unemployment insurance benefit during the period from April 1, 1943, to August 31, 1943, was \$406,860.98. In this period 11,387 claims were received for adjudication at the nine offices of the Commission, of which 8,534 claims were allowed, 2,455 claims were not allowed with 323 claims pending.

An analysis of the 2,455 claims not allowed by insurance officers reveals the following reasons for non-allowance: 666 claims under Section 28 (i) in which claimants had insufficient contributions; 127 claims under Section 28 (ii) in which 83 claims were not made in the prescribed manner, and 44 of the claimants were not unemployed; 65 claims under Section 28 (iii) in which 49 were not capable of work and 16 were not available for work; 77 claims under Section 43 (a) for loss of work due to labour dispute; 34 claims under Section 43 (b) (i) for refusal of an offer of work; 10 claims under Section 43 (b) (ii) for neglect of opportunity to work; one claim under Section 43 (b) (iii) for failure to carry out written directions; 1,450 under Section 43 (c) of which 150 were discharged because of their own misconduct, and 1,300 were disqualified for voluntarily leaving without just cause, one claim under 43 (d) for being under 16 years of age;

24 claims under Section 43 (f) in which 17 were in class "O" contributions and 7 for other reasons.

Appeals and References

During the period April 1, 1943, to August 31, 1943, there were 349 references and 79 appeals made by claimants to Courts of Referees. In addition there were 10 references by insurance officers to Courts of Referees. Of the 548 cases, 438 were heard, 70 had not been heard and 40 had been withdrawn. The Courts of Referees allowed 110 cases and disallowed 328.

Appeals to Umpire

Eleven claimants (including 2 not heard at March 31, 1943) sought permission from the chairmen of Courts of Referees to appeal to the Umpire, under Section 58 (c) (ii); 4 other permits were asked for, either by claimants or associations of employed persons, under Section 58 (b) and one by an insurance officer under Section 58 (a). Of these, nine were not granted permission. Of the 7 granted, four were heard and three had not been heard. None of the appeals heard were allowed, but two were referred back to the Courts of Referees for further evidence and consideration.

Insurance Registration

Reports received from Local Offices of the Unemployment Insurance Commission showed that at October 1, 1943, 134,724 employers with insured employees were registered and 2,833,326 employees had been issued with insurance books. The total of insured persons includes those becoming insurable under the recent Amendments to the Unemployment Insurance Act, effective September 1, 1943.

A breakdown of employers and employees according to Regions in which registration took place is shown in the following table:—

TABLE I

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of August, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

A further upward movement in industrial activity is shown in the report this month, according to data submitted by 13,834 establishments employing a total of 1,867,898 men and women at the beginning of August; this total was greater by 22,033 persons, or 1.2 per cent, than that reported at the beginning of July.

The majority of the persons added to the working forces at the date under review were taken on in the non-manufacturing industries, which absorbed some 72 per cent of the 22,033 persons additionally employed. Co-operating manufacturers reported an increase of 6,200.

The index number of employment (based on the 1926 average as 100) was 185.9, as compared with 183.8 per cent in the preceding month, and 177.8 at August 1, 1942.

Information concerning payrolls, which is furnished each month by the co-operating firms, is incorporated in this article. The per capita average weekly wage in the industries submitting returns rose from \$30.97 at July 1, to \$30.98 at the beginning of August, as compared with \$28.62 at August 1, 1942.

Report on employment conditions for September.—A summary of employment con-

ditions for the month of September has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment; vacancies, and placements, August, 1943.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from Employment and Selective Service Offices of the Unemployment Insurance Commission for the five-week period July 30, to September 2, inclusive, showed 325,233 positions offered, 257,661 applications for employment and 189,214 placements effected. Of the latter 185,226 were in regular employment and 3,988 were in employment of one week's duration or less. There was a decrease of 14 per cent in the daily average of placements when compared with the preceding four weeks but a gain of 225 per cent in comparison with August, 1942.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of September, 1943, the percentage of unemployment among trade union members was 0.4 which was identical with that recorded in August; the unemployment percentage in September, a year ago was .9. The September figure was based on returns compiled from 2,335 labour organizations with a total membership of 462,870.

The Employment Situation at the Beginning of August, 1943 as Reported by Employers

INDUSTRIAL activity showed a further upward movement at August 1, when the general increase exceeded the average at that date in the experience of the years since 1920; it approximated the general gain at the beginning of August in 1942, but was smaller than in 1940 or 1941. The Dominion Bureau of Statistics received information from 13,834 establishments employing 1,867,898 men and women; this total was greater by 22,033 persons, or 1.2 per cent, than that reported at the beginning of July. The amounts disbursed in weekly payrolls were also higher by 1.2 per cent.

Based on the 1926 average as 100, the index of employment, at 185.9, exceeded by 4.6 per cent that of 177.8 at August 1, 1942, previously the maximum for midsummer. (See Table I and accompanying chart.) The latest figure was, however, fractionally lower than the all-time peak of 186.5, reached at December 1, 1942. Since the increase in the index at the first of August was above normal, the seasonally-adjusted index showed a further advance, rising from 180.2 at July 1, to 180.9 at August 1.

As has usually been the case at midsummer, the majority of the persons added to the working forces at the date under review were taken on in the non-manufacturing industries, which absorbed some 72 per cent of the 22,033 persons additionally employed. The co-operating manufacturers reported an increase of some 6,200, a gain which exceeded the average at the beginning of August in the period since 1920, but which was nevertheless considerably smaller than that at August 1 in any other year since 1938; prior to that, the trend in manufacturing had usually been downward. Within this group, there was further expansion in iron and steel, lumber, electrical apparatus and other branches of the durable goods industries. In plants turning out non-durable goods, further considerable curtailment was indicated in chemical works; the production of textiles, tobacco and some other commodities also showed a falling-off, which in some cases was seasonal in character. On the other hand, animal and vegetable food, pulp and paper, beverage and petroleum factories reported greater activity.

Within the non-manufacturing industries, logging recorded seasonal curtailment of about average proportions, while the trend was upward in trade, communications, services, mining, transportation and construction and

maintenance. The largest increase of over 13,300 employees, took place in construction, but this gain of 7.9 per cent was considerably smaller than usual at the beginning of August. Except for the advance of more than 3,200 persons in transportation, and 1,200 in mining, the improvement in the remaining industries was rather slight. The expansion in coal-mining, which absorbed most of those taken in the extractive industries, was the largest indicated since September 1, 1941.

Payrolls

The amounts expended by the co-operating employers in salaries and wages at August 1 were given as \$57,870,495, an average of \$30.98 per employee. At July 1, these firms had reported the disbursement of \$57,168,949, a per capita average of \$30.97. The mean at August 1, 1942, had been \$28.62, and at August 1, 1941, \$25.69. It is probable that under normal circumstances, there would be a falling-off in the general average per employee at midsummer, partly because of vacations, and partly because the considerable increase in the number in recorded employment would ordinarily take place in the industries in which the earnings tend to be less-than-average. Although loss of working time during vacations affected the latest payrolls to some extent, they are nevertheless the highest in the record of 27 months; the average per employee, however, continued rather below the April 1, 1943, high figure of \$31.14. As compared with August 1, 1942, there was a rise of 12 per cent in the index of payrolls, while the gain in the general index of employment was 4.6 per cent. The weekly average earnings of those in recorded employment have risen by 8.2 per cent in the 12 months.

A brief review of the statistics of payrolls from their institution shows that since June 1, 1941, the contents of the average pay envelope of the typical employee in the eight leading industries has advanced by 22.2 per cent. During this period, the cost-of-living index has risen by 7.9 per cent, while increases in taxation and other expenses have also tended to offset a considerable part of the gain in the weekly earned income of the average employee. Nevertheless, the general rise in current earnings, together with the employment of additional members of many of the families, has resulted in a considerable improvement in the financial position of a large proportion of the total population.

If the statistics of employment and payrolls for financial institutions are added to those given above for the eight leading industries, the latest survey depicts the situation reported by firms employing a total personnel of 1,932,350, as compared with 1,909,188 at the beginning of July. The aggregate weekly payroll in the nine leading industries (viz., manufacturing,

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at July 1, 1943, and August 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

logging, mining, communications, transportation, construction and maintenance, services, trade and finance) was \$59,906,132, as compared with \$59,161,576 at July 1. The per capita average in the nine industries was \$31, a figure insignificantly higher than that of \$30.99 at July 1. The average at the beginning of August, 1942, was \$28.68.

firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups

has shown an increase of 21·6 per cent, while the aggregate weekly payrolls of those workers are higher by 47½ per cent. Including finance, the gain in employment from June 1, 1941, to August 1, 1943, amounted to 21·0 per cent, and that in payrolls, to 46·3 per cent. The explanation given in preceding bulletins for the much greater rise in the salaries and wages than in the numbers employed may again be stated: (1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the payment of cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been increased on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted.

The influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 35·5 per cent from June 1, 1941 to August 1, 1943, and that of payrolls has advanced by 66·2 per cent, pro-

portions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

Employment and payrolls in the production of durable goods in the period of observation have shown especially marked expansion, there being an increase of 58 per cent in the index of employment, and of 96·6 per cent in the salaries and wages distributed by the co-operating employers from June 1, 1941, to August 1, 1943. Although there has more recently been a slackening in some of the non-durable goods industries, the index number of employment in this group at the date under review was higher by 15·2 per cent than that indicated at June 1, 1941, since when there has been an increase of 34 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience.

TABLE I—INDEX NUMBERS OF EMPLOYMENT AND PAYROLLS, BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS

The matter of short-time or over-time may also considerably influence the reported aggregate and average, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Employment and Payrolls by Industries

Manufacturing.—The trend of employment in manufacturing continued upward; as in recently preceding months, the expansion at August 1 was greater-than-average according to pre-war standards, but was considerably

smaller than at the same date in any other year since 1938. A combined working force of 1,188,869 was reported by the 7,720 establishments furnishing information, as compared with 1,182,740 at the beginning of July. The increase of 6,129 persons, or 0.5 per cent (which was accompanied by a gain of 0.7 per cent in the reported payrolls) raised the index from its previous all-time peak of 226.5 at July 1, to 227.7 at the beginning of August; it then exceeded by 7.2 per cent the figure of 212.4 at August 1, 1942. This increase, though not inconsiderable, was the smallest recorded in the 12 months' comparison over a lengthy period.

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

The fact that the latest advance was above normal is reflected in a gain in the seasonally-adjusted index; from 221.9 at July 1, this rose to 222.7 at the date under review.

There was further expansion in the durable goods industries at August 1, but the number of employees added (viz., 8,185) was less than at the beginning of July; the gain was also considerably smaller than that at August 1, 1942. The largest increase at the date under review was in iron and steel plants, which employed some 5,300 additional workers. Electrical apparatus and lumber mills also reported considerable advances, while there were small gains in clay, glass and stone factories.

The non-durable goods industries as a whole were quieter, mainly as a result of losses in chemicals and textiles; those in the latter were seasonal. The leather, tobacco and miscellaneous manufactured products divisions were also quieter. On the other hand, animal and vegetable foods, pulp and paper, beverage and petroleum factories showed considerable improvement. Employment in the production of non-durable goods as a whole was at a rather lower level at August 1 than at the same date in 1942. A gain of some 3,500

workers had then been indicated, while at the latest date, there was a reduction of over 2,600.

The manufacturers furnishing data at the beginning of August reported that they had distributed \$37,649,459 in salaries and wages, a sum which was greater by 0.7 per cent than that of \$37,403,056 expended by the same firms at July 1. The per capita average, at \$31.67, was slightly higher than that of \$31.62 at July 1, and considerably exceeded the average of \$29.08 and \$26.06 at August 1 in 1942 and 1941, respectively.

Based on the disbursements at June 1, 1941, as 100, the latest index of payrolls was 166.2, being a little higher than that of 165.1 at July 1, 1943, and 16.1 per cent higher than that of 143.2 at August 1, 1942, since when the index of employment has risen by 7.2 per cent. The reasons for the disparity in the rates of gain have already been given. In the manufacturing industries, the upgrading of employees as they acquire experience is of especial and increasing importance, tending to offset the effect of the large scale dilution of labour resulting from the shortage of workers which has become acute with the development

TABLE III—INDEX NUMBERS OF EMPLOYMENT BY PROVINCES AND ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	CANADA	Maritime Provinces	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Prairie Provinces	Manitoba	Saskatchewan	Alberta	British Columbia

Relative weight of employment by Provinces and Economic Areas as at Aug. 1, 1943.	100.0	7.9	.1	5.0	2.8	31.6	40.2	10.5	4.9	2.1	3.5	9.8

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

of the war effort. As has previously been pointed out, the changing industrial distribution of the wage-earners in recorded employment has also contributed materially to the relatively greater gain in payrolls, there being a growing proportion of workers in the more highly-paid heavy industries. At August 1,

1943, such industries provided work for 57.4 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at the same date in 1942, the proportion was 53.4 per cent. The importance of this growing concentration in the durable goods group is emphasized by the fact that the latest per

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	¹ Relative Weight	Aug. 1 1943	July 1 1943	Aug. 1 1942

¹ The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

per capita average earnings of persons engaged in these classes, at \$34.80, were \$6.98 higher than at June 1, 1941, while in the light manufacturing industries, the latest average, standing at \$27.29, has risen by only \$3.99 in the 27 months.

From the institution of the payroll statistics early in 1941, there have been extremely marked advances in salaries and wages distributed to persons employed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and tobacco industries. The advances in those industries have been accompanied by noteworthy, though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita average earnings in the various branches of manufacturing were considerably higher at the date under review than at August 1, 1942.

Many factors contribute to the differences found in the average weekly earnings in the various industries. Prominent among these is the sex distribution of workers in the various industries, a factor which is associated with that of age, the women workers, in general, tending to belong in the younger age groups, where earnings normally are less than among more experienced employees. The presence or absence of overtime work also substantially affects the per capita average earnings.

Logging.—Seasonal curtailment was noted in employment in logging; the losses were generally below-average, being considerably smaller than those indicated at August 1 in either 1942 or 1941. Statements were tabulated from 502 employers with 40,737 persons on their working forces, as compared with 44,373 at the beginning of July. The salaries and wages disbursed at the date under review amounted to \$1,092,292, an average of \$26.81 per employee; the payrolls at July 1 had aggregated \$1,157,509, while the average had been \$26.09. At August 1, 1942, the mean was \$22.98. As has previously been stated, the figures of aggregate and per capita earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings; these differ greatly in various parts of the country, the average in British Columbia being decidedly higher than in any other province.

The August 1 index of employment stood at 136.1; this was 12.2 points below that at July 1, and 4.2 per cent lower than at August 1, 1942. There was, however, an increase of

7.1 per cent in the index of payrolls in the 12 months.

Mining.—Activity in mining was greater than in any of the three months preceding; the improvement took place in the extraction of coal and other non-metallic minerals, there being continued declines in metallic ore mining, in which there was also a considerable reduction in the payrolls. Statistics furnished by 467 operators indicated the employment of 74,404 workers, exceeding their July 1 staffs by 1,204, or 1.6 per cent. This gain was greater than usual for the time of year.

The salaries and wages paid in mining as a whole at August 1 were given as \$2,666,904, as compared with \$2,672,831 reported at the beginning of July. The average per employee at that rate was \$36.51, and at August 1, \$35.84. The latter was \$1.20 higher than the figure at the beginning of August of last year. Since then, the index of employment has fallen by 7.7 per cent, while there has been a loss of 5.8 per cent in the index of payrolls.

Communications.—The tendency continued favourable in communications, there being heightened activity at the date under review in the telephone and telegraph divisions. The payrolls also were higher, standing at \$829,749, as compared with \$808,736 in the preceding period of observation. The per capita average advanced from \$28.89 at July 1, to \$28.99 at the first of August, as compared with \$27.56 at the same date last year. The latest index of employment at 107.1, was slightly higher than that of 106.7 at August 1 of last year, since when the index of aggregate payrolls has gained by 5.6 per cent.

Transportation.—Employment in transportation showed further seasonal advances at the beginning of August, when the expansion was above-average in the experience of the years since 1920. The trend was upward in employment on steam railways, in local transportation and shipping and stevedoring. Returns were furnished by 592 employers having 151,223 workers, as compared with 147,992 at July 1. The index rose from 117.2 at that date, to 119.7 at the beginning of August; it was then higher than in any other month in the record. As compared with August 1, 1942, there was a gain of 8.4 per cent.

The payrolls disbursed at the date under review, for services rendered in the week preceding, totalled \$5,373,784, exceeding by 1.8 per cent, the sum of \$5,277,810 reported at July 1. The per capita average stood at \$35.54, being a few cents lower than the July 1, figure of \$35.66, but considerably higher than that of \$34.38 at August 1, 1942.

Construction and Maintenance.—Heightened activity was again indicated in construction and maintenance; the increase was larger than in the preceding report, and also exceeded that at August 1 of last year. Most of the advance took place in the highway division, while there were smaller gains in railway construction and maintenance. There was a slight decline in building. Data were received from 1,550 contractors whose employees numbered 181,991, as compared with 168,665 at the beginning of July. This increase of 7.9 per cent was accompanied by that of 7.3 per cent in the salaries and wages paid, which aggregated \$5,380,175, as compared with \$5,011,825 in the preceding report. The per capita average fell from \$29.71 at July 1, to \$29.56 at the beginning of August, as compared with \$26.72 at August 1, 1942. The index of employment, at 144.2, was slightly lower than that of 146.8 at the same date of last year; the index of payrolls, however, has risen by 5.5 per cent in the intervening period.

Services.—Employment in hotels and restaurants showed further improvement, while there was a small decline in laundries and dry-cleaning establishments; the 637 firms making returns had a personnel of 43,918, as compared with 43,115 in their last report. The recorded payrolls amounted to \$814,666, an average of \$18.55 per employee; at July 1, the total of \$803,579 represented a per capita average of \$18.64. The August 1, 1942, average had been \$17.26. Over the 12 months, the index of employment has advanced by 3.8 per cent, and that of payrolls, by 11.3 per cent.

In connection with the average weekly earnings in the service division, attention must

again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 62 per cent of the total personnel reported in the service division as a whole at the date under review. Part-time work is also an important factor in the service group, particularly under wartime conditions.

Trade.—There was a contra-seasonal increase in trade at August 1, according to information from 2,305 employers with a working force of 158,136, as compared with 157,783 at the beginning of July. The weekly salaries and wages distributed by the co-operating firms totalled \$4,063,466, as compared with \$4,033,603 in the preceding period of observation. The average per employee at August 1 was \$25.70, 14 cents higher than the July 1 figure, and \$1.45 more than the August 1, 1942, average. Since then, the index of employment has fractionally declined, while that of payrolls has risen by 4.2 per cent.

Financial Institutions.—Statistics were furnished by 753 financial institutions which reported a staff of 64,452 at August 1, as compared with 63,323 at their last report. The weekly salaries and wages distributed totalled \$2,035,637, as compared with \$1,992,627 at July 1. The average per employee advanced from \$31.47 at July 1, to \$31.58 at the beginning of August; the figure at the same date of last year had been \$30.34. The index of employment in financial institutions, at 124.8, was rather higher than that of 122.4 at the beginning of August, 1942, since when the index number of payrolls has advanced by 6.1 per cent.

Report on Employment Conditions for September, 1943

THE following summary of employment conditions for the month of September has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

Agriculture, as one of Canada's primary seasonal industries, has been a focal point of manpower needs during the Spring and Summer months. Farmers, like all other employers, were unable to procure as many workers as they desired, but on the whole the labour shortage was not as critical as had been anticipated. High school students on vacation and members of the armed forces on leave made a valuable contribution during the harvest and fruit picking season, and harvest

excursions from west to east in August, and east to west in September, were an important reciprocal contribution to the farmers' vital labour requirements.

With crops almost in, harvesting manpower is being rapidly diverted to the logging industry, where labour needs far exceed the supply. With men required by thousands, German prisoners of war are being used to eke out the labour shortage on some of the larger limits. The needs of lumber camps and mills are so pressing that there is danger of closure in some centres should labour requirements remain unsatisfied.

As a leading agricultural country, Canada also has to cope with a tremendous demand for labour in the country's countless food-processing plants. This demand naturally

reaches its peak at the close of the fishing and agricultural season, and here as in the logging industry, agricultural helpers have been diverted to make up some part of the shortage in vital manpower.

It is of special interest to note in how many branches of industry women are taking over the work of men—and carrying it on most successfully. In the assembly lines, in the pulp and paper laboratories, at the wheel of a taxi or a bus, in field and factory, women are playing a vital part in national employment.

Maritime Region

Agriculture.—With the near completion of harvesting in the Maritime provinces, the call for farm labour was steadily lessening. In the Moncton area and in Prince Edward Island farmers complained of a labour shortage; but other sections seemed to be well covered. The hay and grain were almost all in, and adequate plans had been made to ensure sufficient workers for the apple picking and packing in the Annapolis Valley, which wind up agricultural activity in the region for the season.

Fishing.—Every fisherman in the Maritimes has been employed to meet the needs of a highly satisfactory fishing season. These operations were now practically wound up, with the resultant release of a certain number of men to the fish packing and processing plants presently running at full capacity. Nova Scotia reported no shortage of labour in the fish processing industry but New Brunswick was in need of more workers.

Forest Industries.—Increased activity in all branches of forest industries has made steadily mounting demands on labour in the Maritimes. Lumber mills were operating at reduced capacity, and every district reported shortages in all types of labour. It has been impossible to satisfy this demand until the harvest was over. However, with the harvesting completed, agricultural workers were being diverted to fuelwood cutting and logging.

At Campbellton, N.B., a survey of the pulp and paper industry was being conducted with a view to ascertaining what mill employees could be replaced by women. It was anticipated that about 100 positions could be filled in this way.

Coal Mining.—In Nova Scotia the coal mines have been operating full time, with the demand for experienced men far exceeding the supply. For the most part the men cleared by the Local Employment and Selective Service Offices have been inexperienced, though some certified miners have been transferred to western Canada and Cape Breton. The return of soldier miners and ex-miners to their

former employment has been encouraging. Under the existing Compulsory Transfer Regulations (P.C. 4092, P.C. 6077 and P.C. 6433) every effort was being made to procure men with the necessary physical qualifications for the work, and these orders have, to some degree, met the requirements for mine labour.

Manufacturing.—In the manufacturing field the return to school of many students engaged in industry during the summer vacation has caused an increasing shortage of workers. In some areas factories in high priority manufacturing were working steadily, some at full twenty-four hours in order to fill government contracts. Aircraft and shipbuilding plants were working full time, but with fewer skilled men than complete efficiency demanded. In the Moncton area some of these companies have endeavoured to relieve skilled labour by a training plan in conjunction with the Technical School, but such training of necessity involves a considerable lapse of time before the trainees are ready for duty.

Construction.—With the approach of cold weather, construction companies were making every effort to complete their contracts. Men have been transferred from one job to another as contracts were completed, but the impossibility of procuring an adequate supply of skilled and unskilled labour was a great handicap. In the Moncton district the setting up of a labour pool has assisted the construction companies in the field of unskilled labour, but this type of labour has not been found very satisfactory, since it was subject to the volume of work required of these men by the stevedoring agency. Halifax had succeeded in alleviating the acute situation somewhat, by referring men from the labour pool, which was originally formed to assist in longshoring work. This pool when it reaches its complete quota of 500 labourers will be of material assistance to the various industries in the area.

Quebec Region

Agriculture.—Throughout the Quebec region there has been very little demand for farm labour though even the few requirements have somewhat exceeded the supply of workers available. In some districts the harvest has been far behind schedule, with much diminished crops reported, and the probability of non-completion before the middle of October. In other areas the season was almost ended and farm labourers were gradually being freed for other work. For the most part these men were desirous of going into manufacturing or construction.

Logging.—As a result, forestry, which plays such an important part in this region, has been

appreciably handicapped in fulfilling its labour requirements. Some farmers have been turning their energies to fuelwood cutting. The demand for workers was greatly in excess of the supply and the situation was considered acute. In order to produce their quota the old-established lumber companies were utilizing the services of loggers who have been in their employ for some time, but contractors for woodcutting alone experienced great difficulty in finding workers because of the serious shortage of manpower. At Chicoutimi, 500 prisoners of war were being used to cut fuelwood, but about 200 local men would be required to assist them. From Levis came the report that, with the local calls for woodsmen filled at the close of harvest, there would still be required some 200 men for work in Maine, U.S.A., where the wild cherry tree is cut and shipped back to Canada for aeroplane construction.

Manufacturing.—As one of the foremost manufacturing provinces, Quebec has felt the labour shortage in this field acutely. Production in chemical, oxide, and dry colour plants has lagged seriously behind, while packing and flour mills have also been held up on delivery because of this shortage. In munition plants a great shortage of female workers was reported; and with the stepping up in the replacement of men by women in war plants, the shortage of women in non-essential industries has also become more acute. (One plant alone required 1,500 women workers immediately; another was able to absorb applicants as quickly as available). Textile and rubber plants and clothing manufacturers were reported to be in constant need of women operators, with the available supply becoming continually more restricted.

Shipbuilding yards at Quebec have been supplied with 140 workers, with still further manpower required. On the other hand, at Montreal the demand for skilled men in shipyards has decreased.

The rise in aircraft production in the Quebec region was accompanied by an increase in orders for electric welders, with the flow of untrained applicants remaining stable. Machine shops and foundries reported a constantly more urgent need of fully qualified men, as well as strong unskilled labour, with no supply of either available.

Construction.—There has been no great shortage of construction workers in the Quebec region, except for such centres as Montreal, Quebec, Valleyfield and Arvida. As jobs have been completed workers were moved from one project to another. Skilled tradesmen—electricians, carpenters, plumbers, etc.—were, of course, in constant demand, but on the whole there have been sufficient labourers to fulfil the demands of high priority construction.

Ontario Region

Agriculture.—Throughout the Ontario region the labour demand of agriculture seemed to have been well met. Threshing and silo-filling was expected to be the immediate occupation of the majority of farmers. Many have completed their farm work and some have gone to the bush for fuelwood cutting, while the number of farmers who have applied for transfer for the western harvest has exceeded the number of transfers arranged. High school students have been of great assistance in the fruit and tomato picking, and the shortage of labour for the almost completed tobacco harvest (cut short by frost) has not been at all serious; so that whilst the over-all demand for labour during the Summer was greater than the supply, no acute shortage was presently indicated.

Logging.—Logging operations in the region were in full swing, but the demand for bushmen was still mounting and few applicants were available for the work. It is reported that through lack of workers logging was practically at a standstill in the Pembroke area, while in the Arnprior district 400 bushmen were required for sawmill production, which has been curtailed thirty per cent owing to labour shortage. Prisoners of war were being put in to solve the labour shortage on several of the larger limits, but the over-all logging picture showed that 5,000 men at Timmins, 3,000 at North Bay, 1,000 at Kapuskasing and 1,800 at Sudbury were required for vital lumber work, with other districts asking for smaller (but still substantial) numbers—all alike reporting comparatively slight prospect of meeting requirements. Sawmills were affected in lesser degree. Some of the smaller ones had been forced to close when men were absorbed into larger mills, and some of these in turn had to close down temporarily because of lack of labour for loading and despatching.

Manufacturing.—The labour shortage in the manufacturing industries was reported as the most acute in this region, with the result that more and more female help was being employed. In many instances employers were willing to train inexperienced assistants, and the services of women were being utilized for the first time in many new occupations. The return to school of many high school students who have been temporarily employed in industry had increased the demand for labour, and many complaints have been received from employers of the slow-down in production due to manpower shortage. Unskilled labour was not obtainable in sufficient quantity and skilled workers were at a premium. Salvage companies were reported to be urgently in need or workers, with applicants scarce owing to the nature of the work and the rate of pay.

In the manufacture of iron products, chiefly required for aeroplane equipment, the demand

for semi-skilled and unskilled workers has increased in all factories: skilled mechanics were also in great demand. Very few men were needed in the low priority textile industries, but many women were required. Food factories, too, needed hundreds of female workers, and women have been supplied as painters, helpers and research laboratory testers in the pulp and paper plants.

Construction.—In construction, as in manufacturing, the labour supply has not met the demand in the Ontario region. The switch-over from agriculture has brought some reinforcements to the industry but not enough to relieve the situation to any appreciable extent. Airport construction in various parts of the province has created a demand for carpenters and labourers. A certain shortage of unskilled labour was reported throughout the entire region but it assumed large proportions only in some localities and it was not an over-all lack of workers, as in manufacturing.

Mining.—Gold mining, in the low priority bracket, had no hope of securing men for its many existing vacancies. All available labourers were being directed to the fluorspar mines in the Madoc area, the mica mines at Perth and the Nickel Mines at Sudbury—all in the high priority group. Agriculturists in some instances were filling these urgent labour vacancies.

Prairie Region

Agriculture.—In the prairie provinces harvesting was proceeding according to schedule and crop conditions have been sufficiently varied to assure that adequate farm help was obtainable throughout the entire area with the co-operation of the military and local authorities. The demand for harvesters was partially met by volunteers from Ontario, and while there was a serious shortage of harvest help reported in many districts of Saskatchewan, on the whole there seemed to be no severe labour shortage in this field.

Logging.—Until the harvesting in the western region was over, it was difficult to fill the requirements of the logging companies. There was an urgent demand for bushmen, loggers, pulpcutters, etc., with very few applicants for this work, but it was anticipated that this lack of labour would be rectified as soon as the crops were in and farmers were released for other activities.

Mining.—Among the low priority industries, an acute shortage was reported in the northern district gold mines: in fact, one mine has been forced to close down because of the increasing shortage of mine labour, which for some time had made operations difficult and now impossible. This action, while regrettable, would release men for employment with other mines presently experiencing labour difficulties. The gold mines were eking out the shortage of

manpower by the employment of more Indians, with fairly satisfactory results.

In the coal mines farther south, transfers-in and releases of ex-coal miners from the armed forces have helped the labour situation, but coal production could be substantially increased if adequate housing for the men were available. There was still a strong demand for certified miners, with the referral of additional unskilled labour awaiting the filling of these skilled requirements. The oil fields also needed far more men than were available, physically fit labourers being in great demand and the current supply meagre.

Manufacturing.—The return to school of students who had been engaged in vacation employment aggravated the shortage of labour in manufacturing. A large shipbuilding company at Port Arthur was reported to be seriously affected by the shortage of skilled men in the metal trades, essential for ship construction. There was also a continually heavy demand for workers in the aircraft industry.

Packing and steel plants were also having difficulty in securing men, although the shortage was not so drastic since men had begun to return from harvest operations. Canning factories were completing the season's run and sugar factories, due to commence operations on September 20, were now busily engaging workers for the season. Woollen mills complained of the large turn-over of labour, due to girls leaving to obtain higher wages elsewhere. On the whole, the labour shortage in manufacturing was felt most acutely in the food processing industry of the region.

Construction.—Construction throughout the prairie provinces has been seriously handicapped by the shortage of labour, with no prospect of obtaining the necessary workers. Contractors were, of course, anxious to push work to conclusion before the freeze-in, and it was hoped that the diversion of labour after the harvest would be of material assistance, as well as the completion of some projects well under way and the ensuing quick release of skilled workers for other jobs. Labourers were urgently needed throughout the region, especially in the areas of Steep Rock, Winnipeg, Saskatoon, Edmonton and Calgary.

Pacific Region

Agriculture.—With the harvesting almost completed there has been very little lack of farm workers, except in the Duncan and Okanagan districts. In the former area voluntary helpers and the women's land army were meeting the problem of the potato crop, and in the Okanagan area the gathering of the fruit crop was still in full swing. With the picking of soft fruits past, the main harvest—apple picking—was under way. No serious labour difficulty was anticipated, although in Kelowna

many female orchard workers were proving unsuitable as pickers, making more workers per orchard a necessity. The one extensive demand for workers in the agricultural field was for year-round labour on dairy farms, and applicants for such work were very scarce.

Logging.—The requirements of the lumber camps were probably the most pressing throughout the entire Pacific region. Owing to fire hazards in the woods, one of the largest operators in the Nanaimo district had been forced to close down for three days, with 250 to 300 men affected by the stoppage. Others were threatened with imminent closure or reduced operations if their labour requirements were not filled. Men on leave from the services were the only source of supply in sight, with the probability of the off-seasonal employment of agricultural workers later on. Transportation difficulties were a deterrent factor and absenteeism in camps a grave problem, with which operators were unable to cope. In view of the shortage of log supplies sawmill production continued fairly stable with little call for labour.

Mining.—In the mining field, the problem of supplying labour for coal and base metal mines remained still unsolved. In several areas, it was apparent that the limit had been reached in the absorption of unskilled labour until further certified coal miners were obtained. The cessation of operations of War-time Metals Corporation's tungsten operation at Salmo, B.C., was expected to release 160 men to be absorbed into other base metal industries. The shortage of housing accommodation was one of the chief drawbacks in the placing of mine labour.

Manufacturing.—During the latter part of the month, the high priority war industries in the Pacific region were reported as being less exigent in their demands for men. The requirements of the Boeing Aircraft Company were still considerably in excess of the labour supply available and women from 18 to 60 years were being taken by the company in large numbers to meet this pressing need. Skilled men released from any one plant on account of lessening requirements were at once placed elsewhere.

Construction.—Despite the extended period for launching cargo vessels, shipbuilding yards were still calling for experienced help, with very few suitable applicants responding. (In this respect it must be noted that since reports for September were compiled, there has been a complete reversal of the shipbuilding picture, with plans already being implemented to bring the work of the shipbuilding yards to a close when the contracts presently in hand are completed.) As in manufacturing, the majority of high priority jobs in construction were being satisfactorily maintained, with less essential work suffering accordingly from the labour shortage. Vancouver, Victoria and Prince Rupert reported an urgent need for building labourers for civilian projects.

Services.—Two aspects of the labour situation in the service industries continue to reflect acute shortage. Owing largely to the diversion of female labour to essential war industries and to enlistment in the forces, all regions have reported that women for the professional and domestic services were practically non-procurable. The demand for domestic servants and assistants in hotels, restaurants, laundries and hospitals far exceeded the supply. Experienced stenographers and bookkeepers, too, were non-available.

Transportation.—The situation as regards transportation was likewise one of Canada-wide shortage. School reopening was a salient factor in this respect. Alike on the Great Lakes and the Pacific Coast, there was an acute shortage of shipping crews, aggravated by the heavy labour turn-over. Many crew members were getting no time off, and ships short of crew were in danger of being withdrawn from an already overburdened transportation service. Section men and labourers for railway maintenance were at a premium and there was a heavy demand for bus drivers, etc., without any prospect of sufficient supply.

Even with the transfer of labour across Canada from seasonal occupations to the year-round industries of war and peace time, the consensus of reports for all areas has made it clear that an over-all shortage of skilled and unskilled labour will continue to make heavy demands on Local Employment and Selective Service Offices during the months ahead.

Applications for Employment; Vacancies and Placements; August, 1943

DURING the five week period July 30 to Sept. 2, 1943, reports received from Employment and Selective Service Offices of the Unemployment Insurance Commission showed a loss of 14 per cent in the average daily placements effected when compared with those of the preceding four-week period July 2 to July 29, 1943, but a daily average gain of 225

per cent in comparison with the month of August, 1942.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It

will be seen from the graph that the trend of the curve of vacancies in relation to applications took an upward course while the curve of placements in relation to applications showed a moderate decline. The ratio of vacancies to each 100 applications being 126.2 during the five weeks ending September 2, in contrast with 112.8 during the previous four weeks, and 88.3 during the month of August, 1942. The ratio of placements to each 100 applications, during the period under review, was 73.4 compared with 77.8 during the four weeks July 2 to July 29, 1943, and 53.6 during August last year.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the period July 30 to September 2, 1943, was 10,841 compared with 10,650 during the preceding period ending

During the five weeks July 30 to September 2, 1943, the offices referred 256,781 persons to vacancies and effected a total of 189,214 placements. Of these, the placements in regular employment were 185,226, of which 116,674 were of men and 68,552 of women, while placements in casual work totalled 3,988. The number of vacancies reported by employers was 206,260 for men and 118,973 for women, a total of 325,233, while applications for work numbered 257,661, of which 154,463 were from men and 103,198 from women. Reports for the four weeks July 2 to July 29, 1943, showed 255,597 positions available, 226,622 applications made and 176,311 placements effected, while in the month of August, 1942, there were recorded 83,027 vacancies, 94,018 applications for work and 50,360 placements in regular and casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

July 29, 1943, and with 3,194 during the month of August, 1942. The average number of applications for employment received daily by the offices during the five weeks ending September 2, 1943, was 8,588 compared with 9,443 during the four weeks July 2 to July 29, 1943, and with 3,617 during August last year. The average number of placements made daily by the offices during the period under review was 6,307, of which 6,174 were in regular employment and 133 in work of one week's duration or less, compared with a total daily average of 7,346 during the preceding four weeks. Placements in August a year ago averaged 1,937 daily, consisting of 1,692 in regular and 245 in casual employment.

The following table gives placements effected by the offices, each year, from January, 1933, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,286	389,586
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	318,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943 (35 weeks).....	1,292,653	38,829	1,331,482

Unemployment in Trade Unions at the Close of August, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are unemployed because of sickness, or who are engaged at work outside their own trades are not regarded as being without work. As reports from unions making returns vary from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only, to the organizations reporting.

Returns were tabulated at the close of August from 2,335 labour organizations, having a total membership of 462,870 persons. Of these 1,950, or a percentage of .4 were listed as unemployed. This was the same percentage as that shown in the preceding month. In August, a year ago, the percentage of union members without work was .9. The Dominion percentage of .4 was the lowest registered in any month in trade union records, which were begun on a quarterly basis in December, 1915, and changed to a monthly report, as from January, 1919. This percentage was identical also, with that shown at the end of the second quarter in June, 1918, when employment stood at the highest point ever attained in any of the quarterly reports. Although the Dominion unemployment percentage remained unchanged, there were some fluctuations within the various groups. Union members in the building trades reflected a slightly higher employment level, as the percentage declined from 1.4 to 1.3, while in mining the percentage of members listed as unemployed was up slightly from .5 to .7. In other large groups such as those of manufacturing and transportation, the percentages of .2 and .4, respectively, remained unchanged, while in organizations with smaller memberships, such as trade and services, the percentages of unemployed members stood, as in July, at full employment and .5 respectively.

In table I, the unemployment percentages are shown by provinces. As will be seen therein, these figures ranged from .1 per cent in Alberta to .7 per cent in Quebec. In Alberta there was a slight betterment, when compared with July, while in Quebec, Ontario and Manitoba the unemployment percentages remained unchanged. Union members in Nova Scotia, New Brunswick, Saskatchewan and British Columbia recorded minor employment recessions. In comparison with the situation in August, a year ago, noteworthy expansions in work were reflected in New

Brunswick, Manitoba and Alberta, while in Quebec and Ontario, likewise, there were appreciable employment advances. A slight betterment was observed in Saskatchewan, while in British Columbia the percentage of those without work was identical with that shown in August, 1942; in Nova Scotia, there was a minor recession in activity.

A separate compilation is made each month of unemployment among trade unions in the largest city in each province with the exception of Prince Edward Island. At the close of August, these figures ranged from less than .1 per cent in Halifax to .6 per cent in Montreal. Slightly higher employment levels than those of July were observed in Halifax, Montreal, Toronto and Winnipeg. The unemployment percentages in Saint John and Edmonton remained unchanged, while in Regina and Vancouver, there were minor employment recessions. In comparison with conditions in August, a year ago, noteworthy employment increases were indicated in Winnipeg and Edmonton, while gains of lesser degree were reflected in reports received from Toronto, Regina, Halifax and Montreal unions; in Saint John there was a minor betterment while in Vancouver the unemployment percentage remained unchanged.

The accompanying chart shows the trend of unemployment from January, 1938, to date. The curve in August continued at the same level as in July, thus continuing to reflect the highest employment level of the year, to date. In comparison with August, 1942, the point of the curve was appreciably lower, thus indicating a rather substantial employment expansion since that period.

For the manufacturing industries 843 reports were tabulated, having a combined membership of 266,514 persons, of whom 599, or a percentage of .2 were unemployed. This percentage was identical with that of July; in August, 1942, the percentage of those without work was .5. In comparison with the situation in the preceding month, while the main percentage remained unchanged, there were fluctuations within the various trades. Due to improved conditions for leather workers, the employment level was substantially better for members in the animal products division. As will be seen in table II this group percentage declined from 1.9 to .6. Union members in the non-ferrous metal division were fully employed, in comparison with less than .1 per cent of inactivity in July, while in the vegetable products group, which

includes soft drink workers, cigar and tobacco workers and bakers and confectioners, conditions were very slightly improved, also. Among electric current employees, etc., and unclassified manufacturing workers, there were minor increases in work, while printing and publishing, papermakers and woodworkers unions reported the same percentages of unemployment as in the preceding month. Textile and carpet, rubber, clay, glass and stone and mineral products union members were reported as fully engaged at both dates. Slightly lower employment levels were reflected among garment workers and union members in the iron and steel trades, while for smaller organizations such as hat, cap and glove and

no unemployment, either in July, 1943, or in August, a year ago. In the month under review, as in July, no unemployment was reflected in reports received from unions in New Brunswick, Alberta and British Columbia, while in Nova Scotia there was a moderate contraction in available work. In comparison with conditions in August, 1942, as in July, coal miners in each of the above provinces, with the one exception of Nova Scotia, indicated that the members were fully engaged at both dates.

Reports were received covering 10,119 workers in the metallic ores unions and 3,779 members in the non-metallic minerals division. The percentages of unemployment in these

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

chemical products workers, also, there were minor decreases in work available. In comparison with the situation in August, a year ago, an impressive expansion in work afforded was observed among unclassified manufacturing workers, while among union members in the animal products division and in the printing and publishing trades, employment levels, likewise, were considerably higher. On the other hand, slight contractions in available work were reflected among garment workers and union members in the iron and steel trades.

Returns were received from 60 unions of coal miners, having a total membership of 20,180 persons, of whom 100, or a percentage of .5 were without work, as compared with

groups remained, as in July, at .3 and 3.3 respectively. In comparison with conditions in August, 1942, no reports were tabulated for the metallic ores group during that period, while the percentage of unemployed members among non-metallic mineral workers was 4.5.

Unions in the building and construction trades returned 207 reports having a combined membership of 34,633 persons. Of these 446, or a percentage of 1.3 were without work, in comparison with percentages of 1.4 in July and 3.3 in August, a year ago. In comparison with the preceding month, carpenters and joiners manifested a slightly higher employment level, while for smaller groups, also, such as painters, decorators and paperhangers, plumbers and steamfitters, hod carriers and

unclassified building workers and steam shovel men, there were minor increases in available work. The percentage of unemployment among bridge and structural iron workers remained unchanged, while wood, wire and metal lathers were fully engaged at both dates. On the other hand, slightly reduced activity was apparent among bricklayers, masons and plasterers, electrical workers and granite and stonecutters. In comparison with conditions in August, 1942, a noteworthy employment expansion was in evidence among carpenters and joiners, while for bricklayers, masons and plasterers and hod carriers and unclassified building workers also, substantial increases in activity were apparent. With the exception of wood, wire and metal lathers, in which group, no unemployment was reported at either date, each of the remaining trades recorded minor increases in available work.

In the transportation industries, 881 returns were tabulated, having a total membership of 83,992 persons, of whom 314, or a percentage of .4 were without work. This percentage was identical with that of July, while the percentage of members without work in August, a year ago, was 1.2. Steam railway employees, whose returns constituted over 79 per cent of the entire group membership, indicated a slightly higher employment level. The unemployment percentages for navigation workers and street and electric railway employees remained unchanged, while no unemployment was reported by teamsters and chauffeurs, at either date. In comparison with the situation in August, a year ago, navigation workers reflected noteworthy employment expansion, while the employment level for union members in the steam railway division was substantially higher also. As in the previous comparison, no change was indicated by street and electric railway employees, while again reports from teamsters and chauffeurs did not reflect any unemployment at either date.

As will be seen in table II, the percentages of unemployment, as in July, remained very low among such groups as trade and services, of which the latter includes civic, hotel and restaurant, theatrical employees, barbers, stationary engineers and firemen, etc. In comparison with conditions in August, a year ago, there was slightly less employment in the miscellaneous group; this was due mainly to

some recessions in activity for hotel and restaurant employees.

Among lumber workers and loggers, no unemployment was reported which was the case also, in the previous month, and in August, 1942; the reports received from these workers covered 6 unions with 5,550 members. Among fishermen, full employment was recorded, also, in comparison with an unemployment percentage of .2 in July and .4 in August, a year ago.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Table I shows by provinces the average percentage of union members who were unemployed each year from 1932 to 1942 inclusive and also, the percentage of unemployment for August of each year from 1932 to 1941, inclusive, and from August, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in table I.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and Logging	Mining	Manufacturing Industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Electric current, etc.	Wood products	Fibres, textiles and textile products	Textile and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Rubber workers	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Chemical and allied products	Miscellaneous manufacturing industries	Buildings and construction	Transportation	Shipping	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail and wholesale clerks)	Services	Governmental (civil)	Miscellaneous	All occupations

Labour Law

Labour Legislation in New Brunswick, Northwest Territories and Yukon in 1943

New Brunswick

THE New Brunswick Legislature, which opened on March 2 and closed on April 17, 1943, enacted a law prohibiting fee-charging employment agencies, and amended Acts relating to factories, steam boilers and workmen's compensation.

Factories and Steam Boilers

A number of changes were made in the Factories Act passed in 1937 (LABOUR GAZETTE, 1937, page 1331) and the Act and amendments were proclaimed in force on September 15, 1943, repealing the statute enacted in 1920. As amended, the 1937 Act defines a factory to include all places in which one or more persons are employed in handcraft or in manufacturing, preparing, repairing or conditioning goods for trade or sale. It also includes laundries and dry-cleaning establishments, these having been added this year.

No child under 14 may be employed in a factory without the written authorization of the Minister of Health and Labour who is also given power to prohibit employment of boys and girls under 18 in factories where he considers the work to be dangerous or unwholesome. Hours of employment for women and boys under 18 are limited to 9 per day and 54 per week unless the Minister gives a written permit for their extension, which he may revoke at any time. The employer must keep posted a notice of the conditions on which the permit was granted and must keep a record of the overtime worked by each person. All employees must be allowed an hour for food and rest at the end of each six-hour period except where the eight-hour shift system is in effect when a full shift may be worked without intermission. Under a section added this year the employer must provide rest-room facilities satisfactory to the Minister.

Little change has been made in the provisions for health and safety. These require cleanliness, proper space and ventilation, guarding of dangerous places and machinery, sufficient fire escapes, precautions against fire, and suitable chairs or seats for female employees. Provision for inspection and posting

of notices is also similar to that of the former Act. Except in cases of wilful and serious misconduct on the part of the employee, the employer is now made responsible for the enforcement of the section forbidding a woman or young person under 18 to work between the fixed and traversing part of any self-acting machine while it is in motion.

Where an accident in a factory causes injury or death to a person unlawfully employed, the employer is liable to the same extent and in the same manner as the Workmen's Compensation Board would be if the person were lawfully employed. Formerly the employer was only liable in such cases if the employment was unlawful because the injured person was under age. The parent of a boy under 18 employed contrary to the Act is now liable to a penalty unless the employment was without the parent's consent, connivance or wilful default. Formerly this provision applied only to parents of children and young girls.

Sections of the former Factories Act dealing with inspection of steam boilers and licensing of stationary engineers were omitted from the new statute, but a special Act dealing with these matters was passed in 1937 (LABOUR GAZETTE, 1937, page 1331) and was amended at the recent session and proclaimed in force on September 15, 1943. This Act, as amended, provides for the appointment of a Board of Examiners of three members with at least ten years experience as stationary engineers and forbids any person not possessing a certificate of competency under the Act to operate a steam plant or steam boiler, except in emergencies, with a permit from the Minister of Health and Labour. It is also forbidden to employ any person not possessed of such a certificate. No person may use a boiler unless he has an inspection certificate issued under the Act or the boiler is insured in a company licensed under the Insurance Act. The Lieutenant-Governor in Council may make regulations classifying certificates, prescribing qualifications of candidates, laying down rules for the construction and operation of boilers, and generally, for carrying out the provisions of the Act.

Workmen's Compensation

An amendment in the Workmen's Compensation Act enables the Board to pay a lump sum in any case where it considers it would be to the advantage of the workman, instead of only in cases where the disability is ten per cent or less. The amount to be paid, however, may not exceed what the Board considers the equivalent of that payable in respect of a ten per cent impairment of earning capacity, the balance of compensation, if any, being paid periodically.

Private Employment Offices

The Employment Agencies Act forbids the keeping of a fee-charging employment agency, under penalty of a fine not exceeding \$25. The Lieutenant-Governor in Council is authorized, however, by Proclamation published in the *Royal Gazette*, to exempt any person or class of persons from the operation of the Act. Fee-charging employment agencies, with some exceptions, are now prohibited by provincial law in all provinces except Ontario and Prince Edward Island.

Motor Vehicle Drivers

A section which was added to the Motor Vehicle Act gives statutory effect to an Order in Council passed in June, 1942. This section enables the Department of Public Works, for the duration of the war, to issue a special driver's licence to any male person 16 years of age and over who is engaged in an occupation requiring him to operate a motor vehicle and

whose competence is certified by a qualified person. The licence may only be issued with the consent of the parent or guardian and on the application of the employer, who must furnish proof of financial responsibility. The licence is only valid for operation of vehicles weighing not more than 10,000 pounds gross which belong to the employer and are specified in the licence.

Compulsory Labour for Fighting Forest Fires

The Forest Fires Act was amended to make male persons between the ages of 16 and 65, instead of only those between 18 and 50, liable to be summoned to fight forest fires. As formerly, trainmen, telegraphers and dispatchers on duty, doctors, and persons who are physically unfit are exempt.

Housing

An Act to enable Municipalities to enter into Agreements in respect of Wartime Housing provides that where the Dominion Government or Wartime Housing Limited (a Crown Company), or both, undertake to provide housing, school or other accommodation in the Province for employees of an industry, any municipality may enter into and carry out an agreement with them to provide services in respect of the undertaking and accept a fixed payment for such services.

An amendment in the New Brunswick Housing Commission Act, authorizes a housing commission to borrow for purposes of the Act up to \$5 per capita of the population of the municipality instead of \$2.50, as formerly.

Yukon

Under the Workmen's Compensation Ordinance, as amended, a workman who suffers partial disablement through loss of a member is entitled, in addition to the lump sum provided in the Schedule for his specific injury, to be paid fifty per cent of his average daily wages while he is under treatment and until he is restored to fair health, but in no case for longer than twelve months. The waiting period was reduced from fourteen days to three. The clause was deleted which provided that where an injury developed or proved to entitle the workman to compensation other than that provided for temporary disability and the workman had been paid compensation for temporary disability, the amount so paid was to be deducted from the amount to which

he became entitled. An employer is now exempt from liability to pay compensation or damages for an accident to a workman who is entitled to compensation for such accident under any United States law.

An Ordinance to Prohibit Fee-charging Employment Agencies forbids the keeping of such an agency, whether for profit or not, under penalty of a fine of \$100 and in default of payment of fine a prison term not exceeding two months.

An amendment in the Health Ordinance enables the Medical Health Officer to require any person who handles food in the course of sale, cooking or preparation, in a place other than a private dwelling, to submit to a medical examination.

Northwest Territories

An Ordinance Respecting Employment Agencies, which was assented to February 9, 1943, forbids any person, firm, corporation or association to keep a fee-charging employment agency under penalty of a fine of \$75 and in default of payment of the fine a prison term not exceeding six months.

Amendments in the Steam Boiler and Pressure Plant Ordinance were assented to on March 3. The inspector is required to set and seal the safety valve of every boiler, air receiver and refrigerating plant, test the pressure gauges of every pressure vessel and satisfy himself that the boiler or pressure vessel is safely installed. The master mechanic or chief engineer in charge of mechanical equipment or, failing such, the engineer operating the plant must keep a boiler record book giving full particulars of the condition of the boiler at the

time of each cleaning and the book is to be open to inspection by the boiler inspector, at any time. The section enabling a second-class engineer to take charge of a steam or pressure plant of over 50 h.p. where two or more engineers are employed and a third class engineer to act as his assistant was amended to limit such arrangement to plants not exceeding 100 h.p.

Correction

In the summary of the National Physical Fitness Act in the September LABOUR GAZETTE at page 1294 the total amount which may be expended by the Dominion Government in assistance to the provinces should have been given as \$225,000, not \$250,000.

Recent Regulations under Dominion and Provincial Legislation

Seamen—Unemployment Insurance—Housing—Licensing of Guides and Drivers in Alberta—British Columbia Minimum Wages—Projectionists and Workmen's Compensation in Saskatchewan—Restaurant Workers in New Brunswick

THE recent Orders in Council relating to labour supply, listed below, are summarized in the Man-power section of this issue. A consolidation and revision of the unemployment insurance regulations concerning contributions has been issued, and the benefit regulations have been amended slightly. The Department of Pensions and National Health has been authorized to provide free medical treatment for merchant seamen who have served in war zones. Another Order in Council restricts, in regard to Canadian ships under bareboat charter, the application of the schemes under which compensation is paid to seamen or their dependents for death, disability, damage to effects or loss of remuneration due to enemy action.

In the provincial field, Alberta has revised its regulations relating to drivers and chauffeurs under the Public Service Vehicle Act and also those concerning the licensing of guides under the Game Act. In addition, permission has been given to carry farm labour in trucks to and from work during the harvest season. In British Columbia, two additional classes of workers have been exempted from the overtime provisions of the minimum wage order governing the logging industry. New Brunswick has made regulations to ensure sanitary conditions in restaurants. Revisions of the regulations under the Workmen's Compensation (Accident Fund) Act and the Theatres and Cinematographs Act in Saskatchewan have been issued.

Dominion

Unemployment Insurance Act

New regulations relating to contributions and minor amendments in the regulations concerning benefits were gazetted on September 3, 1943. The contribution regulations rescind the original regulations issued in May, 1941, and amendments (LABOUR GAZETTE, 1941, page 633; 1942, pages 69, 1046, 1443; March and May, 1943, pages 350, 688). A summary of these regulations was given in the revised handbook, Information for Employers, which was issued

last February. The new regulations are arranged in different order and a number of changes have been made to give effect to the recent amendments in the Act (LABOUR GAZETTE, Sept., 1943, page 1268), and to simplify administrative procedure. The new Contribution Regulations are divided into five parts: Coverage, Computation of Contributions, Payment of Contributions, Records of Contributions, General. They also contain tables of contributions and of deductions.

CONTRIBUTION REGULATIONS

Coverage (Part I). The amended Act covers all workers earning \$2,400 or less, instead of \$2,000 as before, and in addition, all those whose remuneration exceeds \$2,400 if they are paid an hourly, daily or weekly rate, or a piece rate including a mileage or other rate. In cases where it is difficult to estimate the yearly remuneration, the earnings of the worker or of other persons in the same job during the previous year are to be considered. However, workers in an excepted employment listed in Part II of Schedule I of the Act, or specially exempted are not covered. The Commission has power under the Act to declare classes of workers non-insurable in order to remove anomalies, to prevent duplicate payment of contributions for workers subject to the Acts of more than one country, or to deal with persons in insurable employment to an inconsiderable extent; and also to remove anomalies by declaring classes of workers insurable. This power had been used to bring under the Act a number of special groups such as temporary government employees, persons whose earnings exceeded \$2,000 due to war conditions, and miners, building tradesmen, and railway employees whose earnings fluctuated about the \$2,000 mark. However, the amendments in the Act have automatically brought these groups under the Act and the special provisions relating to them in the regulations have been repealed. Special provisions continue in effect for certain other groups such as life-insurance agents (excluding officers and salaried employees of an insurance company), who are declared excepted from the Act. Another regulation stipulates that persons partly in insurable and partly in non-insurable employment under the same employer may be covered if their employer registers consent, unless such persons are employed for 15 consecutive weeks in non-insurable employment. Persons employed in insurable employment by one or more employers, but less than four hours a day for each of them, and those not available for insurable employment more than two days a week may secure a Certificate of Excepted Employment. The first employer of the day is usually deemed to be the employer for contribution purposes, but employers may agree that one shall pay the contributions and be re-imbursed by the others on a pro rata basis, or, in the absence of such an agreement, the Commission may designate any one employer to pay the contributions.

Stipulations are also laid down in regard to the manner of applying for Certificates of Exemption, which are issued to seasonal workers not ordinarily employed in other insurable employment who wish to be relieved

of the obligation to pay their own share of the contributions. Both Certificates of Exemption and Certificates of Excepted Employment are to be valid for the period specified therein unless the holder's circumstances change so as to make him ineligible for one.

By an agreement between Canada and the United States, in force since April 12, 1942 (Schedule A to the regulations), provision is made to avoid duplicate payment of contributions in respect of workers who might otherwise be subject to unemployment insurance acts in both countries, and for the taking of claims for benefit in one country on behalf of the other. Workers not covered by this arrangement who are employed outside of Canada for a period exceeding eight months by an employer in Canada and were insured before leaving the country, are, generally speaking, excepted from the Act. In the case of workers living in Canada and insured under the laws of a foreign country for work done outside of Canada, contributions must be paid only on earnings for work done in Canada; but workers resident outside of Canada and insured under the law of another country for work performed in Canada are not covered by the Canadian Act.

Computation of Contributions (Part II).—New provisions in this Part give effect to the amendments in the Act authorizing the Commission to determine the value of board, lodging, living quarters or other non-pecuniary remuneration in order to determine a worker's earnings for contribution purposes, and giving it power to determine the contributions payable by an employer who fails to keep adequate records, by taking 3 per cent of the total remuneration paid by him.

In general, six unemployment insurance contributions are to be paid by workers and employers for each full working-week. For workers paid monthly or semi-monthly, contributions may be made either for the actual number of days worked or for 26 or 13 days respectively in each pay-period. If a worker does not work on every working day in a pay-period, contributions are to be paid either for the number of days actually worked or for the number of days for which he is paid, whichever is the greater.

Provision is also made in the regulations for determining the number of contributions payable in the case of workers whose daily period of employment extends over midnight, and in the case of those whose working-week is normally less than six days but whose daily hours are often abnormally long, and for railway employees paid on a mileage basis.

Payment of Contributions (Part III).—Now included in this Part are regulations concern-

ing methods of payment, amount of payment, time for payment and refunds of contributions. A number of provisions have been simplified. The scheme for paying contributions in bulk, formerly confined to employers of at least 500 workers, has been made available to all employers. Employers desiring to pay contributions by bulk payments at stated intervals must agree to maintain records in a form approved by the Commission, to furnish a deposit equal to the estimated amount of the contributions payable by him, to submit a certified contribution statement at the end of each insurance year for each employee, to place a similar statement in the insurance book of each worker who leaves their employ during the year, and to supply any other information requested by the Commission. The tables in Schedule B have been added to the regulations to simplify computation of the amount of contributions payable by employers using meters or the bulk-payment scheme. These tables are also to be used in calculating the deductions to be made from workers' wages for their contributions. Provision is made for adjusting deductions from wages when fractions of a cent are involved. Employers using stamps will continue to determine the amount of their contributions by means of the tables in the Second Schedule to the Act. Provision has also been made for the payment of contributions in cases of adjustment through the use of an adjustment form.

Contributions may, therefore, now be paid either by unemployment insurance stamps, meters, bulk payment or adjustment forms. Employers using stamps must apply to the Commission for a licence to purchase stamps and for a registration number which is used for identification purposes and in cancelling the stamps affixed to a worker's book or card. Stamps may be sold only by the Post Office Department or other authorized persons and unused stamps may be rebought by the Commission. It is an offence to deface a stamp intentionally. Permission to use a metering device must be obtained from the Commission and detailed stipulations are laid down to prevent the improper use of such devices.

Refunds will be granted to both workers and employers in cases where contributions have been paid and wage deductions made under the erroneous belief that a worker was covered by the Act, but any benefit paid to the worker must be deducted from the refund. Expenses of adjusting cases may also be deducted. Time limits are set for applications for refunds and a new clause implements the amendment in the Act declaring that a mini-

mum of 50 cents must be involved. Inspectors of Insurance Revenue are authorized to make adjustments in the case of employers making over-payments or under-payments of contributions if not more than \$5 is involved.

Contributions must be paid within 72 hours of the worker's pay-day, but when a worker leaves his employment all unpaid contributions must be paid immediately. Contributions for workers receiving no pecuniary remuneration or less than 90 cents a day must be paid at least once a week or at some other stated interval specified by the Commission. The employer pays both the worker's and his own contributions in such cases. A new clause stipulates that an employer who is behind in his payments must pay his arrears within 24 hours of a request by an officer of the Commission.

Contribution Records (Part IV).—Contributions made on behalf of each worker must be recorded in insurance books or on insurance cards by employers using stamps or meters, on contribution statement by employers making bulk payments, or on adjustment forms by employers adjusting contributions. A new clause declares that insurance cards may be used only by employers designated by the Commission. An employer must obtain an insurance book from the nearest Local Office for each insurable employee who does not deliver one to him when hired. Application for the book must be made within 72 hours after the employee commences work but those making bulk payments need not apply for the book until the last day on which the worker performs services for them. On separation from employment, an employer must give the worker his insurance contribution records in the form of an insurance book, card or statement not later than the day after the last day on which the employee worked for that employer. When a worker dies, or is unlikely to resume insurable employment immediately, the records must be sent to the nearest Local Office by the employer within a week after the worker leaves his employ. If a worker is himself in possession of his records when he dies, becomes permanently incapacitated or enters non-insurable employment, he or his relatives must deliver his records to the nearest Local Office. Employers are to receive receipts from Local Offices or workers when they give up a worker's contribution records. The employer is responsible for the custody of the records of all persons in his employ and must produce them for inspection by any officer of the Commission or by an employee. The latter has the right to inspect his contribution records at reasonable times but not more than twice a

month. The Commission may require that all contribution records be returned to the nearest Local Office at the end of the fiscal year or at any other time and officers of the Commission may take possession of any contribution records. When insurance records are lost, destroyed, or defaced, duplicate records may be issued by the Commission and a charge of \$1 may be made but the Commission may refuse to trace the record of a worker's contributions if the insurance number of the worker is not supplied.

General (Part V).—Employers and workers are forbidden to make alterations on contribution records except to note changes of address, although the former regulations also permitted them to change the name in case of marriage. Employers must post notices for the information of their employees at the request of the Commission. The information obtained by the Commission from employers and workers is to be treated as confidential but the Commission has authority to divulge such facts as are necessary to an insured person claiming benefit, to publish information relating to employees of the Commission and statistical data and other facts not relating to any particular person, and to supply information to any Government Department or any Court dealing with a case involving interpretation of the Act or regulations. The penalty clauses in the old regulations prescribing a maximum fine of \$50 for specific offences have been replaced by a general penalty clause which provides for a maximum fine of \$250 or imprisonment up to three months or both for violations of the regulations.

BENEFIT REGULATIONS

The Benefit Regulations were fully summarized in the 1942 *LABOUR GAZETTE*, page 196. Certain minor amendments have been made in Part II, which deals with application for benefit, by an Order in Council of September 3 (P.C. 6951).

Under the regulations, persons with dependents on applying for benefit are required to submit a declaration by a "responsible person" or persons to the effect that the husband, wife or child of the claimant actually is dependent on him. A list of "responsible persons" was included in the regulations but an amendment eliminates this list and declares that a responsible person is anyone designated as such by the Commission.

Another amendment adds a new regulation relating to the clauses in the Act which stipulate that an applicant for benefit must have been in insurable employment for at least 180 days in the two years immediately

preceding the date of the claim, unless he was incapacitated for work, employed in an excepted employment or employed in business on his own account for any period during the two years. In that case, the two-year period is extended by the length of the time the worker was incapacitated, in excepted employment or running his own business, provided that the total period does not exceed four years. The new section in the regulations declares that the Commission is to prescribe the form and manner in which applicants must submit proof that they were incapacitated, in excepted employment or carrying on their own business during any period in the two years.

Another new regulation gives effect to the amendment in the Act authorizing Insurance Officers appointed by the Commission to disallow claims and in certain cases to declare persons ineligible for benefit for a period not exceeding six weeks on four grounds which were formerly forbidden as grounds for disallowance by Insurance Officers. Insurance Officers must notify the claimant when they disallow a claim and advise the claimant of his right of appeal to a tripartite court of referees appointed under the Act. The regulation also stipulates that the Commission may determine the benefit claims and questions which an Insurance Officer may deal with and may lay down the procedure to be followed by such Officers in considering claims and questions.

A final amendment stipulates that in cases where money is payable out of the Unemployment Insurance Fund to any person resident in the United States, as authorized by an Order in Council passed last March (*LABOUR GAZETTE*, May, 1943, page 688), payment is to be made subject to such conditions as the Commission may determine.

Seamen

Free Medical Treatment. Under the terms of Order in Council P.C. 164/6991 passed September 4 under the War Measures Act, free medical treatment is now available for merchant seamen on a parity with that offered to persons discharged from the Armed Forces for non-pensionable disabilities. All seamen on ships of Canadian registry and all Canadian seamen on non-Canadian ships operating in war zones are eligible for treatment for any non-pensionable sickness or disability incurred while serving on such ships. The Order does not apply to seamen eligible to receive free medical treatment under Part V of the Canada Shipping Act. The latter makes provision for free medical treatment for seamen employed on any ship paying the duty levied on most ships entering Canadian ports, but a seaman is not eligible for such treatment if he arrives

in Canada otherwise than on the ship to which he belongs. The new Order in Council is designed to provide treatment for indigent and disabled seamen returning to Canada after service in war zones.

Treatment will be given in Canada only and will be provided by the Department of Pensions and National Health. It must be authorized within 12 months from the date on which the seaman terminated his service, and the period of treatment may not exceed 18 months. The Order is effective from May 1, 1943.

Compensation Schemes. By Orders in Council P.C. 163/6991 and P.C. 138/7590, passed September 4 and October 1 under the War Measures Act, non-Canadian seamen on ships of Canadian registry or licence chartered on a bareboat basis are no longer eligible for compensation under the Orders in Council providing for compensation to seamen (or their dependents) who suffer death, disability, damage to personal effects or loss of remuneration due to enemy action (LABOUR GAZETTE, 1942, pages 691, 1173, April and July, 1943, pages 527, 1031). These Orders apply to all seamen on ships of Canadian registry or licence, to Canadian seamen on non-Canadian ships certified by the Transport Controller to be engaged in essential war work on behalf of the British Commonwealth or its allies, and to Canadian salt-water fishermen. At present many Canadian ships are being chartered on a bareboat basis by foreign charterers with the result that the crews of such ships may become eligible for compensation under schemes set up by the country in which the charterer resides. In order to "avoid inequalities by reason of variations in the provisions of the various authorities but to retain the rights of Canadian nationals serving on the aforesaid ships," it has been decided to declare that all ships of Canadian registry or licence under bare-

boat charter to any charterer resident outside Canada are to be considered ships of non-Canadian registry or licence for the purposes of determining the eligibility of any person to receive compensation under the Canadian scheme.

Housing

Additional centres have been included in the Government's scheme for relieving the housing shortage by converting large houses into apartments (LABOUR GAZETTE, Sept., 1943, page 1295). An Order in Council passed September 20 (P.C. 7324) under the War Measures Act extends the scheme to the cities of Windsor, Sarnia, Halifax, Moncton, Saint John, Edmonton and Calgary and the municipalities contiguous to them.

Other Orders in Council

The following Orders in Council are summarized in the Manpower Section, page 1333:

P.C. 6625, Sept. 1, and P.C. 7260, Sept. 16, amending the National Selective Service Civilian Regulations (LABOUR GAZETTE, Jan., 1943, page 19) in regard to labour turnover in "designated establishments" and direction into essential employment; P.C. 6990, Sept. 7, amending the National Selective Service Mobilization Regulations (LABOUR GAZETTE, January, 1943, page 153) in a number of matters; P.C. 6632, Sept. 7, as amended by P.C. 7261, Sept. 16, preventing coal-delivery men from being called up for military service or enlisting voluntarily without the permission of a Selective Service Officer; P.C. 6797, Sept. 15, amending P.C. 6434 (LABOUR GAZETTE, Sept., 1943, page 1213) regarding the remuneration of soldiers employed on farms; National Selective Service Orders No. 10, Sept. 10, and No. 11, Sept. 21, declaring that P.C. 6625 does not apply to females or to construction workers unless specially designated.

Provincial

Alberta Game Act

New regulations gazetted on August 31 under this Act revise the provisions relating to the examination and licensing of Class A and Class B guides and establish a third classification for which no examination is required. Class B guides may only act as assistants to Class A guides, and Class C guides are limited to employment by persons hunting game birds. A Class C guide may act for a maximum of five persons on a trip but the other two classes may act for only two.

Alberta Public Service Vehicles Act

A special regulation gazetted August 31 declares that the carrying of farm labourers on trucks to and from work during the harvest season is to be considered as necessary during the present emergency and is therefore permissible under the Public Service Vehicles Act. The Act forbids the carrying of passengers in any truck operated as a public service or commercial vehicle except in emergencies unless the passengers are members of the owner's family or are employees of the truck owner.

or of the owner of livestock being transported in the truck.

New general regulations under the Act, as revised in 1942, were gazetted September 15, rescinding regulations passed in 1940 and amendments (LABOUR GAZETTE, 1940, page 446; 1941, page 691). There has been no change in the provisions limiting the hours of drivers of public service vehicles carrying passengers to the maximum permitted by the Alberta Hours of Work Act—nine a day and 54 a week except in special cases. Hours must be recorded in a log-book carried by the driver. As before, owners of passenger-carrying vehicles or holders of a liveryman's certificate may be required to file lists of their drivers with the Highway Traffic Board and to notify the Board of all dismissals and the reasons therefor. Candidates for a chauffeur's licence are still required to furnish medical certificates. Temporary chauffeur's permits may be issued for a specified period to employees of specified employers provided that the parent or guardian of the applicant endorses the application form and the vehicles are covered by satisfactory public liability and property damage insurance. Applicants for temporary certificates must have a driver's licence and may be required to take a special driver's test in addition. A fee of \$3 a year is required for a chauffeur's licence but it is reduced to \$1 for employees of the Alberta government, and drivers of school vans, who must have a chauffeur's licence, are exempt from the fee. The fee for temporary permits is 50 cents for periods of six months or less and \$1 for a period of a year.

British Columbia Male Minimum Wage Act

Order 1 (1943) governing the logging industry (LABOUR GAZETTE, Aug., 1943, page 1173) has been amended by Order 1A (1943) gazetted September 23. The amendment adds two groups to the list of persons exempt from the overtime provisions of the Order: emergency fire-fighters, and boatmen when employed on a monthly basis.

New Brunswick Public Health Act

New Restaurant Regulations designed to prevent the contamination of food were gazetted September 15. They require restaurant employees to wear clean clothes and keep their hands clean when handling food or equipment. No person suffering from a communicable disease may be employed in or about a restaurant nor may any person be employed while there is a communicable disease in his home except with the written permission of a District Medical Health officer.

Employers must provide adequate hand-washing facilities for workers, including warm water, soap and individual towels. Toilet facilities must be clean, well-lighted and ventilated, and lavatories may not open directly into any room where food is handled or stored. Other provisions of the regulations relate to the ventilation, lighting and cleanliness of rooms, waste disposal, refrigeration, water supply and the cleansing and bactericidal treatment of utensils and equipment.

Saskatchewan Theatres and Cinematographs Act

Following the revision of this Act in 1940, new regulations governing theatres, public halls, moving-picture machines, operators, itinerant exhibitors, film exchanges and censors were gazetted September 7, replacing regulations issued in 1931. The new regulations are a revision and consolidation of the former ones with their amendments (LABOUR GAZETTE, 1931, page 658; 1941, page 1271; 1942, page 799).

The minimum age for motion-picture machine operators has been reduced from 18 to 17 but applicants for an apprentice's licence must still be 18 unless the Minister uses the discretionary power granted to him by the regulations to issue licences to applicants over 16 but under 18 in cases of necessity. Under the former regulations, applicants for a first-class operator's licence were required to serve as a second-class operator under a first-class operator for at least 20 hours a week for three months. The new regulations omit the stipulation in regard to minimum weekly hours but still require the three months' service. The other provisions relating to operators have not been changed.

Saskatchewan Workmen's Compensation (Accident Fund) Act

A new consolidation of the regulations under this Act was gazetted on September 7, replacing regulations issued in 1941 and subsequent amendments (LABOUR GAZETTE, 1941, pages 139, 1271; 1942, pages 588, 799). They became effective September 30.

There has been one change in the list of industries excluded from the Act. An amendment in 1942 had substituted "commercial flying" for "all operations in connection with flying machines except the manufacture thereof" in the list, but the new regulations revert to the original wording. The other general regulations, the revised medical regulations and the schedule of medical, surgical and X-ray fees remain unchanged.

Decisions of The Labour Court of Ontario

Court, Finding that Agreement With Employees' Association was Ratified by Workers, Refuses Certification of Trade Union

A case in which a local of the United Electrical, Radio and Machine Workers of America applied to be certified as the collective bargaining agent for the hourly-rated employees of Atlas Steels Limited, Welland, was decided by Mr. Justice Kelly on September 4. The Atlas Workers Independent Union intervened and also applied to be certified. The Court refused to certify the applicant union on the ground that a valid agreement had already been entered into between the company and the intervener. It also refused to certify the intervener.

The applicant union began organizing the plant in December, 1942. The evidence showed that as a result, some of the employees started to organize an independent association. A meeting called by the existing welfare association rejected a proposal to amend its constitution to permit it to act as a collective bargaining agent. This meeting was held on the company's premises during working hours, the employees who attended did not suffer deductions from pay for the time spent there and the General Manager of the company addressed the meeting. At a second meeting the General Manager again spoke. According to the applicant union he offered proposals for future organization but his own evidence, which was accepted by the Court, was to the effect that he attended to answer questions. Subsequently an organization was formed and a constitution drawn up. The applicant claimed that foremen were active in organizing the association.

On April 21, an agreement was signed by representatives of the company and the association. The company had at first refused to negotiate until there was evidence that the association represented a majority, but the General Manager stated that he was ultimately satisfied of this through personal contact and by an affidavit of two of the officers who swore that they believed they represented a majority. The agreement was endorsed at a meeting which was attended by about 70 of the 2,500 employees.

Meanwhile the applicant union had continued its organizing activity and on April 30 it applied for a board of conciliation and investigation under the Industrial Disputes Investigation Act. An Industrial Disputes Inquiry Commissioner appointed by the Dominion Department of Labour, conducted a vote on June 16 at which 1,383 out of a

possible 2,480 ballots were cast, 1,263 for the applicant and 110 for the intervener with 10 being spoiled. The company, however, had withdrawn its permission to hold the vote and refused to recognize its results.

The company in turn took a vote on July 12 to determine if its employees supported the agreement it had just concluded. The vote was supervised by a firm of chartered accountants and of the 1,543 votes cast, 820 were in favour of the agreement, 701 against and 22 ballots were spoiled. 2,380 employees were eligible to vote. The applicant union had urged its members either to refrain from voting or to vote "no".

The Court held that the agreement entered into between the company and the intervening association barred the applicant's claim for certification. It rejected the applicant's contention that the intervener was improperly influenced by the company, holding that the evidence fell far short of proving this and that "at most, the only inference that could be taken . . . is that the management may have favoured the organization of the Independent Union [intervener] preferably to the organization among its employees of the applicant." On the question of whether or not the majority of the employees supported the agreement, the Court held that the meeting of about 70 employees at which the agreement was originally endorsed was completely inadequate as an indication of the workers' views. The vote subsequently conducted by the company, however, was accepted by the Court as sufficient evidence to show that the workers endorsed the agreement. The Court found that the company took all reasonable precautions to ensure secret balloting and gave all workers a chance to indicate their opinions. In its view "those refraining from voting were either in favour of the agreement or were so indifferent as to the result of the vote as to signify that they were quite willing to be bound by the majority of those voting." The approval signified in this vote was held to relate back to the date of execution of the agreement.

The agreement had been in operation for four months and was to be effective for the "comparatively short term" of one year. The employees, having taken advantage of it, could not now ask for a new union and a new agreement. Moreover, there was evidence that the grievance committee established under the agreement was active and letters from the Minister of Munitions and Supply complimenting the company on its production indicated that the employees were satisfied with working conditions.

In view of the fact that the vote at which the workers endorsed the agreement was not taken until the present proceedings were pending, it was held that the dismissal of the application would be without prejudice to a further application six months after the date of judgment. *Local 523, United Electrical, Radio and Machine Workers of America v. Atlas Steels Ltd.*, Sept. 4, 1943.

Vote Ordered in Massey-Harris Plant at Toronto

On September 13 Mr. Justice Barlow ordered a vote to be taken to determine if the hourly-rated employees of Massey-Harris Company Ltd., wished to be represented for the purpose of collective bargaining by the United Automobile, Aircraft and Agricultural Implement Workers of America. The union had applied to be certified and the Industrial Council of the Employees of Massey-Harris Company Ltd., had intervened. The Court decided that the evidence adduced by the applicant to show that it represented a majority of the employees was sufficient to entitle it to a vote, though not to certification without a vote.

A preliminary question was decided by the Court on September 7. The intervener moved the dismissal of the application on the grounds that the applicant, which was an international union, was not a trade union or other association of the company's employees within the meaning of the Act and that no constitution of an association had been filed as required by the Act. The Court, however, held that the applicant was in fact a collective bargaining agency as defined by the Act:—

The applicant is a trade union. It claims to represent a majority of the employees of the respondent. It would be too narrow an interpretation of the Collective Bargaining Act to hold that certification of an applicant as the collective bargaining agency could only be made of a local of the employees of the respondent. If I were to so hold, it would prevent craft unions from making application for certification. Sec. 1 (b) of the Act defines "collective bargaining agency" as "Any trade union or other association of employees which has bargaining collectively amongst its objects." The Applicant is a trade union, and comes within Sec. 1 (b).

The main point to be decided before a vote could be ordered was whether or not an agreement entered into on November 4, 1942, between the company and the intervener was a bar to certification. In 1919 an Industrial Council was set up in the Toronto works of Massey-Harris Company Ltd.,

to provide effective communication and means of contact between the employees and management on matters pertaining to industrial relations so as to establish those rela-

tions upon a definite and durable basis of mutual understanding and confidence and to promote the common welfare.

This Council, which consisted of an equal number of representatives of workers and management, was directed by its constitution

to consider questions of policy relating to wages, hours, employment and working conditions, works practice and rules, safety and prevention of accidents, sanitation and health, and other similar matters of mutual interest.

There had never been a written agreement, however, between the employees and the company until November 5, 1942, when the employee representatives on the Industrial Council, calling themselves the Industrial Council of the Employees of Massey-Harris Ltd., entered into an agreement with the company.

It was admitted that the agreement was not submitted to the employees generally for an expression of opinion. The respondent and intervener argued, however, that the employee representatives on the Council, who were elected every six months by the workers in the plant, were empowered to enter into such an agreement.

The Court rejected this argument. It found it impossible, after taking into account the purpose for which the Council was formed and the way in which it operated, to conclude that the employee representatives were elected for the purpose of acting as bargaining agents of the employees. Moreover, there was evidence that the employee representatives were not entirely independent of the management, both because they were elected to a council on which the management was entitled to equal representation and because all expenses, including that of printing the agreement in question, were borne by the company,

In order for the agreement to stand it must be found that the employee representatives were elected as, and in fact did become, the agents of the employees for the purpose of bargaining and entering into the said agreement on behalf of the employees.

In regard to the question of who should be allowed to vote, the respondent company and intervener made two suggestions, first, that employees who were absent on military service should be allowed to vote since they were eligible for re-instatement, and second, that a separate vote should be taken of the workers who had been employed by the company for more than a year. Both suggestions were rejected by the Court on the ground that they were impracticable, and, in the case of the second, that it might lead to discrimination as far as this particular vote was concerned and that in any case it would not be helpful in finally determining the matter. The usual

direction was made prohibiting organizing activity and electioneering while the vote was pending. *United Automobile, Aircraft and Agricultural Implement Workers of America v. Massey-Harris Company Ltd.* (1943) Ontario Weekly Notes 571.

Vote Refused When Applicant Fails to Give Reasonable Evidence that it Represents Majority

On September 17 Mr. Justice Barlow rejected the application of both the Victoria Employees' Independent Union, Canadian Furnace Ltd. (Applicant) and a local of the United Steelworkers of America (Intervener) for certification as the collective bargaining agency for the employees of Canadian Furnace Ltd., Port Colborne. He held that neither party had produced sufficient evidence to lead to the presumption that it represented the majority of the workers and that therefore there was no justification for incurring the expense which a representation vote would involve.

Sec. 13 (1) of the Act provides that a collective bargaining agency claiming to represent the majority of the workers may apply to the Court for certification. The Court stated that in making such an application the applicant must make out a prima facie case that it represents a majority, and merely to say "I claim to represent the majority" is not enough.

In the present case the applicant claimed 70 members out of the 180 who were eligible and stated that sufficient others were friendly to it to give it a majority. The intervener called as its only witness a field representative of the international union who stated that the local had 156 members. On cross-examination, however, it appeared that his statement was based on hearsay, and the intervener did not call as a witness any official of the local itself, who would have personal knowledge of the situation. *Victoria Employees' Independent Union, Canadian Furnace Ltd., v. Canadian Furnace Ltd.* (1943) Ontario Weekly Notes 576.

British Columbia Minimum Wage and Maximum Hours Orders

THE Board of Industrial Relations in British Columbia which administers the Male and Female Minimum Wage Acts and the Hours of Work Act has issued a compilation of all orders and regulations in effect under these three Acts on August 2, 1943. The male and female minimum wage orders are summarized and arranged in alphabetical order. The orders under the Male Minimum Wage Act now cover indentured apprentices, bakers, barbers, box-manufacture, bus drivers, carpenters, Christmas-tree industry, construction, elevator operators, stationary steam engineers, first-aid attendants, fruit and vegetable industry, manufacture of household furniture, janitors, logging, mercantile industry, painters, decorators and paper-hangers, patrolmen, sawmills, shingle industry, ship-building, taxicab drivers, transportation industry and wood-workers. Orders under the Female Minimum Wage Act govern indentured apprentices, bus-drivers, elevator operators, fishing industry, fruit and vegetable industry, hotel and catering industry, janitresses, laundries, cleaning and dyeing, manu-

facturing, mercantile industry, office workers, personal service, public places of amusement, shingle industry, telephone and telegraph workers and transportation industry.

The regulations under the Hours of Work Act are given in full and printed in numerical order. The Act limits hours in "industrial undertakings" to eight a day and 48 in a week but permits the Board to make permanent or temporary exceptions. Special arrangements are made for the following industries and occupations: lumbering, logging, fish-canning, cook- and bunk-house workers, engineers, firemen and oilers, shipping staff, emergency repair men, manufacture of seasonal boxes and shooks, seasonal lithographing, barbering, mercantile industry, drug-stores, baking, catering, retail florists, elevator operators, fruit and vegetable industry, transportation industry, hotel clerks and taxicab industry. Other regulations provide for the issue of temporary exemption permits and impose certain obligations on employers in regard to records, posting of notices, etc.

Prices

Prices, Retail and Wholesale, in Canada, September, 1943

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

A FURTHER advance of 0.2 points to 119.4 occurred in the cost-of-living index between August 2 and September 1, 1943. (See Table I.) This latest advance has brought the index 1.5 points over the July, 1942, level upon which the last previous cost-of-living bonus was authorized. However, the bonus is not subject to review until the October index has been released.

The advance of 0.2 points in the index between August 2 and September 1 reflected small scattered increases in the foods, home-furnishings and miscellaneous sub-groups. Foods advanced 0.3 points to 133.5 for September 1, with increases for eggs, beef and pork outweighing declines for potatoes and lemons. Furniture and hardware were responsible for a rise of 0.3 to 118.2 for home-furnishings and services, while an increase of

0.1 to 108.3 for miscellaneous items was due to higher transportation costs. Other groups were unchanged at 111.5 for rents; 113.4 for fuel and light, and 120.6 for clothing.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table III) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

† Commodities in the cost-of-living index excluding rents and services.

particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent

single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centered around each city average.

Table II is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding

(c) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the change indicated by these reports (see text, para. 4 and 5).

(d) Rents marked (d) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The cost-of-living bonus provided for by the Wartime Wages Control Order (P.C. 5963, July 10, 1942, replacing P.C. 8253) must be based on the official cost-of-living index as adjusted to base 100.0 for August, 1939. For each rise of one point in the index the amount of the bonus or its increase shall be:— (1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G. 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized quarterly in the LABOUR GAZETTE under the title, *Price Control in Canada*.

Wholesale Prices

Price increases in wood, animal and vegetable products were responsible for a further advance in wholesale price index in September to 101.2 from 100.4 in August. Reflecting a rise of \$4 per ton for newsprint effective September 1 and the removal of a subsidy on certain eastern lumber descriptions on the same date, the wood, wood products and paper group advanced a further 4.1 points to 113.6 in September. Animal products gained 0.4 to 108.4 with substantially higher prices for raw furs and lesser gains for eggs, butter and shoes accounting for the increase. Lower prices in this group were recorded for steers, lambs and certain fresh meats. In the vegetable products group, higher prices for wheat, flax, rye, bananas, cottonseed oil and hay overbalanced a sharp seasonal reduction in potatoes, and small declines in lemons, onions and rosin, to lift the index 0.2 to 92.7. Other groups registered no change between August and September, fibres, textiles and textile products remaining at 91.9; iron and its products at 115.7; non-ferrous metals at 79.7 and non-metallic minerals and chemicals and allied products both at 100.5.

The Canadian farm product price index advanced 0.4 points in September to 97.9. Field product prices, which mounted 1.2 points to 86.1 on higher quotations for grains and hay were responsible for the advance. Animal products on the other hand were weaker, easing 1.0 to 117.6 on lower prices for live stock which outweighed seasonal firmness for eggs.

Conventions of Labour Organizations

DURING the past month conventions were held by three of the major labour organizations in Canada—The Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour. In the deliberations of all three bodies labour's im-

portant participation in the war effort and its concern for the post-war situation was naturally reflected in the decisions taken—probably this was more in evidence in the 1943 conventions than in any other wartime meetings. Summaries of the proceedings of all three conventions are given in the following pages.

Trades and Labour Congress of Canada

COVERING in its deliberations a wide range of wartime activity and post-war planning, the 59th convention of the Trades and Labour Congress of Canada was held in the Chateau Frontenac, Quebec, during the week commencing August 30.

The Congress re-affirmed its pledge of support to an all-out war effort, but was critical of what it regarded as lack of government co-operation, particularly in the matter of labour representation on policy-making bodies. Other matters on which the convention concentrated were establishment of a labour code, wage policy, collective bargaining, bonuses and the cost of living.

There were present 519 delegates representing a membership reported by Vice-President J. A. Sullivan as 190,778 workers.

The delegates were welcomed by Mr. J. Matte, chairman of the Quebec and Levis Federated Trades and Labour Council, who presided at the opening session. Others who expressed felicitations to the convention were: the Hon. Edgar Rochette, Minister of Labour, Province of Quebec; Mayor Lucien Borne, of Quebec City and Mayor Bolduc, of Lauzon.

A telegram from the Prime Minister, Right Hon. W. L. Mackenzie King, conveyed his regret at not being able to address the delegates in person. The Prime Minister expressed his appreciation of labour's contribution to the war as follows:—

"As I look back over the four years of war I cannot express too warmly my appreciation of the splendid co-operation given Canada's war effort by organized labour and the many thousands of men and women in the ranks of labour whose constant and patriotic efforts have made possible the achievements of Canada's fighting men at sea, on land, and in the air."

Unable to leave Ottawa owing to pressure of urgent national duties, the Minister of

Labour, Hon. Humphrey Mitchell, telegraphed his best wishes to the convention, and sent as his speaking substitute, Mr. V. C. Phelan, Acting Director of Information of the Department.

Emphasizing the close contact which existed between the Department and the Trades and Labour Congress, Mr. Phelan pointed to the fact that several Ministers of Labour and senior officers of the Department had held high office in the councils of labour. He indicated the rapid expansion of the Department in the war years from a personnel of 200 to a working force of 7,000 as reflecting the enormous increase in responsibilities, some of which he outlined. He attributed much of the social legislation which had been enacted to the initiative and social consciousness of the workers, and declared that one of the major supports of democracy was a strong trade union movement.

Address of Mr. Bengough

Mr. Percy Bengough, in his opening address, stated that the Congress had endeavoured to co-operate with the Government but that such efforts were not entirely successful. He considered that one of the greatest difficulties of the Congress resulted from the Boards set up to produce ships and munitions, and he characterized such bodies as "having become stronger than the elected representatives of the people."

"There have been one or two regrettable strikes", he asserted, "but I cannot feel that we can criticize our members on that score for there have been one or two lockouts". He also charged that one Crown Company had sent out a leaflet telling its employees, in effect, that the Company union "was better than any outside labour organization."

He further asserted that letters had been sent out advising employees "to keep in mind

the wage freezing policy of the Government" and urging that "employers do not join with their employees in requests for wage increases to National or Regional War Labour Boards."

Attacking what he claimed was a decided lack of labour representation on policy-making bodies and Crown Companies, he declared that in the war effort the workers are not only providing the work effort but a large percentage of the armed forces and, through victory bonds and war savings certificates, are providing considerable of the capital. "And yet", he added, "the basis of representation in Crown Companies is 110 employers—representatives of finance—to 1 labour man."

Resignation of Tom Moore

At the conclusion of his address, Mr. Bengough read a letter from Mr. Tom Moore, president of the Congress, resigning from that body owing to continued ill-health.

In a strong exhortation, Mr. Moore, from the background of his long service to the Congress, declared it to be "a wonderful organization with a great future", and urged its officers, confronted "with the great responsibilities of our movement", to "carry on in faith and confidence".

Subsequently, the Congress, with profound regret, accepted the resignation of its leader and by resolution, unanimously adopted, voiced its great appreciation of his long and conspicuous service to the cause of the workers.

Report of Executive Council

The report prepared by the Executive Council, dealing with its activities since the 1942 convention, was approved in full by the delegates. It stated that workers must make it their responsibility to secure for the post-war world "a real democracy in which all can participate in a full life as complete as human ingenuity can make it"; but added that "we must, doing first things first, bend every effort in the meantime to press for a one hundred per cent war effort in every direction and through every medium". Declaring that "definite and numerous promises" had been received from Government spokesmen that changes would be made in respect of the question of labour representation on war and production boards, the report charged that these promises had not been kept.

Sweeping reforms were expected as a result of the public inquiry of the National War Labour Board into labour relations and wage conditions. The text of the proposals of the Executive Council at this inquiry was contained in the report. Also included was a complete account of the legislative proposals

made by the Council to the Dominion Government during February (LABOUR GAZETTE, March, 1943, page 376), and of the submissions made on behalf of the Congress to the House of Commons committees on Reconstruction and Re-establishment and Social Security.

The report also dealt with the following among other topics: a summary of labour matters dealt with by Parliament during the 1943 session; a review of wartime orders in council affecting labour; the Dominion Council of Health; recreational facilities for war workers; organizing activities; the Marsh plan; trade union film circuit; labour-management production committees, the trade union conference held in Great Britain and attended by representatives from the Dominions; and provincial legislative reports.

Report of Committee on Reconstruction

The Committee on Rehabilitation and Reconstruction presented a report based on a survey of general conditions prevailing in Canada and a study of surveys made by various authorities. The report refers to the mass unemployment of the depression period, and indicates that the solution to this problem was found by government planning in wartime, although the Government is criticized for failing to seek labour's advice in imposing its controls. Stating that if private enterprise cannot guarantee workers an avoidance of such suffering it must be sacrificed the Committee recommends a "new controlled competitive system to bring about social and economic security".

"Our immediate future can best be protected by the exercise of controls over finance, commerce and industry", the report adds. Stressing the responsibility of federal, provincial and municipal bodies to undertake a system of planning for full employment, the report suggests the following public works that should be planned by the nation immediately: rural electrification; housing and garden city projects; slum clearance; rapid electric transportation, both urban and rural; main arterial highways and bridges; reforestation, development of waterways and canals; hospitals and educational institutions.

To this Committee, headed by John M. Bruce, were referred a number of resolutions dealing with post-war planning as well as sections of the Executive's Report.

As a substitute for eight resolutions dealing with various phases of reconstruction the Committee:—

- (1) recommended that local bodies co-operate with it, in presenting labour's case before any Government Tribunal;

- (2) demanded that the International Labour Office, as an organization in which labour enjoys equal representation, be granted representation in every conference relating to post-war problems;
- (3) recommended that the incoming executive Council make representation to the Government for the immediate creation of a National Planning Council composed of equal representation of workers to all other groups.

Report of Committee on Legislative Activities

Dealing with the legislative sections of Executive Council's report, the Committee on Legislative Activities was critical of what it termed the Government's "restrictive labour policy", but noted that "there have been beneficial changes in legislation dealing with the unemployment insurance, old age pensions, income tax and physical fitness".

Messages of Fraternal Delegates

Representing the British Trades Union Congress, Stanley James, gave an outline of the negotiations toward the setting up of a proposed Anglo-American Trade Union Committee. Detailing the general position of Labour in Great Britain he said the special contribution of the trade union movement is "to insist on the destination of the worker and the machine, and to secure to men and women in industry conditions which will encourage them to do the best for the common cause".

In regard to representation of labour on government bodies he stated that the trade union movement in Great Britain had succeeded in securing "representation on the hundreds of committees and tribunals which in wartime control the life of even the smallest of our children, to say nothing of the millions of people in trade and industry." Commenting further on this topic he stated:—

"Coming as I do from the United Kingdom where labour, government and management have really united to prosecute the war, and where all deliberations are of tripartite character, I have been somewhat shocked at the paucity of representation by labour in Canadian endeavours, and sincerely hope that this Congress can bring pressure to bear to see that responsible labour organizations are given the voice to which they are most certainly entitled in the ruling of their own country and destinies."

As fraternal delegate from the American Federation of Labour, Mr. Arnold S. Zander addressed the delegates and dealt with some of the broader aims of the labour movement. He

spoke in favour of a post-war world organization to decide and enforce policies directed at international security and justice. Stressing the need of continual alertness against forces of reaction which menaced the labour movement, he advocated a continuous program of adult education on the part of labour leaders as a means of making labour a constructive power in the political and economic life of the world community. Referring to the joint war effort of American and Canadian workers, he declared: "We plan, also, to work with you in peace—for a better world—for the four freedoms—for the brotherhood of man".

Describing the International Labour Office as the only official world institution in which labour is directly represented and stressing the necessity in a world of international competition of labour achieving its gains on an international front, Mr. Adolphe Staal, Chief of the Workers' Organization Service of the I.L.O. declared that the objects of the trade union movement and of the I.L.O. are identical. "These objects" he said, "may be summed up in a few simple words: they are to secure employment to every man and woman willing to work, under humane working conditions and at a direct wage. The stronger the trade unions in the various countries, the greater the chances of attaining these objects." He urged mutual collaboration between the trade union movement and the I.L.O.

Address of Mr. J. L. Cohen, K.C.

At one of its sessions the Congress was addressed by Mr. J. L. Cohen, K.C., who reported "on the discharge of the functions and responsibilities of the National War Labour Board".

After detailing what he considered were the "functions and responsibilities of the re-constituted National War Labour Board", Mr. Cohen gave an analysis of the workers' part in the national program and in this connection, said in part:—

"We must ascertain, in terms of the national interest, whether the nation benefits from, whether the war effort is aided by, promoting the principles of collective bargaining and the establishment of labour organizations. By the same criterion we must ascertain how we can deal expeditiously and justly with disputes arising out of the application or interpretation of collective agreements already arrived at and whether the Industrial Disputes Investigation Act is an effective or an ineffective instrument to-day—in this year of 1943. Similarly, in relation to national needs and the national interest, we must properly appraise and deplore the cost in production of an un-

sound industrial and labour policy, yes, even at the cost in human lives at the fighting front and even at the home front. We must measure the role that labour should be enabled to play within industry and with government and what representation should be given to labour, within government itself, and upon government administrative and policy-making bodies. We must ascertain what is a constructive policy of wage control. . . ."

Address of Honourable J. L. Ilsley

Speaking on the relation of wage policy to price control, the Honourable J. L. Ilsley, Minister of Finance, declared that a balanced program of taxes, borrowing, price control and rationing, was essential if the costs of the war were to be distributed fairly and if civilian goods were to be properly shared by all citizens. He pointed out, however, that "price control cannot work if costs of production keep on rising."

"They have risen already to a dangerous extent since we established the price ceiling, and the upward push on that ceiling has been near the bursting point in many places and at many times," he said.

One of the great upward pressures threatening the price ceiling to-day and bound to threaten it in the immediate future, the Minister said, is the pressure of rising wage rates.

"I realize that in what I have to say some of you, perhaps many of you, will disagree with me. But I have tried to think straight and I believe you want me to talk straight on this point.

"Wages and salaries are much the largest element of cost—I mean when we look at the country as a whole and include the labour going into materials and transportation as well as labour in the final manufacturing process.

"If labour costs go up substantially, prices will have to go up too. There may be limits within which wage increases can be absorbed by reduction of profits or within which increased output per worker results. But these are narrow limits and I believe it to be nothing more or less than the sober truth to say that if labour costs go up substantially and widely, we cannot hope to hold the price ceiling."

If the ceiling is not held, Canada will be caught in the upward sweep of rising prices and wages "to the advantage only of experts in the art of profiteering out of inflation and to the great disadvantage of the rank and file of the population."

Labour Representation and Government Labour Policy

One of the first resolutions to be passed by the convention was a composite of 14 sub-

mitted by various affiliated groups calling for greater labour representation on Government boards and commissions. Asserting that these boards are at present not representative of the people of Canada but are controlled by "big business and financial interests", the resolution stated that labour's repeated requests for full representation on all boards and Crown Companies set up by the Government had not been complied with, and charged that certain cabinet ministers were ignoring the Prime Minister's promise to give labour representation on such boards, the resolution concluded by asking the Prime Minister "to immediately fulfill the promises made in this respect to organized labour or submit his record to the people of Canada, so that democracy may prevail."

Closely following the resolution seeking labour representation on government boards was one which called for the replacement of the Minister of Labour. This resolution also recommended that the Department of Labour "should be solely directed by the Minister of Labour without interference from other cabinet ministers and officials."

Other resolutions sought changes in government labour policy and the removal of certain government officials. One adopted resolution asked for

the creation of a Ministry of Production with labour representation thereon, the reorganization of National Selective Service, the representation of labour in all War Boards, and the revision of the arbitrary labour and wage freezing policies of the Government.

Another resolution called for the adoption by the Federal Government of social security legislation along the lines of the bill recently submitted to the United States Congress by Senator Wagner. This was referred to the incoming executive for further study.

The convention, also by resolution, "demanded" that the Minister of Munitions and Supply, Honourable C. D. Howe, "immediately change his policy and encourage co-operation between Crown Companies and legitimate unions . . . to show an example to private employers".

The resignation of Mr. John A. McClelland from the National War Labour Board was requested in another resolution.

Five resolutions called for the resignation of Mr. Ralph P. Bell, Director-General of Aircraft Production.

A final resolution in this group criticized the Honourable Louis St. Laurent, Minister of Justice, as "not representing the spirit of French Canadian workers".

Pledge of War Support

In substitution of three resolutions on the matter pledging wartime abstinence from strikes, the following was adopted unanimously:

Whereas, invasion of Sicily and the Italian mainland is the opening attack of Canadian, British and American forces to crack open Hitler's European forces, and in concert with the Russian armies force the Fascist Nazi regime into unconditional surrender; and whereas, it is the fundamental duty of the organized labour movement to back the attack with all we have. Therefore, be it resolved, that this convention reiterate its previous position, taken on the outbreak of war, after the London Convention of 1939; and be it further resolved, that the Government, in the best interests of the war effort, make the same policy mandatory upon the employer; and be it further resolved, that the Executive stand instructed to address a cable to General McNaughton assuring him that organized labour as represented by the Trades and Labour Congress of Canada will do everything within its power to see that there is no interruption in the flow of weapons and war supplies in order to achieve a speedy victory.

Cost of Living

There was considerable criticism in regard to the cost-of-living index and the cost-of-living bonuses. There were 18 resolutions submitted dealing with various phases of the problem.

Several delegates considered that the index did not measure the full rise in the cost of living and the opinion was also expressed that "the cost-of-living bonus should be scrapped and the whole thing be put on a pay envelope basis". The action of the convention on this subject was expressed in a substitute resolution which called for a revision of the present cost-of-living index "to make it a more truthful expression of expenditures and costs to the average worker", a system of regional cost-of-living bonuses to allow for variations in living costs in different parts of the country, a full, tax-free cost-of-living bonus for every worker, and the publishing of figures on which the index is based in the *LABOUR GAZETTE*.

National War Labour Board, Collective Bargaining and Labour Code

Several resolutions were passed strongly advocating collective bargaining and the establishment of a labour code. Some of these were contained in the group of resolutions listed under the heading of "National War Labour Board". A cross-section of the resolutions adopted on these subjects indicated: (1) that present government policies on collective bargaining were considered inadequate; (2) that

the public inquiry under the National War Labour Board had revealed "numerous grievances" and that the alleviation of these was dependent upon the immediate establishment of a federal labour code; (3) that it was necessary to enact a Dominion Labour Relations Act, establishing "a genuine collective bargaining policy with proper machinery for its enforcement"; (4) that preference be given by the federal government in awarding contracts to firms having collective bargaining agreements with organized labour.

Other objectives of these resolutions included: a wage minimum of "50 cents per hour or \$25 per week under which wages would not be frozen"; holidays with pay, extension of the full cost-of-living bonus, free from taxation; the outlawing of all forms of company unionism and the imposition of stiff penalties where employers failed to bargain collectively with trade unions which represented a majority of their workers; enactment of legislation similar to the Wagner Act "giving full protection to workers in their right to form labour unions".

In the discussion on the collective bargaining features of the resolutions, criticism was expressed of the collective bargaining measure in effect in Ontario.

National Unity and Joint Labour Action

There were seven resolutions dealing with national unity and joint labour action. The one which was adopted as a composite expression of the attitude of Congress on this subject, after pointing to "the continuing division in the ranks of the Canadian trade union movement", and after stating that "the refusal of the Government to give full representation and partnership in the war effort had the effect of reducing the strength of labour's role at the present time", went on to favour:

the establishment of a Canadian Wartime Labour Board composed of equal representation of the Trades and Labour Congress, the Canadian Congress of Labour, and the Railway Brotherhoods, the purpose of such Wartime Labour Board being to co-ordinate Canadian labour's wartime activities and to avoid poaching and internecine warfare of one union against another, and further to press upon the Government and the organized employers the common demands of all labour unions for total war policies, labour representation and genuine wartime legislation to protect labour's rights and thus enable the labour movement to exert its full united efforts behind the job of winning the war and the peace to follow.

Equal Pay for Equal Work

A resolution calling upon the Congress to reiterate its previous stand on equal pay for equal work for women precipitated consider-

able debate. The stand was taken by some delegates that the resolution was not only designed to favour women but was a protective measure for men to maintain wage standards. Examples were cited of industries in which the principle of equal pay had been successfully established.

Miss Daniele Cuisinier, a delegate from Montreal, advocating the extension of this principle, said in part: "Even though the question of equal pay for equal work has long been an established principle, putting it into effect is still a timely demand. . . .

"I contend", she continued, "that any woman with a sound constitution and a normal healthy condition can undergo the war work in most industries without harm to herself. The tragedy is that in our province of Quebec, due to lower wage rates and standards of living, the conditions of health and education are not such as could help our women war workers. Therefore, this question, like so many others, leads us directly to the sore point of all trade unions—wage equality for Quebec, wage equality throughout Canada. Only when we have achieved this will we have the unity so essential to victory. And, to achieve this we must be even better organized.

"French Canadian workers", she asserted, "have a record second to none in their war effort. It is up to the trade union movement through united action all over the Dominion to ensure wage equality for Quebec. It is also a guarantee of the Canadian living standard."

Calling for "equal pay, equal education, equal health and living standards for a united Canada", she declared that women workers should take their place in the "tremendous job" of post-war reconstruction.

An opposing viewpoint was voiced by another speaker who said that "after the war women were going to be in competition with their fathers, sons and future husbands", and expressed the fear that "this will bring about direct relief again".

The motion as adopted by the Convention resolved that the Congress "not only reiterate its previous stand on equal pay for equal work but also contact proper authorities to get a definite ruling on this matter"

Wage Policy and Control

Supplementing its action on the cost-of-living bonus, the Congress adopted, without discussion, a resolution, which after declaring—that in the effort to stabilize the economy of the country, "wages and prices of certain commodities had been fixed at set levels", and that "it is becoming more apparent that the wages of thousands of Canadian workers have

been frozen at abnormally low levels which is one of the chief causes for stoppages in war industries and dissatisfaction with the government's labour policy"—protested the freezing of wages at sub-normal levels, and "demanded" that "prices be frozen to the same extent as wages, the alternative being the complete rescinding of this order".

Selective Service

Matters relative to Selective Service came within the purview of the Congress in three resolutions. One of these, which was adopted, declared that "the machinery set up in the Dominion under the name of National Selective Service has been imposed upon citizens and workers as a necessary war measure", and its authority "is so broad that it can only be justified as a war measure". It then "demanded that it shall cease to exist within a period of six months after the termination of hostilities and that the active program of placement of workers shall be returned to the Unemployment Insurance Commission of Canada".

The other two constituted a request to place hotel and restaurant employees and culinary service workers in a preferred category, and this was referred to the provincial executives for action.

Unemployment Insurance

There were seven resolutions dealing with unemployment insurance. In these, the chief recommendations were: (1) that "the scope of the Unemployment Insurance Act be widened to cover every wage earner in the Dominion of Canada"; (2) that "the verification of dependency be eliminated and the sworn declaration of the applicant be sufficient to entitle the wage earner to benefit"; (3) that the maximum weekly benefit payments be raised; (4) that the right of appeal to an umpire be restored and that applicants' expenses be borne by the Commission; (5) that Section 40 of the Act be amended in regard to the lapsing of rights.

Political Action

On the subject of political action the Congress had before it a number of resolutions which were incorporated in a substitute resolution as follows:

Resolved, that this convention calls upon its affiliated unions and on all organized workers to take all necessary steps in the communities and provinces of this Dominion to create trade union committees for political action, so as to enable the trade unions to play a more direct and more appropriate role in influencing and shaping the great

movement for independent political action and thereby secure trade union representation on all governing bodies; we further recommend that labour unions support candidates who favour the policies of the trade union movement as represented by this Congress.

The above resolution was adopted.

Workmen's Compensation

Expressing dissatisfaction with the lack of uniformity in Workmen's Compensation laws in the various provinces, the delegates passed a resolution instructing the incoming executive committee to have prepared a model act embodying the following features: (1) 100 per cent compensation; (2) blanket coverage of all occupational diseases; (3) the placing of the supervision of preventative measures under the Workmen's Compensation Boards; (4) compensation to be paid from the date of the injury. The full cost, it was declared, should be placed upon industry "which will have a tendency to bring about the removal of unhealthy conditions of employment". Another resolution advocated that the services of "chiropractors, osteopaths, etc., be made readily available to all workers".

Other Resolutions Adopted

Action was also taken by the delegates in passing the following among other resolutions:

That representatives of labour be included in delegations sent by the Government of Canada to any part of the fighting front.

That the Pension Act be amended to provide that there be no discrimination in awarding pensions between members of the armed forces who have served in Canada for one year or more, and those members serving overseas.

That the Government remove the restrictions on the production and sale of beer.

That rationing of scarce commodities be continued and extended, as "the most equitable way of meeting the requirements of our people".

That, since manufacturers were allowed exemption from taxation on portions of their income designated by them as set aside for depreciation of machinery, a comparable exemption for depreciation should be allowed to working men supplying their own tools.

That the recommendations of the Parliamentary Committee set up last year by the Dominion Government, to the effect that the bans be removed from certain banned organizations and their property restored, be implemented by the Government.

That postal employees receive time and one-half for overtime and periodical revision of their salaries and working conditions; that customs and excise officers receive an 8-hour day, time and one-half for overtime and double time for work performed on Sundays and holidays.

In regard to shipping matters: that the Government implement the conventions and recommendations of the I.L.O. passed in

Geneva in 1936; that ship owners and operators pay a "proper war risk bonus" to the entire ship's personnel engaged in manning Canadian vessels; that wage rates paid to marine engineers be revised upwards.

That a National Health Insurance Act be enacted at the next session of Parliament.

That profits from industry should be limited to 5 per cent by taxation or other methods, and that excess profits should be used for the prosecution of the war.

That the Congress deplores the employment of "dollar-a-year" men and urges that all persons in Government employ be paid on a basic salary basis to prevent evasion of income taxes.

That the Dominion Companies Act be amended to ensure adequate information as to financial statements and profits being published by corporations.

That holidays with pay be made compulsory on all employers of labour.

That the Civil Service Superannuation Act be reopened to permanent civil servants not previously electing to come under the Act.

That trade unions make recommendations to provincial governments to co-operate in the Dominion industrial recreation program; that trade unions participate in community recreational programs; and that facilities be made available by authorities.

That children under 16 years of age be kept out of industry.

That the Congress seek legislation to provide for an indentured system of apprenticeship for all mechanical industry.

That a full cost-of-living bonus be paid all old age pensioners.

That the provisions requiring the signing over of property owned by old age pensioners be eliminated.

That old age, sickness and incapacity security legislation be enacted by the Dominion Government in co-operation with the provinces, making it possible that a monthly contribution be made by employee, employer and the State, and that at the age of 60 years all persons be granted the option of retiring, and that benefits for old age, incapacity and blindness be not less than \$50 a month for a single person and \$75 for a married person.

That the Government "restore the privileges enjoyed by the Workers' Educational Association in connection with the Labour Forum (CBC)", and that a similar program in French be planned by the CBC.

That closer co-operation be developed between the Executive of the Congress and the Workers' Educational Association.

Election of Officers

Vice-President Percy R. Bengough was elected President of the Congress by acclamation.

Nominated for the position of Secretary-Treasurer were J. A. "Pat" Sullivan and Elphege Beaudoin. Mr. Sullivan was elected.

It was unanimously agreed by the delegates present that the recommendation of the Committee on Constitution and Law increasing the number of Vice-Presidents from three to five should be carried out and that Vice-Presidents

should be chosen regionally, that is, one for the Maritime Provinces, one each for Quebec and Ontario, one for the Prairie Provinces, and one for the province of British Columbia. The following Vice-Presidents were then elected: for the Maritime Provinces, James A. Whitebone; Quebec, Paul Fournier; Ontario, John W. Buckley; Prairie Provinces, Carl E. Berg; and British Columbia, Birt Showler.

Provincial Executive Committees elected were as follows: Nova Scotia: G. A. Smith, Chairman, Halifax; Clarence Webber, Brooklyn; J. J. Fultz, Halifax; W. De Vons, Amherst.

Ontario: John Gavin, Chairman, Toronto; John Toms, Toronto; J. F. Cauley, Hamilton; R. J. Barnett, Ottawa.

Manitoba: J. B. Graham, Winnipeg, Chairman; James McDuffe, Brandon; L. V. Guberman, Winnipeg; E. Houle, Winnipeg.

Saskatchewan: W. J. Smith, Saskatoon, Chairman; F. Ingram, Moose Jaw; H. Davis, Prince Albert; P. W. Heffner, Regina.

British Columbia: C. E. Herrett, Vancouver, Chairman; J. S. Black, Prince Rupert; F. J. Bevis, Victoria; Robert Cormack, New Westminster.

Toronto was chosen as the next convention city.

Canadian Congress of Labour

WITH a delegate attendance of 545, representing approximately 200,000 members, the fourth convention of the Canadian Congress of Labour was held at the Windsor Hotel, Montreal, from September 13 to 17.

The convention marked a new departure for the Congress in that it "endorsed the Co-operative Commonwealth Federation as the political arm of labour in Canada".

The convention preliminaries included the welcome extended to the delegates by Mr. T. Prezeau, president of the Montreal Labour Council, and by His Worship Mayor J. Adhemar Raynault, of Montreal. The Honourable Adelard Godbout, Prime Minister of Quebec, was represented by Mr. Brunay E. Brais, of the Quebec Minimum Wage Commission, who also represented the provincial Minister of Labour, Hon. Edgar Rochette. The Dominion Minister of Justice, Honourable Louis St. Laurent, also attended the opening session. He declared it to be essential that there must be minimum standards for the least favoured of Canadian people, and that the position of the common man must be improved after the war.

Representing the Dominion Minister of Labour, Honourable Humphrey Mitchell, was Mr. V. C. Phelan, who addressed the delegates on the functions of the Department and particularly its wartime responsibilities. He emphasized the importance in a democracy of a strong labour movement, the part it had played in initiating sound legislation in Canada and its future role in the post-war world.

Presidential Address of A. R. Mosher

At the outset of his presidential address, Mr. A. R. Mosher drew attention to labour's contribution to the war effort and declared that that contribution must be sustained.

"Our immediate task...is to consider how the movement and the workers we represent can continue the utmost support to our fighting forces and to the war effort generally... We bear a heavy responsibility, not only for supplying the munitions of war, but for maintaining public morale at a high level and uniting the people of Canada in a common spirit of determination, not only to take their full share in the winning of the war, but also in obtaining peacetime conditions which will be worthy of the sacrifice and struggle which have been endured."

He asserted that no matter how long or how difficult the war might be it was not too soon for organized workers to begin thinking and planning seriously "for the post-war period in Canada and the world over. Consultation and co-operation with all nations will be essential for a just and enduring peace and for the economic well being of all people," he declared.

Because it transcended barriers of race, creed and language, Mr. Mosher was confident that labour could make an "important contribution towards the national and international status of the Dominion. The labour movement," he continued, "is looking forward to a very great extension of its membership and influence, but unfortunately, its development has been hampered by the antagonistic attitude of a great many employers, and by the lack of a federal labour policy which would protect the rights of the workers to organize and bargain collectively."

Referring to the criticism that has been levelled at labour "because several serious strikes have taken place, particularly during the past year," Mr. Mosher asserted that, in his opinion, "the workers should not endanger the war effort by strikes and slow-downs in war industry". "Nevertheless," he continued, "it should be clearly understood by the public ...that where strikes have occurred there has been extreme provocation on the part of the employers and Government alike. Nothing would have been more gratifying to me, as President of the Canadian Congress of Labour, than to be able to report that there had been no strikes among Congress unions during the past year, and that it had been possible for labour to abandon the strike weapon because there was an adequate government policy to protect the workers' rights and because employers were adopting a fair and reasonable attitude towards their workers. I regret to say, however, that the stage has not been reached in Canada when this is possible. May I add that workers do not go on strike without giving very serious consideration to such a step, since it means an immediate loss of income, but so long as only such a drastic method will remedy intolerable conditions, the workers are bound to feel justified in using it.

"For a great many years, the labour movement was primarily concerned with industrial relationships and economic objectives". However, the President was of the opinion that with the establishment of extensive controls over industrial operations and the expansion of government ownership and operation of industry, especially of public utilities and other government owned and operated enterprises employing large numbers of workers, labour's attitude towards governments would have to be reconsidered. Serious thought must be given to the advisability or otherwise of "the adoption of political policies and closer association with political parties", he asserted. "It would appear that, in its own interests, the labour movement can no longer stand aloof from political action, and that, unless it has a voice and influence in the political field, it will be unable to make its full and proper contribution to the public welfare." Continuing, he said: "Organized labour insists that the resources of Canada, human and material, shall be utilized to the fullest extent to meet the needs of her citizens and to render every possible assistance to the people of other countries less fortunate than ours... The organized workers will not be satisfied with any less vigorous effort to defeat our greatest peacetime enemy, involuntary

poverty, than is now being made to defeat the Nazi-Fascist gangsters in Europe and Asia...the fight against poverty and all its train of evils will require the same spirit of co-operation, the same large-scale planning and the same determination to win through to victory".

Enlarging upon the steps necessary to achieve this purpose, the President referred to "the task of educating the workers and the people of Canada as a whole with regard to the possibility as well as the desirability of drastic and effective changes in the economic system...It should now be obvious to every thinking person that the favourite excuse of the politicians during the last depression, that there was no money to provide work and wages, was utterly without foundation...In the world as it can and must be made, there will be both freedom from want and freedom from fear."

In concluding his address the President declared that "the time has come for labour to assert its rights and insist that they be respected, but at the same time it must unhesitatingly assume its full responsibilities as a national institution, having a vital function to perform and a worthy purpose to fulfil...Labour unions must widen their sphere of activity to include education in economic and political subjects and participation in the making of national policies affecting every aspect of Canadian affairs."

Other Convention Addresses

Representing the Congress of Industrial Organization, Mr. Allan S. Haywood, vice-president and Director of organization for that body, addressed the delegates.

Featuring Mr. Haywood's speech was his definition of the relationship between the CIO and the Canadian Congress of Labour. "This Congress," he stated, "is not affiliated with the Congress of Industrial Organizations. It is not chartered by them...It is an instrument created for Canadians to work out their own destiny in their own way." He explained that individual CIO unions in Canada were affiliated with the Canadian Congress of Labour in the same manner as independent unions; and furthermore declared that the CIO central office in Washington did not receive per capita tax from the CIO unions in Canada, but that this money was paid instead to the Canadian Congress of Labour.

Mr. Haywood described organizing activities in the United States, and relationships

between labour movements in North and South America, England and Russia.

At one of the sessions of the delegates were addressed by Mr. R. J. Thomas, president of the United Automobile Workers of America, and a vice-president of the CIO. Dealing with the war effort of the United Nations, mentioning especially Russia and China, Mr. Thomas spoke in favour of greater co-operation both for the duration of the war and in the post-war period. Urging increased production, Mr. Thomas said: "Too many people feel that the war is about over. I say to you we have got to continue the greatest amount of production we can produce until we know the war is over, and your troops and ours enter Berlin and Tokyo". He advocated a voice for labour at the peace table, as one means of staying off another war "in another twenty-five years"; and as a means of obtaining this voice, he called for greater unity in the labour movement throughout the world.

Mr. Adolphe Staal, Chief of Workers' Organizations and Service, International Labour Office, in a brief outline of the history and work of the I.L.O. pointed out that: "The trade union movement of the world will in the future have to assume many new tasks; it will not only have to deal with conditions of employment . . . but it will also have to take an active part in ensuring that there is employment for all . . . Unemployment is a world problem and it can be cured only by world remedies.

"In the past," Mr. Staal stated, "the I.L.O. has concentrated its activities on questions of a social character. It is more and more recognized, however, that social questions cannot be separated from economic questions. In the future the I.L.O. will have to give far more attention to the economic aspects of social questions."

With this in view it is planned to set up international committees to deal with problems of rehabilitation, trade and commerce and monetary questions in the post-war period.

Mr. Staal declared, however, that "the implementation of international standards depends entirely on national governments", and asserted that "such implementation would be brought about more easily and quickly in countries where there are strong labour movements which can influence the national legislative bodies, than in countries where the trade union movement is weak."

During a subsequent session the convention was addressed by Mrs. Christine White of the Conveners Branch of the Wartime Prices and Trade Board, who dealt with the Board's policy in combatting inflation.

The delegates listened to an address by J. L. Cohen, K.C. who reviewed labour's record

in the war and outlined his views on labour policy. He urged the establishment of collective bargaining, and a sound legal basis "upon which trade unions can increase their ability to serve the nation". He declared that "labour must be justly dealt with on the question of the cost of living bonus" and that there must be "a policy of selective service based upon a proper policy of the treatment of labour".

Report of Executive Council

An account of its work during the preceding year was contained in the report of the Executive Council of the Congress, which was read by Secretary-Treasurer P. Conroy.

The report described the Council's activities in connection with the Ontario collective bargaining legislation, including the submission of a memorandum to the Select Committee of the Legislature when the Act was being prepared. The Act was described as "an extremely disappointing piece of legislation, particularly because of the requirement that only lawyers are permitted to appear before the Ontario Labour Court."

The administration of the federal Department of Labour was also criticized. In addition the report dealt with problems of jurisdiction, the steel strike, the British Dominions labour conference, co-operation with the Trades and Labour Congress of Canada, the memoranda submitted to the federal government in March (L.G. March, 1943, p. 379) to the National War Labour Board at its public inquiry in May, and to the House of Commons Committee on Reconstruction and Re-establishment.

The work of the Congress department of research established under the directorship of Dr. Eugene Forsey, was praised in the report. This department, it was stated, had been of assistance to various affiliates in preparing material. Under Dr. Forsey it had also contributed towards the development of "an improved public opinion on labour matters, as well as economic and political subjects," and its establishment represented "a step towards the assumption of a larger role for the labour movement as a national institution, carrying on educational as well as organizational and legislative activities."

In regard to organization, the report listed 98 local unions chartered during the past year, two labour councils established at Oshawa and Regina and announced a membership of "approximately 200,000".

Political Action

The debate on the resolution concerning political action lasted for an entire afternoon's

session of the Congress. The Resolution's Committee had recommended concurrence in the resolution which provided for endorsement of the Co-operative Commonwealth Federation as "the political arm of labour". In the ensuing debate, the motion of concurrence was supported by the following speakers: David Cote, C. H. Millard, M.L.A., R. Lamoureux, Arthur Williams, M.L.A., C. Gillis, M.P., Ben Levert, and P. Conroy, Congress secretary-treasurer. It was opposed by George Harris, Harvey Murphy, Joseph Starr, Pearl Wedro and others. In the subsequent vote, the resolution as recommended was adopted by a substantial majority.

This resolution, which was a substitute for fifteen others, was as follows:

Whereas it is becoming increasingly apparent that organized labour, if it is to play its part in improving the welfare and economic status of the workers, must take political and economic action, due to the inevitable and ever-enlarging control that governments are exercising over all aspects of economic life and industry in this country; and

Whereas, in the opinion of this Congress, the policy and program of the Co-operative Commonwealth Federation more adequately expresses the viewpoint of organized labour than any other party:

Therefore be it resolved that this Convention of the Canadian Congress of Labour endorses the Co-operative Commonwealth Federation as the political arm of labour in Canada, and recommends to all affiliated and chartered unions that they affiliate with the Co-operative Commonwealth Federation.

No Strike Pledge

The position of Congress in the matter of strike action was defined by Mr. Mosher in his presidential address (summarized in a preceding section of this review). The convention subsequently declared itself in a resolution which reaffirmed a "no-strike" pledge. This resolution, after first asserting that there had been "provocations...for the strikes which had occurred", and that the situation had been "further aggravated" by the labour policy of the government, was adopted as follows:

Be it therefore resolved that this Convention of the Canadian Congress of Labour, fully conscious of the tremendous role that labour must play in the final annihilation of the Axis enemy and the winning of this people's war at an early date, reaffirms its win-the-war, no-strike pledge; and

Be it further resolved that this fourth Convention of the Canadian Congress of Labour call upon the Federal Government to co-operate with the organized labour movement, and assist it in carrying through this pledge by immediately enacting labour legislation on the basis of the recommendations made by the trade union movement.

Collective Bargaining

As a substitute for 13 resolutions submitted by various affiliated groups the delegates adopted a single resolution calling on the Dominion Government to "enact without delay collective bargaining legislation that will guarantee to all workers the right to organize in, and bargain collectively with their employers through legitimate unions of their choice." Such legislation, the resolution stipulated, should declare company-sponsored unions to be illegal in this country.

As a preamble to this resolution it was argued that "the general adoption of collective bargaining will do more than anything else to make possible labour's maximum contribution to the war effort"; and that "industrial democracy will assist in eliminating industrial strife and disharmony".

A further request on this general topic was to the effect that the terms of Order in Council P.C. 10802, extending the right of collective bargaining to employees in crown companies, be made applicable to workers in the C.B.C., the National Harbours Board, the Naval Dock Yards, the Department of Transport, and the Dominion Arsenals.

Ontario's recently enacted collective bargaining legislation was strongly criticized as "proving to be an instrument of great aid to reactionary employers." A resolution adopted by the convention instructed the incoming executive to "have its legislative committee meet with the trade unionists recently elected to the Opposition in the Ontario Legislature for the purpose of drawing up amendments to Bill 49" embodying the following:

(1) That it be made legally incumbent upon employers to negotiate with *bona fide* trade unions upon request, and to conclude, within a stated time, a collective agreement;

(2) That the various groups, commonly known as company unions be outlawed;

(3) That the Act be administered by an independent board representative of labour, management and the public, rather than a judge, as at present;

(4) That obstruction to the completion of a collective agreement between a *bona fide* trade union and employers shall be dealt with by the aforementioned Board;

(5) That all so-called "employees associations" having effect during the process of trade union organization in a plant or having effect contingent upon or since the enactment of Bill No. 49 and all allegedly signed contracts between these groups and management shall be made illegal;

(6) That employers shall be required to accept a majority expression of the employees relating to the formation or subsequent operation of a *bona fide* trade union

(7) That any dispute concerning the *bona fides* of the trade union and the desires of employees involved regarding check off, main-

tenance of membership, or closed shop shall be settled by ballot vote conducted at a place convenient to the voters.

Family Allowances

Emanating from the floor of the convention following the appearance in the press of articles to the effect that the Government was considering the desirability of instituting a system of family allowances, the following emergency resolution was concurred in by the delegates:

Whereas press statements have recently appeared indicating that the Federal Government is considering the inauguration of a system of family allowances instead of acceding to labour's demand that wage rates under fifty cents per hour be removed from the operation of wage-control legislation and left to determination by collective bargaining; and

Whereas such action by the Government, without first making available the reports of the National War Labour Board, following its inquiry, and without consultation with organized labour; can be regarded only as adding insult to injury; and

Whereas in the opinion of the Congress, the proposal referred to has been initiated by the controllers of finance in Canada:

Therefore be it resolved that the incoming executive committee be instructed to protest vigorously against this proposal, and to take whatever action is necessary to prevent its adoption.

Wage Control and Cost-of-Living Bonus

Over twenty resolutions were submitted to the convention dealing with various aspects of the Government's wage control policy and criticizing the official cost-of-living index as not reflecting the true rise in living costs. A single substitute resolution, as follows, was brought forward and adopted:

Whereas in spite of the fact that some wage increases have been granted under the Wartime Wages Control Order, P.C. 5963, the wages of hundreds of thousands of Canadians are held at substandard wage levels; and

Whereas it has been recognized by competent authorities such as the Toronto Welfare Council that under present circumstances a living wage should be at least \$33.73 per week; and

Whereas the cost-of-living bonus is at present quite unsatisfactory, therefore be it

Resolved: That the Canadian Congress of Labour ask the Dominion Government to amend P.C. 5963 to provide for the following:—

(1) That a floor of 50c per hour be placed under wages in order that wage negotiations will not be hampered when dealing with rates of pay below this level.

(2) That the order be amended to make clear the right of unions to present cases before both Regional and National War Labour Boards with or without employer support.

(3) That the method of computing the cost-of-living index must be changed to bring the index into line with the actual rise in the cost of living.

(4) That a full cost-of-living bonus shall be paid on a uniform basis in all industry.

(5) That the cost-of-living index be revised monthly and increases in cost-of-living bonus be paid monthly rather than every three months as at present.

(6) Special attention should be given under the order to areas which have been particularly disturbed by war-time conditions affecting the cost of living.

Income Tax

Fifteen resolutions regarding income tax were condensed into a single resolution, which asked: (1) that overtime pay and cost-of-living bonus be exempt from income tax; (2) that no tax deductions be made from the wages of workers who during the year will not earn an amount sufficient to place them in a taxable income group; and (3) that the exemption be raised to \$1,500 for married men and to \$1,000 for single men and women.

It was argued that the present income tax regulations impose a "severe hardship" upon the workers in the lower income group; and that by including overtime pay in taxable income the tax burden is increased "out of proportion" and the incentive to produce is "to a great extent removed".

Revision of Rationing

The following resolution, adopted by the delegates as a consolidation of several others, approved in principle of the rationing of consumer goods in wartime, but asked the Government to revise its rationing regulations in regard to "certain inequalities":

Whereas rationing of consumers goods is a natural and logical development of our war economy; and

Whereas we must face the basic problems of securing the fullest use of our resources and the most effective distribution of the products we produce, we must also insist that it be done on a fair and equal basis which will create a minimum of hardship and a minimum of friction; and

Whereas in the opinion of this Congress there exists in the present rationing system certain inequalities, both in the rationing itself, and the distribution of goods under the quota system and

Whereas these conditions show themselves in the following manner; namely, certain communities who by virtue of a large influx of workers due to the war emergency find themselves with an insufficient supply of consumer goods to take care of the needs of their people; this being most noticeable in public eating places which are required to cater to this large semi-transient group; and

Whereas the present rationing system does not make any provision for extra rations for

those workers engaged in heavy manual labour, such as mining, steel, etc.; and

Whereas the method of assigning quotas on certain commodities, is working to the disadvantage of a great mass of the workers in many areas, due primarily to circumstances beyond the control of the ultimate consumers:

Therefore be it resolved that this Convention requests the Government to give serious consideration to this problem with a view to so revising the rationing regulations so as to eliminate the inequalities referred to herein.

Labour Representation

The objectives of eight resolutions dealing with labour representation on government boards were contained in an adopted substitute as follows:

Whereas many boards are being set up to deal with labour, economic and social questions; and

Whereas labour is keenly and vitally interested in the function of all of these boards; particularly those that directly or indirectly affect the workers;

Therefore be it resolved that this Convention reiterates its demand that labour should have adequate representation on these boards, and instructs the incoming executive to continue to urge upon the Government the necessity of giving labour this right and also to recommend to the Government that labour women be appointed as representatives to those boards wherein feminine abilities are peculiarly adaptable.

Government Labour Policy

There were a number of resolutions critical of government labour policy. These were brought together in a composite substitute resolution which called for the "immediate release" of the majority and minority reports of the National War Labour Board inquiring into wage and labour conditions in Canada. Coupled with this recommendation, was "insistence" that Mr. J. L. Cohen be reinstated as the representative of labour on the National War Labour Board.

One resolution called for the resignation of the Hon. Humphrey Mitchell as Minister of Labour. The Resolutions' Committee recommended non-concurrence, and the convention also rejected the resolution, Mr. P. Conroy pointing out that the issue was the Government's labour policy and not the Minister of Labour.

Selective Service

There were five resolutions dealing with Selective Service. Of these, two, pertaining to military training deferments, were incorporated in a substitute resolution as follows:

Whereas workers in certain branches of essential employment are unable to plan their futures because employers are unable to advise them as to whether they are going to

be drafted for compulsory military training or retained as key-men in the industry; and

Whereas deferments are granted only to employers, and are, therefore, valid only in that employer's plant, and not within the industry as a whole:

Therefore be it resolved that this Convention of the Canadian Congress of Labour urge upon the Government of Canada the necessity of (1) definite action being taken to see that workers are advised as to their status relative to drafting for compulsory service or retention as key-men, and (2) that deferments when granted to workers because of special technical knowledge or workmanship within an industry be made applicable to the industry as a whole and not to one specified plant.

In three other resolutions the major recommendations were: (1) that a special commission "with adequate trade-union representation, be established to conduct a thorough survey of the manpower problem"; (2) that local Selective Service Boards be empowered to deal with current problems; (3) re-introduction of the seven-day notice (when severing employment) to all workers in the construction industry, and the dissolution of the National Joint Conference Board of the Construction Industry; (4) that the Congress protest "violation of collective bargaining agreements" in regulations of Selective Service "which provide for the return to their original jobs of men laid off during slack periods."

The above recommendations were referred to the incoming executive to deal with.

Unemployment Insurance

Various amendments to the Unemployment Insurance Act were requested. It was urged that the Act include all workers, regardless of income, who are not now included under the Act; that payment be made for the full period of unemployment; that benefits be raised "as required for health and decency", with the employer's contribution to be increased to meet the additional cost; that payment be made to all unemployed people regardless of their contribution; and that payment be not delayed but made in cash after the preliminary nine days are complete.

These were all referred to the executive.

Post-War Planning

A series of resolutions on post-war planning was submitted to the convention. In these, the chief recommendations were: (1) The introduction of a system of social security fashioned after the Beveridge plan with regard for "the higher standard of living which exists in this country"; (2) relief of any unemployment by post-war projects, revenue producing and state-owned; (3) bridging of the Canso

strait in Nova Scotia as a post-war employment project for the Maritimes; (4) establishment of government boards with adequate labour representation charged with the responsibility of post-war planning.

All of the above recommendations were referred to the incoming executive.

Labour-Management Committees

Full collaboration between workers and management was declared to be necessary to achieve all-out production, in a resolution instructing the incoming executive to "continue the campaign for the wide-spread establishment of labour-management production committees," and also to "renew the representations to the Government to accept its responsibility for actively promoting the establishment of such committees throughout industry."

Equal Pay for Equal Work

Two resolutions dealt with the question of equal pay for equal work, one in relation to women in industry and the other as regards wages in the province of Quebec as compared with the rest of Canada.

In the first of these resolutions it was asserted that in spite of the principle of equal pay for equal work as between sexes having been endorsed by the National War Labour Board, nevertheless many corporations were "still pursuing a policy of discrimination in establishing rates of pay for women workers." In reaffirming the Congress' adherence to the principle of equal pay for equal work, the resolution asked that the National War Labour Board direct the Regional War Labour Boards to grant equal pay for equal or comparable work performed by either sex.

The second resolution referred to the efforts of the trade union movement in "organizing the unorganized in the fight for sustained and increased production and for raising sub-standard wages in Quebec" as "an enormous contribution to our national war effort." The struggle to bring about equality of Quebec workers with those in the rest of the country was termed "a major contributing factor in cementing the national unity of all Canadians." The resolution called on the federal and provincial governments to "adopt policies and legislative measures" to give Quebec workers "equality in wage rates, health and working conditions."

Canadian Labour Unity

Noting with approval the "joint actions of the presidents of both Labour Congresses in Canada on issues of major importance to the

labour movement as a whole," the delegates instructed the incoming executive to "continue in their efforts to bring about unity of action between all *bona fide* bodies" on important issues. Local unions were urged to increase their efforts in an educational campaign for workers in their district in this connection.

International Labour Unity

The substance of ten resolutions dealing with international labour co-operation was embodied in a substitute which was adopted as follows:

Whereas it is desirable that labour should co-operate with labour throughout the United Nations to assure victory over Fascism; and

Whereas this Congress notes with approval the progress that has been made in this regard through the initial efforts of the British Trade Union Congress and the International Federation of Unions to crystallize this need, through the formation of the Anglo-Soviet Trade Union Committee:

Therefore be it resolved that this Congress re-iterate its resolve to take the necessary steps to secure closer co-operation and unity of action between the organized workers of all United Nations and to assist in making a policy that may be the basis of winning the war against the Axis and securing a peace which will establish for all people, freedom of speech, assembly, religion and freedom from fear and want.

Be it further resolved that this Convention go on record as favouring the submitting of an application for affiliation to the Anglo-Soviet Trade Union Committee, through the Committee Secretary, Sir Walter Citrine, as an initial step in carrying out this policy.

Workmen's Compensation

Three resolutions on workmen's compensation from British Columbia and Ontario unions were replaced by a single resolution asking that "the Government set up a research committee to review the entire question of occupational hazards with a view towards bringing the basis of the existing Workmen's Compensation Act up to date, and in line with the needs of the day"; and that "the Act be so amended as to provide for direct representation from organized labour on the Workmen's Compensation Board." It was also asked that workers with an income up to \$3,000 be included.

Old Age Pensions

The present old age pension scheme was considered entirely inadequate in an adopted resolution which contained the following recommendations: (1) Reduction of the pensionable age from 70 to 60 years; (2) increasing the pension from \$20 to \$40 per month as a minimum payment plus the addition of pro-

vincial grants; (3) granting of pension rights to wives of pensioners if the combined income of husband and wife does not exceed \$100 per month; (4) abolition of the means test and property attachment; (5) pensions to be payable regardless of length of residence in Canada.

Co-operative Movement

The Congress by resolution expressed its support of the co-operative movement. It asked the federal and provincial governments to "remove the various legal impediments" to the development of the movement; in particular requesting that the Wartime Prices and Trade Board "make available necessary supplies and goods for the use of co-operatives," and that the income tax legislation be amended so that consumer dividends paid by a co-operative be not regarded as taxable income.

Constitutional Amendments

A number of constitutional amendments, reported to the convention by the committee on Constitution and Law, were adopted by the delegates. One of these, which evoked considerable discussion but was eventually carried in a roll call vote, altered the basis of representation at Congress conventions, so that no union can send more than ten delegates to a future convention. Under this amendment each chartered local union and each local of an affiliated union or organizing committee can send one delegate for the first 100 members or less, and one additional delegate for each additional 500 members or major proportion thereof; with the limitation that no unit can send more than ten delegates.

Other Resolutions

The following, among other resolutions, were also approved by the delegates:

That labour be represented in Canada's delegation to the peace conference;

That, consistent with sound military strategy, the invasion of western Europe be undertaken at the earliest possible moment;

That the ban on anti-fascist organizations be lifted and their confiscated property restored;

That the Dominion Government, in conjunction with provincial governments or local authorities "and exclusive of private enterprise" set up the necessary machinery to put into effect immediately a comprehensive housing scheme, "whereby good houses will be built for use and not for profit, and at economic rents within the reach of every working class family in the country";

That the Government pass mandatory legislation granting the workers of Canada at least two weeks' annual holiday with pay;

That the Government of Canada use its influence towards the re-establishment of the League of Nations upon a basis of international collective security;

That the Government offer sanctuary to all refugees from political or religious persecution, without regard to race, creed or financial condition, and that the Government take immediate steps to facilitate the entry into Canada of refugees, especially those stranded in Portugal whom it is still possible to rescue;

That a national health plan be adopted by the Government to provide free hospitalization, surgical and medical attention for all workers and their families, so as to enable them to maintain a higher standard of health than now prevails;

That all members of the Armed Forces on furlough be granted free transportation within the country, and that all correspondence from them be carried free of charge;

That a bonus of \$1,000 be paid, at the end of the war, to every soldier, sailor, airman and merchant marine who has served one year on active service, with an additional \$200 for every subsequent year of service;

That the Federal Government extend to the Indian people of Canada "full and complete rights of citizenship";

Expressing "deep appreciation" of the work that was done by the late Dr. Norman Bethune, and recommending to the Government the institution of a "living monument" dedicated to his work;

That affiliated unions be requested to supply the Research Department of the Congress with copies of existing contracts;

That the Dominion Government take over full ownership and operation of all radio broadcasting as a public utility under the Canadian Broadcasting Corporation;

That, whereas the present system of banking does not operate in the best interests of the people inasmuch as it leaves their economic and social life to a large extent at the mercy of "a small clique of financiers," the Government should take over the entire banking system and operate it in the interests of the people.

Recommending control of all transport in Canada by the Board of Transport Commissioners;

That a campaign of organization be devised by the Congress Executive and carried out without delay in newspaper offices in the larger cities of the Dominion;

That the Criminal Code be amended so as to make it a criminal offence for anyone to "neglect, refuse, or withhold medical attention for all practise discrimination because of race, colour or creed";

That the Canadian Senate be abolished.

Election of Officers

Mr. A. R. Mosher was re-elected by acclamation as president of the Congress. Other officers chosen were as follows: first vice-president, Alex McAuslane; second vice-president, Sol Spievak; secretary-treasurer, Pat Conroy; executive committee, Silby Barrett, T. T. Johnston, J. E. McGuire, C. H. Millard, T. Prézeau.

Quebec was chosen as the site of the 1944 convention.

British Labour in Wartime—Report of P. Conroy, Delegate to Dominions Trade Union Conference

In April of this year Mr. P. Conroy, Secretary-Treasurer of the Canadian Congress of Labour, and Mr. Alfred Farmilo, representing the Trades and Labour Congress of Canada, were delegates to a Dominions Trade Union Conference held in London and sponsored by the British Trades Union Congress. The following report on conditions in Britain in wartime, especially as they affect trade unions, and impressions received during five weeks spent in Britain was submitted by Mr. Conroy to the convention of the Canadian Congress of Labour in September. Opening with an expression of appreciation to Canadian and British government officials and to officers of the British Trades Union Congress for their assistance and co-operation in making the trip possible, Mr. Conroy continues as follows:—

Dominions Trade Union Conference

Our mission to Britain was to attend a Dominions Trade Union Conference, sponsored by the British Trades Union Congress. This had been called for the purpose of exchanging information between the Mother Country and the several Dominions relating to the war, including the role played in each country by the trades unions, and also securing advice as to the aims and aspirations of the unions in each country in the post-war period. The conference, unfortunately, was circumscribed in its initial stages by the loss of the New Zealand delegation en route—the result of enemy action at sea—and the inability of Australia to send delegates. With British delegates and representatives from the International Federation of Trade Unions in attendance, the Dominions were represented by South Africa and Canada. Sir Walter Citrine reported on his previous efforts to secure a conference representative of many more countries, which had failed on account of internal conflicts and other considerations in those countries. The British delegates were, however, hopeful of a developing realization in all countries that world-wide unity in the days ahead was necessary, and that this realization would make closer co-operation possible.

The information exchanged at the Dominions conference revealed that the trade union movements of all countries represented were playing a decisive role in furthering the war effort. Degrees of comparison invariably had a sound cause, such as distance, resources, population, and other factors that contributed to the effort of each country. In no instance was it reported that the common people were not heart and soul in the fight for victory. The evidence at

hand was testimony to a common aim pervading all countries, that the objective must be secured, and that the fruits of victory would be of substance and benefit for those who toil for a living. It cannot be said, however, that the conference found everything good in its exchange of information and that there were not some grounds for discouragement.

The fact that the British Trades Union Congress was unable to have a wider range of countries attend is in itself evidence that in too many nations there is a tendency to believe that progress can be made by disjointed sections among the trades unions and that each can make a maximum contribution in both peace and war by pursuing its own separate way. This is one of the sores that of necessity must be healed before true world-wide unity can be achieved. The lack of Labour unity in such nations—including our own—has been a factor in the war, and, unless quickly remedied, will also be one in effecting a peace that should be beneficial to the people. The deplorable consequences of this situation can perhaps be realized better in Britain and from Britain, where the movement is not only a united whole, but a disciplined body that is and has been capable of great achievements.

What British Labour has Done

It is true that such unity and discipline are the benefits of a longer experience than ours, but it is a goal at which to aim. The British movement has had to deal with tremendous difficulties. The country has been entirely uprooted. The requirements of war have upset all of life's normal functions. Physically, through enemy action, and the necessity for a wholesale and fundamental adjustment in the conditions of life and work of the people, the nation has been figuratively dislocated. Millions of trades union members have joined the various armed services. Other hundreds of thousands have had to be transferred to new jobs in locations many miles from home. Yet to-day, in numbers, the British movement is at an all-time peak, even with the loss of millions of members. In prestige and in the respect it commands the movement has advanced with great strides. It may be considered as expressing the voice of the people, and as such has the ear of the Government.

This has been accomplished under conditions that usually result in a decline in the numerical strength and position of the trades unions. Hours of labour are long and hard.

Home and domestic conditions have been uprooted. Food and clothing are rationed to the most extreme degree. Millions of homes have been destroyed or irreparably damaged. Wages are a long way from being all that workers are entitled to in return for their labour. In short, the whole structure of British life has been patterned to distress and hardship, but the people do not seem to mind. In fact, that seems to be the explanation of the strength of the trade union movement. The organized workers are doing more than merely fighting a war. This conflict will determine whether they shall live or die, not as trade unionists, but as human beings. If they fail, their lives cease. If they win, with the new-found strength and confidence with which they have armoured themselves, they seem to see in their victory a chance to bring to life the dignity that has been so long denied them. One cannot come away from Britain without being impressed with the determination and purpose behind their present war effort. It has embraced and enveloped the whole people, and ours, good as it may be, seems somewhat puny by comparison.

Women in Industry

We visited many towns and cities, and went into the countryside. Everywhere was the evidence of war. The land was being tilled almost exclusively by women or elderly men, for the young men had gone. In the armed services there seemed to be almost as many women as men, and it was the same in the factories we visited. Indeed, some factories employed women almost exclusively, and generally, the work of the women was regarded as good. Here and there management and unions expressed doubts as to the permanent value of such wholesale dragooning of women's labour. There appeared many hold-over prejudices with much doubt as to the wisdom of permitting women to supplant men in such large numbers. In some jobs, women were found to be superior to men, such as those involving intricate and repetitive work. Whatever the overall comparison between the sexes in their contribution to the war may be, it is enough to say that all women, young and old, have made an enormous contribution to the survival of the country in its darkest days.

Labour-Management Production Committees

In going through the factories, the delegates made a point of securing advice and information on the operation of labour-management production committees. On the whole, they seem to be working reasonably well. In Britain, such committees are buttressed by official gov-

ernment interest, action and support, with a Cabinet Minister in charge, and with Labour having a directing voice in the work of all production throughout the country. There have cropped up prejudices on both sides, with employers and unions doubting the benefit of such joint undertakings in production. This was more noticeable in the early stages of the war, but as the war continued, it was realized that prejudices must be discarded. While there were no exact figures on which to base a judgment as to the operations of such committees, it would appear that they have been a substantial benefit to the country. At least Great Britain ranks among the highest in per capita production of any nation at war, and undoubtedly the joint committees have had much to do with attaining this high level of production.

Rationing and Price Levels

As to the necessities of life, it is enough to say that the whole life of the people is rationed. The satisfying feature of the British rationing schemes is that they achieved a general levelling of the people, and it is generally agreed that very few people have been able to gain at the expense of the masses. Food is best in the factory canteens and in the British or community restaurants. In the main, food in hotels and restaurants is quite poor. He is an astute and able visitor who is able to find the occasional good meal—by Canadian standards—in the average British restaurant. An explanation of this condition is that the bulk of the best food is withdrawn from such enterprises, and channelled through factory canteens and the homes of the people.

Prices are in most instances comparable to Canadian levels, though in others they are higher. The price levels of most staples have been kept down by government subsidy and, in the apparent hope of driving non-essential or luxury goods out of production and consumption, these commodities have been subjected to extremely heavy taxation. An instance of such heavy taxation is immediately noted in the purchase of tobacco, the price of which has trebled since the beginning of the war. Beer and spirits of all kinds are also high in price. As affecting the consumption of tobacco and other incidentals by our Canadian soldiers, sailors and airmen abroad, I should like to say in passing that the pay of a Canadian serviceman is badly depleted if he confines himself to one package of cigarettes and one glass of beer per day. Those who have been sending packages to relatives in Britain should continue to do so, and send them often and regularly. Cigarettes, soap, razor blades, chocolate and other minor delicacies are badly needed and greatly appreciated when received.

How British Trade Unionism Works

It is important to refer to the structure of British Trade Unionism, and its methods of operation. The first thing that strikes a visitor is the apparent maturity of the movement. Trade unions are grown up. They have "gone through the mill" in past years, and have now woven themselves into the fabric of British life. They are accepted as an institution, and this has been of great benefit in this war. There is not a department of government in which the unions are not represented. Looking after wages, hours of labour, and working conditions is only the beginning of the function of the British unions. The parent body, the British Trades Union Congress, is built on a departmental basis and almost approaches the structure of government. Each department has one or more experts in charge, which eliminates endless discussion and minimizes the need for numerous meetings and conferences. Authoritative opinion thereby guides all activities of the trades unions. There is little emotion exhibited. All discussion is on a matter-of-fact basis, the evident purpose being to get at the root causes of existing difficulties. We have much to learn from the Britishers in this respect. We waste a tremendous amount of time and energy in Canada in shouting and emoting, as compared with the Britishers, who seem merely to go to work and do the job at hand.

In the field of comparative organization, particularly as affecting skilled trades, the British wage-level is low by Canadian standards. This would seem to be a contradiction in view of the highly developed and well-integrated trade union movement in Britain. The explanation lies, however, in the fact that Britain is relatively poor in natural resources as compared with our own country, and even were industry socialized, the ability of the Britisher to raise levels to those reached on this continent under similar operation would be lessened by the fact that the resources are not there in abundance. In addition, as a large exporting nation of manufactured and processed goods, maintenance of export markets is predicated on competition with world-wide varying levels, some of which are very low. The aim of the unions is to take the most out of the social system that it is capable of producing and in this they have done a good job. Most wage-agreements are on a national basis, employers and unions preferring this method, which lends itself to stability in wages, production and distribution. There are very few instances of a uniform national wage. Wages are zoned, levels being based on population and production costs in the respective zones. When asked for the reason for existing wage-

differentials, union authorities reply that they have grown up with the development of industry, that in many cases the differentials are not justified, and that only constant effort will ultimately eliminate them. Considerable progress has been made in this respect.

Co-operation Among Trade Unions

The Britisher is not so mechanically-minded as the North American. He does not believe that at all times a straight line is the shortest distance between two points. The result is that there is no such thing in existence as a pure craft union, nor yet an industrial union, as we conceive them. Most unions are a combination of both types of unionism, with the craft ideology being the base upon which most unions operate. In some large industrial plants, we found as many as forty unions represented, yet they seem to get along quite well. There is, however, an urge to reduce the multiplicity of unions, but instead of competitive organization the policy of amalgamation is the medium employed. It has worked well and has eliminated undue friction, though some of this exists particularly among the unions governing unskilled and semi-skilled trades, which are perhaps the best organized in the country.

This report is but a thumbnail sketch of conditions in Britain. The people are determined that this war will pay for itself in the establishment of permanent and true values, that adequately weigh the contributions and the necessities of those who go to make up the nation. The war has disclosed that the country could not be saved only by those who have traditionally frolicked on "the playing fields of Eton." It took the bone and sinew of the country, the mass of the people to do it. Many of the traditional social superiorities and inferiorities have thereby been wiped out. In their place is the widening of a new-found strength. In relation to Canada and other Dominions, the conceptions of many Britishers are still quite hazy. Canada has much to do in the field of education and publicity abroad, although our Canadians in uniform have performed a tremendous educational feat for their country. Our men and women in Britain are valued not for what Canada has given to the Motherland, but for themselves. The impressions they have left can be definitely considered as assets for the Dominion. Canadian men and women in the service have represented their country beyond measure.

Our Opportunities as Canadians

Despite all the kindnesses that were heaped upon us by everyone we met and also in acknowledging that in many respects the

Britishers are ahead of us, one cannot be abroad any length of time without returning home a better Canadian. By comparison, we have a wonderful country that we do not appreciate to the full. There is not a Canadian abroad, living in the concentrated industrial areas of other countries or in the small confining countryside, who does not have a longing and nostalgia for the almost limitless vistas and horizons of his own land, with its tremendous resources, long distances, and the freshness and vigour that animate the life of all Canadians. We can do more with our country than we have done. We are an energetic people, and in the field of trade unionism this seems to be our trademark. Yet, in looking at the virtues of peoples in other lands, it would seem that our energy should be tempered with greater wisdom, that our denunciations of injustice can be wisely balanced with constructive application. As a young people and

a young movement, our unions would appear to need a greater measuring of our objectives and a seasoning of our emotions with factual analyses. We have to develop a properly-integrated movement, well-ordered and disciplined, built around all of the needs of the people and not merely the wage and hour range of our limited operations. These things will take time. We have the youth, the energy and the intelligence. We have the country to contribute to and draw upon. With a growing wisdom and a wider consciousness, it is my opinion that we can do these things and serve our own people in greater measure than we have done before.

I regarded my trip to Britain as a representative of the Congress as a distinct honour, a privilege, and an education. I am aware that every delegate says such things, but I want you to know that in my case at least they are true.

Canadian and Catholic Confederation of Labour

THE twenty-second annual convention of the Canadian and Catholic Confederation of Labour took place in Granby, P.Q., during the four days commencing September 19. The convention was attended by 213 delegates and considered over 100 resolutions.

Membership in the Confederation has increased, according to the report of the Confederation Bureau, from 46,447 at the end of May, 1942, to 53,384 at the end of May, 1943. During the year 25 new syndicates became affiliated with the Confederation, 11 through federations and 14 directly. Two new federations were established.

The convention was opened with a Mass sung by the General Chaplain of the Confederation, followed by a banquet at which Mr. Paul Martin, parliamentary secretary to the Minister of Labour, represented the Minister.

Mr. Martin praised the work done by the Confederation since its formation in 1921 in organizing unions in various industries and bringing about collective bargaining. "This must have meant a raising of the standard of living for many Quebec workers, and improved working conditions," he declared.

Outlining Canada's war effort, he spoke also of post-war prospects. "There is much talk about a new world," he said. "What we mean by this is that the resources of the world and particularly of this country are such that they can be harnessed so as to provide more generously and completely for the masses of our people. I frankly tell you that I am for this new world. Our problems are man made and can be solved by man. I look forward

to the day, and very soon, when we will have a social insurance plan that will be broad enough to take in old age, unemployment, invalidity, accident, health, all in one contributory scheme, so that all those who contribute will be assisted in their efforts and will be able to draw from a fund for one of these purposes." In regard to unemployment he said that the war had shown that by maintaining a high national income work could be provided.

Speaking on labour-management co-operation he declared: "Industry is not alone the prize of management. Labour and management have a joint role to fill. Labour-management co-operation in production should be encouraged. Management would do well to realize this. Toleration and patience are requisites for each of these partners in industry." In the sharing of the fruits of joint effort, he asserted, lay the social justice to which the world looked forward.

Report of President

Mr. Charpentier, in his presidential report, referred to 1942-43 as a year of struggles, tests and sacrifices "perhaps without precedent for the body of our movement." He asserted that attacks had been made by rival labour organizations. These were supplemented by "high federal functionaries" who he declared had interpreted wartime orders and rulings to the advantage of rival groups. He paid tribute to the determination and to the success of syndicates which had held their own or in-

creased their membership. During the year affiliated groups had negotiated 20 to 25 new agreements, and had renewed 60 to 70 others without disturbing the public peace.

He congratulated union centres which were successfully operating consumers' co-operatives, mentioning specifically the building co-operatives of Sherbrooke and Asbestos. More and more centres, he said, were forming study groups.

In the field of publicity Mr. Charpentier called attention to the radio programs in which the Confederation had participated, the increased circulation of the C.T.C.C. journal, *Le Travail et la Vie Syndicate*, and the appearance of several papers put out by syndicates or by union centres.

Industrial Democracy

Mr. Charpentier voiced criticism of union representation votes, in that a worker might be obliged, by majority vote, to "belong to a union and at the same time indirectly to a labour movement with which the union is linked, which movement often advances social and political principles that the worker personally detests."

Advocating legislation on freedom of association which would respect the principles of "Christian industrial democracy," he asked for provincial legislation to precede such federal action as might result from the recommendations of the National War Labour Board and to convey the sentiment and views of Quebec on labour matters.

"The fixing of national standards on hours of work, hourly or weekly wages, the standardization of the Companies Act, and the abolition of union anarchy by making workers' organizations subject to national legal criteria, are urgent measures which, once put into force, would facilitate the solving of the labour problem in Canada," Mr. Charpentier declared.

Social Security

Mr. Charpentier criticized the Marsh report on social security as an influence tending towards centralization. "The various benefits that it proposes: family allowances, unemployment benefits, health insurance, funeral benefits, etc., would be administered by Ottawa for the whole country. Nothing could be more contrary to national unity as we conceive it in Quebec. How would central authority respect all that is particularly ours: family ideals, traditions, civil laws, etc.?"

He advocated that a social security plan be undertaken by the federal government after the war with concurrent legislation in each province. He expressed satisfaction that the Quebec government had already adopted compulsory health insurance in principle, as well

as having incorporated the principle of family allowances in the Collective Agreement Act. He said an extension of legislation on family allowances was necessary, to cover families not included in the present law. He also asked for a provincial housing act, declaring that the federal act did not answer the needs of the working population of the province.

Cost of Living

Referring to an inquiry made by the Confederation into the cost of living in a number of centres, Mr. Charpentier said that one result was clear: that the Government should be required to check the actual increase in the cost of living, as well as that shown in the official cost of living index, or else permit a rise in substandard wages.

He said it was undeniable that wages were too low in a large number of Quebec industries. This contention was borne out by the fact that the Quebec Regional War Labour Board had received, and granted, more requests for wage increases than the Ontario Board. However, he protested against "the exaggerated accusations hurled by other labour organizations and by certain people in this province" concerning low wages paid in Quebec. Such accusations did not take into account the "considerable improvement" that had taken place due to the Collective Agreement Act and the minimum wage legislation; also it did not do justice to the Confederation which alone had pressed for enactment of these measures.

He expressed satisfaction that the Confederation had been among the organizations which had requested adoption of a law on compulsory school attendance such as had just come into effect in the province. He urged also uniformity and cost-free distribution of books for pupils in elementary schools.

Collaboration in War Effort

Referring to the war effort Mr. Charpentier declared: "Our collaboration has been loyal, and will be until the end of the world conflict."

The Confederation had maintained industrial peace without interruption to the war effort, he asserted.

In conclusion, he said that the Confederation wished to play its part in building "the new social edifice that all Canadians wish to see" in the post-war world.

Insurance Plan

Among the first matters to be dealt with by the delegates was a project for a Confederation insurance fund. Mr. Gerard Picard,

general secretary of the Confederation, informed the convention that this project had received close attention from the executive during the year. A draft plan was submitted to the delegates for their consideration and evoked spirited discussion. The object of the plan was to afford maximum protection to members at the age when their family responsibilities were greatest. A clause excluding from death benefits those of the age of 55 or over at the time of the plan's inception aroused some debate, with some delegates preferring a system of graduated rates of premium payment.

Professional Syndicates Act

A resolution was passed asking that all applications for incorporation under the Professional Syndicates Act be submitted to the Minister of Labour before being approved by the Provincial Secretary; the object being to prevent incorporation of company unions.

Workmen's Compensation

An amendment to the Workmen's Compensation Act was requested to provide that workers be represented when an accident occurs to make sure of impartiality in the preparation of the report. It was also asked that blood-poisoning suffered as a result of injury received at work, and lime burns be made compensatable; that rates of compensation be raised to 100 per cent of wages up to an annual income of \$2,000; and that all industries be brought under the law.

Family Allowances

By unanimous vote the delegates adopted a resolution to the effect that the Confederation should smooth the way to the introduction of family allowances, leading to the passage of a law by the government on the subject.

Scholarships for Sons of Workers

The fact that sons of workers are tending more and more towards improving their education, and that a worker cannot ordinarily afford to give his son the progress in education he is capable of benefiting by, was considered by the delegates in a motion urging that the Provincial Secretary accord full scholarships to sons of workers who are taking courses at a university or at an institution affiliated with a university.

Selective Service

The convention passed three resolutions dealing with Selective Service. It was suggested that in thickly populated centres, such

as Montreal, Quebec, Three Rivers, Sherbrooke, etc., there should be in the Selective Service Office one official at the service of workers' organizations exclusively, with a secretary to deal with telephone calls from unions. An amendment was sought to the definition of "casual employment", from 3 days to 6 days. It was requested that Selective Service make serious inquiries about employers who habitually write on a notice of separation the words "not competent," sometimes placing workers in an embarrassing situation.

Cost of Living Bonus

A uniform compulsory cost of living bonus for all industries was requested by the delegates in a resolution which deplored "the ambiguities and injustices for certain groups of workers who must be content with the insignificant bonus of 60 cents a week although they are faced with the same cost of living as other groups receiving a full bonus." It was also asked that the words "from the date of the last general increase in wage rates" be removed from the third paragraph of section 34 of P.C. 5963.

Two other amendments to P.C. 5963 were suggested, one which would permit the Minimum Wage Board of the Province of Quebec to order wage increases up to the minima laid down in the federal order, P.C. 7679; and another which would permit the recognition of the procedure of amending collective agreements by the Regional War Labour Board.

Other resolutions called for enforcement of application of P.C. 7679 in all industries with war contracts without exception; and for the rates specified in this order to be made obligatory in all industries. Minimum rates of 35 cents an hour for men, 25 cents for women, and 20 cents for workers under 18 years of age were urged by the delegates.

Holidays with Pay

Several resolutions were submitted dealing with the subject of holidays with pay. It was decided that the Confederation would prepare a draft law on this subject for submission to the government. The delegates also went on record as favouring a week's vacation with pay each year for all workers.

Taxes

Protests were voiced in a number of resolutions over various aspects of the taxation system. It was argued that a "large number" of workers were refusing to work overtime because of a resulting increase in their taxation rate, and that this lost time caused considerable harm to the war effort. One resolution

urged that income tax be levied only on the regular wages of workers; several others specifically asked that no tax be levied on the cost of living bonus, on overtime payment, on holidays with pay, or on income received through retroactive decisions of the War Labour Board or Unemployment Insurance Commission. In cases where excess deductions at the source had been made, it was requested that the Minister of Finance see to a speeding-up of reimbursements. Shorter and less complicated tax forms were asked, so that "thousands of workers" would not be obliged to pay for the services of qualified accountants; and it was requested that no tax be made on incomes of less than \$1,000 per single persons or \$1,540 for married men. Another resolution asked that employers be obliged to furnish workers with a slip showing in detail the deductions made from wages.

Cost of Living and Price Control

A more rigid control of prices was asked of the Wartime Prices and Trade Board. Complaints were voiced especially against the price of meat, lack of uniformity in price ceilings for individual merchants, and the "black market". A more efficacious control of wholesale prices was asked; and it was suggested that a cessation of all publicity concerning commodities which might be about to be rationed would discourage hoarding and the "black market".

Unemployment Insurance

In regard to the Unemployment Insurance Act, the convention passed resolutions asking for the following amendments: that benefits be payable from the first day of unemployment rather than from the ninth; that benefits be made retroactive from the first day even if a claim is not made until after several days of unemployment; that the difference in the rate of benefit between single men and married men with one child of \$12.24 to \$14.40 a week is too small, and that the father of a family of two children or more should receive \$25; that there be less delay in payment of benefits.

It was also asked that, "in order to prevent the dismissal of workers who verify their insurance books for themselves," inspectors verify the stamps in the books so that the worker can be sure that all the stamps he has paid for are inserted. Another resolution stated that "75 per cent of employees are afraid of asking to see their books," since employers "reproach them for lack of confidence," and requested that the Government

produce twice a year a duplicate of the sums paid.

Membership Open to Other Faiths

The General Chaplain of the Confederation, Reverend Father Jean Bertrand, in an address told the delegates that membership in the syndicates should be open to "all men of good will", providing that, as syndicate members, they "conform their acts to the Christian social doctrine". He said that this practice of open membership had been a matter of fact for the past years in many syndicates affiliated with the Confederation.

In this connection the delegates approved a section of the President's report stating that "federations and syndicates are, as heretofore, left free to choose whatever name they may deem appropriate". Thus unions so desiring may omit, or continue to omit the word "Catholic" from their title.

Other Resolutions

Other resolutions adopted by the Convention dealt with the following among other matters:

Amendments to the Collective Agreement Act;

Urging institution by the provincial government of workers' tribunals;

Requesting regulation of hours of closing in respect of grocers and barbers;

Proposing an amendment to the provincial strikes and lockouts law to make it include all employments and services;

Supporting the Chiropractors' Association in its request to governments to organize itself as a professional incorporation;

Asking a law to protect the public from "the misleading advantages of instalment buying";

Requesting the establishment of compulsory pension funds for municipal employees in towns of more than 5,000 population;

Asking for the setting-up of a provincial bureau of statistics;

Asking that union officials who make placements in projects essential to the war be placed in category C for gasoline rationing;

Requesting a reduction in the eligibility age for old age pensioners from 70 to 65; and that all pensioners receive the full pension of \$365 a year;

Asking for fuller French-Canadian representation in the federal Department of Labour;

Asking for an immediate session of the provincial legislature to give force of law to the recommendations of the Royal Commission into the disputes at the Lake St. John Power and Paper Company and Price Brothers;

Recommending that the federal government organize a national lottery to "aid in financing the war effort";

Recommending, in the light of papal encyclicals, that a study be made of a better world for after the war; this to be undertaken in collaboration with the *Semaines sociales du Canada*;

Deciding to undertake a "vast campaign" in all union centres in favour of credit unions (*caisses populaires*) and consumers' co-operatives;

Favouring the setting-up of a committee to create a union theatre as a means of spreading union information.

Election of Officers

At the conclusion of the convention Mr. Alfred Charpentier, Montreal, was re-elected president for a ninth term of office.

Other executive officers elected were: vice-presidents, E. Tellier, Three Rivers; O. Filion,

Montreal; A. Roberge, Quebec; L. P. Baily, Jonquiere; secretary, Gerard Picard, Quebec; treasurer, A. Bourdon, Montreal.

The directors elected, with the federations they represent, were as follows: O. Cyr, Asbestos, asbestos; J. Collins, Shawinigan, aluminum; P. E. Cabana, Montreal, barbers and hairdressers; J. Dorion, Quebec, building; E. St. Amand, Montreal, trade; R. Bellemarre, Montreal, gloves; G. A. Gagnon, Montreal, printing; F. X. Legare, Rimouski, lumber; W. Cloutier, Victoriaville, furniture; P. Lessard, Port Alfred, pulp and paper; H. D'Amour, Drummondville, textiles; I. Rousseau, Victoriaville, clothing; L. Morency, Quebec, federation of study circles.

Directors for regions where there are central Councils are as follows: R. Gosselin, Quebec; C. O. Bruneau, Montreal; G. Dallaire, Chicoutimi; E. Jacques, Sherbrooke; A. Quinty, Three Rivers; M. Lavigne, Hull; O. Chabot, St. Hyacinthe. Reverend Father Jean Bertrand is General Chaplain of the Confederation.

Notes of Current Interest

Dominion-Provincial Conference on Labour Relations

A Dominion-Provincial Conference on labour relations was held in Ottawa during three days beginning Monday, November 8. The conference arose out of the reports filed by members of the National War Labour Board, following the recent general enquiry into labour relations in Canada. The reports have been receiving constant study by the Department of Labour and recommendations based on the reports, studied in the light of practices in other countries, have been placed before the Cabinet. As a good part of the field of labour relations and their effect upon wartime industry, would normally be within provincial jurisdiction, the provinces were invited to send representatives to a conference in order that the benefit of their advice, and possibly their co-operation in regard to administration, might be secured.

Hon. Humphrey Mitchell, Minister of Labour, presided as chairman, while Arthur MacNamara, Deputy Minister of Labour, assisted as vice-chairman. Paul Martin, M.P., Parliamentary Assistant to the Minister of Labour was chairman of the Conference Arrangements Committee.

The Minister of Labour outlined to the representatives the proposals being advanced at this time by the Dominion Government in the matter of wartime collective bargaining legislation. These were considered in detail by the conference, and suggestions, particularly in reference to items of administration which would normally be within provincial jurisdiction, were invited.

A spokesman for the Government outlined new federal proposals for maintenance of the wartime wage stabilization policy and price controls.

The Hon. Humphrey Mitchell, as chairman of the conference, issued a press statement when the meeting concluded at 5.15 on Wednesday afternoon.

He first explained that the conference was called by the Department of Labour for the purpose of obtaining the views of the provincial Ministers and officials of Departments of Labour on the questions of:—

1. Compulsory collective bargaining in respect to any term or condition of employment customarily included in collective agreements subject to the provisions of the Wages Control Order.
2. Compulsory arbitration of disputes arising out of negotiated agreements.
3. Definition and prohibition of unfair labour practices.
4. Adequate machinery for enforcement.

The Minister then said that after three days of very interesting discussion during which all aspects were canvassed he was very happy to state that on these four basic principles unanimity had been reached although two views developed as to what would be considered as war industry, if the order is to be restricted to war industry.

The Minister stated that the Department would now have the advantage of the views expressed and he would be assisted very considerably in framing his recommendation to the government.

Following is a list of the provincial delegates who attended the conference on labour relations:—

British Columbia—Honourable Geo. S. Pearson, Minister of Labour, Mr. Adam Bell, Deputy Minister of Labour, Mr. James Thomson, Conciliation Officer; Alberta—Mr. W. D. King, Deputy Minister of Trade and Industry, Mr. C. Adams, Chairman of the Alberta Board of Industrial Relations; Saskatchewan—Honourable R. J. M. Parker, Minister of Labour, Honourable J. W. Estey, Attorney-General, Mr. C. A. Scott, Commissioner, Bureau of Labour and Public Welfare; Manitoba—Honourable Errick Willis, Minister of Public Works and Labour, Mr. J. A. Leslie, Chief Conciliation Officer, Mr. W. J. Waines, Economic Adviser; Ontario — Honourable Charles Daley, Minister of Labour, Honourable L. E. Blackwell, Attorney-General, Mr. James Marsh, Deputy Minister of Labour, Mr. Louis Fine, Chief Conciliation Officer, Mr. J. B. Metzler, Chief Executive Officer, Regional War Labour Board; Quebec—Honourable E. Rochette, Minister of Labour, Mr. J. O'Connell-Maher, Associate Deputy Minister of Labour, Mr. Louis Phillippe Pigeon, Law Clerk, Legislative Assembly of Quebec; Nova Scotia — Honourable L. D. Currie, Minister of Labour; New Brunswick—Honourable J. B. McNair, Premier, Honourable J. A. Doucet, Minister of Labour, Mr. N. D. Cochrane, Director of Labour, Mr. Charles J. A. Hughes, Vice-Chairman, Regional War Labour Board; Prince Edward Island—Honourable Horace Wright, President of the Council.

Cost of living index declines fractionally

The Dominion Bureau of Statistics cost-of-living index declined fractionally from 119.4 on September 1 to 119.3 on October 1, 1943.

This index which has been specified as the basis for calculating cost-of-living bonus adjustments under Order in Council P.C. 5963 has increased 18.4 per cent between August, 1939, and October, 1943. It is now 1.4 points above the July, 1942, index upon which the last cost-of-living bonus adjustment was based.

Food prices which have contributed the greater part of the advance in recent months were also responsible for the October decline. The food index dropped from 133.5 in September to 132.9 in October. Sharply lower prices for potatoes and lesser decreases for lamb,

beef, carrots and turnips were of greater importance than increases for eggs and butter. There was also a slight reduction in the fuel and light index from 113.4 to 113.3. Two group indexes advanced, rents from 111.5 to 111.9, and clothing from 120.6 to 121.1. Remaining group indexes were unchanged, homefurnishings and services at 118.2, and miscellaneous items at 108.3.

National War Labour Board orders increase in cost of living bonus

Following the increase (as of October 1, 1943) of 1.4 points in the adjusted cost-of-living index announced by the Dominion Bureau of Statistics (*see above*, and also p. 1572) the National

War Labour Board issued a General Order on November 3 that cost-of-living bonuses be increased accordingly commencing with the first payroll period beginning on or after November 15, 1943.

In the case of adult male employees, and of other employees receiving weekly wage rates of \$25 or more per week, the amount of the weekly increase will be 35 cents; for male employees less than 21 years of age and female employees, whose weekly wage rates are less than \$25 per week, the increase will be 1.4 per cent of their weekly wage rates.

This increase is compulsory for all employers who are subject to the Wartime Wages Control Order, P.C. 5963, and the 35 cent or 1.4 per cent upward adjustment must be added to all cost-of-living bonuses presently being paid to employees who are not above the rank of "foreman".

The maximum weekly bonus will now be \$4.60, or 18.4 per cent of the weekly wage rates, as the case may be.

The Board's General Order does not affect the provisions of its special direction made last June for manual workers in the construction industry following representations from the National Joint Conference Board of that industry.

The text of the Order is as follows:—

NATIONAL WAR LABOUR BOARD GENERAL ORDER

The Dominion Bureau of Statistics has found that the cost-of-living index number for October 1, 1943, of 119.3 (adjusted index 118.4) has risen by 1.4 points over the index for July 2, 1942, of 117.9 (adjusted index 117.0).

Accordingly, pursuant to the provisions of Section 34 (1) of the Wartime Wages Control Order, P.C. 5963, and subject to the provisions

of the Order, the National War Labour Board orders that:—

1. Except as otherwise provided in Sections 2, 3 and 5 of this General Order, every employer shall, effective from the first payroll period beginning on or after November 15, 1943, increase:—

- (a) the amount of cost-of-living bonus payable to adult male employees and to other employees employed at weekly wage rates of \$25 or more by the amount of thirty-five (35c.) cents per week;
- (b) the amount of cost-of-living bonus payable to male employees under 21 years of age employed at weekly wage rates of less than \$25, and to female employees employed at weekly wage rates of less than \$25 by 1.4 per cent of their weekly wage rates.

2. No employer shall, by reason of this General Order, increase the amount or percentage of any cost-of-living bonus payable to employees where such amount is more than \$4.25 per week but less than \$4.60 per week, or if such percentage is more than 17 per cent but less than 18.4 per cent of weekly wage rates, to an amount in excess of \$4.60 per week or a percentage in excess of 18.4 per cent of weekly wage rates.

3. If payment of cost-of-living bonus was commenced, not pursuant to Order in Council P.C. 8253 and established prior to the effective date of that Order, and is in excess of the amount of \$4.60 per week or 18.4 per cent of weekly wage rates, such amount or percentage of cost-of-living bonus shall remain unchanged.

4. The adjustment or payment of a cost-of-living bonus calculated as ordered shall be to the nearest cent of any fractional figure.

5. Nothing in this General Order shall affect the operation of the Direction of the National War Labour Board dated June 14, 1943, applicable to employers in the construction industry.

C. P. McTAGUE,
Chairman,
National War Labour Board.

Leave to appeal to National War Labour Board The National War Labour Board announced at Ottawa on October 13 that its by-law with respect to appeals from decisions of Regional Boards had been amended.

Appeals to the National Board are brought only upon permission granted either by the Regional Board concerned or by the National Board. The request for leave to appeal, if addressed to the Regional Board, has to be made within thirty days of the announcement of the decision; as to applications addressed to the National Board, heretofore no time limit prevailed.

By the amendment, it is now provided that leave to appeal, when sought from the National Board, must be applied for within sixty days of the announcement of the Regional Board's decision. The new provision reads as follows:

Amended By-Law 11 (4), (5)

(4) Any person interested in or affected by any decision or order of a Regional Board may appeal to the National Board, if

- (i) The Regional Board making such decision or order grants leave so to appeal and the request for such leave to appeal has been made within thirty days of the announcement of the decision or order of such Regional Board; or
- (ii) The National Board grants leave so to appeal and the request for such leave to appeal has been made within sixty days of such announcement.

(5) On any such appeal, the decision or order of the National Board shall constitute the decision or order of the Regional Board as if originally made by it.

B.C. teachers to affiliate with Trades and Labour Congress of Canada

A recent decision to affiliate with the Trades and Labour Congress of Canada will make the British Columbia Teachers' Federation the first teachers' association in Canada to join the ranks of organized labour.

The decision was taken at the fall meeting of the B.C. Teachers' Federation, held in Vancouver early in October, and was unanimous.

It was pointed out that, although such action is new to Canadian teachers, unions of teachers in the United States have for many years been affiliated with labour organizations, notably the American Teachers' Federation with the American Federation of Labour.

Credit union national committee

During the second week in September a meeting of representatives from every province in the Dominion was held in Levis, Quebec, to discuss the advisability of forming a national body of credit unions. The meeting was held in the same room in which the first general meeting of the first credit union in North America was held in 1900.

According to an article in *The Co-operative Consumer* for October 1, a Credit Union National Committee, representative of each of the provinces, was formed. The duties assigned to this committee were: "(1) to study and, if necessary, to take action on problems of legislation or taxation of national interest to credit unions; (2) to study and make recommendations regarding the procedure for establishing a National Association of Credit Unions and a suitable constitution."

The findings of the committee will be submitted to the several provincial credit union federations or leagues for their approval before being placed before the National Conference next year.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

A slight increase in employment at the beginning of September as compared with the previous month was recorded by the Dominion Bureau of Statistics index. This advance which was a continua-

tion of the movement in progress since May was considerably smaller than that recorded at any September 1 in recent years. It was stated that "the slackening in the rate of expansion at the date under review continues the levelling-off which has recently been indicated in the current figures of employment; this is partly due to shortages of labour, but in some cases results from changes in the

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended October 28, 1943.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public. (7) Figures for four weeks ended October 30, 1943, and corresponding previous periods. (8) MacLean's Building Review.

type of production required in certain war industries". The slight increase in the index, 0.1 per cent, was due mainly to the increased employment in manufacturing. The general index at September 1 was 3.8 per cent higher than at September 1, 1942.

Aggregate weekly pay rolls increased 0.8 per cent above the previous month while per capita weekly earnings rose from \$31.06 at August 1 to \$31.28 at September 1. This was the highest in the record, exceeding by 14 cents the previous high point at the beginning of April. At September 1, 1942, the average was \$29.29 and at September 1, 1941, was \$26.04.

The index of the physical volume of business, also calculated by the Dominion Bureau of Statistics, indicating the trend in mineral production, manufacturing, construction, electric power output and in the distribution of goods declined from 241 in August to 236.7 in September. Increased activity was indicated in the manufacturing group but the other four principal groups recorded decline.

Factors indicating the trend of industrial conditions for the first nine months of 1943 showed substantial increases as compared with the similar period in 1942. The increase of more than 17 per cent in the business index reflects marked expansion in war production. It was stated by the Bureau that while a tendency toward tapering off has been displayed in recent months, the level of productive activity has been greater during the present year than at any time in our industrial history. The index of mineral production averaged 26 per cent higher for the first nine months of 1943 than for the corresponding period of 1942; manufacturing production was 23 per cent higher; the consumption of electric power 10 per cent higher; while the value of construction contracts awarded declined 29.7 per cent in the same comparison. In the distribution of goods the tonnage of freight carried by the railways was 10.3 per cent higher in the first three-quarters of the year than in the like period in 1942; wholesale sales were 7 per cent higher; retail sales 4 per cent; exports 26 per cent higher and imports 3 per cent higher. Among the declines recorded in this nine months comparison was that of 21.5 per cent in the receipts of gold at the mint; 5.8 per cent in coal production; 23.9 per cent in production of factory cheese; 9.2 per cent in the consumption of raw cotton; 8 per cent in newsprint; and 9.1 per cent in pig iron production.

Industrial Disputes Investigation Act

Eleven applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of October. Five boards submitted their reports; five boards were established, and the constitution of two boards was completed during the month. Seven disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in six cases. The settlement of one dispute was reported, agreement having been reached between the parties. One application was rejected, while strike votes were conducted in two cases.

L. E. Westman appointed Associate Director Selective Service (War Industries)

Arthur MacNamara, Director of National Selective Service, announced recently that effective immediately Mr. L. E. Westman, formerly Assistant to the Director of National Selective Service and Chief Alternative Service Officer, would assume the duties of Associate Director of National Selective Service (War Industries).

Mr. L. E. Westman entered the Department of Labour with the formation of the Wartime Bureau of Technical Personnel in the early days of the war, and was one of those closely connected with the organization of engineers, chemists and science workers in pre-war activities of the Department of National Defence, which led to the establishment of the Bureau.

He is President of Westman Publications Limited, a Past President of the Canadian Chemical Association, and has been intimately associated with the development of process, chemical and metallurgical industries throughout the country. He is a professional member of the Canadian Institute of Chemistry, the Canadian Institute of Mining and Metallurgy and the Engineering Institute of Canada.

Vancouver union operates mobile library

A new departure in trade union educational methods was introduced at a recent general meeting of the Boilermakers' and Iron Shipbuilders' Union of Canada when a mobile library was opened for the benefit of the members, according to the *Vancouver Province*.

John Wigdor, chairman of the arts education committee of the union, and Claude Donald, chairman of the library sub-committee, arrived at the meeting with sections of the new union library. Members were then given an opportunity to choose works on economics, history and fiction.

Attendance bonus rejected as cure for absenteeism

The idea that an increase in wages may constitute a solution to the problem of absenteeism in industrial plants was unanimously rejected by the United States National War Labour Board in a recent decision.

The Board denied the request of a North Carolina cotton mill to institute a bonus plan whereby workers would receive extra compensation for perfect work attendance.

"The National War Labour Board believes that the causes of absenteeism are so complex and varied as to require many specific preventive actions. It is specious reasoning to say that 'more wages' is all that is necessary to solve this complex problem. It would be even more specious to approve general wage increases thinly disguised as attendance bonuses for that would affect the entire wage stabilization 'program,'" declared Dr. George W. Taylor, vice-chairman of the Board in his opinion dealing with the case.

He described the causes of absenteeism as falling into two general categories: unavoidable factors such as sickness, inclement weather, accidents, personal needs, or transportation breakdowns; and the avoidable factors which originate in the plant or outside the plant and are subject to "controls."

The causes for absenteeism which originate in the plant can be very largely minimized by management, while outside factors can be controlled through community co-operation, Dr. Taylor said.

"If the approach to absenteeism is simply the payment of an attendance bonus," continued the opinion, "without going to fundamental causes of absenteeism, the result is sure to be somewhat higher wages without any real solution of the problem of absenteeism. Such a result is incompatible with the wage stabilization program."

Adjustment of wage rates up to 40 cents an hour in United States

Wage increases up to 40 cents an hour may be granted by employers in the United States without necessity of obtaining the approval of the National War Labour Board, according to a recent amendment to the Board's General Order No. 30. Prior to the amendment such increases were allowed without the approval of the Board; provided that they did not furnish a basis either to increase price ceilings of the commodity or service involved, or to resist otherwise justified reductions in such price ceilings.

Essential civilian industries and labour shortages in United States

Maintenance of essential civilian industries, such as laundries, restaurants, hotels, grocery and other stores, street railways, and bus lines, and telephone exchanges is being increasingly hampered by manpower shortages, according to an article in the September *Labour Information Bulletin* published by the United States Department of Labour.

"A stable, properly functioning civilian life is necessary to more than just the morale of the individual 'home-front fighter,'" the article points out. "A break-down in Detroit's laundry service means turn-over in the tank factories. Lack of restaurants in Pittsburg means illness among steel workers. Poor department-store service in Los Angeles means absenteeism in aircraft plants. As civilian services deteriorate, war production lags."

The service industries, the article declares, have in the past "with one or two notable exceptions" employed inexperienced labour, paid low wages, offered the most unsatisfactory working conditions, and promised the least job security. As employers of women primarily, the service industries have had access to "the only remaining major reservoir of untrained, unorganized, and unskilled workers. . . In depressions they have abundant labour resources and subsistence-level demand; in boom times they have an inadequate labour supply and huge demands upon their services."

Laundries are in the most immediate need of help, the article states, adding that during the past year 600 laundries in the United States have closed. In regard to wages paid, the laundries and restaurants in particular have pointed out that their price levels control wages, and because they are industries that compete with the housewife, who places no value on her own time, such service charges must be kept down. "Though this competition with the housewife is diminished in time of war, when millions of homemakers become industrial workers, arbitrary price levels set to stem inflation raise the same barrier."

To ease the situation, the U.S. War Manpower Commission has launched a recruiting campaign for women workers in civilian service occupations, directed mainly at urban housewives below the age of 45 who are not responsible for the care of children under 16 years of age.

Laundries have been declared essential by the commission in many war-production centres, thus freeing workers to their jobs.

The American Institute of Laundering has made a study of laundry jobs on which physically handicapped and older persons can be used. The War Labour Board has granted wage increases to laundry workers in New York City, and the operators have asked the Office of Price Administration for a rise in price ceilings.

The service trades in general have been helped by the War Labour Board's announcement of wage floors in various regions which enable proprietors in low-paying industries to raise wages to a certain level without recourse to the Board (see above).

"With the aid of carefully planned recruiting programs, industry-wide studies of jobs and woman-power potentialities, and Government control of wages and prices, the civilian industries can be maintained," the article asserts. "The alternative, in the view of all concerned, is decreased production of war material and increased problems in other sectors of the labour front."

Union upholds its president in suspending strikers

Their president's right to suspend members who violate the union's no-strike pledge was upheld by delegates to the eighth convention of the United Rubber

Workers of America. The convention rejected the appeal of four workers in a Detroit plant who had stopped work in protest against the employment of Negro women and who had been suspended from membership by the president of the union. The suspended workers contended that the union constitution did not give the president power to suspend anyone without trial, but the convention delegates, voting three to one against the appeal, asserted that any other course would have made a mockery of the no-strike pledge.

The convention re-affirmed its no-strike pledge in a resolution which stated that "progressive and militant activities on the part of our members should not be discouraged, but legitimate objectives can be and must be attained by some means other than strikes, stoppages, slow downs or other interruptions."

Free life and health insurance for U.S. clothing workers

An insurance fund to provide free benefits for more than 125,000 workers in the men's and boys' clothing industry in the United States will shortly be established,

it was announced recently by Sidney Hillman, President of the Amalgamated Clothing Workers.

Employers will provide the entire contributions to the fund, amounting to 2 per cent of their weekly payrolls. The fund will be

administered by the newly-found Amalgamated Life and Health Insurance Company, operated by the union.

The plan covers all production workers, whether or not they belong to the union, and also all shipping clerks, clerks and bookkeepers who belong. Upon the death of a covered worker his beneficiaries will get \$500 from the fund. The health and accident provisions call for the payment of an indemnity of \$8 a week for women and \$12 for men for a period not exceeding fifteen weeks in any consecutive twelve months.

The plan was adopted on a national basis after a three-year experiment with it in Chicago. It is incorporated in an agreement between the union and the Clothing Manufacturers Association of the United States that was worked out late last year, and will apply in the seventeen states where clothing workers are unionized.

Regulations to prevent racial discrimination in employment

The United States War Manpower Commission recently issued a series of instructions to its field officers intended to reduce incomplete usage of the nation's manpower due to racial discrimination and to further the objectives of the Fair Employment Practice Committee.

Among the instructions were the following:—

1. Where an employer submits to the United States Employment Service a request for workers which is discriminatory in character, USES officials are to try to persuade him to drop the discriminatory features and, whether or not he does so, are to see that qualified workers are referred to him without regard to discriminatory specifications.

2. All discrimination that is not eliminated by informal action of USES officials will be reported to area, state and regional manpower directors. Regional directors will take steps to eliminate such discrimination and, if unsuccessful, will notify the Fair Employment Practice Committee.

Discrimination is defined as consisting of the following actions: (1) submission of hiring specifications which exclude from employment, limit employment of, or restrict employment to levels below their best skill or abilities of occupationally qualified aliens or workers of a certain race, colour, creed or national origin, and (2) limitation of upgrading opportunities for, exclusion from in-plant training programs of, or refusal to classify properly or to refer or hire available occupationally qualified aliens or workers of a certain race, colour, creed or national origin.

**U.S. Government
appoints
consulting
committee on
vocational
technical training**

A Consulting Committee on Vocational Technical Training has recently been appointed by the Federal Commissioner of Education in the United States. The Committee is to collect information in regard to the training of technicians such as laboratory assistants, production supervisors and other workers requiring non-professional technical training. With the recent developments in such fields as aviation, electronics and synthetics, the need for technically-trained workers has increased tremendously. A limited number of technical courses are at present offered by vocational schools, technical institutes, extension divisions of engineering colleges, junior colleges and other agencies, but it is felt that additional and more widely varied courses will have to be developed. The Committee includes representatives of the U.S. Office of Education, trade unions, employers and educational institutions.

**Grievance
machinery under
collective
agreements
in United States**

"Settling Plant Grievances, a Review of Grievance Procedure under Collective Bargaining" is the title of Bulletin No. 60 published recently by the Division of Labor Standards of the United States Department of Labor. "It summarizes the mechanics of grievance procedure tested and proved effective over a period of years and established in hundreds of collective bargaining contracts". Attention is drawn in the introduction to the stand taken by the National Labour Relations Board and the War Labour Board in refusing to deal with disputes until the parties to a collective agreement have exhausted the remedies provided by the agreement. The War Labour Board has urged labour and management to develop their own machinery for settling intra-plant disputes over the interpretation or application of an agreement. Both boards consider that the use of such machinery in good faith promotes "higher morale, greater plant efficiency and increased production."

Diagrams in the bulletin show typical grievance machinery in both large and small plants. The various stages from consultation between shop steward and foreman to negotiate between the chief union officials and the heads of the company are shown. In many cases, provision is made for arbitrating unsettled disputes. "Arbitration", it is stated "as the last step in the grievance procedure is a necessary adjunct to a no-strike provision", but "arbitration is not a substitute for col-

lective bargaining". It is also pointed out that no matter how perfect the grievance machinery, it cannot function properly without mutual confidence and good will. The importance of the human factor in making it work is stressed, and classes in collective bargaining are recommended for shop stewards and foremen. "The pamphlet is addressed to those concerned with the improvement of collective bargaining techniques, particularly to the representatives of management and labour who are working to develop democratic procedures in industries where collective bargaining is still new and many difficult problems are being faced for the first time."

**Union
membership
and collective
bargaining
by foremen**

Lack of uniformity characterizes trade union practice in the matter of union membership of foremen and their inclusion in collective bargaining agreements in both the United States and

Great Britain. It is pointed out in Bulletin No. 745 of the United States Bureau of Labour Statistics that the problem is not a new one. In the American printing trades, for example, union membership of foremen, under the closed shop agreements has been required for more than fifty years. On the other hand, in certain industries, such as the manufacture of steel, foremen and supervisors are excluded from unions which include production workers. In still other instances supervisory groups have separate union organizations.

The bulletin, which is based on a study of approximately 200 international labour unions, summarizes the current stages in the evolution of a common policy in the United States as follows:—

1. Exclusion of foremen and supervisors from membership in unions which include the production workers is the general rule in the mass production industries, such as the manufacture of steel, automobiles, electrical products, rubber and clothing. Some of the agreements, however, cover "working" foremen and supervisors such as section or unit leaders.
2. Separate organization by supervisory groups has long been the practice in the Maritime industry, in parts of the railroad industry and in the postal service.
3. Foreman membership in unions and the inclusion of foremen under agreements covering production workers are general in the printing and building trades, in

the metal trades in so far as they operate on a craft basis, in many of the railroad trades, and to a greater or less extent, among the teamsters, long-shoremen, and others.

The constitutional provisions of the international and national unions, with headquarters in the United States, which include references to foremen are described in the same bulletin. The unions are listed as follows:—

- (a) Nine unions which are composed solely of persons of foremen and supervisory rank.
- (b) Twenty-nine unions which permit, and in some cases require, membership of foremen in the same union as production workers.
- (c) Thirty-seven unions which exclude foremen and general supervisors, although working foremen and minor supervisors are admitted in some instances.
- (d) The constitutions of the remaining international and national unions (approximately 120) do not mention foremen. Presumably most of these exclude foremen from membership, although some of their locals may include foremen in the absence of a constitutional provision debarring them.

In Great Britain the organization of supervisory grades of workers in ordinary unions has increased in recent years. The Trades Union Congress recognizes non-manual workers as a separate group among its affiliates and gives them separate representation on the General Council.

Unions in other groups of the T.U.C. cater for supervisory grades, swelling the total numbers. For example, the mining group includes union colliery deputies (foremen underground), and superintendents and administrative workers are free to join the railway unions.

The Association of Supervisory Staffs and Engineering Technicians, formerly a small association of foremen, now covers supervisory grades, technicians, planning and production engineers and personnel managers in engineering, ship-building and transport. This Association maintains that these are workers and not owners and have the same right to unionize as the employees they supervise. It has won recognition from varied types of employers. It feels too, that a new drive is needed to unionize managers in mass industry, as well as artisan foremen and semi-professional technicians.

Employment of blind workers in Australia

Review, an official publication. Good progress has been recorded. The New South Wales office has been successful in placing 65 blind persons in employment. Although it appeared at one time that through a scarcity of materials 22 members of the Blind Institute would become unemployed, they were satisfactorily placed in munitions work. Others have been employed in the Commonwealth Air Corporation, Lithgow Small Arms factory and Aircraft Production works. Engaged on testing and assembly of components, they are found to be quick and deft workers.

In Melbourne during recent months 44 blind people have been found essential employment, and in Adelaide, as the result of special attention to the problem, 42 have recently been placed, with the result that only two unemployed persons were under the care of the Blind Institute.

Australian miners forfeit holiday

A proposal by Australian miners that they give up half of their annual 14-day Christmas vacation to increase coal production, already record-high, was endorsed by the Commonwealth Coal Conference, the Australian News and Information Bureau reports. (Australia because of its geographical position, has its summer weather during the Christmas season.)

Encouragement of co-operative movement recommended by International Conference

One of the resolutions of the United Nations Conference on Food and Agriculture held at Hot Springs, Virginia, from May 18 to June 3, urged Governments to take certain steps "to make it possible for people to help themselves" in lowering costs of production and distribution through co-operation. It was stated that the co-operative movement has been of great importance in many countries for both small independent farmers and low-income families in urban areas, and that the democratic control and educational programs which are features of the co-operative movement can play a vital part in the training of good democratic citizens. It was recommended, therefore, that (1) all countries should study the possibility of the further establishment of co-operative societies, (2) each nation should examine its laws, regulations and institutions with a view to removing

any obstacles there might be to co-operative development, and (3) full information as to the present development of co-operatives in different countries should be made available through the permanent organization which it was proposed to establish under another resolution.

The Conference met at the invitation of the United States Government "to consider the goal of freedom from want in relation to food and agriculture." It consisted of representatives of 44 countries, including Great Britain and the British Dominions, the United States and the U.S.S.R. (L.G., July, 1943, p. 908).

I.L.O. study on European population movements

The International Labour Office has recently published an exhaustive study on *The Displacement of Population in Europe* (Studies and Reports, Series

O (Migration) No. 8). It is estimated that at least 30,000,000 Europeans have been displaced as a result of the war. This includes only people who have been moved across pre-war international boundaries and takes no account of the millions who have left their homes, but not their native countries, because they have been conscripted for labour service or because they have been evacuated from bombed cities and coastal defence areas.

The acknowledged aim of the German Government, the study points out, is to redistribute the population of Europe so as to establish German influence and leadership over the largest possible area. Transfers of population assumed "enormous dimensions" as this policy was pursued. Non-German people have been displaced *en masse* and Germans have been moved into specified zones of settlement. To these transfers which took place in pursuance of a long-term policy has been added the transfer of millions of workers to meet the industrial needs of Germany. And while workers were moving from occupied countries to the Reich, German officials, technicians and key workers were moving in the other direction. With German expansion now checked, evacuation is at an end outside the ring formed by the German armies, but inside the ring movements may be expected to become more violent than ever.

The study is concerned primarily with analysing the situation rather than proposing remedies. It is pointed out, however, that the problems raised will be enormous and "will require the greatest possible amount of international organization and collaboration" if they are to be solved. After the war, most of the people transferred will want to return to their homes and in many cases their help will be needed to rebuild their countries.

International organization will be required, however, to overcome the difficulties which repatriation on so large a scale will meet. Moreover, labour requirements will not necessarily correspond to the pre-war distribution of the population, and some redistribution of labour between countries may be necessary. This, too, will require international action. In fact, it will "call for nothing less than the organization of an international employment service."

Finally, it is pointed out that the problem of resettlement cannot be wholly solved by European measures. Many Europeans will be induced after the war to emigrate overseas and the reconstruction of Europe "depends partly on whether these centrifugal forces can find an outlet." However, a mere return to the unregulated migration of the pre-1914 era will not be desirable and there will have to be "an international organization capable of co-ordinating the interests of the countries of emigration and immigration."

Income tax resolutions of Trades and Labour Congress

In a check-up of the proceedings of the Trades and Labour Congress convention, it was ascertained that two important resolutions were omitted from the review given in the last issue of the LABOUR GAZETTE.

A composite resolution on overtime called for the abolition of income tax "being paid on overtime work or a cost-of-living bonus".

Another resolution urged the Dominion Government to:

"First, return to the income tax system.

"Second, raise the amount exempt from income tax to a sum covering a decent standard of living, \$2,400 a year.

"Third, substantially lower the percentage on the first \$1,000 taxable income.

"Fourth, exempt entirely the cost-of-living bonus from income taxation."

The Institute of Life Insurance is quoted in the New York Herald-Tribune of October 28 as stating that war workers are using their increased earnings to buy more life insurance and to add substantial amounts of protection under company group insurance plans.

As evidence that workers have been buying larger individual policies this year, the institute cited the fact that purchases of policies in units of \$1,000 and over have increased while the buying of smaller unit policies has declined. Group insurance purchases have exceeded industrial insurance sales (the small weekly payment type) for the first time in history, and new contracts arranged by employers thus far this year are 20 per cent ahead of the number a year ago.

Reconstruction and Social Security

Report on Post-War Reconstruction Submitted to Government Prime Minister Receives Recommendations of Advisory Committee

A NEW stage in Canada's post-war planning was reached with the submission to the Government of the Report of the Advisory Committee on Reconstruction on September 24, and with the subsequent disbanding of the Committee. Under the chairmanship of Dr. F. Cyril James, this Committee, which is responsible to the Privy Council, has for over two years been studying problems of post-war reconstruction.¹ Its members, serving voluntarily on a part-time basis, were brought together as a compact advisory group representing the interests of labour, industry, agriculture, science and education in post-war problems (L.G., Feb., 1943, p. 168).

The Committee has now been discharged. A public statement issued recently by the Prime Minister, Right Honourable W. L. Mackenzie King, expressed appreciation of the Committee's work during its period of operation in the following terms:

"On behalf of the Government, I welcome this opportunity of expressing to Dr. James, and his colleagues on the Committee, Mr. P. R. Bengough, Mr. D. G. McKenzie, Mr. J. S. McLean, Mr. Arthur Surveyer and Dr. R. C. Wallace, as well as to Mr. Tom Moore and Dr. Montpetit, whose health did not permit them to remain with the Committee to the end of their labours, and to those who have assisted them, as members of subcommittees and in the preparation of special studies, the Government's appreciation of the time and thought they have given to the work of the Committee, and the Government's thanks for their contribution towards a solution of the many difficult problems of reconstruction and of the post-war period."

The Prime Minister also announced that one of the recommendations contained in the Committee's Report is to the effect that the time has now arrived when detailed responsibility for reconstruction planning should be undertaken by full-time members of the Govern-

ment staff, and that the functions of the Advisory Committee on Reconstruction should be merged with those of the Advisory Committee on Economic Policy. This recommendation, he declared, has been accepted by the Government.

Activities of Advisory Committee

During its period of operation the Committee has from time to time made interim recommendations to the Government; and its members have also appeared on various occasions before the committees of the House of Commons and the Senate which are considering reconstruction, re-establishment and social security.

The Committee's work has been broadly conceived. It is evident from statements which have been made to parliamentary committees on more than one occasion by the chairman and other representatives of the Committee that the present Report is drafted within the framework of some of the major post-war issues. One of these is international relief and rehabilitation in the occupied and war-devastated countries in which plans for joint action by the United Nations are now in process of implementation. A related and longer-range matter is that of international food and agricultural policy, which was the subject of comprehensive preliminary study at the International Conference in Hot Springs, Virginia, last April. The Report, however, deals particularly with the economic policies required for the security of full employment in the domestic field.

Of the various studies prepared for the Committee, the *Report on Social Security*² by Dr. Leonard C. Marsh, Research Adviser to the Committee, is the only one that has so far been published. This report, which deals with the requirements for a comprehensive plan of income-maintenance measures on a contributory social insurance basis (covering unemployment, sickness, disability, old age and retirement, widowhood and orphanhood, and extra

¹ It has not been concerned, except incidentally, with matters of demobilization and rehabilitation of the armed forces, these problems falling within the sphere of the Advisory Committee on Demobilization and Re-establishment.

² L.G., April, 1943, p. 429.

expenses due to births, deaths and the upkeep of families) was presented to the House of Commons Committee on Social Security last March. As stated in Dr. Marsh's report, however, "the first positive measure in providing social security is a program which will make work available;" and the Committee's recommendations on the subject of providing full employment are thus an essential complement to social security recommendations already presented.

Other studies which have either been made or are in the course of preparation round out the Committee's coverage of the broad field of reconstruction. Wartime controls have been examined in certain selected fields, to appraise their implications for post-war policy. Farm population trends in the past have been carefully analyzed, and a survey is being made of available agricultural settlement areas. Another study attempts to evaluate the experience of economic trends and fluctuations in Canada during the last war and post-war period. A comprehensive study has been made of the construction industry in Canada. Another deals with the industrial utilization of agricultural products. Some remaining studies which are not yet complete are being continued under the direction of Dr. Marsh.

Special Problems Studied by Subcommittees

In addition to the above-mentioned studies, work in six special fields was undertaken by subcommittees reporting to the Advisory Committee on Reconstruction. Together with the Report of the Advisory Committee, there were submitted to the Government the final reports of three of these subcommittees.

The first of the subcommittees, under the chairmanship of Mr. K. M. Cameron, was assigned to the field of post-war works projects. This group was directed to "study the extent to which a carefully formulated program of construction projects may contribute to the national welfare of Canada, as well as providing employment opportunities during the post-war period." It was also asked to report regarding the way in which such a program may be most effectively organized in advance of the termination of hostilities. Its report, in addition to making recommendations on basic principles for a program of construction projects, contains a draft for a master classification of projects, into which specific proposals could be fitted. It also includes a standard questionnaire for the evaluation of particular projects.

The second subcommittee, whose chairman was Dr. R. C. Wallace, dealt with conservation and the development of natural resources. It was asked to make recommendations on a

"policy and program appropriate to the most effective conservation and maximum future development of the natural resources of Canada, having regard to the importance of these resources as national assets, and emphasizing the part which the proposed policies may play in promoting employment opportunities at the end of the present war." The report of the subcommittee covers both long-term and short-term programs designed to supply employment and make the wisest use of natural resources. It deals with mining, forestry, water and power resources, fisheries, wild life, and tourist development.

The third subcommittee, under Mr. Percy Bengough, studied post-war employment opportunities. Its terms of reference were to "consider the most effective organization of employment opportunities in the post-war period, with special reference to: (a) the proper use of available labour; (b) legislation or practices affecting the length of the working period; and (c) other relevant implications of the subject of reference, and to recommend specific plans regarding legislation or practices in this field." This subcommittee has consolidated its recommendations on training and placement facilities required for the post-war period, and has also given special attention to the supply and training of building labour in view of its importance in relation to post-war programs. (Some of these recommendations have already been made public as appendices to the *Report on Social Security*, pp. 129-133). The group is not pursuing further its remaining terms of reference, as part of these, relating to social insurance, are already covered in the *Report on Social Security*, and others are being considered by the Vocational Training Advisory Council.

Three more subcommittees are still at work, and will continue until their reports, which are in process of preparation, are completed.

The subcommittee on agricultural policy was assigned, under the chairmanship of Hon. D. G. Mackenzie, to "study the problems of Canadian agriculture, with particular reference to: (a) the desirability of raising the standard of living of all Canadians to a desirable nutritional level; and (b) the probable developments in the international movement of Canadian agricultural products; and (c) to recommend a comprehensive program for the rehabilitation of Canadian agriculture at the end of war."

Housing and community planning is being considered by a fifth subcommittee, whose chairman is Dr. C. A. Curtis. The scope of its report will include consideration of financial assistance for home ownership, low rental housing, home improvement, and rural hous-

ing, as indicated by the terms of reference, which are: "to review the existing legislation and administrative organization relating to housing and community planning, both urban and rural, throughout Canada, and to report regarding such changes in legislation or modifications of organization and procedure as may be necessary to ensure the most effective implementation of what the subcommittee considers to be an adequate housing program for Canada during the years immediately following the war."

Finally, the special post-war problems of women are being studied by a subcommittee which is dealing with problems relating to the re-establishment of women after the war, procedure to deal with these problems, and other matters relating to the welfare of women in the period of reconstruction. The chairman of this group is Mrs. R. F. McWilliams.

These three subcommittees have all submitted interim statements on the various topics assigned to them, and are now engaged on the completion of their final reports.

Australian Government Considers Health Program

Parliamentary Committee Proposes Comprehensive Scheme of Preventive and Curative Health Measures

THE sixth report of the Australian Parliamentary Joint Committee on Social Security, dated July 1, 1943, examines proposals for a comprehensive health scheme designed to ensure maximum physical and mental health for all Australians. Earlier reports of the Committee dealt with social security legislation, unemployment, housing and reconstruction planning (L.G., 1942, p. 1175; Feb., 1943, p. 169). Unlike the Canadian health insurance plan drafted on behalf of the Advisory Committee on Health Insurance (L.G., April, 1943, p. 433), the scheme put forward by the Australian Committee is non-contributory.

The Committee considered that a comprehensive scheme could not be introduced during the war, but it recommended that immediate action should be taken to provide economic assistance to expectant and nursing mothers, tuberculosis patients and their dependents and other persons suffering from temporary incapacity. Grants should also be provided for child welfare activities and a campaign against venereal disease.

A comprehensive health plan, should, in the Committee's opinion, embrace both the treatment of disease and the pursuit of positive health through preventive work. It should also include specialized maternity care, rehabilitation of convalescent and handicapped persons, educational activities including research, health education and improved training for doctors, nurses and technicians, and economic assistance to persons incapacitated by illness. The Committee recommended the division of the Commonwealth into "Health Districts" for administrative purposes and urged a definition of the public health responsibilities of federal, state and local governments. It declared that "no policy of preventive or curative solicitude for public health

can succeed in a community which does not give economic security to all its people."

A graduated tax on incomes seemed to the committee the best means of financing any general health scheme. No decision was reached on the question of whether the scheme should be administered by the Commonwealth or by the States assisted by federal grants-in-aid. The Committee recognized that the Commonwealth's jurisdiction in the field of health was limited but considered that this power could be widened by agreement with the States or a vote of the people. It concluded that "no matter how the scheme becomes law, it can be given life and force only by the complete and sincere agreement of all the Governments and Parliaments of Australia."

Combination of Private Practice and Salaried Medical Service

After examining the alternative systems for providing medical services to rich and poor alike, the Committee declared itself in favour of a combination of private practice and a salaried medical service. It believed that the ultimate solution of the problem would be a full-time salaried medical service with standardized uniform hospital facilities, but in view of the strong opposition to such an innovation manifested by the medical profession, it considered that it would be wise to approach this goal by stages. It suggested instead, therefore, that a full-time salaried medical service should be established in remote areas where physicians were scarce. In other areas, strategically-located out-patient and consulting clinics should be set up to be staffed by private practitioners who would give a certain number of half-days each week for

a fixed salary. They would be free to carry on private practice at other times, and attendance at the clinic would be purely voluntary.

The Committee had found serious deficiencies in existing hospital facilities in Australia. It recommended, therefore, that a fund should be established to make good existing defects and that a body should be set up to draft uniform standards for hospitals and to advise on hospital planning, construction and equipment. It suggested a regionalization and specialization of hospitals to reduce the number of inefficient ones and concentrate equipment and staff. Sick transport must be improved to bring hospital care within the reach of all. Training courses for nurses should be standardized and conditions of employment made uniform. Steps should be taken to attract suitable girls into the profession and to close the gap between school-leaving and entrance to hospital training by establishing nursing colleges or other preliminary training. Nursing assistants should be employed to relieve nurses of routine domestic work.

Special attention was given by the Committee to such problems as the prevention and control of tuberculosis and venereal disease. A survey of mental disease and deficiency was urged and the enactment of uniform legislation in this field was suggested. Greater uniformity of food, drug and poison laws and of systems of registering medical practitioners was also recommended.

Health plans proposed by the British Medical Association in Australia and the National Health and Medical Research Council are given in appendices to the report. Another appendix contains special recommendations for the control of tuberculosis put forward by Dr. M. J. Holmes of the Federal Department of Health. In a final appendix, the report of the Medical Survey sub-committee of the Committee is summarized. It contains detailed information on existing medical services in Australia and a number of important recommendations, many of which were adopted by the Social Security Committee.

Post-War Planning by Business in United States

AN organization has been formed in the United States designed to assist and to encourage private enterprise in its post-war planning. This organization, known as the Committee for Economic Development, is described in one of its publications, *Plan Post-War Jobs—Now*, as a private, non-profit corporation financed by contributions from individual businesses, and operating independent of any private or governmental agency. The United States Department of Commerce has provided it with offices in the Commerce Building in Washington, D.C., and has placed at its disposal various facilities and statistical data, without, however, having any formal or official connection with it.

The Committee is organized under a Board of Trustees, made up of a number of prominent business men, its Chairman being Mr. Paul G. Hoffman, President of the Studebaker Corporation. The Board of Trustees has responsibility for the basic policy of the Committee.

Working under the Board of Trustees is a Research Division, which concerns itself with "the practical problems of reconversion to civilian production" and with "the defining of the conditions necessary to encourage progressive growth of business enterprise in the post-war period." Field research is carried on by a staff of business analysts and university economists.

There is also a Field Development Division, whose function it is to make contact with individual firms. This division has twelve

regional committees across the country. The committees appoint and work with district chairmen, who in turn appoint and work with community chairmen within their areas. In this manner an extensive coverage of communities and their business interests is planned for.

The pamphlet *Plan for Post-War Jobs—Now* quotes a Department of Commerce estimate of the amount of goods and services that could be produced in 1946 (arbitrarily selected as a post-war year) if the manpower that will be available after the war is effectively used, with "unemployment held to a practical minimum and with 1940 hours of work." This estimate names a figure of \$142 billions of goods and services at 1940 prices, an increase of 46 per cent over 1940 output. The estimate is broken down as to individual products.

Accordingly the Committee proposes that individual firms plan a "target" for their own post-war production, in line with the Department of Commerce estimate for the product they are concerned with. If such planning is extensively carried out, business as a whole may attain the target of maximum productivity and hence maximum employment, it is suggested.

The pamphlet describes the scope of the Committee, makes a number of recommendations for specific action by firms in a wide field related to post-war planning, and also contains various statistical and illustrative data.

Manpower

Planning for Part-time Workers in Canada

Principles for Effective Absorption of Women into Essential Jobs on Part-time Basis

PART-TIME workers have been employed for many years in department stores and restaurants but their introduction into industry and service organizations is comparatively recent. It is not unfair to say that the attitude of most employers has been markedly against the idea, and acceptance of these short-shift workers has often only come about as a result of a tight labour situation, that is, where demands far exceed the supply of applicants. However, where careful preparations have been made in advance, these part-time workers have proved very successful (L.G., Aug., 1943, p. 1077; Oct., p. 1336) and a noticeable increase in the number of opportunities follows quickly.

Monotonous or heavy jobs have been successfully undertaken by part-timers who in this way have the energy to expend in half a day that they would not have for a whole day's work. Also, women who have married and retired from business are more inclined to be interested in an arrangement with their former employer if they can work for part of the day and yet still have time enough left for shopping and other household duties.

Part-time workers have been employed to advantage on light, clean, manual work; repetitive operations; or where initial training is relatively short and simple; or where output is not closely geared to the flow of production. The British Ministry of Labour and National Service mentions the following fields:—

Clerical.—In a large number and variety of offices, banks, warehouses, wholesale and retail establishments, works and factories, in government departments; on shorthand-typing, copy typing, stencilling, auditing, bookkeeping, machine operation of all kinds, checking and despatching, record keeping, sorting, recording, cashier work and telephone operating.

Trade.—In retail trade of all kinds, also in warehouses, stores and distribution centres, packing, storekeeping, weighing, checking, portering and general labour.

Essential Domestic.—In hospitals and similar institutions, hostels, hotels and boarding houses, canteens and restaurants, schools, holiday

camp and private houses; on such work as ward-maids, cooks, kitchen hands, washers up, waitresses, general help and cleaners.

Transport.—On driving many types of motor vehicles in public and private transport; on maintenance and repair of vehicles in garages and in repair shops; as railway porters; and as conductresses of omnibuses and trams.

Clothing Industry.—In the manufacture of all kinds of clothing and underclothing, anti-gas clothing, hats and gloves; as power machinists, hand machinists, pressers, finishers, felling hands, on various hand sewing operations, inspecting, packing, checking, and on embroidery for service badges.

Electrical and Radio.—On all kinds of repetitive machine operations; operating presses (hand and power); simple fitting and assembly, including riveting, soldering and welding; viewing and simple inspection, armature winding and other light electrical assembly; light labouring, crane driving; internal transport; packing; storekeeping; time recording; tracing; taking off blue prints; and maintenance of drawing office records.

Airframe Manufacturing.—On operating presses (hand and power); stamping and engraving part numbers; pre-drilling skins and any pre-drilling to jigs or templates; small sub-assembly; riveting; burring and fraying from machine and press shops; detail wiring; detail inspecting using simple gauges; assisting draw mill operators; holding up for riveters and assemblers; simple milling or drilling in machine shops.

Other Industries.—In certain sections of iron and steel production, e.g., in foundries; in the manufacture of chemicals; in cordite charging, fuze and cartridge charging, fuze and cartridge filling and stacking of explosives; in manufacture of cables and wire, rubber goods, optical instruments, balloons and parachutes, and of various munitions accessories such as ammunition boxes and containers of all kinds, equipment for engineering and signalling, telephone apparatus, chains and respirators; in the food industry, including canning of all kinds, milk

processing, the manufacture of egg products, bread, jams and preserves, biscuits, potato crisps, margarine, chocolates and sweets; in breweries and mineral water factories; in the textile trades; in laundries; in tobacco industry; in the manufacture of cardboard boxes, tubes and paper bags, baskets, leather goods and equipment, glass and glass goods, fertilizers, surgical dressings and first aid outfits, buttons, tin boxes, camouflage nets, asbestos, bedding and mattresses, brushed, ropes and twine, sacks, pottery, linoleum, bank-notes, cement and bricks; in metal engraving, bookbinding, printing, tanning, sawmilling and a variety of other industries.

Definition of Part-time Employment

National Selective Service exempts part-time subsidiary employment from all employment regulations and defines it as work in addition to a regular full-time occupation and carried on outside normal hours, that is, before 8 a.m. or after 6 p.m. Housewives may accept part-time subsidiary employment during or outside these normal work hours, if the number of hours worked does not exceed 24 in any one week. Other combinations of part-time work are not likely to be recognized as exempt and hence should be considered as fully covered by the regulations of P.C. 246, unless advised to the contrary by the National Selective Service Officer in the district.

Introduction into an Organization

Employment of part-time workers on any considerable scale means changes in the organization, which in turn often involves a good deal of extra trouble both for the employer and present employees but once the system is established, the extra work is negligible. True, adjustments in time-keeping and payroll work are necessary but it is impossible that the employment of one part-time clerk may be more than enough to take care of these details. The increased cost is proportionately less if workers are employed on any considerable scale.

Detailed consideration is advised before the scheme is begun as so much is dependent on the proper introduction of these new workers. It is extremely important that members of the present staff understand clearly the necessity of employment of part-time workers and realize the benefits so gained by the organization. For sometimes the work may require re-allocating and so affect these employees of long standing; in such circumstances it is only reasonable that they fully understand the situation. This is even more important

when experienced workers are required to transfer from work on which they have gained skill to newer and therefore more difficult occupations. These older employees and the married women are most likely to resent the "favoured" newcomers. If conditions are explained well and preventative measures taken wherever possible, there is every chance that the plan will be acceptable to all.

Women seeking part-time work to-day are usually housewives, whose children are likely to be of school age or older.

While work in war plants carries its own special appeal, it is equally necessary to recruit in other occupations not so obviously connected with the war effort yet no less essential. In undertaking a part-time job, it might be pointed out that these women assume certain definite responsibilities in industry which in turn free younger or stronger women for a full-time war job. In this way the housewives are contributing to the war effort as are women filling shells or making aeroplane parts. For instance, there is no more vital national service than part-time domestic employment in hospitals.

Status of the Worker

If a woman is encouraged to feel welcome and a necessary part of an organization, she is more likely to assume the responsible attitude of a regular employee; otherwise she may treat her work and her employer in the offhand inconsiderate manner of a casual or temporary worker. Giving her some title, such as "Auxiliary" as in England or "Victory Shift" as in the United States, gives her status both in her own opinion and in that of the rest of the staff.

One instance of remarkably good assimilation of this group is seen in the experience of a large British department store chain. The management went far out of its way to grant full recognition to part-time workers. They receive their lunches free as do the rest of the staff, are allowed holidays and annual leave with pay, may obtain free medical service and any other privileges that are available to members of the regular staff. In other words, every effort is made by word and deed to prove to these employees that they are considered as much a part of the organization as the full-timers, the only difference being in the total number of hours worked per week.

There is much to be said for the practice of extending privileges of regular staff to these part-time workers for in this way they become accustomed to the idea of assuming their share of responsibility.

Supervision

Recognizing that the young girl is probably the most adaptable worker in industry to-day, it is obvious that an older woman, especially a housewife, presents certain differences in instruction and supervision. For instance, if older women are working with or for workers younger than themselves, it is to be expected that they will show a reluctance to ask for assistance on the job or even to admit that they do not understand a certain phase of the work. It is important to accept this independent attitude in these women for it means that they must be as carefully instructed as any young inexperienced worker and possibly more closely supervised during this period of training. Once knowing the job thoroughly, however, this type will take pride in being on her own, likes responsibility and requires less personal supervision than younger workers.

While poor supervision has an adverse effect on almost every worker, results seem to show up quickly with older workers. They are serious of purpose and more apt to be critical of careless or remediable mistakes. Although nagging or bullying will be keenly resented by the older women, their remedy is more likely to be to resign on some superficial reason rather than to stand their ground and fight it out. As a rule, these older women know

Fatigue of a New Job

The healthiest and strongest of workers can suffer unaccountably from "new job fatigue" and it is likely to take the housewife unaware. By warning her of the excessive fatigue of the first few weeks, she will be encouraged to stay on the job through the difficulties of adjustment.

Schedule of Hours

Generally part-timers cannot be employed as well on a three-shift system as on one shift of 6 hours or less or on two short-shifts; the most popular arrangement, however, is probably the 3- or 4-hour work day.

There is much to be said in favour of a carefully worked out schedule of hours so that an applicant may be shown a time-table of several different shifts. In this way she can study the various "tricks" to see which would best suit her. While the schedules themselves should not be flexible, there should be sufficient variations as between departments to permit a fairly wide choice. If the schedules are not fixed, each person would be encouraged to seek individual solutions to personal problems with disastrous results in administration.

Some examples of different types of schedules are shown below:—

1. One or Two Part-Day Shift

(a) 3-Hour Period:

From:	9.00 a.m.	9.30 a.m.	10.00 a.m.	2.00 p.m.	3.00 p.m.	4.00 p.m.	5.00 p.m.	6.00 p.m.
to:	12.00 p.m.	12.30 p.m.	1.00 p.m.	5.00 p.m.	6.00 p.m.	7.00 p.m.	8.00 p.m.	9.00 p.m.

(b) 4-Hour Period:

From:	8.30 a.m.	9.00 a.m.	9.30 a.m.	1.00 p.m.	1.30 p.m.	2.00 p.m.	2.30 p.m.
to:	12.30 p.m.	1.00 p.m.	1.30 p.m.	5.00 p.m.	5.30 p.m.	6.00 p.m.	6.30 p.m.

2. Single Shift

(a) 5-Hour Period:

From:	8.30 a.m.	9.00 a.m.	9.30 a.m.	10.00 a.m.	10.30 a.m.	11.00 a.m.	11.30 a.m.
to:	1.30 p.m.	2.00 p.m.	2.30 p.m.	3.00 p.m.	3.30 p.m.	4.00 p.m.	4.30 p.m.

(b) 6-Hour Period:

From:	8.30 a.m.	9.00 a.m.	9.30 a.m.	10.00 a.m.	10.30 a.m.	11.00 a.m.	12.00 noon
to:	2.30 p.m.	3.00 p.m.	3.30 p.m.	4.00 p.m.	4.30 p.m.	5.00 p.m.	6.00 p.m.

3. Full Time for 1, 2, 3, 4 Days a Week.

4. Combinations of the Above.

exactly why they are working and what for and their purpose is usually an unselfish and self-sacrificing one. This attitude, together with better judgment and sound commonsense can often be used to good effect in providing leadership to younger and more impressionable workers.

It might be pointed out that with this type of employee her domestic obligations weigh heavily with her and affect her attendance and work, so that careful and sympathetic consideration in helping her deal with problems of this nature should prove profitable.

It is worthwhile noting that the adjustment of a work period by even one hour, especially at the start of the day may be all that stands between success and failure of the plan. While work habits vary greatly as between localities, as a rule, housewives do not like to begin work before 8.30 a.m.

Punctuality and Good Attendance

Emphasis on the need for punctuality and attendance is more likely to be needed by housewives than younger workers. They should be urged to accept and adhere closely to the

rules of the organization in this respect for in managing their own homes for years they have become thoroughly individualistic as a rule. If the discipline of fixed schedules and strict punctuality has ever been known, it has likely been forgotten.

Remembering that it is quite natural for this type to put home responsibilities ahead of everything else, it should not be surprising if these married women request time off or extra privileges on seemingly trivial matters. For instance, a married woman will be more inclined to ask for time off when a friend or relative is visiting her home than not. It may be necessary to tactfully remind them that the responsibilities of their job require personal sacrifices and that regulations must be observed wherever possible. By constantly stressing the regular rather than the casual nature of their duties, these women will be continuously reminded of their obligations.

Transportation

Because of the brevity of the work-day and the comparatively small earnings of the part-

time worker, it is desirable to place them in employment as near to their homes as possible.

Wages

Rates of pay should be at least on the same basis as for full-time employees and it is also customary to use the same pay period, as for example, weekly. If piece rates and production bonuses are in effect, there is no reason why they cannot be worked out for part-timers as for the rest of the staff.

Married women may earn up to \$660 per annum without being required to pay income tax.

Unemployment Insurance

While in Canada, part-time workers ordinarily have certain privileges exempting them from unemployment insurance contributions, if, however, part-time work is insurable employment equals or exceeds 4 hours on any one day, then the employee is considered insurable for the entire week's work.

United States Government Suggests Standards for Part-time Employment of Women

THE part-time employment of women not available for full-time work in areas of acute labour shortage is recommended by the Women's Bureau of the United States Department of Labor. In Special Bulletin No. 13 of its series on labour problems affecting women in war time, the Bureau gives the results of a survey of current practice in a number of war industries already using part-time workers, and recommends standards for this type of employment. It points out that the use of part-time workers insures a fuller utilization of the available labour force and enables employers to reduce absenteeism among regular employees by keeping hours of work within reasonable limits and allowing full-time employees regular days-off for domestic and personal needs. It urges that every effort should be made to attract part-time workers into community service industries such as laundries, retail stores and restaurants where they can release full-time workers and assist these services in meeting the increased wartime demands on them. Part-time workers can also fill many clerical jobs. Work which is independent of other operations and can be started and stopped at any time is the best type for part-time workers.

While most plants included in the survey arranged short daily shifts for part-time

workers in the morning or early afternoon, some hired them for full shifts two or three days a week and others had week-end or evening shifts for high school students. Still others teamed up part-time workers in pairs and arranged for each employee to work half a full shift. The Women's Bureau recommends that the beginning and ending hours of part-time shifts should be adjusted to the needs of the worker, but consideration must also be given to transport arrangements, plant facilities such as rest-rooms and lunch-rooms and the efficient use of machines and equipment. It also urges that women should be granted a 10-minute rest period during each four-hour work-spell, and in no case should more than five hours be worked without a break for lunch or rest. Part-time workers should not be expected to work on the night shift nor to spend long hours in travel.

Women with children of pre-school age should not be actively recruited for part-time work. The Bureau also opposed the practice of recruiting part-time workers for evening or week-end shifts from persons with full-time clerical or professional jobs, and asserted that in no case should a woman's total hours of employment exceed eight a day or forty-eight a week. It expressed strong disapproval of

week-end shifts which deprive workers and supervisors of their day of rest.

"Employment on their weekly 'day off' of women who are employed a full week elsewhere defeats the purpose of part-time shifts; it impairs the worker's efficiency so that over a period of time she will produce less on both jobs."

It was recommended that part-time workers should be paid the same rates as full-time workers on similar work, and women's rates should be the same as those paid to men. The development of community facilities to meet the needs of working women was also urged. Provision must be made for child care, laundry, shopping and other household duties.

Explanation of Labour Priority Ratings

REFERENCE was made in the October LABOUR GAZETTE (p. 1335) to the workings of the labour priority system in Canadian industry. On October 27 a further explanation and definition of labour priority ratings was issued by the Director of National Selective Service, Mr. Arthur MacNamara. Four priority classifications have been established: "A", a very high priority; "B", high; "C", low; and "D", no priority.

"Generally speaking," the Director said, "an 'A' priority is assigned to industries, activities or establishments engaged in the production of fuel, base metals, steel, certain chemicals, aircraft lumber and selected equipment and machinery, shipbuilding, aircraft production, manufacture of the implements of war, including equipment and facilities necessary to produce such materials and parts, including maintenance and repair of such materials.

"'B' priority rating includes industries or establishments engaged in such activities as logging, communications, transportation, agriculture, processing or manufacture of basic foods, newspaper publishing, maintenance of civilian health and safety, Government promotion of war production and production essential to the support and supply of (a) the armed forces (b) the highest priority industries and (c) essential services; construction and repair of industrial and essential municipal facilities.

"'C' priority rating includes those industries for which a low priority is intended, although some essentiality is recognized. These industries are considered essential to civilian life but are not directly vital to the war effort. Such industries as apparel and other finished textile products manufacturers, pulp and paper, printing, some commercial machinery, repair work on buildings, and parts of wholesale and retail trade and business service for civilians are included in this classification.

"'D' priority rating includes those industries for which no priority is considered to be justified. Generally speaking, this includes non-essential production for civilian use. Residential construction, retail and wholesale

trade of non-essential items, insurance and real estate, recreational services, advertising for civilian services, domestic and personal services, taverns, photography, etc., are all activities included in this classification."

Mr. MacNamara pointed out that only one priority is given to each establishment. "However," he said, "more than one priority might be given to one firm operating more than one establishment and such ratings would be in accordance with the essentiality of the production or activity of each establishment. Consequently, certain occupations are given a special classification, such as key men in laundries, pharmacists in drug stores and key skilled men in machinery repair services."

Labour priority ratings of firms and classes of employees are under constant review and are subject to change by the National Selective Service Advisory Board in accordance with any change in the essentiality of their production. Further, the control of employment in "A" and "B" priorities does not constitute any interference with men who desire to enter the armed forces voluntarily, nor with men required to report for medical examination or military training under mobilization regulations.

Labour Priority of Pulpwood Cutting

Fuller recognition of the essentiality of the pulp and paper industry by placing its pulpwood cutting operations in a higher labour priority category and by other measures related to the seasonal character of these operations, was announced by Hon. Humphrey Mitchell, Minister of Labour, on October 29. This action followed unanimous recommendations by the Interdepartmental Labour Priorities Committee to the National Selective Service Advisory Board, and discussions of a Special Committee of the Pulp and Paper Industry of Canada in collaboration with the Director of National Selective Service.

The "freezing" regulations affecting other "A" and "B" priority industries will not apply to men employed in these woods operations, as there are obvious difficulties in administering the application of such a regulation to these occupations.

*Postponement of Military Call-Up of Men
Employed in Meat Packing Industry*

Following representations made at conferences of officials of National Selective Service, the Wartime Prices and Trade Board and the Meat Production Board, action was taken by the Director of National Selective Service early in October to supply more men for the meat packing industry. The need was considered to be both serious and urgent when it was demonstrated at the conferences that the industry had lost 21 per cent of its manpower to the armed forces and that the marketing and processing of meat products in Canada would probably reach an all-time high during the period from October 1943 to January 1944.

Mobilization Boards have been requested, when dealing with applications for postponement of military service of persons engaged in the meat packing industry to give consideration to the available supply of labour for the industry, the importance of the particular applicant's position in the industry and the importance of the industry generally in the prosecution of the war.

The particular classes of work and men for which postponement was requested included supervisors, butchers, processors in all depart-

ments, employees of by-product cellar and freezer departments, handlers and loaders, skilled packing house maintenance men, and employees holding first, second, third, and fourth-class engineers papers in the steam power and refrigeration plants of the industry.

The Employment and Selective Service Offices with packing plants within their areas were instructed to make special provision to meet the labour requirements of this industry and to give top labour priority where an emergency situation had developed and where there was danger of spoilage due to lack of manpower.

In addition to these directives of National Selective Service, the Dominion Minister of Agriculture requested farmers, particularly in the Prairie Provinces, to hold to a minimum their marketing of sows and unfinished cattle during the remainder of 1943.

The Minister of Agriculture emphasized that the emergency did not result from lack of marketing facilities or packing plant capacity, but because abattoirs in Western Canada were short some 1,300 men needed to operate at capacity. Efforts were made to obtain labour from farms following the completion of harvesting operations.

National Selective Service Enforcement Proceedings

ONE of the prime requisites in the application of National Selective Service is adequate machinery for the enforcement of the Regulations. Since the beginning of the present fiscal year especially, paramount attention has been given to this task. Certain amendments to the Regulations made since April, 1943, have increased the volume of work required of the Employment and Selective Service offices and a corresponding strengthening of the enforcement organization has been necessary.

These amendments provided for:—

- (1) the direction of conscientious objectors under N.S.S. Civilian Regulations;
- (2) the implementing of the compulsory transfer of labour;
- (3) the "freezing" of persons engaged in the school teaching profession and in the coal mining industry.

To provide for enforcement administration to cope with these increased duties and responsibilities much of the work decentralized by the appointment of a Regional enforcement officer in each of the five Regional offices. These officers direct and supervise the preparation of enforcement cases occurring in

their respective regions. To assist the Regional enforcement officers a total of 41 officials were assigned to key points within the regions. Each of these officers specializes in the investigation and enforcement work arising from contraventions of the Regulations. In addition, in order to ensure prompt and efficient attention at the local office level, one Selective Service officer has been designated to each local office to co-ordinate the handling of the enforcement work. In each of the regional enforcement positions a qualified lawyer with extensive administrative experience was appointed.

In order to further increase and maintain efficiency in the enforcement machinery, schools of instruction have been held in each of the regions. These were conducted by the respective Regional Enforcement officers, assisted by representatives of the Local division of the Head Office of National Selective Service at Ottawa. The schools proved so helpful that similar schools were set up for local officers engaged in enforcement work at the larger local offices.

Following the campaign of education, a more vigorous policy of enforcement was adopted. Prior to that time action was taken

only in flagrant cases. Up to the end of March 1943, 11 prosecutions had been undertaken. But this number had been increased to 35 by the end of April and 57 by the end of July.

Approximately 5,000 cases have been under review up to November 1, 1943. Owing to a variety of circumstances, such as ignorance of, or misunderstandings in connection with the Regulations, enforcement officers have not taken legal proceedings in much the larger number of cases. In fact, it has been a matter of policy to avoid prosecutions, if at all possible.

The following is a summary of the cases that had reached the courts up to November 1, 1943:—

Total prosecutions commenced.....	195
Convictions	68
Acquittals	4
Cases not proceeded with.....	30
Cases pending.....	93

The special campaign or "spot check" instituted in September, to determine the extent of compliance with Compulsory Employment Order No. 6 (L.G., Sept., 1943, p. 1211) has disclosed that, to a great extent, both employers and employees are giving excellent co-operation. It is intended to make a further check at a later date and the necessary steps will be taken in all cases where it appears that deliberate and flagrant contraventions of the Regulations have occurred.

Summary of Farm Assistance Measures Taken by Government During 1943

THE Department of Labour has given out a summary of the measures taken by National Selective Service to meet the farm labour situation during the present crop year. The following were the more important steps taken:—

- (a) Agreements were entered into with all provinces, under which the Dominion undertook to give financial assistance to the provinces for recruiting and transferring farm labour, and for promoting other means of overcoming threatened labour shortages by a better utilization of manpower already available on the farms. (L.G., May, 1943, p. 568.)
- (b) Several hundred local farm production committees were organized to stimulate production, and at the same time to arrange for the sharing of labour and equipment among farmers, transfers of workers from less productive farms, and the placement of outside workers.
- (c) Agricultural workers who had left the farm last winter for other employment, were required to return for the crop season.
- (d) Through attaching conditions to postponement of military training and through other means, men were required to move from less productive to more productive farm work.
- (e) Under the Compulsory Transfer Orders, former farm workers are being returned to that work.
- (f) The Department of Labour, in co-operation with the provinces affected moved 700 men from Saskatchewan to Ontario for work on farms in the latter Province,

for six to eight weeks before the western harvest season began.

- (g) By arrangement, substantial numbers of soldiers and Air Force personnel were granted compassionate farm leave. In addition, many soldiers and airmen helped farmers during their forty-eight hour leaves.
- (h) Substantial numbers of soldiers were detailed for Farm Duty, under arrangements made with the Army (L.G., Aug., 1943, p. 1075); these are additional to the men granted compassionate leave. About 400 Naval personnel have also been assigned to farm work.
- (i) The Department of Labour, in co-operation with the provinces, moved 3,700 experienced men early in September from Ontario farms to assist with the harvest in Manitoba, Saskatchewan and Alberta: care was exercised that the men taken were not further required at that time on their own farms in Ontario. (See article below.)
- (j) The Dominion shared with the Prairie Provinces some of the cost of moving farm equipment to areas where machines were not available.
- (k) Arrangements were worked out with American authorities for an exchange of machines (combine units) between the Prairie Provinces and adjacent states; and also for a limited number of farm workers to assist with potato harvesting in the State of Maine, while Ontario tobacco growers secured experienced workers from the United States.

- (l) Appeals to students and urban dwellers, made by Selective Service in co-operation with the provinces, resulted in a substantial number of extra helpers for the farmers.
- (m) A number of treaty Indians were induced to engage at harvesting and other farm work.
- (n) Conscientious objectors, Canadian Japanese (to the number of 5,000 to 6,000), internees, and some prisoners of war were also made available for farm work in various areas.

"Summing up the situation", Mr. Mitchell concluded, "by the use of the devices referred to, and through the co-operation of the governments of the different provinces, even

though the general labour situation has been particularly difficult all during the present year, we did succeed in meeting the various labour problems of the agricultural industry as they arose. The work of the local production committees, which consists of local citizens in the areas served, was found to be most helpful. Much credit is due the Provincial Governments and their officials, as well as a great many local organizations, for assistance in meeting this year's farm labour problems."

The provincial machinery, including local farm production committees, will continue their work during the fall and winter in order to assist in locating farm workers who may be spared for employment in other essential industries during the slack season.

Results of Prairie Harvest Assistance Program

REPORTS from the Prairies at the close of the 1943 harvesting season indicate that the labour supply problem was satisfactorily met this year. Prairie farmers took the grain crops off in good time with the assistance of 1,600 soldiers on Farm Duty and 3,700 farm workers brought in from Ontario. This outside labour was organized by Federal and Provincial Officials and active support was given by the District Officers Commanding in British Columbia, Ontario and Quebec through whom the soldier help was made available. In addition to this help some 4,000 soldiers and 800 to 900 airforce men on (compassionate) farm leave assisted on their own or their immediate relatives' farms.

Advantage was taken of the plan introduced early in August for detailing soldiers on Farm Duty to implement the supply of harvesters that could be made available from civilian sources. Before the end of August about 850 Farm Duty soldiers had been transferred from British Columbia; about half of these going to Saskatchewan and the rest divided equally between Alberta and Manitoba. Manitoba also obtained during the same month, 200 men from Military District No. 5 in Quebec, and 175 from Military District No. 2 in Toronto. An additional 81 were sent to that Province from Kingston early in September. Toward the latter part of September, 300 men were sent to the Edmonton area in Alberta from the Montreal Military District.

The main body of outside labour was made up of experienced farm workers from the Province of Ontario, who were obtained without handicapping farm work in the province. Early in August, an application card for transportation to the West as a harvester was forwarded to all Ontario farmers and farm workers by the Director of National Selective

Service. This card appealed to those who felt that they could spare time from their work to help with the harvest in the West. To ensure that the applicants were experienced farm workers whose going would not interfere with Ontario agricultural production, space was provided on the card for the signature of an Agricultural Representative or other competent authority specifying that the men could be spared. The cards so endorsed were then sent to the nearest Employment and Selective Service Offices.

Each of these Offices kept the Department of Labour advised of the number of men available as harvesters for the West. As information had been secured beforehand of the numbers needed at various western distribution points, it was possible to direct each office to send specific numbers of men to specific points in the West. Men available were notified to proceed to these points and travel warrants were sent to their nearest railway stations for free outgoing railway tickets and a receipt to enable them to get return transportation on payment of \$10.

The Department of Labour, by special arrangement with the railways, obtained round trip transportation for the men at the one way rate between the points of origin and the distribution points in the West. The actual cost to the government for transportation to these points was the one way fare for each man minus the \$10 which each would pay for return fare. Where men were moved about within a province in the West the costs were borne jointly by the Dominion and Province concerned. When it became necessary to transfer men from Manitoba to the other two provinces and from Saskatchewan to Alberta as harvesting advanced, the Federal Government bore all the cost.

Movement of Farm Labour

The movement of men began about August 23 and by September 1 approximately 1,000 had been sent, mostly to Manitoba and Saskatchewan points as the Alberta harvest was somewhat later. The bulk of the rest of the harvesters proceeded West early in September and the movement from the Ontario points was closed on September 22.

According to final reports received from the Local Employment and Selective Service Offices in Ontario, 833 men were sent to Manitoba, 2,109 to Saskatchewan, and 761 to Alberta, making a grand total of 3,703. Since Alberta's harvest was later than that of the other two provinces it was possible to meet Manitoba's needs first and then transfer men from that province further West as harvesting was completed. By the first of October, Manitoba reported 200 soldiers on Farm Duty and 225 Eastern harvesters redirected to Saskatchewan and Alberta points. Saskatchewan also reported, at about the same time, that 100 harvesters had been sent from that province to Alberta.

As this large number of men were sent to the Prairie Provinces early in the harvesting season it enabled full advantage to be taken of the exceptionally good weather conditions to get the harvest off somewhat earlier than had been anticipated. The harvesting was largely completed in Manitoba and Saskatchewan early in October, and was well advanced in Alberta by the middle of the month. For that reason the earliest return date for harvesters, which had previously been set for October 31, was advanced to enable men to leave the first two mentioned provinces on October 6 and Alberta on October 12.

Campaign for Farmers to Take Off-Season Work

A CAMPAIGN to secure the services of farm workers for transfer to essential industries during the slack season on the farm was announced recently by Mr. Arthur MacNamara, Director of National Selective Service. The campaign will be carried out by the Department of Labour, in co-operation with the Provincial Departments of Agriculture.

"To a considerable extent", Mr. MacNamara said, "fuel wood cutting and other woods operations have always depended upon the assistance of workers from agriculture during the Fall and Winter months, in order to secure their production. Similarly, in some parts of the country, coal mining, base metal mining and fish packing establishments have also in the past leaned heavily upon the farmer during his slack season. Due to the war, the large numbers of workers available for these seasonal

At the request of Alberta the latest date on which men might return and still have their return transportation receipts honoured was changed from November 15 to November 30. The reason for this was the fact that bad weather during the later part of October delayed harvesting operations in the northern part of the province.

The success of the movement of harvest workers to the West and the service they have rendered, from the viewpoint of the three Prairie Provinces, is demonstrated in the following excerpts from letters sent to the Minister of Labour, Honourable Humphrey Mitchell. Mr. D. M. McLean, Director of Farm Help Service for Manitoba, states: "Arrangements made in the East with respect to the use of soldiers on Farm Duty, and the Eastern harvesters were more than satisfactory . . . there has been much praise of the class of help sent to our farmers here who are very appreciative of the assistance that your Department has been able to give". The Honourable W. J. Patterson, Premier of Saskatchewan wrote: "The 2,300 men who came to Saskatchewan from Ontario were a particularly fine group and gave excellent satisfaction wherever they were employed". The Minister of Agriculture for Alberta, Honourable D. MacMillan speaking of the help says: "These men have been most satisfactory and I wish to commend yourself and the officials of National Selective Service for the very excellent type of men they have dispatched from Ontario to assist us with harvesting this year . . . I would also like to mention that valuable assistance has been received from soldiers."

industries—a regular feature of the Canadian employment situation—have virtually disappeared. Many have gone into the Forces, while others are now steadily engaged in essential industries. In view of this fact, we must depend to an even larger extent upon securing men from the land while they are not needed at home. Moreover, due to labour shortages, additional industries now look for men off the land: railway track maintenance and packing plants are among the industries now asking the services of farmers for the Fall and Winter."

Mr. MacNamara said that it was impossible to form a close estimate of the number of farmers sought by industry, but probably it would exceed 150,000 across Canada. It was pointed out that workers in agriculture who have secured postponement of military train-

ing by reason of their occupation, will be allowed to continue on postponement if they accept approved essential employment during the slack season.

"There is no thought of interfering with farm production", Mr. MacNamara explained. "We do not want men while they are still required on the land for Autumn work, nor do we want to take away from the farm any man who is needed there for year-round work. Nevertheless, there is a substantial margin of men who may be spared during the next few months, and those are the men whose services we wish."

The agreements between the Dominion and the Provinces for farm labour recruitment provide that Provincial Field Organizations will assist the Dominion in locating farmers for other seasonal industries in the off-season, and all the Provincial Organizations have been approached and are co-operating with Selective Service in the present campaign. Also, several hundred local Farm Production Committees, organized by the Provinces have undertaken to participate in the campaign.

Employment in the Holiday Season

BY means of an Order signed by Honourable Humphrey Mitchell, Minister of Labour, special provision has been made to facilitate the engaging of workers for the Christmas rush by the Post Office Department and retail trade. The Order (Special Order No. 12 under National Selective Service Civilian Regulations) is dated November 10.

From December 13 to January 5, the Post Office Department and retail business may engage women over 44 years of age and men over 59 years of age, without first securing National Selective Service permits. In any case where it is wished to retain after Janu-

ary 5, one of these employees who is taken on without permit, it will become necessary on that date to secure a permit from Selective Service.

Students and teachers may be engaged for employment during their Christmas vacation, without a Selective Service permit, by either the Post Office Department or the retail trade.

In areas where there is no shortage of female employees for essential industries, Selective Service Officers may permit the employment of women under age 44 for employment around the holiday season.

Publications on Women's Role in the War Effort

WANTED: *Women in War Industry* is the title of a recent book by Laura Nelson Baker (E. P. Dutton & Company, New York). In addition to stressing the urgent need for more women workers in war industry, it contains information on how to choose a war job, obtain or train for one. Working conditions and safety are discussed with particular emphasis on safety clothing. Detailed descriptions are given of a large number of factory jobs from spot welding to riveting and the book is profusely illustrated with photographs showing women performing a wide variety of industrial operations. Suggestions for successfully combining homemaking with industrial employment are also included. In an appendix a summary is given of the labour laws recommended by the Women's Bureau of the United States Department of Labour for the protection of women workers, and the progress made by existing labour legislation towards these standards is indicated. Rest pauses and limits on working hours are among the problems indicated as requiring more legislative attention.

In the same field, the Science Research Associates of Chicago have published a pamphlet on *Women's Work and the War* by Mary Elizabeth Pidgeon who heads the Research Division in the Women's Bureau. Facts and figures on the employment of women in various types of war jobs ranging from industry to transportation and the military services are given. Attention is drawn to the expanded opportunities for women in medicine, personnel work, social and welfare work, home economics and the other professions. This publication is also illustrated with photographs showing women at work in such varied occupations as lumbering, meteorology and shipbuilding.

Figures presented in the pamphlet show that four million women have joined the labour force between 1940 and 1942 in the United States, raising the percentage of women from 23 to 29 per cent of the workers. At the beginning of the year 30 per cent of the workers in major aircraft plants were women, with some plants running as high as 70 or 80 per cent. Over 54,000 women were working in shipyards. Women members in trade unions numbered over four million.

Industrial Welfare

Safeguarding Workers Exposed to Radio-Active Substances in Great Britain

ADDITIONAL regulations have recently been passed in Great Britain to protect workers engaged in luminising processes from the hazards of radio-active substances. They take the form of an amendment in the Factories (Luminising) (Health and Safety Provisions) Order issued in April, 1942, under the Defence (General) Regulations which empower the Government to make regulations to safeguard the welfare of persons in war industries or in occupations essential to the life of the community. Luminising processes include handling any luminous compound, applying it to surfaces or introducing it into glass tubing and removing it from any surface or glass tubing. The United States Department of Labour includes employment in processes using radio-active substances in its list of hazardous occupations and prohibits the employment of young persons under 18 in such processes.

As amended, the regulations in Great Britain prohibit the employment of young persons under 16 in luminising processes unless they are already so employed and are over 15 years of age. After January 1, 1944, persons who have been employed continuously in luminising operations for 12 months may not be so employed again until a period of at least three months has elapsed. The work-week in such industries may not exceed 48 hours. A medical examination must be given to every employee within seven days of the date of his employment and monthly examinations are required for all employees. The examining surgeon may forbid the employment of any person in luminising processes and such persons must obtain written permission from the surgeon before they may resume such employment.

Workers are forbidden to take food or drink, use tobacco, cosmetics, sanitary conveniences or leave the factory without first removing protective clothing, washing their hands and arms and cleaning their finger nails. Employ-

ers must provide suitable washing facilities including soap, towels, nail brushes and hot water. They must allow workers at least ten minutes before each meal and before shift-end for washing and are required to appoint someone to supervise washing. They must also provide suitable protective clothing, including overalls, hair covers, waterproof aprons and rubber gloves. Separate provision must be made for storing work-clothing and street-clothes. Seats of suitable height, furnished with back-rests and having a smooth surface must be provided. It is forbidden to carry on other processes in the same room as luminising processes. Efficient exhaust ventilation must be installed wherever workers are handling luminous compounds but it is not required for workers removing a luminous compound from any surface or from glass tubing if carried out by a wet method.

Stipulations are also laid down in regard to the handling and storage of luminous compounds, floors, benches and tables in rooms where one is used, minimum working space, etc. The use of brushes for applying a compound is forbidden, and glass screens or other appliances must be provided to protect the faces of workers. Regular cleaning of rooms and equipment is required. Other regulations stipulate that workers must use all appliances and obey all rules designed to secure their health and safety.

Factories not engaged in war work nor performing services essential to the life of the community may obtain exemptions from the regulations. The Chief Inspector of Factories may also exempt an employer or worker from all or any part of the regulations if he considers them not necessary to protect the persons involved. Employers must maintain a Health Register of all persons who have been in their employ since the regulations went into effect. A copy or abstract of the regulations must be posted in the factory.

Administration of Industrial Welfare Policy in Australia

IN the Australian Department of Labour and National Service there is an Industrial Welfare Division which is responsible for promoting good working conditions in industry in the interests of sustained production and the welfare of the worker. This Division, like the Department of which it is a part, was set up after the outbreak of the present war to deal with wartime problems, but a substantial body of factory legislation has for many years been administered by the State Governments.

The Division is directly responsible for working conditions in the factories of the Ministry of Munitions and it also works closely with other departments in charge of Government factories. In private industry, it gives advice to employers or unions on request, publishes information and administers certain National Security Regulations. Its organization is still incomplete but it now has Factory Welfare, Technical Services, Food Services and Research Sections, and also a field organization.

The Factory Welfare Section concerns itself not with physical working conditions such as buildings, seats, ventilation, heating and lighting, but with such matters as the suitability of workers to their jobs, arrangement of working hours and the relations of workers with each other. It conducts courses in the Universities for the training of industrial welfare officers (LABOUR GAZETTE, May, 1943, page 564), and these officers have been placed in Government factories and in a few cases in private industry. Special attention is given to the problems connected with the employment of women. Technical advice is given on these problems and in certain groups of factories the welfare officers have taken over the interviewing and placing of women and the introduction of them to their work. A small team of welfare officers makes special investigations of absenteeism in private and Government fac-

tories where this problem is causing particular concern, and helps to put remedial measures into effect. The Section also arranges transportation for workers at Government factories. Finally, it administers the National Security (Supplementary) Regulations requiring the provision of first-aid equipment and casualty rooms, and the National Security (Hours of Work) Regulations.

The Technical Services Section deals with physical working conditions. It lays down general standards for new factories, inspects all applications for permission to build industrial buildings and advises Government and private factories as to the adequacy of building layout and equipment. It circulates standard sketch plans of locker and wash rooms, casualty rooms, work seats, etc., and in some cases arranges the manufacture of standard equipment. It administers the National Security (Industrial Lighting) Regulations which require the progressive application of the Standards Association standard of artificial lighting to war industries working shifts or under permanent blackout. It has appointed safety officers to Government factories and has co-operated with State Factory Inspectors and National Safety Councils in giving information to private industry.

The Food Services Section plans and operates hot meal cafeterias and canteens for workers in Government munitions factories and advises Government contractors and other employers about food services. Canteen Advisory Committees consisting of representatives of the workers are being established in all factories.

A small Research Section keeps in touch with the research done in the other sections and itself investigates more general problems of industrial welfare and reviews overseas experience from the point of view of its applicability to Australia.

Joint Safety Committees in American War Plants

UNION participation in the promotion of safety through joint safety committees is the subject of a pamphlet recently published by the Division of Labour Standards of the United States Department of Labour.* It summarizes the experience of a number of plants with joint safety committees and describes the composition, functions and working of such committees. In addition, the

fundamentals of safe and healthful working conditions are outlined as a guide for safety committees. It is pointed out that a committee's work must include consideration of good housekeeping, machine-guarding, proper illumination, safe work-practices, planning of all operations, safe design of machinery, of plant and of work-places, maintenance, supervision, accident investigation and co-operation by the workers. The standard conditions of work which are recommended are those outlined in the pamphlet entitled *Wartime Work-*

*U.S. Department of Labour, Division of Labour Standards, Bulletin No. 61, *Joint Safety Committees at Work*, August, 1943. Price 10 Cents.

ing Conditions issued by the Division of Labour Standards and summarized elsewhere in this issue of the *LABOUR GAZETTE*.

Joint safety committees vary in size but usually contain an equal number of representatives of the union and the company. Union members are either appointed or elected by the union or may be selected by the company from a list submitted by the union. Sometimes each department is represented by one member or departments may be granted representation in proportion to their size. In large plants, departmental sub-committees are frequently established under the plant-wide committee. Occasionally safety committees are tied up with joint production committees, but it is stated that "safety committees do not and should not depend on labour-management committees for their existence, nor should safety committee work be subordinated to other labour-management activities."

Because of the educational value of experience on joint safety committees, many plants change the members every six months or year. Men with sufficient length of service to be familiar with the industry and the plant are preferred. Shop stewards and grievance committeemen are usually excluded from membership to keep safety out of the realm of grievances and avoid overburdening such officials. The appointment of safety com-

mitteemen from the second and third shifts should not be neglected.

Some committees meet weekly, others monthly. They investigate the carrying out of previous recommendations and make new recommendations. The safety director presents a monthly accident report and each accident is discussed. The safety director links together the committee and management and should have sufficient authority to put recommendations in effect promptly.

In addition, most committees conduct monthly or more frequent inspections. Many have developed inspection forms listing all the details to be checked. They also carry on safety campaigns using such devices as bulletin boards, posters, slogan contests, competitions, meetings, etc. The committeeman is responsible for enlisting the co-operation of workers in working safely in the shop. Workers report unsafe conditions to him and he makes recommendations to the foreman. It is urged that committeemen should take advantage of safety training courses sponsored by the National Committee for the Conservation of Man-power in War Industries (*LABOUR GAZETTE*, Oct., 1943, p. 1330) and should make use of literature supplied by State and Federal governments, the National Safety Council and the American Standards Association.

Wartime Employment of Young Persons in the United States

A STUDY of "Juvenile Labour in Wartime in the United States" was published in the September issue of the *International Labour Review*. Figures are presented which show the tremendous increase in the number of young persons employed. In October, 1942, there were over two million boys and girls between 14 and 18 years of age at work and during the summer an additional million held jobs on farms and elsewhere. An increase in illegal employment was revealed through school surveys, and a large proportion of school children, varying from one-quarter to one-half in many high schools, were combining school-work with employment. Occupations entered by the young people were usually those requiring little or no training such as cashiers, waitresses in lunch rooms, pin-boys, messengers, garage and filling station helpers, and delivery boys. The proportion of boys working as newsboys and girls as domestics declined but the percentage entering manufacturing industries increased sharply.

The study indicates the steps taken by Federal and State Governments to safeguard

the health and welfare of the employed young persons. A number of States have relaxed child labour standards to meet the man-power shortage but others have established new standards to protect boys and girls from the dangers of wartime employment. The Children's Bureau of the United States Department of Labour and the War Man-power Commission have conducted a joint campaign to ensure that children will be employed only after all other sources of labour are exhausted and that the health, welfare and educational opportunities of those employed is adequately protected. The War Man-power Commission last January published a statement of policy on the employment of young persons under 18 and the Children's Bureau amplified it in a pamphlet entitled "Protecting the Health of Young Workers in Wartime" (*LABOUR GAZETTE*, May, 1943, p. 562). To keep young persons out of hazardous and dead-end jobs, the Children's Bureau has supplemented its hazardous-occupation orders (which prohibit the employment of boys and girls under 18 in specified occupations) with advisory standards

regarding the type of work young persons should be permitted to take up in such war industries as shipbuilding, lead-using industries and employments involving exposure to carbon disulphide and chlorinated solvents. In addition the Bureau issued a statement of policy on standards for the wartime employment of young persons in agriculture (LABOUR GAZETTE, 1942, p. 379). A separate section of the study in the International Labour Review deals with the various emergency schemes under which children are being employed in agriculture and industry.

Employment of School Children

This fall the United States Office of Education combined with the Children's Bureau to conduct a "Back to School" campaign (LABOUR GAZETTE, Sept., 1943, p. 1208) stressing that the first responsibility of young persons under 18 was, even in wartime, to take full advantage of educational opportunities. They recommended, however, that in areas of acute labour shortage, schemes for combining school work with employment should be developed. Standards recommended for such schemes were laid down in a statement of policy issued recently by the War Man-power Commission, U.S. Office of Education and Children's Bureau and published in the Office of Education's organ, "Education for Victory" for October 1.

Any community scheme for utilizing the services of school children should be worked out by local education authorities and the

U.S. Employment Service with the aid of an advisory committee representing business, industry, organized labour, the press and other groups concerned with the welfare of young persons. No child under 14 should be permitted to work and those from 14 to 16 should not be called on until the 16 and 17 year-olds are employed, nor should they be admitted to manufacturing occupations.

Students from 14 to 16 should not be allowed to work more than three hours on school days and eight hours on other days and total school and work-time should not exceed 8 hours a day. When school is in session, weekly hours should be limited to 18, and during holidays, to 40. Work between 7 p.m. and 7 a.m. should be forbidden.

Maximum working hours for students 16 and 17 years of age should be four on school days and eight on holidays with school and work hours totalling not more than nine a day. Weekly hours should be limited to 28 during term and 48 during holiday periods. Night work after 10 p.m. should be prohibited.

Employment and age certificates and parental consent should be obtained for all young workers and physical examinations are also urged. One day's rest in seven must be allowed and adequate arrangements made for meal and rest periods, sanitary facilities and safety measures. Wages should be those paid to adults for similar work. Employment in hazardous and unhealthy occupations should be forbidden.

Recommended Conditions of Work for War Plants in the United States

RECOMMENDATIONS concerning working conditions in war plants have been drawn up by the Division of Labor Standards of the United States Department of Labor*. They are designed to supplement State and Federal laws and regulations and "provide management with a yardstick for measuring physical working conditions." They "may indicate some methods of improving morale, increasing output, and controlling absenteeism and labour turnover."

The recommendations cover physical conditions in workplaces, hours of work, medical and first-aid facilities, protective clothing and equipment, sanitary and other facilities and the promotion of safety. The codes drawn up

by the American Standards Association on particular aspects of these topics are endorsed. A bibliography of other U.S. Government publications on safety and welfare is appended. In addition there is a self-appraisal safety quiz for management and a check-list of the factors to be considered in determining the optimum hours of work to achieve maximum production (LABOUR GAZETTE, 1942, page 1372).

Hours of Work

The 8-hour day and 48-hour week recommended by eight U.S. Government agencies (LABOUR GAZETTE, 1942, page 881) is endorsed with the qualification that in plants not operating on a three-shift system, longer daily hours for a shorter work-week may be more efficient. The longer week-ends would compensate for the longer working-day and would

* U.S. Department of Labor, Division of Labor Standards, Special Bulletin No. 13, *Wartime Working Conditions, Minimum Standards for Maximum Production*, September, 1943.

allow more time for shopping and personal affairs, thus reducing absences for these reasons. In determining hours of work, consideration must be given to travelling time, recreation facilities, the physical demands of the work and the rest periods allowed.

One day's rest in seven is recommended. In plants where Sunday is used for maintenance work and bottleneck breaking, production seldom suffers as there is better attendance and morale among workers who are free on Sundays.

A 30-minute break for a meal is proposed for all shifts of six or more hours. A longer period may be required if eating facilities are not nearby, if time is needed for washing in plants where poisonous substances are used or if the work is heavy or monotonous. In continuous operations a rest period of at least 10 minutes should be granted at the midpoint of every four-hour or longer spell.

Experience indicates that the health, efficiency, and *total production* of the worker are increased by such periods; also time lost due to unofficial relief rest periods is reduced by provision for official and regular rest pauses.

At least one week's holiday with pay after a year's service is recommended. Holidays have been found beneficial in maintaining productive efficiency and reducing absences. They should be spread over a long period so as not to interrupt production.

Boys and girls under 18 should not be allowed to work on night shifts. In selecting night workers, consideration should be given to age, home responsibilities and physical condition. Employers of night-workers should give special attention to such problems as good lighting, transport and eating facilities, supervision, safe and healthful conditions of work, and medical care. In choosing shift schedules, efforts should be made to minimize the disruption of normal sleeping and eating habits and consideration given to times when transport and community facilities are available.

Conditions in Workplaces

Adequate precautions must be taken to prevent and control fires and explosions. Machines should be properly guarded and care taken in the handling of materials to eliminate hazards and avoid unnecessary lifting. Good plant housekeeping includes not only cleanliness and neatness but proper maintenance of all equipment and facilities.

For light work, the room temperature should be between 65 degrees and 70 degrees. It may be lower for heavier work but should not be less than 60 degrees. In the summer, work-room temperatures between 75 degrees

and 82 degrees should be maintained to avoid too great a contrast with outside temperatures. Air should be changed frequently and relative humidity kept at 45-50 if possible. Dusts, fumes, vapours and gases must be controlled to prevent industrial diseases from toxic substances. Good plant lighting is very important and precautions should be taken to prevent eye-strain. Excessive noise which interferes with efficiency should be controlled.

Efforts should be made to fit workers to their jobs and adjust equipment to the height and build of the worker. Workers should be given a medical examination before being assigned to hazardous jobs and should always receive training in safe and efficient work-practices before starting work. Seats should be provided for all jobs which can be done in a sitting position, and one seat for every three standing workers should be available. The worker should be able to alternate between sitting and standing. Footrests should be furnished where necessary.

Protective Clothing

Safety clothing such as hard hats, gloves, mittens, leggings, aprons and rubber boots must be provided for employees working with chemicals, molten metals or in heavy fabrication work or other dangerous occupations. It should be adapted to the needs of women workers. Goggles or face shields should be used if eye hazards are present.

Respiratory devices are necessary for workers temporarily exposed to dangerous fumes and gases but should not be considered a substitute for exhaust ventilating systems and other means of control.

Sanitary Facilities

Drinking water should be supplied in sanitary fountains or dispensers with disposable paper cups. In most plants, there should be at least one dispenser for every 50 workers, but where the work is hot and strenuous, one for every 30 employees. Salt tablets may be provided at the direction of a physician for workers exposed to heat or engaged in strenuous work. Water may range in temperature from 40 to 80 degrees but ice should not be in contact with the water.

Separate toilet facilities and wash-rooms must be provided for each sex. They should be convenient to but entirely separate from work-rooms, well-lighted and ventilated. If there are more than 10 but less than 24 workers, two toilets are sufficient, three for an additional 25 and five for any number between

50 and 100. Thereafter, one should be added for every additional 30 workers. Wash-rooms must have one basin or two feet of trough for every 10 workers up to 100 and an additional one for every 15 workers thereafter. Hot and cold water, soap and individual towels are recommended. Showers must be provided for workers exposed to skin infection.

Other Welfare Provision

If workers are required to change their clothes on arrival, dressing rooms, lockers and showers must be provided. Two-compartment lockers are recommended if work-clothing is in danger of being contaminated by toxic substances to keep it separate from street-clothes. Wire baskets suspended from the ceiling may be substituted for lockers.

If 10 or more women are employed, a rest-room should be provided. In smaller plants a screened-off place should be available for women. At least one couch is recommended if from 10 to 100 women are employed, two if there are from 100 to 250 women and an extra one for every additional 250 women.

The importance of providing hot lunches and mid-shift snacks to supplement inadequate diets and improve efficiency is stressed. Washing facilities should be located near to canteens. If toxic substances are not used, meals may be brought to the work-room by mobile units.

Medical Facilities

Every plant should have a first-aid room staffed by a doctor or nurse, or a worker trained in first-aid should be on call at all times. Physicians may be either part-time or full-time, depending on the size of the plant. If there is no full-time physician, the names, addresses and telephone numbers of doctors on call should be listed on a bulletin board at the first-aid station. First-aid rooms must be properly heated, lighted, ventilated and provided with bathing and toilet facilities. They must be equipped with a first-aid kit containing the minimum supplies listed in the pamphlet for various sizes of plant. If there is danger of asphyxiation in the plant, an inhalator should be included.

Promotion of Safety

It is pointed out that safety cannot be achieved merely by rules and regulations. Management must show that it is genuinely interested in safety by taking the time and spending the money to eliminate hazards, and workers must be given a definite responsibility in the safety program. Supervisors specially trained in industrial safety should be employed. Plants with less than 100 workers should have at least one trained safety supervisor; those with from 100 to 500 employees require a safety director and an assistant for each shift, and an additional assistant should be added for every 1,000 workers thereafter.

British Trade Union Opinion on Industrial Health

IT is pointed out in the I.L.O. Review for October that increased production demanded by war conditions has given prominence to the problem of industrial health and that there is every likelihood that this interest will continue after the war. The improvement of the standards of life and health is imperative whether in war or in peace.

"Industrial health must be interpreted in as wide a sense as possible, taking into account everything which affects the worker in his industrial environment. It concerns not only doctors, but many other specialists: chemists, physicists, personnel managers, employers and trade unionists and most important of all, the workers themselves," the article states.

The Secretary of the Social Insurance Department of the British Trade Union Congress, Mr. J. L. Smyth, is quoted as saying: "The prevention of ill-health can be achieved only

by co-ordination and planning. The doctor must know not only the patient, but the patient's work and should also be made responsible in the factory for food, ventilation, lighting, etc." He urged that for the adaptation of workers to their jobs doctors ought to have an extensive course in psychology and that research should be speeded up as much as possible. Further, it was his opinion that the doctor in industry should be kept absolutely clear of workmen's compensation controversies. Rehabilitation rather than compensation should be the main object.

Mr. Smyth asserted that trade unionists recognized that industrial health problems had international aspects which "should be developed on an ever-increasing scale as a contribution to understanding between the nations and to the establishment of comparable standards."

Decisions of National War Labour Board

THE National War Labour Board has in recent months issued decisions in the following cases:—

Canada Steamship Lines Limited, and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Eastern Canada Stevedoring Company, Limited, and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Montreal and Saint John, N.B., Wharf Freight Handlers), and the Canadian National Railways and Canadian Pacific Railway Company.

Montreal Cottons Limited, and the United Textile Workers of America, Local 100 (Valleyfield, Quebec).

Dominion Textile Company Limited and United Textile Workers of America, Local 102 (Montreal, Quebec).

Dominion Tar and Chemical Company, Limited, and Local 174, United Gas, Coke and Chemical Workers of America (CIO).

John Inglis Company, Limited, and the United Steel Workers of America, Local 2900.

Pattern Makers' Association of Montreal and vicinity and various employing companies in the Montreal area.

Provincial Transport Company and Local 1157, Amalgamated Association of Street, Electric Railway and Motor Coach Operators of America.

Colonial Weaving Company, Limited, Peterborough, Ontario.

Holt, Renfrew and Company, Limited.

RCA Victor Company, Limited (Montreal, Quebec), and Local 1028-B, International Brotherhood of Electrical Workers.

Robert Daniel McMurchy (Regina, Sask.), and Elizabeth Restall.

Union Gas Company of Canada, Limited, on behalf of Windsor Gas Company, Limited, and National Union of Natural Gas Workers.

Re: Canada Steamship Lines Limited and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees

Reasons for Decision

This is an application for increased rates of pay and certain changes in working conditions for freight handlers at the following Ports—Quebec, Montreal, Toronto, Hamilton, Windsor, Point Edward and Sarnia, Fort William and Port Arthur.

We have had the advantage of evidence in similar applications from Montreal, Saint John and Halifax and have written reasons in connection with these cases.

Although there appears to be little difference between the work done by these workers and that done by the wharf freight handlers in the employ of Canadian National Railways and Canadian Pacific Railway Company at Montreal, there has been a differential in the basic rates. Accordingly we think the basic rate should be increased to 55 cents per hour and night differential for hours worked between 7 p.m. and 7 a.m. should be 5 cents per hour instead of 2 cents per hour presently paid.

The question of upward adjustment of the cost-of-living bonus depends upon whether certain increases can be said to be a general increase within the meaning of Section 34 (3) of P.C. 5963. On the evidence before us it must be found that the increase in question was not a general increase. Accordingly we think the cost-of-living bonus should be increased to 9 cents per hour but not to exceed in any case \$4.25 weekly.

We do not think other conditions of work embodied in existing agreements should be altered. Increases will of course apply to all classifications represented by the Union to maintain existing differentials and there will be proportionate increases to those paid on monthly basis. Increases and cost-of-living bonus adjustment should be retroactive to the date of the application, June 22, 1943.

September 30, 1943.

Re: Eastern Canada Stevedoring Company Limited and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees

Reasons for Decision

This is an application for increase in wages paid freight handlers at the Port of Halifax and also—there being no formal agreement in existence—for authorization of certain working conditions to extend to these workers similar conditions now enjoyed by longshoremen.

In the Montreal Harbour and Saint John Freight Handlers' case we have given our views as to how far under existing conditions the comparison with longshoremen should go. It is unnecessary to repeat them here. There has been long recognition through the field of collective bargaining of a definite and decided difference.

At the present time the base wage rate at this port is 52 cents per hour with a night differential of 10 cents per hour. We think the base rate should be stepped up to 56 cents per hour. We doubt our right under the present Order in Council P.C. 5963 to reduce the night differential to that prevailing at Montreal which we deem more suitable for this class of work. Accordingly, the base day rate is increased to 56 cents per hour without

disturbance of the existing night differential. Appropriate increases should be extended to all classes so as to maintain existing differentials.

As to the other conditions of work applied for, we think these are matters for collective agreement. We do not think it is our function to write the agreement. The parties should get together on these matters and submit what they arrive at for approval. The same also extends to any incentive wage plan so emphasized by the employer in his presentation. If the parties can agree and an incentive wage plan is not likely to result in higher cost, we shall be glad to give consideration to it.

As to vacations with pay, we think the reasoning set forth in the Montreal and Saint John case applies here with the exception that these workers do not enjoy railway transportation privileges. The greater night differential is an important offsetting factor in comparison with Montreal.

The wage increases should be retroactive to the 22nd day of June, 1943. Finding and direction accordingly. September 30, 1943.

Re: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Montreal and Saint John, N.B., Wharf Freight Handlers) and Canadian National Railways and Canadian Pacific Railway Company

Reasons for Decision

This is an application by the Union for increases in the wages of the Montreal Wharf Freight Handlers employed by both Railway Companies and at Saint John, N.B., for increases to the Freight Handlers employed by the Canadian Pacific Railway Company.

The Union based its case upon a comparison between wages paid longshoremen at the same ports and those paid the freight handlers. The Railways advanced an entirely different comparison, namely, that between these wharf freight handlers and the regular freight handlers on the railways at points where loading into steamships is not involved.

We have reached the conclusion that neither comparison is strictly correct. There has been a long established differential and a fairly considerable one between the wages paid longshoremen and those paid freight handlers. It appears that though at one time the differential was not very great, the spread has tended to widen in favour of the longshoremen. Naturally this has been the cause of a good deal of dissatisfaction among the wharf freight

handlers. It appears that two Conciliation Boards in recent years have dealt with the situation at Montreal. The one under the Chairmanship of Mr. Brooke Claxton, M.P., in 1938 brought in a recommendation that the base rate should be increased by 7 cents per hour. The other under the Chairmanship of His Honour Judge Coughlin in 1940 made a similar recommendation; in fact it seems to have simply adopted the Claxton Board report. The Companies have only implemented the reports to the extent of granting a 3-cent increase although subsequently they paid a full cost-of-living bonus. The Claxton Board, judging from its report, went very carefully into a comparison between the work done by wharf freight handlers on the one hand and that done by longshoremen and ordinary railway freight handlers on the other. The conclusion reached appears to have been that the work of the wharf freight handlers was more comparable to that of longshoremen than the Railway Companies were prepared to admit. We have come to a similar conclusion. It seems to us that some extra degree

of skill is probably required in the work of longshoremen but that the work of the wharf freight handler is to some reasonable extent comparable with that of the longshoremen and of the ordinary freight handler as well. In the case of both the longshoremen and the wharf freight handler the work at these ports is seasonal which is not the case with the ordinary railway freight handler. It has become a fairly generally accepted practice for seasonal workers to receive a somewhat advanced hourly rate because the opportunity to work is less. Taking into consideration all of the circumstances in connection with the Montreal wharf case, we have come to the conclusion that the base rate ought to be increased to 57 cents per hour with the prevailing extra 5 cents hourly for work performed between 7 p.m. and 7 a.m. to stand. Upward adjustments to maintain existing differentials are in order. Any individual difficulty can be settled by further joint application.

The question of night differential does not come up at Saint John since the practice at that port is to maintain two separate gangs. In so far as that port is concerned, the basic wage should be increased to 57 cents with no provision for night work differentials. Upward adjustments to maintain existing differentials will follow.

As to claims for overtime rates and conditions to conform with those extended to longshoremen and differentials for handling

certain commodities, we do not feel justified in directing these. After all, this Union subscribed to an agreement to maintain working conditions as they existed until the proclamation of peace. We have in spite of the agreement granted an increase in wage rates. The principle in the circumstances here we do not think should be extended beyond that, merely because another class of workers have different conditions.

As to the claim for vacations with pay, we have dealt with that subject in a general way in the case of Division 4. However desirable the condition may be, its basic foundation is upon the principle that the overworked human machine should have a period of rest in the interests of productivity and the workers' well being and health. The workers concerned here are seasonal workers. As far as the employing Railway Companies are concerned these workers' services are not in demand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

There will be finding and direction with increases effective June 22, 1943.

September 30, 1943.

Re: Montreal Cottons Limited and United Textile Workers of America, Local 100 (Valleyfield, Quebec)

Reasons for Decision

This is an appeal from finding and direction of the Quebec Regional Board. The Union is seeking an order directing payment of full cost-of-living bonus, a ten cent per hour general wage increase, vacations with pay and certain minimum starting rates.

In the Montreal Tramways' case we laid down the principle that before this Board would deal with any application brought by a Union on behalf of workers, the Union would have to establish its clear right to represent the majority of the workers and establish it by legal means.

The Company denies that the Union here represents the workers. The Union quite properly is presently in the process of establishing its status before a Conciliation Board under the Chairmanship of the Honourable Mr. Justice Savard. Undoubtedly in some manner the report of the Conciliation Board will deal with the questioned status of the appellant Union.

In the interests of orderly procedure for all workers and Unions we regret that we must adhere to the position previously taken in the Montreal Tramways' case. To do otherwise would unquestionably open the Board's procedure to all manner of abuse. Before invoking the offices of the Board a Union whose status is not admitted must establish the same by legitimate means.

In passing it should be pointed out to the Union that in order to obtain for the workers whatever increases in wages or changes in working conditions are in order it must make out its case under P.C. 5963, having in mind particularly Sections 25 and 29. Mere general statements are of little help to a Board called upon to adjudicate on the matter.

Accordingly, with regret, we must dismiss the appeal but without prejudice to any subsequent application to the Regional Board by the Union when it has definitely established its status by the process it is now properly undertaking before Mr. Justice Savard or by any other legal process. October 5, 1943.

Re: Dominion Textile Company Limited and United Textile Workers of America (Local 102, Montreal, Que.)

Reasons for Decision

This is an appeal from the Quebec Regional Board.

The same considerations obtain as in the Montreal Cottons' case. We understand from the records that the status of the appellant union is in process of being determined by a Board of Conciliation under the Chairman-

ship of the Honourable Mr. Justice Savard. The Union's status is denied by the Company.

Accordingly, the same disposition of the matter must be made as in the Montreal Cottons' appeal. The appeal will be dismissed without prejudice to any further proceedings before the Regional Board by the Union when its status has been determined.

October 5, 1943.

Re: Dominion Tar & Chemical Company, Limited and Local 174, United Gas, Coke and Chemical Workers of America (CIO)

Reasons for Decision

The parties are in agreement, subject to approval by the War Labour Board, with respect to payment of a 3 cent and a 5 cent premium respectively for time worked on the afternoon and night shifts and the granting with pay of the six public holidays mentioned in P.C. 4671. The Regional Board for Ontario, by decision of July 23, 1943, declined the application for approval. The company appeals from the decision.

Off-shift differentials are not an unusual working condition in modern industry. They compensate the worker deprived of many of the amenities of social and family life by having to work outside the usual daytime working hours. The Board has expressed its views on the subject in the Ford Motor case (decisions dated April 19, 1943, and August 31, 1943*) and we are of opinion that permission should be given here to pay shift workers 3 cents per hour for time worked on the afternoon shifts beginning at 3 p.m. and 4 p.m., and 5 cents per hour for time worked on the night shifts

beginning at 11 p.m. and midnight. The premium is not to be included in computing overtime. Finding and direction should issue with effect retroactive to the date of the collective agreement, namely June 16, 1943.

In reference to the other question involved, we note that section 42 of the agreement provides holidays with pay seemingly in accordance with the pattern of the Board's decision bulletin No. 17, although the record does not indicate that the plan has received the approval of the Regional Board. Such approval is of course necessary, unless the plan was in operation prior to November 15, 1941. In addition to such holidays with pay, the company desires permission to pay for time not worked on the six statutory holidays. Here again, permission depends upon whether a case has been made under Section 29 of the governing Order in Council P.C. 5963. We are of opinion not only that a case has not been made out, but also that to give approval to this branch of the application would be inconsistent with the purpose and spirit of the Order.

To the extent indicated, the appeal is allowed and findings and directions will issue accordingly.

October 8, 1943.

Re: John Inglis Company Limited and United Steel Workers of America, Local 2900

Reasons for Decision

Prior to November 15, 1941, this Company was paying a 5 cent hourly premium to employees working regularly on the night shift. With increasing production, a 3-shift operation was adopted largely on a rotating basis. By finding and direction of July 29, 1943, the Regional War Labour Board for Ontario refused permission to pay the premium to workers who came on the night shift by rotation. Meanwhile it continues to be paid to the minority of night shift workers who are on the "frozen" shift. This is an appeal from the Regional Board's decision. We understand

that by "night shift" the application refers to the third shift, commencing at 11 p.m. and ending at 8 a.m.

Night work is inconvenient to a worker who alternates from day shift to night shift as it is to one who is permanently engaged on the night shift. We can perceive no valid reason why it should be withheld in the one case, while being paid in the other. We refer to the Board's decision in the Ford Motor case (LABOUR GAZETTE, May, 1943, page 585).

The appeal is therefore allowed.

October 8, 1943.

* L.G., May, 1943, p. 585; Oct., p. 1342.

Re: Pattern Makers' Association of Montreal and Vicinity and Various Employing Companies in the Montreal Area

Reasons for Decision

This is an appeal from the Quebec Regional Board by leave granted July 22, 1943.

The application was for an increase in the minimum basic rate and for payment to pattern makers in various plants of the full cost-of-living bonus.

The Quebec Board made a definite finding of fact that after consultation with every employer concerned it had reached the conclusion that the prevailing wage rates were fair and reasonable. On considering the matter since the argument we are unable to conclude that the Quebec Board erred in its finding.

As to the application for full cost-of-living bonus, P.C. 5963 does not contemplate that there should be different rates for different classes of workers in the same industry. The pattern makers cannot have a different rate of cost-of-living bonus from the machinists. It does appear that the pattern makers have already benefited by increases in cost-of-living bonus generally in some of the industries concerned since this application was commenced. No doubt the Quebec Board took the same view as we do.

The appeal must be dismissed.

October 8, 1943.

Re: Provincial Transport Company and Local 1157, Amalgamated Association of Street, Electric Railway and Motor Coach Operators of America

Reasons for Decision

This is an appeal from the Quebec Regional Board on the one question of vacations with pay. The parties entered into an agreement as of May 1, 1943, for the period of one year which received the approval of the Regional Board with this one exception.

The relevant provisions in the agreement with respect to vacations with pay are as follows.

With respect to bus operators:

"One week's vacation with pay will be granted all drivers who have been in the Company's service after one year's continuous service. For each added year of continuous service, an additional day with pay will be granted until a maximum of 14 days has been reached. Vacations with pay will consist of 7 or more consecutive days at the rate of pay the driver is receiving at the time he takes his holidays, but the minimum pay for a week's vacation will be \$25.

For instance:—

Drivers with 1 year's seniority or more will receive 7 days' vacation with pay.

Drivers with 2 years' seniority or more will receive 8 days' vacation with pay.

Drivers with 3 years' seniority or more will receive 9 days' vacation with pay.

Drivers with 4 years' seniority or more will receive 10 days' vacation with pay.

Drivers with 5 years' seniority or more will receive 11 days' vacation with pay.

Drivers with 6 years' seniority or more will receive 12 days' vacation with pay.

Drivers with 7 years' seniority or more will receive 13 days' vacation with pay.

Drivers with 8 years' seniority or more will receive 14 days' vacation with pay.

Fourteen days is the maximum holiday period allowed any driver.

Vacations are to be selected by seniority and will be granted by the Department Head during the course of the year as business conditions permit."

With respect to garage employees:—

"One week's vacation consisting of 7 days with 54 hours pay will be granted all Garage Employees who have completed one year's continuous service with the Company.

For instance:—

After 1 year's continuous service 7 days with 54 hours' basic pay.

After 2 years' continuous service 8 days with 61½ hours' basic pay.

After 3 years' continuous service 9 days with 69½ hours' basic pay.

After 4 years' continuous service 10 days with 77½ hours' basic pay.

After 5 years' continuous service 11 days with 85 hours' basic pay.

After 6 years' continuous service 12 days with 92½ hours' basic pay.

After 7 years' continuous service 13 days with 100½ hours' basic pay.

After 8 years' continuous service 14 days with 108 hours' basic pay.

Fourteen days is the maximum holiday period allowed any garage employee.

Vacations are to be selected by seniority and will be granted by the Department Head during the course of the year as business conditions permit."

We have already in a previous decision (Division No. 4 case) indicated that the Boards are not bound to follow slavishly Directive Bulletin No. 17 where means of comparison are available. D.B. 17 was intended primarily as a wartime directive for

vacations with pay schemes where the comparative principle did not exist.

We find in the scheme proposed here nothing of an unreasonable character and we find that similar vacation with pay schemes are already in existence in this particular business.

We feel that the appeal should be allowed and those parts of the agreement dealing with vacations with pay should receive approval.

Finding and direction accordingly.

October 8, 1943.

Re: Colonial Weaving Company Limited, Peterborough, Ontario

Reasons for Decision

This is an appeal from the Ontario Regional Board with respect to the inauguration of a vacation with pay plan.

The Ontario Board authorized vacations with pay—one week's vacation in accordance with Decision Bulletin 17, but felt obliged to deny the Company's request that two weeks' vacation should be granted to employees having at least five years' service.

We have tried to point out before that D.B. 17 is not regarded by us as absolutely mandatory on the Regional Boards—Provincial Transport Company case and Rogers Majestic Limited case. A Regional Board is quite entitled to deal with the matter on a realistic

comparative basis if reasonable means of comparison exist.

In this particular case a survey of the Peterborough district reveals that at least eight other companies have vacations with pay plans in the precise terms here applied for. We think it would be rather unreasonable to deny employees of this Company with five years' service a condition of work that prevails in the district for employees of many other companies in the same district.

The appeal should be allowed. However, the appellant will be required to apply the conditions stated in Decision Bulletin No. 17 to the hourly rated employees who will be receiving two-week vacations.

Finding and direction accordingly.

October 12, 1943.

Re: Holt, Renfrew & Company, Limited

Reasons for Decision

The Company, on leave granted by the Regional Board for Ontario, appeals from a decision refusing approval of a non-contributory life insurance plan. The application was approved by the Manitoba and Quebec Boards. It provides benefits of \$500 in the case of employees with less than 5 years' service and \$1,000 in the case of other employees. The appellant has no other type of welfare plan.

The basis of the Ontario Board's refusal is that the employees are not called upon to contribute at least 40 per cent of the premium. While we agree that there are good general reasons for the principle of contribution in

employee welfare plans, we are of opinion that in the circumstances of this case and in view of the reasonableness of the amounts involved, the appeal should be allowed. We refer to our decisions in the following cases: Lake of the Woods Milling Company, September 8, 1943; Viceroy Manufacturing Company, September 9, 1943.

It should be noted that our jurisdiction does not extend to "salaried officials" and that this decision is no assurance that the expense involved will be approved by the taxation authorities as a deduction from the company's income.

October 15, 1943.

Re: Robert Daniel McMurchy (Regina, Sask.) and Elizabeth Restall

Reasons for Decision

This is an appeal from the Regional Board for Saskatchewan. The only matter involved is whether the employer-appellant, who was not paying a cost-of-living bonus on November 15, 1941, was obligated to payment of the bonus by the Board's general order dated August 4, 1942 (*The Canada Gazette*, vol. 76, No. 60).

The appellant, though a professional man (a barrister and solicitor) is nevertheless an

"employer" within the scope of Order in Council P.C. 5963, and section 33 (2) lays down the general proposition that an employer shall commence the payment of a cost-of-living bonus, if required to do so by a general order of the National War Labour Board. A general order was made and a bonus of 60 cents weekly or 2.4 per cent of weekly wage rates became payable effective from the first payroll period beginning on or after August 15, 1942.

The cost-of-living bonus is a periodic supplement to wages, distinct and separate from the basic wage rate. The employer, as is the case here, may have increased wages, and may perhaps rightly contend that the increase has more than compensated his employee for the increase in the cost of living; but the only circumstances for which the Board may exempt him from payment of the mandatory bonus is financial inability to pay, a basis upon which the appeal is, of course, not argued.

The range of salary rates for both junior and senior stenographers, which the appellant had confirmed by the Regional Board, are expressly

termed "basic", i.e., they are exclusive of the cost-of-living bonus; see section 15 (1) (i).

In support of the appeal, the appellant's brief refers to sections 62 and 14 of the Order. Section 62 applies only in the special case mentioned, namely, where the Board directs an increase in a Canadian wage rate to bring it up to a rate prevailing outside of Canada; it has no application here. As to section 14, it has not been shown that the provisions of the Wartime wages control order are impossible of application to law offices.

We must dismiss the appeal.

October 21, 1943.

Re: RCA Victor Company, Limited (Montreal, Quebec) and Local 1028-B, International Brotherhood of Electrical Workers

Reasons for Decision

The Union applies for leave to appeal from a decision of the Regional Board for Quebec. The application was for wage increases in most classifications, minimum starting rates, periodic increases for beginners and certain working conditions including punitive double time on Sundays and holidays. The Regional Board directed time and one-half for work done on Sundays and holidays, and approved some increases as well as the hiring rates and upward automatic adjustments for beginners except in the woodworking plant located at Verdun. In refusing to extend increases to workers in what was formerly the Company's cabinet making department, the Regional Board acceded to the argument that further labour costs would place this branch of the Company's operations in a disadvantageous competitive position. This rather novel form of the plea of inability to pay appears to have been the basis of the decision appealed from. The appeal involves a question of principle which we believe warrants consideration by the National Board and we think leave should be granted.

On the punitive rate for work done on Sundays and holidays, we are of opinion the decision should not be disturbed. It is true the rate is being paid in one of the two comparable plants, but time and one-half is the rule in the other and the exigencies of war-time production should in our view tend to reduction of penalty overtime rates. With respect to wage adjustments in the woodworking department, the Union wants the application of the hiring conditions now in effect in the main plant and a general 10 per cent increase in addition. The matter was not quite put that way before the Regional Board where specified increases were asked for designated classifications. The Company's con-

tention is that its present rates are higher than the rates called for by the decree relating to the furniture industry under the Collective Agreement Act (R.S.Q., 1941, chapter 163) and that, although it is at the moment manufacturing few radio cabinets, it must in effect meet the competition of furniture manufacturers. In other words, the argument is that for the purposes of the comparison to which the Board must have recourse in the application of section 25 of P.C. 5963, these rates must be looked at alongside the rates prevailing for similar classifications in the furniture industry rather than those in the electrical equipment industry. The solution of course must be found in the record; we have no comparative basis in either industry upon which a general increase can be ordered or the beginners' hourly rate for men increased from 35 cents to 40 cents.

With respect to periodic increases to beginners in the main plant the Regional Board gave approval to the following:—

"Three months from the date of hiring, all new operators are to be granted an automatic increase of .05 per hour, if their services are satisfactory—and if they are to be retained.

"At the end of an additional six-month period, an employee's progress will be reviewed and consideration given to a further increase within the range of rates in his job classification if, in the opinion of the Company, it is merited."

We can understand that the withholding from the Verdun plant of this provision for automatic upgrading is likely to be a cause of discontent and in the exercise of the somewhat wider discretion afforded us by section 29 we have come to the conclusion that it should be made applicable to the workers in the Verdun plant. On the question of ability to pay, we are of opinion that the Company cannot isolate the woodworking department from the rest of its operations.

A goodly portion of the workers in the plant affected have long since qualified as beginners under the terms of clause 6 of the parties' collective agreement. The rate of those who are receiving less than what would have come to them under the terms of the above quoted excerpt from the Regional Board's decision should be brought up. The Union and the Company will undoubtedly be

able to come to an agreement in implementing this decision. In the event of difficulty, they may apply to this Board for further direction.

Our decision may render necessary certain upward adjustments in some of the other classifications; application for these must be submitted to the Regional Board.

To the extent indicated, the appeal is therefore allowed.

October 15, 1943.

Re: Union Gas Company of Canada Limited on behalf of Windsor Gas Company Limited and National Union of Natural Gas Workers

Reasons for Decision

This is an appeal from a decision of the Ontario Regional War Labour Board of July 5, 1943. The original application was made by the Company for authorization to increase rates to certain of its employees. The Regional Board required the Company to notify the Union of its application. As a result the Union put in an application of its own asking for increases in a higher amount for all employees belonging to the Union. New overtime conditions, holidays with pay and increase of cost-of-living bonus were also applied for. No appeal is taken except on the matter of wage increases, cost-of-living bonus and effective date from which increases were to apply.

For some reason best known to itself, and although it invited a controversy, the Regional Board issued its order in the form of an authorization and not a direction. On the appeal both parties treated the order as a direction to pay rather than a mere authority. We propose to treat it the same way and will declare it a direction if that should prove necessary.

The wage increase granted was 5 cents per hour to all employees eligible to belong to the Union and was to be effective from the 1st day of July, 1943. The original application by the Company was dated February 11, 1943, and the evidence discloses that the parties had been in negotiation for some time prior to that. In arriving at its decision on wages it seems clear that the Regional Board made a comparison with the rates paid by the Windsor Utilities Commission although its decision did not bring the rates equal except in some categories. It appears to have given some effect to the Company's argument that Gas Company rates were more comparable. We are also given to understand that the Regional Board appointed an investigator to look into the situation on the ground. Sitting in appeal

we are unable to say that the Regional Board acted on a wrong principle.

On the question of increasing the cost-of-living bonus, we cannot but conclude that the Regional Board acted on some principle completely foreign to P.C. 5963. Neither the National Board nor the Regional Boards can increase cost-of-living bonuses as a matter of whim and caprice. As we have pointed out before in the Dominion Fire Brick and Clay Products Limited case, the only jurisdiction for adjustment of cost-of-living bonus available to a Regional Board is to be found in the proviso at the end of Section 34 (3). The adjustment must be one that is *made within an industry*. Comparison with industry of a different character is not a factor. Accordingly the direction of the Regional Board increasing the cost-of-living bonus must be set aside.

We see no reason why the Union's contention as to retroactivity should not prevail. However, neither should the Company be penalized by having to pay a further increase on top of the one which it already made on February 1, 1943. Accordingly, we sustain the Regional Board on the matter of the 5 cent increase awarded and make it retroactive to February 1, 1943, so that any increases made effective that day are to be regarded as part of the general increase now authorized with the proviso of course that in cases where more than 5 cents an hour increase were actually made the worker is to suffer no deduction in his rate.

As to the upward adjustment of cost-of-living bonus the appeal is allowed and the Company is directed to continue paying the present cost-of-living bonus subject to any further general order of this Board.

Finding and direction accordingly.

October 26, 1943.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the *LABOUR GAZETTE* for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Report of Royal Commission on Western Coal Mines

THE Hon. Humphrey Mitchell, Minister of Labour, announced on November 20 that the Royal Commission appointed to investigate the demands of the coal miners of Western Canada, which gave rise to the recent strike by some 8,500 men belonging to District No. 18, United Mine Workers of America, has directed an increase of \$1 per day in wages to persons engaged in manual employment in the operation of underground coal mines in the Provinces of Alberta and British Columbia, and two weeks' holidays with pay at basic daily wage rates for such employees who between April 1 and September 30 in any year have been in the employment of any one employer for at least 12 consecutive months and have not been absent from work for more than 90 days (including Sundays, holidays and

vacation), during that time except through causes beyond their control. The direction of the Commission applies to all day wage, contract and other manual workers who are not above the rank of foreman or comparable rank; and becomes effective as of and from November 1, 1943, in respect of any employees who were at work on that date and as of and from the date of resumption of work in the case of all other employees.

The specific claims put forward by the United Mine Workers of America were for an increase of \$2 a day for all day wage and contract employees; time and one-half and rate and one-half for the sixth day's work in any one week; and two weeks' holiday with pay at the basic wage rate after 12 months' employment. (See also page 1520.)

As the result of conferences between the Minister of Labour and Departmental officers with representatives of the U.M.W.A. during the course of the recent strike, the Royal Commission was given the powers of a Regional War Labour Board under the provisions of the Wartime Wages Control Order (Order in Council P.C. 5963). The Commission was composed of Hon. Mr. Justice G. B. O'Connor, of Edmonton, chairman, Mr. T. W. Laidlaw, K.C., of Winnipeg, and Mr. L. D. Hyndman, K.C., of Edmonton.

The unanimous report of the Commission points out that its directions will necessitate an increase in the selling price of coal or financial assistance to the operators to keep the mines open.

Although the daily wage rates of the miners appeared to be high, ranging from \$5.56 and \$5.61 for surface workers in the bituminous and sub-bituminous mines, respectively, up to \$9 and \$9.50 per shift for contract miners, the Commission found that the annual earnings of those employed in mining operations were actually much lower than might be expected. The average annual earnings of the Alberta and British Columbia coal mine workers in 1942 (excluding those who worked less than 175 days) were \$2,115.50. In Cape Breton, N.S., the 1942 average earnings of the face workers or contract miners employed in the mines of the Dominion Coal Company were reported as \$2,488.20.

Recent Proceedings under the Industrial Disputes Investigation Act

IN the month of October five Boards of Conciliation and Investigation submitted their reports in connection with the following disputes.

(1) Between the Burgess Battery Company, Niagara Falls, Ont., and its employees, members of the United Gas, Coke and Chemical Workers of America.

(2) Between the Canadian Furnace, Limited, Port Colborne, Ont., and its employees, members of Local 1177, United Steelworkers of America.

(3) Between the Canadian Kellogg Company, Limited, Sarnia, Ont., and its employees, members of Local B530, International Brotherhood of Electrical Workers.

(4) Between the United Shipyards, Limited, Montreal, P.Q., and its employees, members of Local No. 12, Boilermakers and Iron Shipbuilders Union of Canada (C.C.L.).

(5) Between Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 2982, United Steelworkers of America.

The texts of the reports of the Boards will be found at the conclusion of this statement.

Applications Received

During the month of October eleven applications* for the establishment of Boards of

Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

(1) From employees of Horseshoe Lake Mining Company, Ormiston, Saskatchewan, members of Local No. 2, Sodium Sulphite Workers Union (C.C.L.). The dispute, which concerns the negotiation of a collective labour agreement, was said to affect 36 employees. At the end of the month, the Department was awaiting the company's reply to the application.

(2) From employees of Canadian Vickers, Limited, Montreal, P.Q., members of Local 13, Boilermakers and Iron Shipbuilders' Union of Canada (C.C.L.). The dispute, which developed out of the union's request for the negotiation of a collective labour agreement, was said to affect 4,575 employees. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(3) From employees of Canadian Car Munitions, Limited and the Allied War Supplies Corporation, Montreal, P.Q., members of Local 23216, Ammunition Workers Union of Cherrier (A.F. of L.). The dispute, which was said to affect 6,584 employees directly and 600 indirectly, concerns the union's request for the check-off of membership dues.

(4) From employees of Shawinigan Chemicals, Limited, Shawinigan Falls, P.Q., members of Local 357, International Moulders and Foundry Workers' Union of North America. The dispute, which concerns union recognition,

*By P.C. 5963, the National and Regional War Labour Boards are specially charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

was said to affect 1,547 employees directly and 2,200 indirectly. Following the receipt of the application for the establishment of a Board, Mr. Bernard Rose, K.C., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(5) From employees of Foundation Maritime, Limited, members of Local 565, International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America. The dispute, which arose out of a request for union recognition and the negotiation of a collective labour agreement, was said to affect 1,600 employees. The application was returned for revision and at the end of the month had not been resubmitted.

(6) From employees of Harry Hayley, Hurdman's Road, Ottawa, members of Local No. 1, Ottawa General Workers' Union (C.C.L.). The dispute, which concerns the negotiation of a collective labour agreement, was said to affect 42 employees. On October 30, Mr. Bernard Wilson, Industrial Relations Officer, Department of Labour, Ottawa, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(7) From employees of Grover Mills, Limited, Montreal, P.Q., members of the National Clothing Workers' Union, Inc. The dispute which developed out of a request for union recognition, the negotiation of a collective labour agreement and the dismissal of an employee of the company, was said to affect 195 employees directly and 200 indirectly.

(8) From employees of the Dominion Rubber Company, Limited, Kitchener, Ont., members of Local 80, United Rubber Workers of America. The dispute, which arose out of a request for the negotiation of a collective labour agreement, embodying provision for a closed shop, check-off, and holidays, with pay, was said to affect 1,000 members.

(9) From employees of Wonder Bakeries, Limited, Toronto, Ontario, members of Local No. 1, Amalgamated Bakers and Confectioners' Union (C.C.L.). The dispute, which was said to affect 114 employees directly and 80 indirectly, concerns the negotiation of a collective labour agreement. At the end of the month the employer's statement in reply to the application was awaited.

(10) From employees of Purity Bread, Limited, Toronto, Ontario, members of Local No. 1, Amalgamated Bakers and Confectioners' Union (C.C.L.). The dispute, which concerns the negotiation of a collective labour agreement, was said to affect 86 employees directly and 60 indirectly. The employer's statement in reply to the application was awaited at the end of the month.

(11) From employees of Purdy Brothers, Limited, Halifax, N.S., members of Local No. 1, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.). The dispute arose out of the alleged refusal of the company to enter into a collective labour agreement with the union, and was said to affect 80 employees.

Boards Established

On October 13, a Board of Conciliation and Investigation was established to deal with a dispute between Searle Terminal Limited, Fort William, Ontario, and its employees, members of Local 650, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (LABOUR GAZETTE, December, 1942, page 1378). On October 13, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ontario, who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been unsuccessful in bringing about a settlement and recommended that a Board of Conciliation and Investigation be established. At the end of the month Messrs. A. J. Wickens, K.C., Moose Jaw, Saskatchewan and William A. Johnston, Winnipeg, Manitoba, had been appointed on the nomination of the employees and employer respectively and they were conferring with a view to making a joint recommendation of a person to act as third member and chairman of the Board.

A Board of Conciliation and Investigation was established on October 22, to deal with a dispute between the Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ontario, and its employees, members of Local 189, United Rubber Workers of America (LABOUR GAZETTE, October, 1943, page 1355). On October 21, Mr. J. P. Nicol, who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute reported that he had been unable to effect a mutually satisfactory settlement of the dispute and recommended that a board be established. Messrs. F. Andrew Brewin and J. J. Robinette, both of Toronto, Ontario, were appointed members of the Board on the nomination of the employees and employer respectively. At the end of the month the two members were conferring with a view to making a joint recommendation of a person to act as third member and chairman of the Board.

On October 5, a Board of Conciliation and Investigation was established to deal with a dispute between the Anglo-American Telegraph Company, Montreal, P.Q., and its employees, members of Local 11, American Com-

munications Association (C.I.O.) (LABOUR GAZETTE, September, 1943, p. 1224). Following receipt of the application for the establishment of a Board, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

On October 5 the Commissioner reported that the circumstances warranted the establishment of a Board and recommended accordingly. Mr. Guy M. Desaulniers, Montreal, Quebec, was appointed a member of the Board on the nomination of the employees. On October 28, the manager of the company advised the Department that the company had agreed to recognize Local 11, American Communications Association (C.I.O.) as the bargaining agent of the employees and suggested that in view of this development there would be no necessity for the company to nominate a person to act as member of the Board. At the end of the month the Department was awaiting information as to the consummation of an agreement.

A Board of Conciliation and Investigation was established on October 13, to deal with a dispute between Scott Tool and Machine Company, Limited, Montreal, P.Q., and its employees, members of Aircraft Lodge 712, International Association of Machinists (LABOUR GAZETTE, Oct., 1943, page 1356). On October 1, Mr. Bernard Rose, K.C., Montreal, Quebec, was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner reported on October 13, that it was impossible to compose the differences between the company and the union and therefore recommended the establishment of a Board to deal with the dispute. Mr. James Somerville, Montreal, Quebec was appointed a member of the Board on the nomination of the employees but as he was unable to act, Mr. Paul Fournier was appointed as the employees' representative. Mr. George S. Thom, Ville la Salle, Quebec, was appointed on the nomination of the employer, and at the end of the month, he and Mr. Fournier were conferring with a view to recommending a person to act as third member and chairman of the Board.

On October 6, a Board of Conciliation and Investigation was established to deal with a dispute between the Dominion Rubber Company, Limited, St. Jerome, Quebec, and its employees, members of the St. Jerome Rubber Workers' Federal Union, No. 144 (T. & L. C.) (LABOUR GAZETTE, Oct., 1943, p. 1356). Mr. F. Lafortune, Industrial Relations Officer, Department of Labour, Ottawa, who had been appointed an Industrial Disputes Inquiry Commissioner, reported on October 4, that he

had been unable to effect a satisfactory settlement and recommended that a Board be established. The personnel of the Board is as follows: Honourable Justice Alfred Savard, Montreal, Quebec, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. Paul Fournier and George B. Foster, K.C., both of Montreal, Quebec, appointed on the nomination of the employees and employer, respectively.

Other Boards Fully Constituted

The Board of Conciliation and Investigation established on September 23, to deal with a dispute between Ayers, Limited, Lachute, Quebec, and its employees, members of Local 9, United Textile Workers of Canada (T. & L.C.) (LABOUR GAZETTE, Oct., 1943, p. 1357) was fully constituted on October 18. The personnel of the Board is as follows: The Honourable Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from Messrs. D. A. Paterson, Montreal, Quebec, and Frank Querat, Cornwall, Ontario, the employer's and employees' nominees respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

On August 21, Mr. Bernard Rose who had been authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the Dominion Rubber Company, Limited (Papineau Plant), Montreal, Quebec, and its employees, members of Distillery, Rectifying, Brewery and Wine Workers International Union (LABOUR GAZETTE, Sept., 1943, p. 1225) forwarded an interim report in which he advised that the parties to the dispute had agreed to the taking of a representation vote and submitted a copy of the form of ballot agreed upon. Subsequently, the representative of the union requested that the application be withdrawn, but reserved the right to renew it at a later date. A new application was submitted on October 4, and Mr. Rose was authorized to continue his investigation as Industrial Disputes Inquiry Commissioner and at the end of the month he was continuing his efforts to effect a settlement of the dispute without recourse to board procedure.

An application for the establishment of a Board of Conciliation and Investigation was received from employees of the Butterfly Hosiery Company, Limited, Drummondville, Quebec, members of the Full-Fashioned Hosiery Association, Inc. (LABOUR GAZETTE, Oct., 1943, p. 1356). On October 4, Mr.

Bernard Rose, K.C., Montreal, Quebec, was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner reported that the dispute did not come within the jurisdiction of the Industrial Disputes Investigation Act as amended, and recommended that the application for the establishment of a Board be denied. The interested parties were therefore advised that a Board of Conciliation and Investigation would not be established.

On October 7, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ontario, was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the General Engineering Company (Canada), Limited and its employees, members of Local No. 1, Chemical Workers of Canada (C.C.L.) (LABOUR GAZETTE, Oct., 1943, p. 1356).

Settlements

On October 11, the Department was advised that an agreement had been signed between Prairie Airways Company, Limited (Aircraft Division), Moose Jaw, Saskatchewan, and its employees, members of Local 2688, United Steelworkers of America (LABOUR GAZETTE, July, 1943, p. 923). Accordingly, the application for the establishment of a Board of Conciliation and Investigation was withdrawn.

Strike Votes

On July 29, the Department received the majority and minority reports of the Board of Conciliation and Investigation established to deal with a dispute between the J. Ford Company, Limited, Portneuf Station, and its employees, members of the National Catholic Syndicate of Paper Workers of Portneuf Station (LABOUR GAZETTE, Aug., 1943, p. 1111). The Department was advised by the company on August 7, that the majority report of the Board, which recommended that a representation vote of the employees be taken under the supervision of the Department of Labour to determine the bargaining agency of the employees, was not acceptable, but that the company concurred in and accepted the recommendations contained in the minority report, i.e., that an Employees' Committee of five members be established as the bargaining agency between the employees and the company. The union, having been informed of the Company's rejection of the majority report of the Board, requested that a strike vote be taken in accordance with the provisions of

Order in Council P.C. 7307. Further efforts by Mr. L. Pepin, Industrial Relations Officer, to bring about an amicable settlement of the dispute were unsuccessful and a strike vote was conducted on October 21, resulting in 95 voting in favour of going on strike and 33 against.

On July 11, the Department received the report of the Board of Conciliation and Investigation established to deal with a dispute between Canada Packers, Limited, St. Boniface, Manitoba, and its employees, members of Local 216, United Packinghouse Workers of America (LABOUR GAZETTE, Aug., 1943, p. 1102). The department was informed on July 27, that the union could not accept the recommendation of the Board. The company in its reply drew attention to the recommendation of the Board, namely, "that a proper approach be made to the officials of the company by persons competent to conduct negotiations" and stated that it would be glad to discuss all matters with such persons. On August 17, a request for the taking of a strike vote of the employees of the company was received by the Department from the officers of Local 216, United Packinghouse Workers of America, as the Company had refused to negotiate with a Committee of the Union including one particular official. All efforts to bring about a settlement of the dispute having failed, Mr. H. S. Johnstone was instructed to conduct a strike vote of the eligible employees. The vote was taken on September 29, and resulted in 916 voting in favour of going on strike, and 30 against, with 8 spoiled ballots. Subsequently, Honourable Justice Ewan A. McPherson, Winnipeg, Manitoba, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute and endeavour to assist the parties in reaching a settlement. After considerable negotiation between company and union officials, a memorandum of understanding in which the company agreed to recognize and deal with the union as the sole collective bargaining agency of the employees, while the Union officials agreed to exert their influence in preventing any stoppage of work in the plant, was signed. The memorandum also provided for the immediate taking of a representation vote which was subsequently authorized by Chief Justice McPherson. The vote was conducted on October 29 by Mr. H. S. Johnstone and resulted in a substantial majority for Local 216, United Packinghouse Workers of America.

Report of Board in Dispute Between the Burgess Battery Company, Niagara Falls, Ontario, and its Employees

On October 1, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Burgess Battery Company, Niagara Falls, Ontario, and its employees, members of the United Gas, Coke and Chemical Workers of America (LABOUR GAZETTE July 1943, page 921).

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ontario, chairman, appointed on the joint recommendation of the other two members, Colonel Hugh A. Rose, K.C., Welland, Ontario, and Drummond Wren, Toronto, Ontario, appointed on the nomination of the employer and employees respectively.

The texts of the report of the Board and the minority report follow:—

Report of Board

Re: Industrial Disputes Investigation Act, and re dispute between Burgess Battery Company, Niagara Falls, Ont., and employees, members of the United Gas, Coke and Chemical Workers of America.

To:

The Honourable Humphrey Mitchell, M.P.,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation and Investigation appointed by you to deal with the above dispute has now the honour to submit its report.

At the first meeting of the Board held in Niagara Falls on July 27, 1943, the union claimed that they had a majority of the total number of employees as paid-up members. As a result of the strike on the 22nd of January, 1943, the Canadian Director of the union tried to get in touch with the General Manager of the plant. His reception is disputed, but it is not disputed that the company still refuses to negotiate with the International representative or any other union representative as such.

The representative for the company stated that they doubted that the union had a majority. The union representative said they were prepared to stand or fall on the result of a representative vote and that they would withdraw if they did not get a majority. The company refused to consent to a vote and asked that briefs be filed. The meeting accordingly adjourned, pending the filing of a brief by the company by mail, until Wednesday, August 4, when an answer on behalf of the union was to be filed.

At the meeting on Wednesday, August 4, the union representative stated that he was

prepared to produce union cards to the members of the Board to be checked against the pay-roll, and that he was willing to abide by the result if the company would also undertake that they would negotiate if the results showed a substantial majority in favour of the union.

Counsel for the company informed the Board that neither he nor the local officers of the company had any authority to agree to such a check but that they were prepared to lay the matter before the Board of Directors of the parent company, which was to meet in Illinois on the 24th of August. The representative for the union agreed to postponement until after this date. In view of the possibility of settlement all parties agreed that it was not desirable for the union to file a reply to the brief at this stage.

Early in September, Counsel for the company communicated with the members of the Board and informed them that the company was not prepared to consent to the proposed check. No reason was given for this refusal. Upon being communicated with, the union representative stated that he desired to make no further representations to the Board but contended that a representative vote should be held forthwith.

Counsel for the company stated that he did not desire any further sittings of the Board but asked permission to file a further statement. This was agreed to by the Board. The statement contended that present conditions at the plant were abnormal, as there had been a temporary increase in the number of employees, a large percentage of whom were under 21 years of age, and that the future of the company should not be bound up by a vote of these employees. The Board feels that there is some weight to this contention. It, however, agrees with the contention of the union representative that there should be a representation vote forthwith, under the supervision of the Department of Labour, but that the vote of those employees under 18 years of age, if any, should be tabulated separately.

In reaching this conclusion, the Board has been influenced by the company's refusal to consent to a check of the union cards; by the fact that previous checks show a majority of union membership; and the willingness of the union to submit a sworn statement to the effect that they have an overwhelming majority of union membership in the plant.

If a representation vote is not agreed to by the company the Board has no further recommendation to offer. It does suggest, however, that if a vote does take place, that it would

be advisable to reassemble the Board to make recommendations upon the result of the vote.

All of which is respectfully submitted.

Dated this 27th day of September, 1943.

(Sgd.) Ian Macdonell,
Chairman.

(Sgd.) Drummond Wren,
Employees' Nominee.

Minority Report

In the matter of the Industrial Disputes Investigation Act and of a dispute between Burgess Battery Company, Employer, and its Employees, Members of the United Gas, Coke and Chemical Workers of America.

To the Honourable the Minister of Labour.

The application for the establishment of a Board of Conciliation and Investigation in this case, sets out as the grounds of the dispute upon which the application is based;

1. "Employees claim mass intimidation directed at Union" after alleging that the Company had discharged 169 employees.

2. "Management of Burgess Battery Company when requested refused to discuss union recognition and employees demand a vote be taken in the plant to determine this point."

As to 1, the Union at the first hearing at Niagara Falls withdrew this charge. It was shown that the Company on January 25, 1943, had received instructions to discontinue work on a special order for the United States Army Signal Corps and was obliged to lay off extra employees to the number of approximately one-half of its employees.

As to 2, Mr. Edminston, an organizer of the Union stated that the only approach he ever made to the Company was a telephone conversation and that no formal demand in person or in writing was ever made prior to the establishment of the Board.

I consider that such an approach was improper and such methods should not be encouraged.

Under these circumstances, it would appear there was nothing for the Board to consider and that the matters should have been referred back to the Honourable the Minister of Labour for further instructions.

The Company, in normal times, employed approximately 89 workers about equally divided between male and female.

By reason of increase of business in the first years of the war and the acceptance of the special order for the United States Army Signal Corps the Company had increased its employees so that on January 15, 1943, the Company had 374 employees of whom 128 were males and 246 were females, an

increase of approximately four and one-half times its normal requirements. The new help consisted of approximately fifty per cent under the age of twenty-one years ranging from 15 years upwards.

It would appear to be most unfair that the Company and its future should be bound up in a decision made by these employees of school boy and school girl age, hired as they are only by reason of a temporary situation.

I understand that my colleagues are recommending that a vote of the employees be taken in this matter. I am of the opinion that before any vote, proper steps should be taken to safeguard the interests, both of the Company and its permanent employees, by eliminating such infants and temporary employees from a right to participate in such a vote.

This Company has carried on business in Niagara Falls for twenty years and there has always existed the most harmonious relations between management and employees.

No suggestion or proof of any grievance on the part of the employees in working conditions has been made.

The only evidence submitted, by the Union as to membership was that of Mr. Edminston, a union organizer, who stated that on January 22, 1943, the union had as members a majority of the employees. No figure as to the number of members was given, and he refused to state the number of members, although pressed by me to do so.

Since January 25, 1943, up to the present time, the number of employees of the Company has been approximately 184. No evidence whatever was given by the union as to the number of employees it has as members at this time, and has failed to show that the union has a majority of the present employees of the Company as members.

Therefore considering that the grounds of dispute, upon which the application for the Board of Conciliation and Investigation was based, have been withdrawn and unsubstantiated, that no grievance in working conditions has been suggested, that the Union has failed to establish that it has as members a majority of the eligible employees of the Company at the present time, that approximately fifty per cent of the extra and temporary employees of the Company are under the age of twenty-one years, I recommend that no vote of the employees should be taken and that no recommendation for union recognition should be made in this case.

All of which is respectfully submitted.

Welland, Ontario, September 29, 1943.

(Sgd.) Hugh A. Rose,
Member of the Board.

Report of Board in Dispute Between the Canadian Furnace, Limited, Port Colborne, Ontario, and its Employees

On October 25, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Furnace, Limited, Port Colborne, Ontario, and its employees, members of Local 1177, United Steelworkers of America (LABOUR GAZETTE, July, 1943, page 921).

The personnel of the Board was as follows: His Honour Judge A. J. Gordon, Windsor, Ontario, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Messrs. J. J. Robinette, Toronto, Ontario, and Maxwell Sauder, Hamilton, Ontario, appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

Re: Industrial Disputes Investigation Act and re dispute between Canadian Furnace Limited, Port Colborne, Ontario, and its employees, members of Local 1177, United Steelworkers of America.

To the Honourable the Minister of Labour,
Department of Labour, Ottawa.

SIR,—The Board of Conciliation and Investigation established in this matter which Board is composed of His Honour Judge A. J. Gordon, Chairman, Maxwell Sauder, Esq., and John J. Robinette, Esq., held a meeting at Toronto on Thursday, October 14, 1943.

After the Board of Conciliation was constituted the Victoria Employees' Independent Union commenced proceedings in the Ontario

Labour Court against the Canadian Furnace Limited pursuant to the provisions of the Collective Bargaining Act, 1943, Ontario, Ch. 4, for certification as the collective bargaining agency for the employees of the Company.

Local 1177 of the United Steelworkers of America intervened in the proceedings in the Labour Court and opposed the application and also asked for certification. The judgment of The Honourable Mr. Justice Barlow in the proceedings in the Ontario Labour Court is reported in 1943 O.W.N. 576.

The Board is satisfied that on the argument before the Labour Court, counsel for Local 1177 of the United Steelworkers of America undertook not to proceed further with the application before this Board under the provisions of the Industrial Disputes Investigation Act and it would, therefore, appear that Local 1177 United Steelworkers of America does not desire to proceed with the matter further before this Board.

We, therefore, recommend that this Board be dissolved by the Minister of Labour without prejudice to the right of either party to take such proceedings in any tribunal as they may be advised.

All of which is respectfully submitted.

Dated at Toronto, this 14th day of October, 1943.

(Sgd.) A. J. Gordon,
Chairman.

(Sgd.) Maxwell Sauder,
Employees' Nominee.

(Sgd.) John J. Robinette,
Company's Nominee.

Report of Board in Dispute Between the Canadian Kellogg Company, Limited, Sarnia, Ontario, and its Employees

On August 8, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Kellogg Company, Limited, Sarnia, Ontario, and its employees, members of Local B.530, International Brotherhood of Electrical Workers (L.G., October, 1943, p. 1357).

The personnel of the Board was as follows: His Honour Judge James Parker, Toronto, Ontario, chairman, appointed on the joint recommendation of Messrs. J. J. Robinette and Cecil M. Shaw, both of Toronto, Ontario, the employer's and employees' nominees on the Board.

The Board's report follows:—

Report of Board

Re: The Industrial Disputes Investigation Act, and re dispute between Kellogg Construction Limited (Canadian Kellogg Company, Limited), Comstock Electric Company, Canada Electric Company, Ontario Electric Company, and members of Local B.530, International Brotherhood of Electrical Workers, Sarnia, Ont.

To the Honourable the Minister of Labour,
Department of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation and Investigation established in this matter, which Board is

composed of His Honour Judge James Parker, Chairman, Mr. Cecil M. Shaw, and John J. Robinette Esq., held a meeting at Sarnia on Saturday, October 2, 1943.

The applicant union was represented by Errol G. Russell, Secretary of Local B.530, I.B.E.W., Sarnia, and H. C. Tracy, International Representative I.B.E.W. The Canadian Kellogg Company Limited was represented by Mr. R. J. Wolf.

Mr. Tracy informed the Board that agreements had been made by the local union with Comstock Electric Company, Canada Electric Company and the Ontario Electric Company, leaving only the matter of Canadian Kellogg Company Limited and Local B.530 I.B.E.W. to consider.

Briefs were filed by the Company and by the local union, and the above representatives were heard. No question was raised as to working conditions, wages, etc. The local union wanted formal recognition as the bargaining agency for its members.

The Company contended that it could not fix or vary wages, etc., and that there was no need for an agreement, since the electrical work would likely be completed within sixty

days. The company also felt that it was restricted in its power to negotiate.

It appeared that virtually all the electricians employed by the company are members of Local B.530, I.B.E.W., Sarnia.

The Board met again in Toronto, and we recommend as follows:—

That the Company recognize Local B.530, I.B.E.W., Sarnia, Ontario, as the bargaining agent for the electricians employed by the Company in Sarnia, and that the parties forthwith commence negotiations with a view to the execution of a collective bargaining agreement between them.

The Board then adjourned, pending the negotiation of an agreement as recommended between the parties.

All of which is respectfully submitted.

Dated at Toronto this 6th day of October, 1943.

(Sgd.) J. Parker,
Chairman.

(Sgd.) Cecil M. Shaw,
Employees' Nominee.

(Sgd.) John J. Robinette,
Company's Nominee.

Report of Board in Dispute Between The United Shipyards Limited, Montreal, P.Q., and its Employees

On October 18, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between The United Shipyards, Limited, Montreal, P.Q., and its employees, members of Local 12, Boilermakers and Iron Shipbuilders Union of Canada (L.G., October, 1943, p. 1357).

The personnel of the Board was as follows: His Honour Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. D. A. Paterson and Guy M. Desaulniers, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Desaulniers. Mr. Paterson submitted a minority report.

The texts of the report of the Board and the minority report follow:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a Dispute between the United Shipyards, Limited, Montreal, employer, and its employees, members of Local No. 12, Boilermakers & Iron Shipbuilders Union of Canada (C.C.L.), Employees.

To The Honourable the Minister of Labour of Canada.

The Board of Conciliation to investigate the above stated matter was established by order of the Minister dated September 9, 1943. We, the undersigned, were appointed members of the Board on September 24, 1943. We took the prescribed oath on October 4 and sat on the 4th, 5th and 6th days of October, at Montreal, in the board room of the Builders Exchange, kindly put at our disposal by our esteemed colleague, Mr. Paterson.

We now beg to report as follows:

THE DISPUTE

The application for a Board is made by Local Union No. 12 of the Boilermakers and Ironmakers Union of Canada. It is dated August 26, 1943, following a strike vote said to have been held on August 23, 1943, in the Assistance Publique Hall, Montreal, but the application appears to have been sworn to on August 12, 1943.

The application states the nature and cause of the dispute as follows:

1. Recognition of the Boilermakers and Iron Shipbuilders Union of Canada Local 12; as the sole and exclusive bargaining agency of the employees of the United Shipyards with a union

close agreement *COVERING* as well the following additional conditions.

- a. Hours of work
- b. Overtime rates
- c. Wages and classifications
- d. And any other conditions affecting the employment of said employees.

2. That a government supervised vote be taken in the plant to determine the bargaining agency. (A letter has been sent by us to the Dept. of Labour at Ottawa of United Shipyards Ltd., to the effect that the Company is ready to recognize as the bargaining agency whatever union which will represent the majority of its employees.)

The efforts to adjust the dispute are described as follows in the application:

We have met the management of the Company but they are unwilling to negotiate a contract until there is determination of Union representing the majority of the employees of the United Shipyards Ltd., under these circumstances it has been impossible to bargain collectively with the employer. However, the employer is willing to negotiate, when the bargaining agency will be determined through a secret ballot under government supervision.

The Employer made the following reply to the application of Local 12.

UNITED SHIPYARDS, LIMITED
BICKERDIKE BASIN

MONTREAL, QUE., August 17, 1943.

Department of Labour,
Ottawa, Ontario.

Dear Sirs:

We have received copy of Form of Application for Establishment of a Board of Conciliation and Investigation submitted by Local Union No. 12, Boilermakers and Iron Shipbuilders Union of Canada.

We have been approached by this Union but have stated that we are unwilling to negotiate a contract with them until such time as the bargaining agency has been determined by a secret ballot under Government auspices.

We endorse the Union's desire to maintain the harmonious relationship presently existing between us.

Yours very truly,

UNITED SHIPYARDS LIMITED,
(sgd.) J. RANNIE,
Shipyard Manager.

It seems, therefore, that there is no real dispute between the Employer and Local 12; the Employer is willing and ready to make a collective agreement with any agency that its employees may choose to select; its official attitude is one of absolute neutrality. The real dispute—and a bitter one—is between Local 12 which is part of the Canadian Congress of Labour (the National Organization) and the International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America which is affiliated with the Trades and Labour Congress of Canada, a

branch of the American Federation of Labor (the International Organization). It is a conflict of jurisdiction, each organization claiming the control of the employees and the right to act for them collectively. The fight is between the national organization and the international organization; not between the national organization, which made and supports the application, and the Employer.

Therefore, the representatives of the international organization were admitted at the hearing of the Board, in spite of the objections of the national organization which were overruled.

The National organization presented to the Board a draft of the collective agreement which it had prepared and which it intends to propose to the Employer. The document was accompanied by the following letter:

BOILERMAKERS' AND IRON SHIP-
BUILDERS' UNION OF CANADA
LOCAL No. 12

1555 St. Catherine Street East

MONTREAL, QUEBEC

October 2, 1943.

Mr. Oscar L. Boulanger and
Members of the Board of
Conciliation and Investigation
sitting on the case of the
United Shipyards Limited.

Mr. Boulanger and Members of the Board:—

Attached hereto is a copy of a proposed agreement drafted and prepared by our organization.

We must say in fairness to the company that they have not refused to negotiate and have signified their willingness to arrive at a contract when we have proven to their satisfaction that we represent the majority of the employees.

We will have no objection to this being conducted under the auspices of the Board and we feel that it may have the effect of bringing about stable labour relations for the duration of the war.

Sincerely yours,

PRESIDENT EUGENE LEROUX,
SECRETARY-TREASURER H. GIRARD.

The Board declined to go into the examination of the proposed agreement, despite the protests of the national organization, for the following reasons:

1. The question of representation must be settled and the bargaining agent must be chosen before the collective agreement can be considered.

2. The dispute as described in the application for a Board is over the question of representation.

3. Wages, hours, working conditions are really matters for the War Labour Board which could not be bound by any recommendation of this Board on the subject.

APPEARANCES

For the National Organization:

Messrs. Alex. McAuslane, vice-president, Canadian Congress of Labour.
 Eugene Leroux, president, Boilermakers and Iron Shipbuilders Union of Canada, Local 12.
 Henri Girard, secretary-treasurer, Boilermakers and Iron Shipbuilders Union of Canada, Local 12.

For the International Organization:

Messrs. J. Wright and J. Arthur Charron, International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America.
 Oscar Boyer, International Brotherhood of Electrical Workers.
 Leopold Francoeur, International Brotherhood of Carpenters and Joiners.
 Onesime Renaud, International Brotherhood of Sheet Metal Workers.

For the Employer:

Mr. J. Rannie, shipyard manager.

PLANT AND PERSONAL

It appears that United Shipyards Limited, if not completely owned by the Government of Canada, is at least controlled by the Government. It is engaged in building ships and we need not emphasize the point that its production is essential to the successful prosecution of the war. The approximate grouping of workmen in the plant, outside of office employees, on October 1, 1943, according to figures supplied by Mr. Rannie, is as follows:—

APPROXIMATE GROUPING OF MEN AS AT OCTOBER 1, 1943

	C/H, L/H JOURNEYMEN	IMPROVERS AND LEARNERS	HELPERS	TOTAL
Ironworkers	2740	495	785	4020
Blacksmiths	25	17		42
Machinists and Mechanics	275	73	86	435
Labourers	395			395
Crane and Gantry Operators	84			84
Carpenters and Joiners	341	15	61	417
Stagers	80			80
Electricians	102	35	24	161
Painters and Red Leaders	206	4		210
Riggers	148	5	3	156
Sheet Metal Workers	22			22
Steamfitters	336	110	85	531
Shipwrights	405	39	36	480
	5160	793	1080	7033

J. RANNIE, Shipyard Manager.

the plant nor can they give us an idea of the percentage of the total shipworkers it controls. They are in favour of a vote to settle the question of representation, but they want a vote by crafts or by departments.

Mr. Renaud states that his Local 116 of the International Sheet Metal Workers Union counts six members in the Employer's plant. He has presented a collective agreement covering his particular trade to the manager who said he could not do anything about it until the question of representation had been decided. Mr. Renaud would favour a vote by trades.

Mr. Boyer says that the International Brotherhood of Electrical Workers controls from 100 to 125 of the 161 electricians of the plant as shown on Mr. Rannie's statement. He desires a vote by crafts.

Mr. Francoeur's International Brotherhood of Carpenters and Joiners claims from 200 to 250 of the 417 carpenters and joiners in the plant. He wants a vote, but a vote by crafts.

Mr. Rannie stated that, besides the agreement presented to him by Mr. Renaud, he received another one from the steamfitters of the plant who admittedly are controlled by the international organization. They have already signed, but the employer has not signed it yet for the reason given to Mr. Renaud. During the investigation preliminary to the establishment of this Board, it appears that an understanding was arrived at on this matter, the

According to Mr. Rannie, the number of employees is decreasing at the present time and Mr. McAuslane claims that about 2,000 employees are liable to be laid off at any moment.

UNION MEMBERSHIP

The National Organization claims to have a membership of 4,400 and over in the plant.

Messrs. Wright and Charron do not know how many members their Brotherhood has in

national organization was willing to leave the steamfitters out of a general vote and out of a general agreement, in order that they might make their own agreement with the employer. But the national organization is no longer prepared to concede that exception in favour of the steamfitters, perhaps because the international organization interfered in "their" Conciliation Board and because the general agreement they propose to conclude with the

employer, if and when they are chosen the employees' bargaining agent, covers all drafts, trades, departments and occupations.

EFFORTS AT CONCILIATION

It was suggested to the two organizations concerned to share the jurisdiction over the employees of the plant and to act jointly for them as the bargaining agent. The suggestion was turned down flatly. There was turned down also by the national organization a proposition to take the representation vote by departments, as per the personnel statement furnished by Mr. Rannie, and, following the vote, to let each organization make with the employer one collective agreement for the departments in which it should secure the majority.

OPINIONS

After thinking the matter over seriously, we have come to the conclusion that the only thing advisable to do under the circumstances is to take a general vote among all the employees of the plant without distinction of departments, crafts, trades or occupations, and to give the representation of the employees to the organization winning such a vote.

There is much to say in favour of a vote by departments. With such a vote each trade, such as even the 22 sheet metal workers, the 80 staggers, the 84 crane operators, the 42 blacksmiths, could retain its entity and freedom and could conclude its own bargain with the employer. In a general vote, the 4,000 ironworkers could swing the decision and the lesser trades could be snowed under, rendered voiceless and obliged to follow the crowd, which at first sight seems unjust and unfair.

But we must not lose sight of the deplorable situation prevailing in the plant. In that plant engaged in essential war work we have a bitter fight between two rival labour organizations striving to control the majority of the employees and to secure their mandate, and threatening a strike if they do not go their own way.

It is greatly in the interest of the country and in the interest of labour itself to put a stop once and for all, if at all possible, to so senseless a competition. For jurisdictional conflicts like that are beginning to make the labour movements stink in the nose of the general public. The public are getting the impression that so-called labour leaders care less for the interest of the workers, for peace, order and good government in Canada and for keeping our armed forces overseas duly supplied than they do for their first shirt; the tax-paying public think that those leaders are

keeping up on purpose disunion, dissension, contention and division in the ranks of labour, in order to justify their existence and to continue to live in princely leisure at the expense of the poor deluded workers. Of course, we are not giving that as our opinion and we are not saying that it is the state of things with regard to the plant of the United Shipyards Limited; we are only mentioning what one hears too often on the street. But, nevertheless, we think that the situation prevailing in that plant is not desirable and that an earnest endeavour should be made to remedy it.

Sincerely we consider that the only way to settle the dispute which is going on in the plant between the two organizations, is to let a general vote decide which organization has the supremacy over the personnel of the whole plant. We feel that there never will be peace, harmony and good relations in that plant as long as we leave the two organizations there side by side to overbid each other for the favours of the workers, which would be likely to happen if we should order a vote by departments. It is true that votes by departments have been held before and the International Organization has cited us the Vickers precedent (August, 1942, LABOUR GAZETTE, p. 885) and the Prince Rupert C.N.R. employees precedent. We understand that in both those cases the vote was taken by classes as the result of a mutual agreement between the competing organizations. Such an agreement is impossible in our case.

To rule according to the wish of the majority is a democratic principle for which our forefathers have fought and bled. In our opinion, the application of that principle would solve the problem which we have been investigating, provided all concerned agree to respect it. The other method advocated would only result, in our opinion, in perpetuating the strife.

The employer states that he fears that the crafts adhering to the international organization will go on strike and paralyse the plant in the event of a general vote favouring the rival organization. We strongly urge the government to consider this event, if it should happen, as a direct challenge to constituted authority and to deal with it accordingly.

The national organization wants the vote to be taken on the payroll as of the date of its application for the present board, as it professes to fear a general layoff before the vote. We feel that this is a question for the Department. However, if we may make a suggestion, we advise that the vote be taken on the payroll of October 1, if it is judged necessary to take the vote on a payroll other than the one in force on the day of the vote.

RECOMMENDATIONS

We, therefore, recommend:

1. That a general vote be taken among all the employees of the plant of United Shipyards Limited (excepting office workers) in order to decide whether the national organization (Canadian Congress of Labour) or the international organization (American Federation of Labor) shall represent the said employees as bargaining agent to deal collectively with the employer.

2. That the vote be taken as soon as possible by secret ballot under the supervision of the Department of Labour of Canada and of duly accredited representatives of the two contending organizations.

3. That all parties concerned do accept loyally the decision of the majority and do loyally abide by the result of the vote, in the interest of labour and of the country.

Respectfully submitted,

(Sgd.) Oscar L. Boulanger,

(Sgd.) Guy Merrill Desaulniers.

MONTREAL, October .., 1943.

Minority Report

Montreal, 19th October, 1943.

Re: Industrial Disputes Investigation Act and re dispute between the United Shipyards Limited, Montreal, P.Q., and its employees, members of Local No. 12, Boiler-makers and Iron Shipbuilders Union of Canada (C.C.L.)

The Honourable Humphrey Mitchell,
Minister of Labour, Ottawa, Ont.

Sir,—

I refer to the majority report herein signed by the Honourable Mr. Justice J. O. L. Boulanger, and by Mr. Guy Desaulniers, who, with the undersigned, constituted the Board of Conciliation and Investigation appointed by you to probe certain aspects of this dispute and to make recommendations with respect thereto.

I regret to be at variance with the recommendations therein made by my colleagues, at variance at least in part. That is, while in agreement with them that a vote of the employees should be taken, I disagree as to the nature of the vote proposed. My colleagues recommend a general vote in the plant, whereas I, who am apprehensive of the consequences of

such a vote, for reasons hereinafter set forth, do recommend that the vote be based upon the trades or occupations therein engaged, the majority established in each category of employment to determine the Labour Association which shall be the collective bargaining agency with the company—a most democratic method of determining the issue involved and one which, in its results, would avoid any semblance of coercion or dictation by one section of the plant over any other.

Under all the circumstances as revealed before the board and with the information furnished by those directly or indirectly affected, it appears to the undersigned that a grave injustice would be perpetrated upon the members of certain skilled trades if a "general vote" were taken. Not only so, but results of a serious character, adversely affecting production, would most probably ensue.

It happens that I am the company's representative on this board and my attitude is not to be construed as favouring either labour association concerned at the expense of the other. My interest in the issue is, if possible, to evolve a solution at once fair to all parties and favourable to the uninterrupted production of the shipyard, the officials of which are anxiously concerned lest anything should happen adversely to affect the output of the ships in the fall weeks with winter but a short time away when all launchings must cease.

Certain gentlemen of the International Brotherhood (A.F. of L.) claim considerable memberships in the several crafts at work in the yard. Very particularly is the claim made on behalf of the pipefitters and steamfitters, practically all of whom are members of the A.F. of L. In point of fact an agreement between the company and Local 144 (Pipe and Steamfitters, A.F. of L.) is presently pending and would have been signed but for the establishment of the Board of Conciliation—proof that the company recognizes Local 144 as the source of its supply of these tradesmen.

Attention is drawn to the attached letter addressed by the company to the undersigned, wherein it will be noted that the company takes a completely impartial stand as to the competing claims of the two labour associations. The letter states that it is for the men themselves to decide their affiliation—which is as it should be. However, the company recognizes certain facts and fears certain possibilities. One fact is that the A.F. of L. controls the

supply of plumbers and steamfitters, and one possibility feared is that, unless a craft vote is declared, or an exception made in their case, all the plumbers and steamfitters will desert the shipyard for employment elsewhere. There would be no strike for they would speedily find other employment. However, they would be lost to the company at a time when most urgently required, namely, when the ships are in the water awaiting the attention of those particular trades.

Under those circumstances I fear that a general vote—which, it is admitted, would favour the applicant Boiler Makers Union No. 12 (C.C.L.) would bring about the exact situation which the signatories of the majority report seek to avoid.

Precedent, in any event, favours settlement of the dispute by means of a craft vote. The case of Vickers is cited as an instance in point and also that at Prince Rupert. The results in both those cases have proven satisfactory.

Idealistically, one agreement should govern. A multiplicity of agreements should, whenever possible, be avoided.

Practically, however, the present imbroglio cannot be solved in that way.

I, therefore, recommend that a vote by trades be taken to enable each craft to settle its own affairs.

I have the honour to be, Sir,

Your obedient servant,

(Sgd.) D. A. Paterson.
Member.

EXHIBIT TO MR. PATERSON'S REPORT

United Shipyards, Limited,
Bickerdike Basin,
P.O. Box 3009, Place d'Armes Station,
Montreal, P.Q.

October 8, 1943.

Mr. D. A. Paterson,
Builders' Exchange Inc.,
New Birks Building,
Montreal, Quebec.

Dear Mr. Paterson:

Since accepting the post of Shipyard Manager in the United Shipyards, I have taken up the attitude that the choice of Union to represent the men in the Yard was the men's business and not the Management's.

However, I could not fail to note that in the case of the Pipefitting Department, there already existed a very strong organization affiliated with the A.F. of L. There are a few C.C.L. adherents too in the Pipefitting Department.

It is my belief that should the Pipefitters be submerged by a Yard-wide vote of all the other categories of employment and thereby be expected to have their business affairs controlled by the C.C.L., many of my best men, who are long-standing members of the A.F. of L. organization, would seek employment in other establishments with a resultant severe drop in output in this Yard, and possibly the closing of the Yard itself, at least temporarily.

This aspect has been discussed freely at various times with Mr. McAuslane and other members of the C.C.L. Union and with Mr. Bruce and Mr. Gauld and other members of the A.F. of L.

While the same might apply to a lesser extent in the case of our Electricians and some other trades, I regret I am not in a position to be as definite in my statement.

Yours very truly,

(Sgd.) J. Rannie,
Shipyard Manager.

Report of Reconvened Board in Dispute Between Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P. Q., and its Employees.

On October 25, the Minister of Labour received the report of the Board of Conciliation and Investigation which was reconvened in accordance with Section 28 (2) of the Industrial Disputes Investigation Act, to express an opinion as to the status of Local 2982, United Steelworkers of America, and as to its rights, if any, to represent the hourly-rated employees of the Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q. (L.G. Sept., 1943, p. 1227).

On August 12, a representation vote was held under the supervision of the Department of Labour as recommended by the Board of Conciliation and Investigation as follows:—eligible voters, 950; number of votes cast, 837; number voting "no union," 110; number voting in favour of Circo Employees Association, 324; number voting in favour of Local

2982, United Steelworkers of America, 399; spoiled ballots, 4.

Following this vote, the United Steelworkers maintained that it was the duly accredited bargaining agency, while the company contended that the result of the vote indicated that no agency was qualified to represent its hourly-rated plant employees, and requested that the Board be reconvened to clarify the status of the United Steelworkers.

The personnel of the Board was as follows: Honourable Mr. Justice Oscar Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from Messrs. D. A. Paterson and Guy M. Desaulniers, both of Montreal, respectively the employer's and employees' nominees on the Board.

The texts of the report of the Board and the minority report follow:—

Supplementary Report of Board

In the matter of the Industrial Disputes Investigation Act and of a dispute between Canadian Ingersoll - Rand Company, Limited, Sherbrooke, P.Q., Employer, and Employees, Members of Local 2982, United Steelworkers of America, Employees.

To The Honourable The Minister of Labour of Canada.

The undersigned, members of the Board of Conciliation and Investigation which enquired and reported on the above stated matter, having been requested, in accordance with Section 28 (2) of the Industrial Disputes Investigation Act, to reconvene in order to express an opinion as to the present status of Local 2982 of the United Steelworkers of America and as to its rights, if any, to represent the Employer's hourly-rated employees, met, on September 27, 1943, at Montreal, in the board room of the Builders' Exchange, graciously placed at their disposal by Mr. Paterson, heard the representations of the Employer and of Local 2982 and now beg to report as follows:—

THE ISSUES

Following its investigation at Sherbrooke, on July 30, 1943, the Board unanimously reported and recommended, in part, as follows:

That a vote by secret ballot be held among the employees (excluding office employees) of the Sherbrooke plant of the Company under the supervision of the Department of Labour of Canada and of representatives of the interested parties, in order to determine which union, if any, shall represent the employees to negotiate and bargain collectively with the Company.

The representation vote recommended was taken among the employees of the Company, at the Sherbrooke plant, on August 12, 1943. The ballot read as follows:—

1. I wish to remain independent of any union or association and to deal directly with my employer, Canadian Ingersoll-Rand Company, Limited, in respect of wages, working hours, and other conditions of employment.

2. I wish to be represented by CIRCO Employees' Association as exclusive bargaining agent with my employer, Canadian Ingersoll-Rand Company, Limited, in respect of wages, working hours and other conditions of employment.

3. I wish to be represented by United Steelworkers of America, Local 2982, as exclusive bargaining agent with my employer, Canadian Ingersoll-Rand Company, Limited, in respect of wages, working hours and other conditions of employment.

The result of the vote was as follows:—

Number of eligible voters.....	950
Number of votes cast.....	837
Voting for no union.....	110

Voting in favour of Circo Employees' Association.....	324
Voting in favour of Local 2982, United Steelworkers of America.....	399
Spoiled ballots.....	4

Local 2982 of the United Steelworkers of America claims that as a result of this vote it has been duly selected and appointed the exclusive agent of the employees to bargain collectively with the Company; and as such has instituted proceedings before the Quebec Regional War Labour Board in the name of the employees for a readjustment of wages.

The Employer, while maintaining that its policy always has been to negotiate and bargain collectively with any agent representing a substantial majority of its hourly-rated employees, claims however that the result of the ballot of August 12 does not entitle Local 2982 to speak for its employees, as the Local did not get an absolute majority of the votes cast. For greater certainty we quote the letter of the Employer to the Department which explains fully the Employer's contentions.

CANADIAN INGERSOLL-RAND COMPANY, LTD.
EXECUTIVE OFFICE

Montreal, Que., Canada,

September 7, 1943.

To the Honourable Minister of Labour,
Ottawa, Canada.

Dear Sir:

Re: Industrial Disputes Investigation Act, R.S.C., 1927, Chapter 112. Canadian Ingersoll-Rand Company Limited, Sherbrooke, P.Q., and Employees, Members of Local 2982, United Steelworkers of America.

Following the report and recommendation of the Board of Conciliation and Investigation appointed in this matter, a representation vote was duly held among the Company's hourly-rated plant employees, at Sherbrooke, P.Q., on August 12th, 1943, under the supervision of Mr. L. Pepin, Industrial Relations Officer, of your Department. The result of the ballot was that no individual organization obtained the support of more than a small minority of the total number of employees of the Company entitled to vote.

It was expressly understood and agreed by all parties, including the representatives of the United Steelworkers of America organization, at the hearing before the Board, in Sherbrooke, on July 30th last, that only such organization as was shown by a vote of those concerned, taken under government supervision, to have the support of a substantial majority of all the hourly-rated employees at the plant would be entitled to represent the said employees in respect of wages, working hours or other conditions of employment. Notwithstanding the foregoing, United Steelworkers of America, Local 2982, maintains that having obtained 42 per cent of the eligible votes, it is the duly constituted collective bargaining agency for all the Company's hourly-rated plant employees and it has further made an applica-

tion to the Quebec Regional War Labour Board on behalf of the said employees, demanding certain wage adjustments.

The Company maintains that as a result of the said ballot there is no agency qualified to represent its hourly-rated plant employees for collective bargaining purposes, or entitled to make an application to the Quebec Regional War Labour Board on behalf of such employees and the Company has refused to recognize or negotiate with United Steelworkers of America Local 2982, or any other organization or association in respect of such matters.

In order to clarify the position, the Company desires to obtain the opinion of the said Board of Conciliation and Investigation as to the present status of the said Local and its rights,

of the representation of the employee of the plant who desired to bargain collectively with their employer, and the purpose of the voters was to elect an agent to speak for them. If we look at the matter in that light, it becomes evident that Local 2982 USA has obtained a substantial majority of the union conscious employees, that is of the employees who admit the principles of association and of collective bargaining and who desired to create the proper means to carry out those principles.

The break-down of the vote, according to figures kindly furnished us by the Employer is as follows:

	Absent	Did not vote	Spoiled Ballots	CIRCO Ass.	C.I.O.	Indep.	Total
Drill..	37	17	1	122	120	28	325
Compr.	45	3	2	155	175	46	426
Foundry.. . . .	11	11	1	47	104	36	199
	93	31	4	324	399	110	950

if any, to represent the Company's hourly-rated plant employees. We hereby apply to you under Section 28 of the Industrial Disputes Investigation Act to request the Chairman of the said Board of Conciliation to reconvene the said Board and obtain an expression of its opinion on such questions.

We have the honour to be, Sir,

Your obedient servants,

CANADIAN INGERSOLL-RAND
COMPANY LIMITED

By (Sgd.) J. CAMPBELL,
Secretary-Treasurer."

CONCILIATION EFFORTS

It was suggested at the meeting that possibly, in view of the peculiar situation disclosed by the ballot, some sort of a joint council, composed of a representative of the CIRCO Association, of the Local 2982 USA and of the Employer, might be set up to take care of employer-employee relations in the Sherbrooke Plant of the Employer. The suggestion was not accepted. The Employer takes the position that it is up to its employees to create in their own way their own agency or mouthpiece to represent them collectively and to speak for them in their dealings with the Employer, and, therefore, it declines to have anything to do in the formation of a joint council or any other such organization. Nor does the idea appeal to Local 2982 USA, because it claims to have obtained the suffrage of a substantial majority of the union-minded employees of the plant and it does not want to share its mandate with its defeated competitor.

OPINION

In reality the question to be decided by the ballot of August 12th last was the question

Discarding the absentees and those who did not take the trouble of voting, we find that 837 employees voted. But out of those 837 voters, 110 independents voted for no union at all, being against both the principle of association and the principle of collective bargaining and being content each of them to deal individually with the Employer without having regard to their fellow workers. It was their undeniable right to take this position and they are protected in it by articles 501 and 502 of the Criminal Code. But, when it comes to decide which agent the unionised or associated employees of the plant elected as their mouthpiece, no more account can be taken of the 110 individualists or independents than of the 31 workers who were not sufficiently interested to cast their vote. The question of representation does not interest the 110 individualists; they only voted to be left in peace; they want no union; they want nobody to speak for them; each of them considers that he can talk directly to the boss himself without anybody's help or hindrance. Therefore, in interpreting the ballot and in seeking its signification we must consider only the votes of those employees who were interested in the question of representation and in the selection of an agent to act for them collectively. We find that these employees total 723, and that Local 2982 having obtained 399 votes got an absolute majority in its favor of unionised or associated employees interested in the question of representation.

We have not heard from the CIRCO Association and we may perhaps be correct in assuming from this fact that they are content as good democrats to abide by the result of the ballot.

The Employer has suggested that the matter of interpreting the vote of August 12th last be suspended for six months, the idea being that in the meantime the situation may clarify itself and that one of the rival labor organizations may gain a greater ascendancy over the other than it has at present. Then at the end of six months another vote would be taken, we regret to be unable to defer to the Employer's request for the following reasons:

We are convinced that in six months from now the situation will be just about what it is to-day, with only the possible exception of a slightly increased majority in favour of Local 2982 USA:—the 110 independents will probably continue to remain independent; the indifferent will again abstain from voting and the associated employees will remain generally faithful to their respective organization.

Local 2982 has a clear majority of the employees adhering to the principles of association and collective bargaining and interested in the choice of a representation agency. There is no doubt in our mind that Local 2982 has won the contest for the selection of the employees' bargaining agent and we do not feel that we have the right to suspend the effects of its victory.

And, furthermore, we are loath to expose the Employer, by accepting its suggestion for a postponement, to the accusation of trying to save a little money at the expense of its employees, as a six month stay of the representation question means also a six month stay of the application for a wage readjustment made to the Regional War Labor Board by Local 2982 following the vote of August 12th last.

RECOMMENDATIONS

We, therefore, recommend:

1. That effect be given to the ballot of August 12th, 1943, as meaning that the employees of the Sherbrooke plant of Canadian Ingersoll-Rand Company, Limited, desire to be represented by Local 2982 of the United Steelworkers of America as their exclusive agent to bargain collectively with their Employer.

2. That Local 2982 be recognized as such by the Department, the Employer and all concerned.

Respectfully submitted,

(Sgd.) Oscar L. Boulanger,

(Sgd.) Guy Merrill Desaulniers.

Montreal, October, 1943.

Minority Supplementary Report

In the matter of the Industrial Disputes Investigation Act and of a dispute between Canadian Ingersoll-Rand Company Limited, Sherbrooke, P.Q., Employer, and Employees, Members of Local 2982, United Steelworkers of America, Employees.

TO THE HONOURABLE THE MINISTER OF LABOUR OF CANADA.

The Board of Conciliation and Investigation constituted in the above matter, having been requested, in accordance with Section 28 (2) of the Industrial Disputes Investigation Act, to reconvene, in order to express an opinion as to the present status of United Steelworkers of America, Local 2982, and as to its rights, if any, to represent the hourly-rated employees of the Canadian Ingersoll-Rand Company Limited at Sherbrooke, P.Q., convened, on September 27th, 1943, at the offices of The Builders' Exchange, Inc., in Montreal, and heard the representations of both parties.

After further deliberations the Chairman of the Board and the member thereof representing the Union concurred in a Majority Report, recommending that effect be given to the ballot held under government supervision on August 12th, 1943, among the employees concerned, as meaning that such employees desire to be represented by the Union, as their exclusive agent to bargain collectively with their employer, and that the Union be recognized as such by the Department, the employer and all concerned. After the most careful consideration of the documents submitted to the Board, the representations of the parties and the Majority Report, I find that, with the greatest respect to my colleagues, I am unable to subscribe to their recommendations. I therefore submit the following Minority Report:

THE FACTS

The application for constitution of the Board of Conciliation and Investigation by the Union bears date of May 3rd, 1943, and was sworn to as of May 13th, while the Employer's Statement in Reply is dated May 27th, 1943. The material allegations of the Application and Statement in Reply are referred to at length in the unanimous report made by the Board following its hearing at Sherbrooke on July 30th, 1943. The relevant recommendations made in that report, at page 9, were as follows:

"1. That a vote by secret ballot be held among the employees (excluding office employees) of the Sherbrooke plant of the Company under

the supervision of the Department of Labour of Canada and of representatives of the interested parties, in order to determine which Union, if any, shall represent the employees to negotiate and bargain collectively with the Company.

2. That the ballot form to be used shall be divided in such a manner as to allow the voters to manifest their choice in three alternative ways: i.e. either for Local 2982 of the United Steelworkers of America, or for the CIRCO Association or for no union at all."

On August 12th, the representation vote was held in accordance with the foregoing recommendations and under the supervision of Mr. L. Pepin, Industrial Relations Officer of the Dominion Department of Labour. The three alternative questions on the ballot were:

"1. I wish to remain independent of any union or association and to deal directly with my employer, Canadian Ingersoll-Rand Company Limited, in respect of wages, working hours, and other conditions of employment.

"2. I wish to be represented by CIRCO EMPLOYEES' ASSOCIATION as exclusive bargaining agent with my employer, Canadian Ingersoll-Rand Company Limited, in respect of wages, working hours and other conditions of employment.

"3. I wish to be represented by United Steelworkers of America, Local 2982, as exclusive bargaining agent with my employer, Canadian Ingersoll-Rand Company Limited, in respect of wages, working hours and other conditions of employment."

The official count of the vote, as reported by the Director of Industrial Relations and Registrar, Department of Labour, was:

Number of eligible voters.....	950
Number of votes cast.....	837
Voting for Non-Union.....	110
Voting in favour of CIRCO Employees Association	324
Voting in favour of Local 2982, United Steelworkers of America.....	399
Spoiled ballots.....	4

The Union claims that the result of the vote entitles it to recognition as exclusive agent to bargain collectively with the Company on behalf of all the employees involved. The Company, on the other hand, maintains that the vote was inconclusive and it accordingly applied to the Honourable the Minister of Labour to request the Chairman of the Board to reconvene the Board and obtain an expression of its opinion on the matter. The application was contained in a letter summarizing the facts and contentions of the parties and reading as follows:

"CANADIAN INGERSOLL-RAND COMPANY LIMITED

Executive Office

Montreal, Que.,

Canada, September 7th, 1943.

To the Honourable Minister of Labour,
Ottawa, Canada.

Re: Industrial Disputes Investigation Act R.S.C., 1927, Chapter 112, Canadian Ingersoll-Rand Company Limited, Sherbrooke, P.Q., and employees, Members of Local 2982, United Steelworkers of America.

Dear Sir,

Following the report and recommendation of the Board of Conciliation and Investigation appointed in this matter, a representation vote was duly held among the Company's hourly-rated plant employees, at Sherbrooke, P.Q., on August 12th, 1943, under the supervision of Mr. L. Pepin, Industrial Relations Officer of your Department. The result of the ballot was that no individual organization obtained the support of more than a small minority of the total number of employees of the Company entitled to vote.

It was expressly understood and agreed by all parties, including the representatives of the United Steelworkers of America organization, at the hearing before the Board, in Sherbrooke, on July 30th last, that only such organization as was shown by a vote of those concerned, taken under government supervision, to have the support of a substantial majority of all the hourly-rated employees at the plant would be entitled to represent the said employees in respect of wages, working hours or other conditions of employment. Notwithstanding the foregoing, United Steelworkers of America, Local 2982, maintains that having obtained 42 per cent of the eligible votes, it is the duly constituted collective bargaining agency for all the Company's hourly-rated plant employees and it has further made an application to the Quebec Regional War Labour Board on behalf of the said employees, demanding certain wage adjustments.

The Company maintains that as a result of the said ballot there is no agency qualified to represent its hourly-rated plant employees for collective bargaining purposes, or entitled to make an application to the Quebec Regional War Labour Board on behalf of such employees and the Company has refused to recognize or negotiate with United Steelworkers of America, Local 2982, or any other organization or association in respect of such matters.

In order to clarify the position, the Company desires to obtain the opinion of the said Board of Conciliation and Investigation as to the present status of the said Local and its rights, if any, to represent the Company's hourly-rated plant employees. We hereby apply to you under Section 28 of the Industrial Disputes Investigation Act to request the Chairman of the said Board of Conciliation to reconvene the said Board and obtain an expression of its opinion on such questions.

We have the honour to be, Sir,

Your obedient servants,

Canadian Ingersoll-Rand Company Limited,
(Sgd.) By J. G. Campbell,
Secretary-Treasurer."

Pursuant to this application, the Board was reconvened and, as above stated, met and heard the representations of both parties on September 27th, 1943.

THE ISSUES

The original application for a Board on behalf of the Union was made in respect of the Company's hourly-rated foundry employees only, while Circo Employees Association subsequently filed a separate application, which is still pending, for a Board of Conciliation and Investigation in respect of all the Company's hourly-rated employees, including foundrymen. At the hearing on July 30th, this Board recommended, with the consent of all parties, that a representation vote should be held among all hourly-rated employees, excluding office workers, in order to determine which labour organization, if any, should represent such employees to negotiate and bargain collectively with the Company, and that the form of ballot to be used be divided in such manner as to allow the voters to manifest their choice in three alternative ways, i.e., for the Union, for the Association, or for no union at all.

It was clearly understood by the representatives of the Union, the Association and the Company at the hearing before the Board on July 30th that the decision of the majority of the hourly-rated employees concerned, as shown by the result of the vote, would be recognized by and govern all the parties. The Company readily agreed to the holding of a vote under government supervision in accordance with the recommendations of the Board, as being entirely in accordance with its stated and established policy of recognizing for purposes of negotiation and bargaining any agent shown as the result of a government-supervised vote to represent a substantial majority of the hourly-rated employees on its payroll for the Sherbrooke plant. The Union also categorically agreed to the holding of the vote in accordance with the recommendation of the Board and to be governed by the wish of the majority of the employees as expressed thereby. There can be no doubt that the principles of one vote among all the Company's hourly-rated employees concerned and of the binding effect of the wish of the majority of such employees, as expressed by such vote, were accepted and agreed to by the Union, the Association and the Company. The finding of the Board in its unanimous report on this phase of the matter is significant and will be found at pages 8 and 9, as follows:

"Mr. R. J. Lamoureux, representing the United Steelworkers of America before the Board, accepted the suggestion and declared

himself favourable to a vote in the whole plant to settle the question in the democratic way, promising on behalf of his constituents to abide by the wish of the majority. The Company which already had accepted the idea of a vote in its reply to the application for this Board, consented as also did the representatives of the CIRCO Association."

The fourth and final recommendation of the Board in its unanimous report following the hearing on July 30th last was:

"4. That the conciliation agreement herein sanctioned and homologated by the Board be loyally adhered to and carried out by all concerned."

It clearly follows, therefore, that the only issue now before the Board is to determine whether or not the Union, as a result of the vote held on August 12th, 1943, obtained the support of such a substantial majority of all the hourly-rated employees (other than office workers) at the Company's Sherbrooke plant as to entitle it to recognition as the exclusive agent to negotiate and bargain collectively with the Company on behalf of all such employees.

EFFORTS AT CONCILIATION

It was suggested by the Chairman at the meeting of the Board in Montreal, on September 27th, that in view of the inconclusive result of the ballot, a joint council composed of representatives of the Union and of the Association might be set up to deal with the Company in respect of employer-employee relations in the plant. The suggestion was repudiated by the representatives of the Union, as it does not desire to share with its competitor, the Association, what it regards as its mandate from the employees. The representatives of the Company expressed doubts as to the practicability of establishing a joint council by the Union and the Association but did not formally object to the suggestion, as it felt that the formation of such council was a matter to be decided solely between the Union and the Association. No representatives of the Association appeared at the hearing and, as far as I am aware, no notice of the hearing was given to the Association. The suggestion of the Chairman for the establishment of a joint council was, therefore, abandoned.

When it became evident to me that there would be a serious divergence of opinion between myself and the other members of the Board as to the opinion and recommendation which it should submit to the Minister, I thereupon suggested, on behalf of the Company, that the Board suspend its decision for a period of six months, on the understanding that at such time it would recommend that a

further vote be taken among the employees concerned, on the application of any interested party. The other members of the Board, however, refused to accept a disposition of the matter on that basis.

THE MAJORITY REPORT

The Majority Report of my colleagues is, I submit with respect, erroneous in five important particulars:

In the first place, the Company did not, as stated in the report, decline "to have anything to do in the formation of a Joint Council or any other such organization".

The Company's established policy, as already stated, is that it is prepared to negotiate collectively with any agent shown as a result of a government-supervised vote, to represent a substantial majority of its hourly-rated employees and it could hardly, therefore, refuse to deal with a Joint Council composed of representatives of both the Union and the Association which, between them, obtained 723 out of 950 eligible votes. It is, moreover, my recollection that the suggestion of the Chairman for the constitution of a Joint Council envisaged a Council composed, as aforesaid, of representatives from the Union and the Association but not from the Company. The representatives of the Company at the hearing did not object to the formation of a Joint Council, but merely expressed the opinion that it would not be a workable solution to the problem and this opinion was completely borne out by the immediate and determined repudiation of the suggestion on the part of the representatives of the Union. It was, further, of course, impossible for the Board to recommend the constitution of a Joint Council in the absence of representatives from the Association, which does not appear to have been notified of the hearing.

In the second place, it appears to me that the Majority Report clearly fails to recognize or to deal with the actual question which was before it for decision. In this connection, the report states, at page 5:

"In reality the question to be decided by the ballot of August 12th last was the question of the representation of the employees of the plant who desired to bargain collectively with their employer, and the purpose of the voters was to elect an agent to speak for them."

On the contrary, it is abundantly clear from the original unanimous recommendation of the Board made following the meeting in Sherbrooke on July 30th, that a vote by secret ballot was to be held among the employees concerned, in order to determine *which Union, if any, shall represent the employees to*

negotiate and bargain collectively with the Company. There is in that report the further recommendation that the ballot form to be used shall be devised in such manner as to allow the voters to manifest their choice in any one of three ways, that is, for the Union, for the Association or for no Union. At no time, until the hearing before the Board on September 27th, was any suggestion made by either party that the purpose of the vote was merely to determine which of the two organizations, United Steelworkers of America, Local 2982, or Circo Employees Association, represented the greatest individual number of employees and to entitle that organization to represent all the employees concerned, without regard to the wishes of the substantial majority of them.

The only question to be determined by the Board at this time is as to what Union, if any, obtained, as a result of the vote on August 12th, 1943, a sufficiently substantial majority of the eligible votes to entitle it to be recognized as exclusive agent to represent all the Company's hourly-rated plant employees in negotiations and collective bargaining with the Company.

The result of the vote clearly indicates that neither the Union nor the Association obtained even an absolute majority among the employees who exercised the privilege of voting, let alone a substantial majority of all those entitled to vote. To recognize either of these organizations as entitled, (having obtained in each case only a comparatively small minority of the total eligible votes,) to represent all the employees would be to disregard the expressed wishes of the great majority of them. It would, moreover, have the effect of nullifying, in any event, the votes of all employees who voted against both organizations.

In the third place, quite apart from the apparent misunderstanding of the real question at issue before the Board, the majority report seems to me,—again with respect,—to adopt a fundamentally illogical principle when it disregards the votes of the 110 employees who voted against both organizations. While these men represent a small minority of the total number of employees involved, they constitute a sizeable group in themselves. There is, moreover, in my view, no justification whatever for including them with those who were either absent from the plant when the vote was held or were, as the Majority Report puts it, on page 6, "not sufficiently interested to cast their vote."

After stating that the issue to be decided was the question of the representation of the employees of the plant who desire to bargain collectively with their employer, the Majority Report states, at page 5:

"If we look at the matter in that light, it becomes evident that Local 2982, USA has obtained a substantial majority of the union-conscious employees who admit the principles of association and of collective bargaining and who desired to create the proper means to carry out those principles."

To carry that line of reasoning to its logical conclusion leads to a manifest absurdity. Suppose, for instance, 399 employees had voted independent and only 110 for the Union, would the latter under any circumstances have conceded that the Association, having polled only 324 votes, should be recognized as the exclusive agent to negotiate and bargain with the Company for all its hourly-rated employees. To ask the question is to answer it in the negative. By disregarding the wishes of 10, 110 or any greater number of employees, who choose in any representation ballot to vote for independence rather than representation by any labour organization, this Board would be denying to such persons the liberty of action to which they are entitled under both the Dominion and Provincial law.

I consider also that it is unfair to assume that the 113 employees who did not vote because they were absent from the plant or for any other reason are necessarily opposed in principle to collective bargaining or to labour organizations. It is at least equally reasonable to suppose that these men simply did not desire to be represented by the Union or the Association for collective bargaining purposes. Could there be any possible basis for suggesting that if, say, 400 of the employees had abstained from voting, they should be entirely disregarded when it comes to recognizing an exclusive bargaining agency for all the hourly-rated employees? Such a conclusion would be not only unfair but also entirely unreasonable in view of the specific wording of the ballot which, as already stated, gave the employees only three alternatives, namely: for the Union, for the Association or for no collective bargaining agency at all. Any employee who was opposed to both Union and Association but still favoured the principle of collective bargaining could, therefore, only express his preference by abstaining from voting.

By disregarding entirely not only the 110 employees who voted for independence and the 113 who did not vote, making a total of 223 in all, or more than 23 per cent of the 950 eligible votes, the Majority Report would make not only those individuals, but also the 324 who voted in favour of the Association and against the Union, subject to the wishes of the 399 who voted for the Union. In effect, the Majority Report recommends that an or-

ganization having the support of only 42 per cent of the employees concerned should be recognized as the exclusive collective bargaining agent for all of them, against the expressed wish of 35 per cent, who favoured the Association, and 23 per cent, who either wished to remain independent or did not vote, making a total of 58 per cent, which is considerably more than an absolute majority and might, under certain conditions, be regarded as a substantial one. On the whole, it seems to me, that the contention of my colleagues in this respect, as stated in their Majority Report, is clearly untenable on any reasonable grounds.

In the fourth place, I feel bound to disassociate myself specifically from the reference to Circo Employees Association, appearing on page 7 of the Majority Report, where it states:

"We have not heard from the CIRCO Association and we may perhaps be correct in assuming from this fact that they are content as good democrats to abide by the result of the ballot."

In view of the fact, as above stated, that the Association was never advised of the hearing in Montreal on the 27th and consequently had no representative present at the hearing, the inference made that the Association is prepared to admit that the result of the vote on August 12th entitles the Union to recognition as exclusive bargaining agent for all the Company's hourly-rated plant employees is entirely unwarranted.

I must also point out that at the original hearing before the Board on July 30th, the Union made the most determined effort to have representatives of the Association excluded, on the ground that the application for a Board was a matter solely between the Union and the Company. The Board ruled otherwise and the Association's representatives were permitted to make their representations at the hearing. This, however, cannot be taken as any indication that the Association is prepared to accept the Majority Report of the Board when it was given no opportunity to make its representations at the hearing in Montreal on September 27th and is presumably entirely ignorant of the contents of the Report.

In so far as Circo Employees Association is concerned, it at no time did more than agree, at the hearing on July 30th last, to the holding of a vote among all the hourly-rated plant employees and to abide by the wish of the majority of them. There is, therefore, no evidence upon which this Board could find that the Association is prepared to agree that any organization which polled substantially less than an absolute majority of the votes cast, let alone of the eligible voters, should be

recognized as the exclusive bargaining agent for all employees concerned.

In the fifth place, I must also dissociate myself from the inference drawn by my colleagues on page 7 of the Majority Report, as to the possible result of a further representation vote in six months time. I do not feel that, being entirely a matter of conjecture, is a question upon which this Board can properly express any opinion. Moreover, the inference is made on the assumption that another vote would be taken on a ballot in terms identical with that used at the election of August 12th, that is to say, a three-way vote, alternatively for the Union, for the Association or for independence from any organization. It is possible, and reasonably likely, that a different form of ballot would be adopted, perhaps even one in which the only name appearing would be that of United Steelworkers of America, Local 2982, to which the employees would be able to vote either "yes" or "no". It would be equally plausible to assume that had the ballot been in that simple form at the vote on August 12th the Union would have obtained only the 399 votes it received on the three-way ballot, and thus found itself with a substantial majority against it. This would even seem to be the proper interpretation to place on the result of the actual ballot on that date. The ballot on a second vote might, of course, have infinite variations and it is, therefore, entirely unreasonable to assume that the status quo, as shown by the three-way vote of August 12th would be maintained.

I feel also that the objections raised by my colleague, the representative of the Union on the Board, to the taking of a second vote after a reasonable delay, such as a period of six months, are entirely inconsistent with the arguments made before the Board by representatives of the Union at the hearing on September 27th. These representatives then stated categorically that the Union was in a much stronger position than it was when the vote was held on August 12th, and it is difficult to understand why such strenuous objection is now taken to the suggestion that the status of the Union be established beyond possibility of doubt by means of a further vote at some future date.

Another reason for refusing the Company's suggestion for a suspension of the Board's Supplementary Report is given at page 8 of the Majority Report, where it is stated:

"And, furthermore, we are loath to expose the Employer, by accepting its suggestion for a postponement, to the accusation of trying to save a little money at the expense of its employees, as a six month stay of the representation question means also a six month stay of the

application for a wage readjustment made to the Regional War Labour Board by Local 2982 following the vote of August 12th last."

That is, in my submission, not only a highly improper reason, in principle, against postponing the Supplementary Report of this Board, but the inference contained in it to the effect that the employees would lose and the Company gain money by the delay is not, in my opinion, one which this Board is entitled to make. In making its recommendations this Board should be governed exclusively by the facts and by the issues which it is called upon to decide and not by inferences as to the expediency of the situation from the point of view of one of the parties.

We have no jurisdiction to enquire into the wage structure of the Company or to make any recommendation as to adjustments which may be required to it. These are matters within the exclusive jurisdiction of the Regional War Labour Board for Quebec under the provisions of the Wartime Wages Control Order. It is quite true that the Union may not be entitled to prosecute its pending application before the Regional War Labour Board until it establishes that it is entitled to represent a substantial absolute majority of the employees, but that is certainly no valid reason why this Board should recommend that it is entitled to recognition as exclusive bargaining agency for all the Company's employees concerned, when in fact it only represents a minority of them.

The question of an adjustment in wages is one which affects the Company quite as much, if not more, than it does the employees. I consider it, therefore, improper for this Board to assume that the employees are entitled to an increase in wages and that they will receive it as a result of the pending application by the Union to the Regional War Labour Board. We have no evidence before us on which these assumptions could be justified and even if they could be justified they should not be permitted to influence the decision of this Board in making recommendations as to the recognition of any particular exclusive bargaining agent to represent the employees.

Whether or not the Union is ultimately recognised by the Company as exclusive bargaining agent for all its hourly-rated employees at the Sherbrooke plant, the Company will remain free to make any representations it may see fit to the Regional War Labour Board in respect of any applications made to the latter, either on behalf of the Company or the employees. The merits or demerits of any application to the Regional War Labour Board, pending or otherwise, should not be

permitted for one moment to influence any recommendations which this Board should properly make according to the relevant facts in issue on the questions now before it.

For the foregoing reasons I respectfully submit that the recommendation of the Majority Report, calling for recognition of United Steelworkers of America, Local 2982, as exclusive bargaining agency for all the hourly-rated employees at the Sherbrooke plant of the Canadian Ingersoll-Rand Company Limited is not only without precedent but contrary to the declared policy of the Dominion Department of Labour and a complete negation of the fundamental principles of democracy.

OPINION

In my opinion, there is only one simple, basic policy which can be followed in all cases such as the present. That is that the wish of a substantial absolute majority of all the employees concerned should govern and that no labour organization should be entitled to recognition as exclusive bargaining agency for any group of employees unless that organization can prove beyond doubt that it has the support of a substantial absolute majority of those employees.

The recognition of an exclusive bargaining agency as between a Company and its employees presupposes that negotiations will be entered into between the parties, followed by collective bargaining, resulting ultimately in some contact or understanding between them covering wages, working hours and other conditions of employment. It is self-evident that the bargaining agency representing the employees, particularly if it is to be an exclusive one, must have the support of a substantial absolute majority of these employees, as otherwise, there would be no guarantee to the Company or to the employees themselves that harmonious industrial relations would result, nor that any collective agreement or understanding reached through such agency would be effective. From the employees' point of view, unless their representative has the support of a substantial absolute majority of them, they cannot be assured that negotiations conducted on their behalf will be in the best interests of the majority and they may well find themselves under the domination of a strongly organized and united minority whose prime purpose would be, not unnaturally, to further their own interests and those of their particular organization. From the Company's point of view, it cannot afford to recognize and deal exclusively with any agent representing only a minority of its employees, as that agent would be unable to enforce the necessary dis-

cipline among the employees or be in a position to see that the provisions of any collective bargaining agreement it might enter into would be carried out by the employees. From the point of view of both employees and employer, the recognition of an exclusive collective bargaining agent having the support of a minority of the employees would be little short of disastrous and could only lead to industrial dissension and ultimately even to serious jurisdictional disputes as between groups of employees favouring different labour organizations.

Another most important consideration is that the Company's war production is likely to be adversely affected to a serious extent if the recommendations of the Majority Report are adopted. The Company always enjoyed the most harmonious industrial relations with its employees until the Union started to organize them but since that time there has been, particularly at certain critical periods, a noticeable falling off in the productive efforts of the workers. This is quite understandable and I would like to make it absolutely clear that the Company does not object in any way to the organization of its employees by United Steelworkers of America, Local 2982, or any other lawful labour body. The Company is, determined to avoid stirring up industrial strife by recognizing any organization as exclusive collective bargaining agent against the express wishes of a preponderant majority of the employees concerned. To recognize the Union as exclusive collective bargaining agent while it represents only a minority of the employees affected would undoubtedly lead to serious dissatisfaction on the part of the substantial and preponderant majority of them who do not wish to be represented by it. This, in turn, would inevitably again disturb employer-employee relations which the Company has constantly endeavoured to maintain on a harmonious footing and would necessarily result in further detriment to the Company's scheduled war production.

On the whole, I am of opinion that the only sound and democratic basis upon which this Board can recommend recognition of an exclusive bargaining agency to represent the hourly-rated employees of the Company is to require that such agent establish conclusively by means of a properly supervised government vote that it represents a substantial absolute majority of all the employees involved. This is the basis of the Company's established policy, as expressed in its Reply to the Application for the constitution of this Board, in statements made verbally on its

behalf to the Board itself and in the letter of September 7th, 1943, to the Honourable the Minister of Labour, Ottawa, requesting the reconvening of the Board. That policy is, I submit, the only one entirely consistent with good industrial practice, absolutely fair to all concerned and strictly in accordance with the declared policy of the Department of Labour.

RECOMMENDATIONS

For the foregoing reasons I therefore recommend:

(1) That the established labour policy of the Canadian Ingersoll-Rand Company Limited, namely, that it is prepared to negotiate and bargain collectively with any agent shown as a result of a government-supervised vote to represent a substantial majority of all the hourly-rated employees at its Sherbrooke plant, be approved by the Minister and be recognized by the Department of Labour, by United Steelworkers of America, Local 2982, by Circo Employees Association and by all employees concerned, as the only proper one.

(2) That effect be given to the ballot of August 12th, 1943 as meaning that no organ-

ization is at the present time entitled to recognition by the Company as exclusive collective bargaining agent on behalf of the hourly-rated employees at its Sherbrooke plant.

(3) That neither United Steelworkers of America, Local 2982, nor Circo Employees Association be recognized as exclusive agent to bargain collectively with the Canadian Ingersoll-Rand Company Limited on behalf of its said hourly-rated employees.

(4) That the rights of the Union, the Association and any other lawful labour organization to represent their respective members, from time to time employed on an hourly basis by the Company, in discussions or negotiations with the Company be recognized by the Department of Labour, the Company and all organizations and employees concerned.

The whole respectfully submitted.

Montreal, October 22nd, 1943.

(Sgd.) D. A. PATERSON,

Member of the Board of
Conciliation and Investigation.

Conciliation Work of the Department of Labour during October, 1943

NEW industrial disputes to the number of 67 were handled by the Industrial Relations Branch during October, under the provisions of the Conciliation and Labour Act, while 21 "old" cases also received attention. These disputes were distinct from, and in addition to, those dealt with under the Industrial Disputes Investigation Act, which are described on previous pages.

The disputes were dealt with by Industrial Relations Officers, or, in Ontario, by the additional services of the Provincial Conciliation Officers. Those of chief interest or importance are summarized in the statement below.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Sydney, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the province of Quebec and two officers resident in Fredericton, N.B., and Sydney, N.S., represent the Department in the Mari-

time Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

CARPENTERS, MALTON, ONTARIO.—The October issue of the LABOUR GAZETTE carried a report of a strike by carpenters employed by the Russell Construction Company, Limited, on a housing project at Malton, Ontario. The object of the strike, which lasted from September 25 to 27, was to hasten favourable action on demands for a non-taxable transportation allowance of 25 cents per day, retroactive to August 4. The Regional War Labour Board for Ontario authorized payment of the allowance, retroactive to September 20 and the Company agreed to implement this decision. About 107 employees went on strike on October 8 when informed that the transportation allowance would be taxed as wages. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, explained to a group of the men and their union leaders the position of the Government and work was resumed on October 14. The employees on strike were members of the United Brotherhood of Carpenters, Bricklayers and Painters.

COAL MINERS, GARDINER, N.S.—On October 2 about 100 miners at No. 25 Colliery of the Dominion Coal Company, Limited, Gardiner, N.S., went on strike in protest against the employment of a labourer who was not a resident of the locality. The President of District 26, United Mine Workers of America, conferred with an official of the company and it was mutually agreed that the man in question would be transferred to another colliery nearer to his place of residence. Mr. Allan MacDonald, Industrial Relations Officer, Glace Bay, investigated the situation on behalf of the Department. Work was fully resumed following a stoppage of one day.

COAL MINERS, COALBURN, N.S.—Two strikes occurred during October on the 1st and 12th of the month, when employees of the Greenwood Coal Company, Limited, Coalburn, N.S., became dissatisfied over delay in the matter of an application to the National War Labour Board for an increase in basic wage rates to bring them up to the level of those paid by the Acadia Coal Company at Stellarton, N.S. In each case the strike lasted two working days. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., advised the employees that no Finding and Direction would be issued by the National War Labour Board while the men were on strike. The award of the Board was released on October 15 and directed payment of basic wage rates similar to those in effect in the Stellarton area.

RUBBER FACTORY WORKERS, MONTREAL, P.Q.—On October 6 about 200 employees of the Papineau Factory of the Dominion Rubber Company, Limited, Montreal, went on strike in protest against the dismissal of one employee and the suspension of another. The company claimed that the workers in question were being disciplined for inciting other employees to cut down on production. The strike occurred while an application for the establishment of a Board of Conciliation and Investigation made by the Distillery, Rectifying Brewery and Wine Workers' International Union of America was under investigation by an Industrial Disputes Inquiry Commissioner appointed by the Department. The strike situation was referred to the attention of Mr. R. Trepanier, Industrial Relations Officer, Montreal, at whose request the company agreed to reinstate the discharged employee and to reduce the suspension of the other. The reinstatement was to take place 24 hours after the termination of the strike. This undertaking proved satisfactory and work was resumed at 1 p.m. on October 7.

COAL MINERS, GLACE BAY, N.S.—On October 13 loaders on a longwall at No. 1B Colliery,

Dominion Coal Company Limited, Glace Bay, N.S., refused to remain at work following their regular shift in order to clean off about 120 tons of coal remaining on the longwall. It was the second such strike during the month. To finish the work of the contract men it was necessary for the company to place datal men on the job, which required about an hour. Later when the contract men learned that for pay purposes the management had conceded 85 tons of the coal in question to the contract men and had apportioned 35 tons to the company itself, about 150 longwall men went out on strike. Some 150 others on a second longwall also walked out in sympathy. Mr. Allan MacDonald, Industrial Relations Officer, Glace Bay, N.S., took up the matter of the work stoppage with the President of District 26, United Mine Workers of America, and the General Superintendent of the company's mines. A special meeting was held the evening of October 14 by Local Union 4520, United Mine Workers of America, of which the employees were members. The men were ordered by the Executive of District 26 to return to work the following morning and further instructions were given that employees of No. 1B mine were not to make any more pit-bottom or wash-house decisions in regard to strike action without securing the sanction of the Local or District Executive. It was agreed also that in future the men would stay the required time to clean the longwall in keeping with the union contract.

FOUNDRY WORKERS, OSHAWA, ONTARIO.—Word was received on October 9 by the Toronto office of the Industrial Relations Branch that foundry workers in the melting department of the Ontario Malleable Iron Company, Limited, Oshawa, had threatened to go on strike commencing October 13 with the object of compelling the company to agree to an increase of 6 cents per hour in basic wage rates together with corresponding adjustments for those receiving more than the base rate. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, attended a meeting of the employees of the melting department on October 12, at which officials of the company and the United Steel Workers of America were also present. Union officials strongly opposed any strike action but on October 13 only 4 out of 37 employees in the group in question reported for work. Workers in other departments apparently became confused and left the plant, involving a total of 235 employees. A general meeting of the shop employees was arranged by the union that evening. Mr. F. J. Ainsborough was again in attendance and joined with the officers of the union in counselling an

immediate resumption of work, which took place on the morning of October 14.

ALUMINUM WORKERS, SHAWINIGAN FALLS, P.Q.—At midnight on October 23 about 1,000 employees in two plants of the Aluminum Company of Canada, Limited, Shawinigan Falls, P.Q., went on strike in protest against a seasonal increase from 7 to 8 in the number of Soderberg pots tended per man. The strike was reported to have been called by the International Union of Aluminum Workers, No. 2202 (A.F. of L.), of which all or nearly all the strikers were members. Another union, the National Catholic Syndicate of Aluminum Workers of Shawinigan, was organized in the two plants and held a collective agreement with the company covering all employees. This organization also objected to the increase in the number of pots per man but was not in favour of any stoppage of work. Prior to the strike the Syndicate had been conducting negotiations with the company and had secured a promise from the management that a competent Board might be chosen to study and report upon the winter schedule of working conditions. As soon as advised of the cessation of work, the Director of Industrial Relations urged an International Representative of the A.F. of L. Union to call off the strike at once, pointing out that it was in violation of Dominion statutes and Orders in Council. This appeal was not successful and on October 24 Mr. R. Trepanier, Industrial Relations Officer, Montreal, proceeded to Shawinigan Falls to deal with the situation. Mr. C. Miron, Chief Conciliation Officer for the Province of Quebec, also endeavoured to mediate. Considerable picketting took place during the early part of the strike with the result that not enough of the 1,250 employees who were indirectly affected by the strike and who desired to work were able to secure entrance to the plant to keep the pot lines in operation. A number of pot lines in plant No. 2 became "frozen" because of this. On account of the picketting and other minor incidents steps were taken under the Defence of Canada Regulations to send into the town a detachment of about 350 troops and 75 members of the R.C.M.P. to maintain order and enable those desiring to work to do so without molestation. Mass meetings attended by large numbers of the employees were addressed by the Conciliation Officers, but no support in favour of a resumption of work was secured from the union officials, and the strike continued. Proposals were put forward that the Regional War Labour Board for Quebec might entertain a submission in regard to the seasonal increase in the number of pots per

man, and the National Catholic Syndicate made an application to the Board along these lines. It was decided that the Regional Board had no authority to deal with a problem of this kind. At about this time, following an exchange of telegrams between the Dominion Minister of Labour and Mr. William Green, President of the American Federation of Labor, an official of the A.F. of L. from Washington, was sent to Canada with instructions to help in getting the men back to work. After a conference with a Federal Industrial Relations Officer in Montreal, this official proceeded to Shawinigan Falls but was unable to work out with the company a satisfactory formula for a resumption of work. An agreement was finally reached between the Minister of Labour for the Dominion and the Province, that an industrial commission of experts should be appointed by the Province to inquire into the physical capacity of the men to handle 8 pots during the winter months. This commission would be empowered to call upon experts in time studies as well as investigate the labour conditions. Upon receiving assurance that such a fact-finding body would be established at once, the representative of the American Federation of Labor recommended to the employees that the strike should be terminated at once and this proposal was unanimously accepted. Throughout the course of the strike, work had gradually been resumed by small groups of those who participated in the walkout and on November 8 all employees again reported for work.

STEEL WORKERS, TRENTON, N.S.—A strike of 55 axle makers and helpers employed by Trenton Steel Works Limited, Trenton, N.S., occurred on the afternoon of October 21. The men, who were members of Local 1231, United Steel Workers of America, refused to work on oversized axle billets under company requirements that 29 should be forged per shift. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, investigated the dispute and secured acceptance of a compromise, between the company and union proposals, that 26 axles should be considered sufficient production for each shift. Work was resumed on October 29.

COAL MINERS, ALBERTA AND BRITISH COLUMBIA.—Reference was made in the October issue of the LABOUR GAZETTE (pp. 1371-2) to a threatened strike of coal miners belonging to District No. 18, United Mine Workers of America, in connection with demands for an increase of \$2 per day, holidays with pay, and punitive overtime for the sixth working day of the week. It was stated that as the October issue went to press,

the District Executive of the union had made plans to call a strike on October 15. This strike action was cancelled after the Government announced the appointment of a Royal Commission. This Royal Commission, comprised of the Honourable Mr. Justice G. B. O'Connor of Edmonton, Mr. T. W. Laidlaw, K.C., of Winnipeg, L. D. Hyndman, K.C., of Edmonton, was required to recommend such measures to be taken in accordance with the principles and provisions of the Wartime Wage Control Order as it deemed advisable. The Commission had arranged details for the opening of its inquiry on October 29 when, without warning, the Minister of Labour was advised by telegram from the President of District No. 18, Mr. Robert Livett, that unless the Order in Council setting up the Royal Commission was changed so that the Commission would not have to report to the National War Labour Board, a strike call would be issued to the miners immediately to walk out at midnight on October 31. On learning of this development the Minister of Labour wired Mr. Livett inviting him and other executive officers of the union to come to Ottawa for a conference. The union officials agreed to do this but nevertheless proceeded to call the strike. At midnight on October 31 the employees of 66 principal coal mining companies of Alberta and British Columbia ceased work. About 8,500 men were involved, exclusive of maintenance crews which were left in the mines. The employees of 4 or 5 coal mining properties which have no signed agreements with the United Mine Workers of America also ceased work in sympathy with the union miners. Conferences proceeded at Ottawa throughout the first week of November between the Minister and Officers of the Department of Labour and a delegation of four representatives of District No. 18. On November 6 an agreement was reached that the miners should return to work at once and that the Government would, by Order in Council, confer upon the Royal Commission the same rights of decision and authority as are vested in a Regional War Labour Board, for the purposes of inquiring into the wage rates and working conditions for coal miners in Alberta and British Columbia. The work of the Commission was to be expedited so that a decision would be reached no later than November 20, after which either the coal miners or operators would have the right of appeal to the National War Labour Board. The Executive Board of District No. 18, United Mine Workers of America, by telegram on November 6, ordered the membership of the various local unions to resume work

immediately. Work was resumed on November 8 and 9 by employees of about 13 domestic coal mines in the Drumheller field, three out of 5 mines in the Lethbridge area, and the mines of inland British Columbia. However only one steam coal mine, namely Brazeau Collieries Limited, Nordegg, Alberta, was able to resume operations. By November 10 all 18 mines in the Drumheller and East Coulee field and all Lethbridge mines were again in production. Following pressure from District No. 18 officials, steam coal mines at Fernie and Michel, B.C., and at Coleman, Alberta, in the Crows Nest Pass field resumed work on November 12. Full production in practically all mines, including those on Vancouver Island, was restored by Monday, November 15.

LOGGERS, BRITISH COLUMBIA.—Since mid-June the Department has had before it a dispute in regard to union recognition and collective bargaining between Aero Timber Products Limited, Vancouver, B.C., and its employees in seven logging camps as represented by the International Woodworkers of America, Local 1-71. Following lengthy mediation on the part of Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., the Minister of Labour appointed the Hon. Mr. Justice S. E. Richards, of Winnipeg, Man., as an Industrial Disputes Inquiry Commissioner, to investigate. The parties to the dispute agreed that a vote was unnecessary and that a check of the paid-up membership records of the union against the Company's payroll would suffice. The Commissioner reported that he found that a majority of the employees were members of the Union and recommended that Local 1-71 should be agreed upon as the appropriate bargaining agency for the employees. Pursuant to the provisions of Order in Council, P.C. 10802, relating to Crown Companies, the Minister of Labour determined that the report of the Commissioner should be concurred in and so advised the parties. On November 2 the Company and the Union Executive agreed upon the form of a collective agreement which would be presented to the union members for ratification. By mutual consent employees who are members of the Pile Drivers', Bridge, Dock and Wharf Builders' Union were excluded from the scope of the agreement.

Union Representation Votes

PACKING PLANT EMPLOYEES, PRINCE ALBERT, SASKATCHEWAN.—By joint consent of the parties a representation vote was conducted on October 7 among employees of Burns and Company, Limited, Prince Albert, Saskatchewan. There were 308 eligible to vote and

261 participated in the ballot. A total of 237 voted in favour of representation for collective bargaining purposes by Local 234, Packing-house Workers Organizing Committee (C.C.L.) and 23 in favour of an Employees Relations Committee. There was one spoiled ballot. Mr. H. S. Johnstone supervised the vote.

PAINT WORKERS, TORONTO, ONTARIO.—A vote was conducted on October 8, 1943, under the supervision of Mr. J. P. Nicol, Industrial Relations Officer, Toronto, to determine the collective bargaining agency desired by the employees of the paint and varnish division of Canadian Industries Limited, West Toronto. A total of 210 voted out of 224 eligible. There were 128 ballots cast in favour of, and 81

against, representation by the Canadian Industrial Workers' Union, Local No. 1 (C.C.L.), with two spoiled ballots.

TRUCK DRIVERS, TORONTO, ONTARIO.—On October 26 a vote was conducted to determine whether the employees of Hendrie and Company Limited, Toronto, desired to be represented in collective bargaining by an Employees Committee or by the Canadian Brotherhood of Railway Employees and Other Transport Workers. Out of 108 eligible voters the union secured 76, while 12 ballots were cast for an Employees Committee. The vote was conducted by H. Perkins, Industrial Relations Officer, Toronto.

Strikes and Lockouts in Canada During October, 1943

THE number of strikes and lockouts recorded for the month of October, the number of workers involved and the time loss in man working days showed a decrease as compared with the previous month. There were 36 strikes on record during the month, involving 5,923 workers, with a time loss of 25,496 days, as compared with 42 strikes in September, with 11,076 workers involved and a time loss of 36,896 days. During October, 1942, there were 26 strikes, involving 6,107 workers with a time loss of 26,926 days.

The more important strikes during the month under review affected loggers at Queen Charlotte Islands, B.C., aluminum plant workers at Shawinigan Falls, P.Q., and freight handlers, etc., at Halifax, N.S. These three strikes accounted for more than 65 per cent of the time loss for the month.

Two strikes, involving 269 workers were carried over from September and 34 commenced during October. Of these 36 strikes, 33 were terminated during the month. Seven resulted in favour of the workers, nine in favour of the employers, seven were compromise settlements, one was partially successful and nine were indefinite in result, work being resumed pending final settlement of each strike. At the end of the month, therefore, there were three strikes unterminated, namely: coal miners at Sydney Mines, N.S., aluminum plant

workers at Shawinigan Falls, P.Q., and hotel employees at Edmonton, Alta.

The record does not include minor strikes such as are defined in another paragraph, nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to one dispute of this nature, namely: fur factory workers, Quebec, P.Q., one employer, May 12, 1943, to August 31, 1943.

Date	Number of strikes	Number of workers involved	Time loss in man working days
*October, 1943.....	36	5,923	25,496
*September, 1943.....	42	11,076	36,896
October, 1942.....	26	6,107	26,926

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establish- ments	Workers		

Strikes and Lockouts in Progress Prior to October, 1943

MINING— Coal miners, Glance Bay, N.S.	1	205	410	Commenced September 29; re payment for loading coal left on long wall; terminated October 2; conciliation (federal); in favour of employer.
MANUFACTURING— Textiles, Clothing, etc.— Clothing factory workers, Marieval, P.Q.	1	(a) 64	128	Commenced September 30; for union recognition and closed shop agreement; terminated October 2; conciliation (federal and provincial); (union agreement without closed shop clause secured) compromise.

Strikes and Lockouts Commencing during October, 1943

LOGGING— Loggers, Queen Charlotte Islands, B.C.	3	500	7,000	Commenced October 8; for union recognition and agreement; terminated October 23; referred to an IDI Commissioner; in favour of workers.
MINING— Coal miners, Coalburn, N.S.	1	104	104	Commenced October 1; for levelling-up of wage rates; terminated October 2; conciliation (federal); return of workers pending decision of NWLB‡; indefinite.
Coal miners, Gardiner Mines, N.S.	1	100	100	Commenced October 2; against employment of an out-of-town miner sent by National Selective Service; terminated October 2; conciliation (federal); (miner transferred to another colliery) in favour of workers.
Gas and oil drillers and labourers, Moncton (Stoney Creek), N.B.	1	22	250	Commenced October 6; for an eight-hour day; terminated October 19; conciliation (federal) and return of sufficient workers to complete seasonal operations; in favour of employer.
Coal miners, Glance Bay, N.S.	1	(b) 43	65	Commenced October 7; failure to load coal free of stone; terminated October 8; return of workers; in favour of employer.
Coal miners, Florence, N.S.	1	600	1,000	Commenced October 7; against failure of three miners to maintain union membership; terminated October 13; negotiations; (miners paid union levies) in favour of workers.
Coal miners, New Victoria, N.S.	1	200	250	Commenced October 8; for notification of family doctor in case of accident (following alleged neglect of accident victim); terminated October 9; negotiations; in favour of workers.
Coal miners, Coalburn, N.S.	1	105	210	Commenced October 12; for levelling-up of wage rates; terminated October 13; return of workers pending decision of NWLB; in favour of workers.
Coal miners, Glance Bay, N.S.	1	101	101	Commenced October 14; re payment for loading coal left on long wall; terminated October 14; conciliation (federal); in favour of employer.
Coal miners, Edmonton (Forest Heights), Alta.	1	18	18	Commenced October 14; for a signed union agreement; terminated October 14; negotiations; in favour of workers.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the July issue; in the review of "Strikes and Lockouts in Canada and Other Countries, 1942." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940,

provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in August was 137 and 10 were still in progress from the previous month, making a total of 147 disputes in progress during the month; 56,100 workers were involved in the disputes in progress during the month and the time loss was 139,000 working days.

Of the 137 disputes beginning in August, 29 arose out of demands for increased wages and 49 over other wage questions; 6 on questions as to hours; 18 over questions as to employment of particular classes or persons; 27 over other questions as to working arrangements; 8 were sympathetic stoppages. Final settlements were reached in 123 disputes, of which 27 were settled in favour of the workers, 77 in favour of employers and 19 resulted in compromises; in 16 other disputes, work was resumed pending negotiations.

Upward Trend in Immigration to Canada

AN upward trend in the number of immigrants entering Canada was apparent in figures released recently by the Immigration Branch of the Department of Mines and Resources. During the six months ending September 30, 1943, a total of 5,033 immigrants came to Canada, representing a 15 per cent increase over the number of persons entering the country during the corresponding period of 1942, which was 4,374.

Immigration to Canada reached its lowest ebb during the calendar year 1942, when only 7,576 persons settled in the country (L.G., Feb., 1943, p. 214). This was the smallest figure since Confederation. The peak figure was reached in 1913 during which year there were over 400,000 immigrants to Canada.

During the six months period under review the greatest number of immigrants, 2,558, was from the United States. From the British Isles there were 2,315 immigrants, an increase of 82.6 per cent over the 1,268 persons entering Canada from this source during the comparable period in 1942.

An increase occurred in the number of immigrants, classified as belonging to Northern

European races, from 75 in the half-yearly period in 1942 to 107 in the same period in 1943. Of this total, 77 were French, 6 Belgian, 6 Dutch, 6 German, 5 Danish, 3 Norwegian, 3 Swiss, and 1 Swedish.

There were 53 immigrants in the group classified as "Other Races". Of these, 22 were Hebrew, 5 Czech, 4 Polish, 3 Spanish, and the remaining 19 were of 14 different races.

Of the total number of immigrants, 1,238 were adult males, 2,402 were adult females, and 1,393 were children under eighteen. Classified according to occupation the number was divided as follows:

	Males	Females	Children
Farming	116	53	59
Labouring	203	89	56
Mechanics	377	100	104
Trading	163	234	74
Mining	11	3	4
Female domestic servants	—	220	36
Other classes	368	1,703	1,060

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Vegetable Foods

VANCOUVER, B.C.—CERTAIN BAKERIES AND THE BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION OF AMERICA, LOCAL 468.

Agreement to be in effect from June 1, 1943, to June 1, 1944, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, June, 1941, p. 695 and August, 1939, p. 848, with the exception of the provision for female jobbers (finishers and cake wrappers) at \$3.50 per day. The minimum weekly wage rates are unchanged at \$34.65 for doughmen, \$33.55 for ovenmen, \$30.50 for bench hands and machine men, \$26.40 for helpers, \$33.00 for shippers, \$25.65 for checkers and bread wrappers, \$18.70 for finishers and cake wrappers. Assistant shippers are raised to \$30.00, finishers and cake wrappers (inexperienced) may receive \$15.00 per week during first month and the regular rate thereafter.

Manufacturing: Tobacco and Liquors

MONTREAL, P.Q.—NATIONAL BREWERIES LTD. AND THE DISTILLERY, RECTIFYING, BREWERY, WINE WORKERS INTERNATIONAL UNION, LOCAL 68.

Agreement to be in effect from April 12, 1943, to December 31, 1943, and thereafter from year to year, subject to notice. The company recognizes the union as the sole bargaining agency for all employees covered by this agreement and will not discriminate against any employee because of union membership.

Hours: for day work, 9 per day, 3 on Saturday, a 48-hour week; for night work, 3 hours on Sunday night and 9 hours Monday to Friday, a

48-hour week; for shift work, 6 shifts of 8 hours, a 48-hour week. Overtime is payable at time and one half for all work over 48 per week. Holidays: for six statutory holidays, employees are to be paid. For work on these six holidays, for all employees whose regular duties do not call for work on these days, time and one half to be paid in addition to the regular pay for the holiday. Vacation: one week's vacation with pay for 50 hours for all employees who have been in the employ of the company prior to October 1 of the previous year.

Basic wage rates are to be those approved by the Regional War Labour Board. New employees to be paid 10 cents per hour below basic rates for first 6 weeks, then 5 cents per hour below basic rates for remainder of a three months probationary period.

Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Rubber Products

WELLAND, ONTARIO.—JOSEPH STOKES RUBBER CO. LTD. AND UNITED ELECTRICAL RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 523.

Agreement to be in effect from May 22, 1943 to May 21, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the collective bargaining agency for all employees who are eligible. All employees who are or who later became union members shall, as a condition of employment, remain members of the union. Both the company and the union agree to neither will coerce employees because of their union membership or non-membership. The company will, on request of any employee, deduct union dues and turn same over to the union.

Hours: 8 per day, 48 per week. Overtime and work on holidays are payable at time and one half. Vacation: one week with pay for employees with one year's service. Wages: It is agreed that there be equal pay for equal work, whether job is performed by a man, woman or boy. A wage survey to be made by the union and the company and the parties will negotiate a wage schedule.

Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Animal Foods

MOOSE JAW, SASK.—SWIFT CANADIAN CO. LTD. AND UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCAL 177.

Agreement to be in effect from September 14, 1943, to September 13, 1944, and thereafter

from year to year, subject to notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1942, p. 975, and October, 1942, p. 1207, with these exceptions:

Hours: basic hours are $8\frac{1}{2}$ per day, 9 on Friday, 5 on Saturday, a 48-hour week. Overtime: all time over 9 per day or 5 on Saturday and 50 per week, to be paid at time and one half; double time for work on Sundays and holidays except when the work regularly falls on Sunday. Subject to the approval of the Regional War Labour Board, the rate for unskilled labour is 50 cents per hour for males and 41 cents for females.

Manufacturing: Textiles and Clothing

CORNWALL, ONTARIO.—CANADIAN COTTONS, LTD. AND THE UNITED TEXTILE WORKERS' UNION, LOCAL No. 2.

Agreement to be in effect from April 1, 1943, to April 1, 1944, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1942, p. 1208 and September, 1941, p. 1156, with these exceptions:

Overtime in excess of the standard working day of 8 or 9 hours is payable at time and one quarter. Vacation: one week's vacation with pay for employees with one year's service at June 1; one day with pay and balance of the week without pay to those with less than one year's service at June 1; for all others one week without pay. For the year 1943, the week's vacation was to be the first full week in July. Penalties for being late for work repeatedly and absenteeism are loss of part of vacation pay.

TORONTO, ONTARIO.—THE TORONTO, CLOAK MANUFACTURERS ASSOCIATION AND THE INTERNATIONAL LADIES GARMENT WORKERS' UNION, LOCALS 14 (CLOAK OPERATORS), 83 (CUTTERS) 68, 94 AND 92 (PRESSERS).

Agreement to be in effect from January 1, 1943, to December 31, 1945. It covers the manufacture for females (whether children, misses, juniors or adults) of cloaks, coats, suits, skirts and wraps. Only union members to be employed; both parties agree not to discriminate unjustly against any employer or employee because of their previous attitude towards strikes or unionism. The union label to be used.

Hours: 8 per day, Monday to Friday, a 40-hour week. Overtime is restricted and is payable at time and one half. Wages: for operators, piece rates to approximate \$1.05 per hour for the lowest paid operator of the 80 per cent group of operators engaged by an employer who are the highest paid of the operators engaged by such employer; overpressers \$1.05, underpressers 79 cents, trimmers \$26.00 per week; cutters \$42.00 per week (Subject to the approval of the Regional War Labour Board); fur sewers and tailors 73½ cents, finishers 58 cents; rates for special machine and general hands to be established. A cost of living bonus is provided for, subject to the approval of the Regional War Labour Board, a sick benefit fund to be established, with contributions of $\frac{3}{4}$ of one per cent of payroll by employers

and of $\frac{1}{4}$ of one per cent of wages by the employees.

Provision is made for the division of work in slack periods and for the settlement of disputes.

TORONTO, ONTARIO.—CERTAIN MANUFACTURERS OF SHIRTS AND SPORTSWEAR AND THE UNITED GARMENT WORKERS OF AMERICA, LOCAL 253.

Agreement to be in effect from January 1, 1943, to December 31, 1943, (or 1944 if no notice given in 1943). Only union members to be employed, if available. No discrimination on account of union activity.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime is payable at time and one half; work on four legal holidays, time and one half. Provision is made for division of work in slack periods and for the settlement of disputes.

Manufacturing: Pulp, Paper and Paper Products

THREE RIVERS, GATINEAU AND TEMISKAMING, QUEBEC AND HAWKESBURY, ONTARIO.—CANADIAN INTERNATIONAL PAPER CO., INTERNATIONAL FIBRE BOARD LTD. (GATINEAU), MASONITE CO. OF CANADA LTD. (GATINEAU), AND QUEBEC PROVINCIAL COUNCIL OF PAPER-MILL UNIONS, INTERNATIONAL BROTHERHOOD OF PAPERMAKERS (LOCAL 163 AT THREE RIVERS, LOCALS 251 AND 143 AT GATINEAU), INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPERMILL WORKERS (LOCAL 163 AT THREE RIVERS, LOCAL 142 AT GATINEAU, LOCAL 233 TEMISKAMING AND LOCAL 28 AT HAWKESBURY).

The agreement for Three Rivers, Gatineau and Temiskaming came into effect May 1, 1940 (L.G., Oct., 1940, Nov., 1938) with amendment in 1941 (L.G., Dec., 1941, p. 1559). A supplementary agreement dated December 19, 1941, provided for the inclusion of Local 28 of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers at Hawkesbury. Another supplementary agreement, made July 16, 1942, added local 143 of the same union as a party; this local represents employees of the International Fibre Board Ltd. and Masonite Company of Canada Ltd. at Gatineau.

A third supplementary agreement made in 1943 provides for a vacation with pay of one week for employees with one year's service.

Manufacturing: Metal Products.

OSHAWA, ONTARIO.—GENERAL MOTORS OF CANADA LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 222.

Agreement to be in effect from April 12, 1943, for the duration of the war, and thereafter from year to year, subject to notice. The Company recognizes the union as the bargaining agency for employees who are union members. Employees are free to join or not to join any union. No discrimination to be shown by the Company or the union against any employee on account of his union membership or non-membership.

Hours: 9 per day, Monday to Thursday, 8 on Friday, a 44-hour week. A ten minute rest period is allowed twice a day. All overtime including all work on Saturdays, Sundays and holidays is payable at time and one half. Provision is made for seniority rights and for the settlement of grievances.

TORONTO, ONTARIO.—JOHN INGLIS COMPANY, LIMITED AND UNITED STEELWORKERS OF AMERICA, LOCAL 2900.

Agreement, which applies to the ordnance division, to be in effect from August 19, 1943, to August 18, 1944. The company recognizes the union as the bargaining agency for employees. Employees may join or refrain from joining the union; no discrimination against any employee because of his union connection. The company recognizes union grievance committees and stewards.

Hours: 8 per day, 48 per week. Overtime: time and one half for first four hours in any day and double time thereafter; time and one half for all work on Sundays and holidays. Vacation: one week with pay per year to employees with one year's service. Provision is made for seniority rights and for the settlement of grievances.

MEDICINE HAT, ALBERTA.—ALBERTA FOUNDRY AND MACHINE COMPANY LIMITED AND MEDICINE HAT MUNITION WORKERS FEDERAL UNION No. 137.

Agreement to be in effect from April 8, 1943, to April 7, 1944. The Company recognizes the union as representative of employees who are members of this union. Provision is made for seniority rights and for the settlement of grievances.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN QUEBEC, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable to the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of two new agreements and the amendment of eight others, all of which are noted below. A request for the extension of a new agreement for barbers and hairdressers at Joliette was published in the *Quebec Official Gazette*, October 30; requests for the amendment of agreements for the aluminum industry at Arvida, dairy employees at Quebec and building trades at Three Rivers were also gazetted October 30.

In addition Orders in Council were published in the *Quebec Official Gazette* during October, approving or amending the constitution and by-laws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection by certain other joint committees.

Manufacturing: Vegetable Foods, etc.

BAKERS, MONTREAL.—

An Order in Council, dated October 4, and gazetted October 9, amends the previous Orders in Council for this trade (LABOUR GAZETTE, Oct., 1939, p. 1064; Sept., 1940, p. 970; Jan., 1941, p. 70, Feb., p. 183; Jan., 1942, p. 110, March, p. 352, Apr., p. 483; May, 1943, p. 639). The maximum hours of work for foremen is reduced from 67 to 64 hours per week; any time in excess of 64 hours is to be paid for.

Manufacturing: Fur and Leather Products

FUR MANUFACTURING INDUSTRY (RETAIL) MONTREAL.—

An Order in Council, dated October 7, and gazetted October 16 amends the previous Order in Council for this industry (LABOUR GAZETTE, Sept., 1940, p. 971; Dec., 1941, p. 1572; December, 1942, p. 1490); the amendment does not change the summaries published in the LABOUR GAZETTE.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (CORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—

An Order in Council, dated October 4, and gazetted October 9, amends the previous Orders in Council for the industry (LABOUR GAZETTE,

April, 1942, p. 483, Sept., p. 1097; Jan., 1943, p. 88, April, p. 490). The wages of die press machine operators are raised to 35 cents per hour during first six months and 45 cents thereafter.

Manufacturing: Printing and Publishing

PRINTING TRADES (NEWS AND JOB) QUEBEC.—

An Order in Council, dated October 7, and gazetted October 16, extends the terms of the agreement (LABOUR GAZETTE, Apr., 1940, p. 388, Oct., 1941, p. 183; April, 1943, p. 490, July, p. 989, Aug., p. 1131, Oct., p. 1381) to October 30, 1943.

Another Order in Council, dated October 21, and gazetted October 23, makes obligatory the terms of a new agreement between Le Syndicat Patronal de l'Imprimerie de Québec, Inc. (The Employers' Association of the Printing Industry of Quebec) and Le Syndicat Catholique des Imprimeurs et Relieurs de Québec, Inc. (The Catholic Union of Printers and Bookbinders of Québec, Inc.), the International Typographical Union, Local 302, the Pressmen's Union, Local 152, and the Bookbinders' Union, Local 152, Le Syndicat Catholique des Imprimeurs de Rimouski et Rivière du Loup (The Catholic Union of Printers of Rimouski and Rivière du Loup) and Le Syndicat Catholique des Ouvriers Imprimeurs de la Beauce (The Catholic Union of Printing Workers of Beauce). This agreement applies to the judicial districts of Québec, Beauce, Montmagny, Kamouraska, Rimouski, Gaspé and the parts of the districts of St. François and Arthabaska not covered by the agreement for printing trades in the Montreal District. The agreement covers both newspaper and job work. The agreement to be in effect from October 23, 1943, to October 15, 1945, and thereafter from year to year, subject to notice.

Hours: in judicial district of Québec, 46 per week for day work (48 in certain small establishments), 43 for night work, with overtime payable at time and one half; in other judicial districts hours are 48 per week for day work, 45 for night work, with overtime at time and one quarter; double time for work on Sundays and holidays. Vacation: in 1944, all employees with one year's service to have three days' vacation with pay; in subsequent years, one week's vacation with pay, except the small establishments who are on a 48 hours week, for whom vacation will be 3 days.

Weekly wage rates in judicial district of Québec: on daily newspapers—journeymen typographers, linotypists and monotypists \$36.40, journeymen pressmen and stereotypers \$34, all other journeymen \$32.40; in two commercial offices, journeymen typographers, linotypists and monotypists \$35.80, journeymen pressmen and stereotypers \$33.15, all other journeymen \$31.60; in mechanized typography and press establishments having one or more composing machines or using two cylinders or more, etc., journeymen typographers, linotypists and monotypists \$32.45, all other journeymen \$30.80; shops doing bookbinding exclusively, journeymen \$29.15; in all other establishments, all journeymen \$24.28. Journeymen on night shifts to receive \$2 per week over day rate. Provision is made for apprenticeship regulations and wage rates. A cost of living bonus is provided for. Foremen at least \$3 per week extra. Wages in other judicial districts may be 20 per cent less than in the judicial district of Québec.

PRINTING TRADES, MONTREAL.—

An Order in Council, dated October 4, and gazetted October 9, extends the term of this agreement (LABOUR GAZETTE, Aug., 1943, p. 1131, April, p. 490 and Jan., p. 88 and previous issues as noted therein) to December 31, 1943.

Manufacturing: Metal Products

CLOCKMAKERS, MONTREAL.—

An Order in Council, dated October 4, and gazetted October 9, makes obligatory the terms of an agreement between L'Association des Bijoutiers de la Province de Québec, Inc. (The Jewellers' Association of the Province of Québec) and Le Conseil Corporatif des Compagnons Horlogers de Montréal, Inc. (The Corporate Council of Journeymen Clockmakers of Montreal, Inc.). Agreement to be in effect from October 9, 1943, to October 8, 1944, and applies to the Island of Montreal.

Hours: 54 per week, with overtime paid pro rata. Minimum wage rate for journeymen clockmakers: \$20 per week. Vacation: one week with pay annually to employees with one year's service. Apprenticeship regulations and wage rates are stipulated.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

PAINT INDUSTRY, PROVINCE OF QUEBEC.—

An Order in Council, dated October 21, and gazetted October 30, amends the previous Orders in Council for this industry (LABOUR GAZETTE, July, 1942, p. 856, Sept., p. 1097) but does not change the summary as previously given.

Service: Public Administration

FIRE FIGHTERS, QUEBEC CITY.—

An Order in Council, dated October 4, and gazetted October 9, amends the previous Order in Council for these workers (LABOUR GAZETTE, Aug., 1940, p. 869, July, 1941, p. 854, and July, 1942, p. 856). Weekly wage rates up to \$27 per week were increased by \$1; fire fighters after four years' service increased from \$28 to \$29.50; all others paid weekly wage rates of \$28 or over are increased by \$2 per week; telephone and telegraph operators on yearly salaries are unchanged, but electricians salary range of \$1,300 to \$1,600 was increased to \$1,500 to \$1,800.

Service: Business and Personal

BARBERS, MONTREAL.—

An Order in Council, dated October 21, and gazetted October 30, amends the previous Orders in Council for this trade (LABOUR GAZETTE, Oct., 1941, p. 1315, Dec., p. 1573, July, 1942, p. 857); the amendment does not affect the summaries as previously given.

BARBERS, HULL.—

An Order in Council, dated October 21, and gazetted October 30, amends the previous Orders in Council for this trade (LABOUR GAZETTE, Oct., 1941, p. 1316; Dec., p. 1573; Sept., 1942, p. 1098; March, 1943, p. 341, Oct., p. 1382) by making a different arrangement in the hours for barbers and by providing for hairdressing establishments closing at 1 p.m. on Saturdays during July and August.

Wartime Functions of Vocational Training and Bureau of Technical Personnel

Address by Mr. Paul Martin, Parliamentary Assistant to the Minister of Labour

A COMPREHENSIVE review of the wartime program of the Department of Labour in relation to vocational training for war industries and the special skills required by the armed services, as well as the recruitment and functioning of the Wartime Bureau of Technical Personnel, was given in a recent address before the members of the Toronto Junior Board of Trade by Mr. Paul Martin, Parliamentary Assistant to the Minister of Labour, Hon. Humphrey Mitchell. In his address Mr. Martin also outlines the potentialities of this phase of the Department's work in the post-war period. The text of the address is as follows:

It will be recalled that as long ago as February, 1937, I introduced a motion urging the Government to set up a committee of eminent men and women to develop a plan of national scholarships. At that time, I drew attention to the need of providing assistance to selected students to enable them to continue their studies at universities, agricultural colleges and technical colleges. To me, the need was urgent then because it was evident that the growing complexities of the problems confronting us made it abundantly clear that we needed to increase the number of trained men and women who would be equipped to serve this country.

It is not surprising that after the outbreak of war one of the most urgent problems that faced the Department of Labour related to training.

The first manpower problem which the Department undertook to solve was the absorption into productive work of the existing unutilized manpower. As the records of any employment service will show, however, you cannot fill 100 vacancies with any of the 100 applicants on your books. The skills required of the applicant must satisfactorily match those required of the job. If they do not, there is a wall created between employer and worker which can only be broken down by training.

Toward the end of 1940, the first over-all estimates of the country's manpower requirements for the Armed Forces, war production and essential civilian production, were completed, and these of course are being continually revised in the light of changing conditions. These estimates showed not only an obvious

shortage of skilled workers, but a threatening shortage of semi-skilled workers.

Development of Program

This led to the development of the War Emergency Training Program; a program which has been so successfully grafted on to the administrative machinery set up for training unemployed youth.

As an example of fine achievement, look what has been done for the completely unskilled or semi-skilled man: the man who during the depression was unemployed too long to retain any skill he had or to acquire any new skill. About 68,000 persons have been trained in industrial classes in the last fiscal year to man the thousands of machines in the factories making the tools of war. Forty per cent of those enrolled in the full-time classes were women and they were trained in practically every occupation for which men were trained except a few of the heaviest jobs.

Gross enrolment for all types of training under this war program was 132,326 during the past fiscal year.

Industrial Training

Courses for all these people eager to contribute to the war effort were given in sheet metal work, electric and acetylene welding, machine shop practice, aircraft manufacture, instrument making, foundry work, pattern-making, industrial chemistry and as laboratory technicians. For the shipyards, men were trained as burners, caulkers, heaters, rivetters, pipefitters, marine electricians, loftsmen, welders and shipwrights.

Arrangements were made with employers by field representatives of the Department for the sponsorship of whole classes of men and women, the company agreeing to employ such trainees on the completion of their courses. As a matter of fact, the supply of trainees has fallen off sharply in recent months both for men and women, and we are beginning to see the bottom of this manpower pot. Fortunately many of the companies have reached peak employment and their demands have consequently diminished.

These trainees are paid subsistence allowances which vary from \$7 to \$18 per week

according to circumstances, and in some cases these amounts are supplemented by sponsoring employers. Where necessary, travelling expenses of trainees to school or to employment are also paid, and all full-time trainees are covered for medical aid and permanent disability under the Dominion Government Workmen's Compensation Act.

Training for Armed Forces

And what has been done to help the Armed Forces to train enlisted men?

In the last fiscal year nearly 43,000 men were given training of various sorts.

For the Army, men were trained to be blacksmiths, bricklayers, carpenters, cooks, copper-smiths, draughtsmen, electricians, fitters and instrument makers.

For the Air Force, 7,000 men who had left secondary school and who were deficient in mathematics and science, were brought up to the required standard and made acceptable for aircrew training. Over 18,000 men in the last fiscal year were trained as, for example, aero engine mechanics, air frame mechanics, radio mechanics and wireless electrical mechanics.

For the Navy, men were trained as engine room and electrical artificers, motor fitters, radio mechanics and anti-submarine artificers.

For veterans of the present war, and at the request of the Department of Pensions and National Health, vocational training has been provided and classes for rehabilitation established for over 1,200 men. Some of these men were trained in industrial establishments and in privately-owned schools. The Vocational Training Co-ordination Act, passed last year, puts this Dominion-Provincial program on a permanent basis, and makes it a powerful instrument in our postwar plans.

Job Instruction

Through co-operation with the War Production Board of the United States, the Job Instructor Training Plan was made available for the training of men already employed in war factories as foremen. A little over a year ago, in Montreal, two representatives from Washington instructed a group of some 15 educators and men loaned from industry in the principles of the Job Instructor Training Plan. These men returned to their respective Provinces and set up some 30 training courses of their own from which over 250 persons have now qualified as trainers of foremen and supervisors in their own industrial establishments. Some 17,000 supervisors have already received certificates, and another 5,000 will receive certificates before the end of the war. Employers are justly delighted with the success of this plan.

Another part of the program to train foremen and supervisors covered Job Relations

Training, which was commenced in November, 1942. Four thousand certificates were issued up to the end of March.

Then, as a contribution to the better utilization of labour and improved personnel policies, the Government in co-operation with seven universities sponsored short practical courses in personnel management to over 500 students. With the tremendous expansion of industry, executives have found it increasingly necessary to delegate personnel problems to members of their staffs. Most of the instructors and substantially all the students are engaged in employment and personnel work, and the courses have helped to broaden their understanding of sound principles in this field.

They have come to think of labour relations in terms of human relations, and many employers have expressed their appreciation of the work done by the Department. Not only that, but some of the American instructors felt the course to be so worthwhile that they endorsed their honorariums over to the Dominion Government.

A part of the peacetime youth training program that has been geared to meet the needs of war relates to Aid to Students. In order to maintain the supply of doctors and dentists for military and civilian purposes, and of engineers and scientists for the Armed Forces and war industries, the Government, in co-operation with most of the Provinces, has made loans and grants to promising university students who might otherwise find it impossible to complete their courses because many of these courses have been accelerated, leaving them little opportunity to seek remunerative employment to pay for their fees. Over 2,000 students received such assistance last year. All students who received assistance signed an agreement that they would make their services available to the war effort where required, in the capacity for which they had been trained. The universities themselves have been helped to meet some of the additional costs incurred in the acceleration of courses in medicine and dentistry. In addition, 5,000 openings of summer employment for undergraduates were collected and tabulated.

In addition to all the measures which have been taken to train men and women for the war effort, the Dominion-Provincial Youth Training Program has been continued.

The training generally was related to the war effort and comprised principally agricultural and rural training for young men and women. Rural homecraft, home nursing, and steps to enable them to make better use of their home products formed the general pattern of training for women, while training for men was given in farm mechanics and certain general and specialized types of agricultural work. Occupational and apprenticeship training was

also given in a number of Provinces and, in addition, classes on citizenship and physical education. In all, enrolment for youth training projects in the last fiscal year exceeded 12,000.

Bureau of Technical Personnel

As is known, in 1941 there was established the Wartime Bureau of Technical Personnel in co-operation with the various professional institutes. This was a specialized employment service for engineers, scientists and other professional technicians, set up to avert shortages in and contribute to the better allocation of such essential personnel.

Last December special regulations were passed which made it possible to fully control such personnel, and the regulations, in some degree, set the pattern for the general manpower policy.

Through this Bureau, the employment and allocation of some 9,000 male science students in attendance at Canadian universities is already controlled. A declaration has been secured from each student as to whether he wishes to volunteer as a technical officer in the Armed Forces, and his medical category has been established by standard Army medical boards. By the end of March over a thousand of this year's graduates had been referred to the Armed Services for consideration as potential technical officers, through the use of a military advisor seconded to the Bureau from the Department of National Defence.

The Bureau now maintains a complete inventory of some 30,000 specialists in the engineering and scientific fields, and maintains controls necessary to see that the most effective use is made of their technical knowledge.

To fill in some of the details in this picture I propose to set out the number of persons who have been trained under the War Emergency Training Program in the period April 1, 1942, to March 31, 1943.

As indicated earlier, industrial training has been undertaken in vocational schools and in

plant schools. The enrolment of men in the full-time pre-employment classes in vocational schools was 20,675, while 5,575 men were trained in industry. The figures for women enrolled are 16,067 in vocational schools, and 5,205 in plant schools. An interesting feature of this particular employment training is the marked increase in the number of women who were given a wide variety of occupational training.

At the request of employers, training along many lines was provided for persons already on their payroll with a view to their upgrading and promotion. These part-time classes in vocational schools drew 13,556 men and 2,581 women, while comparable classes in industrial plants trained 3,235 men and 744 women.

These figures relate to the training of civilians only.

Training classes for the Armed Forces were conducted in vocational schools and enrolments were 25,329 in R.C.A.F. classes, 13,470 in Army classes, and 3,961 in Navy classes.

Co-operative Administration

The State is no magic cornucopia. To a great extent it is a mechanism of co-operation, and the magnificent work accomplished under the War Emergency Training Program has been made possible by the co-operative efforts of the Department and the Provinces. The Provinces have entered into agreements with us to provide for the use of technical and secondary schools. The salaries of instructors, supervisors, allowances and travelling expenses of trainees, clerical and caretaking services in schools, rentals of premises and advertising are borne by the Dominion. The Provinces share with the Dominion in the capital cost of machinery and equipment, and certain other provincial costs. The municipalities in most instances supply the shops and equipment of the vocational schools without charge.

The following table is a summary of the total enrolments of the War Emergency Training Program from its commencement in 1940 to August 31 of the present year:

TOTAL ENROLMENTS		
WAR EMERGENCY TRAINING		
from Commencement in 1940 to August 31, 1943		
	Men	Women
Full-time Pre-employment	74,604	25,226
Part-time Classes (already employed)	21,010	4,235
Plant Schools	9,644	9,287
Foremanship Training (already employed)		31,466
Rehabilitation of discharged persons		1,172
Army Tradesmen		34,227
Navy Tradesmen		5,936
R.C.A.F. Tradesmen		51,877
Student Aid		2,906
Total		272,130
Total placed in employment, 86,004		

I have outlined the scope of this co-operative effort and the excellent work that has been done in taking hold of men and women of all classes, degrees of skill and education, and of raising them to a level of efficiency through innumerable channels of training, so that their contribution to their country's war effort will not only be one of enthusiastic co-operation but of the highest possible technical value.

I am sure that I do not need to appeal to your imagination for you to envisage the deep significance of this program in the period of

postwar re-adjustment. It is teaching us that some of the obstacles to full employment are not real obstacles, and that a partnership of management, of workers and of the community can make useful work available in time of peace no less than in time of war. It means that as soon as industry can make its needs known in any detail that through co-operation with the Provinces and by use of machinery now operating smoothly we can train workers to fill vacancies arising in the changing economic structure at a rate considered impossible two or three years ago.

Effect of "Freezing" Order on Technical Persons

A FULL account was given in the October LABOUR GAZETTE (p. 1333) of the recent order in council, P.C. 6625, "freezing" workers employed in industries of high essentiality. The Wartime Bureau of Technical Personnel has now issued the following statement with respect to the effect of the order in the case of technical persons:

"Technical persons have been enquiring if the recently announced 'freezing' order applies to them, and, therefore, a word of explanation seems appropriate at this time.

"The 'freezing' order is an amendment to Part II of the National Selective Service Civilian Regulations, P.C. 246. Therefore, it does not legally apply to technical persons whose employment is controlled under the provisions of Part III. However, as the new order applying to manpower generally is intended to minimize avoidable turn-over and ensure that important work already underway is not interrupted, it is reasonable that the controls already existing for technical persons should be applied in such a way as to have a parallel result.

"In effect, such control is already incorporated in the Technical Personnel Regulations. Since March 23, 1943, the re-employment of a technical person has been subject to the approval of the Minister of Labour. In considering whether approval should be granted or withheld for new employment of an individual, the Minister of Labour (acting through the Bureau) will subject the proposed duties to even closer scrutiny than has been the case in the past.

"Technical persons should therefore note that, before considering cessation from present

employment, it is advisable to request guidance from a Bureau Regional representative or from Ottawa.

"There is also a need for closer observance of the regulations by employers, particularly Section 301 (1), which calls for notification 'forthwith' when a person ascertains that he will be laying off or discharging a technical person. If a company has completed a large project or work is otherwise decreasing, it is not reasonable that they should keep a technical person on their payroll doing nothing. But it is definitely expected that each employer shall make every effort to plan well in advance as to future needs for technical staff and to co-operate in so planning a lay-off as to simplify the absorption of any technical persons concerned into other activities of high labour priority."

British trade unions, employers and education authorities met in Manchester recently to discuss apprenticeship in the engineering industry. They recommended that a national system of apprentice education should be developed and adopted the following resolution:

It is agreed that considerable changes are necessary in the training of apprentices in engineering, and that a more uniform policy is necessary rather than to leave the subject to the initiative of certain progressive firms on the one hand or the indifference of many on the other. The uniform policy means a national one, and it is agreed that the subject should be pursued on such lines.

War Emergency Training

Summary of Program—Enrolment up to end of September— Meeting of Vocational Training Advisory Council

THE War Emergency Training Program provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the up-grading of persons already employed;

(3) Training in plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health.

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

War Emergency Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

Progress of Enrolment during September

From the beginning of the program up to September 30, 1943, the gross enrolment in all types of projects has been as follows:—

Training for Industry.....	179,106
Army	35,149
Navy	6,342
R.C.A.F.	54,002
Rehabilitation (discharged persons from the forces).....	1,794
University students	2,906
	<hr/>
	279,299

During the month, as a result of serious labour shortages in the industry, courses in butter and cheesemaking were inaugurated at Guelph Agricultural College and Kemptville Agricultural College. Similar courses will be undertaken in the Provinces of Quebec and New Brunswick.

Meeting of Vocational Training Advisory Council

During the month of September the semi-annual meetings of the Vocational Training Advisory Council and related sub-committees were held, as a result of which specific recommendations have been made to the Minister. Particular reference has been made concerning the requirements of a permanent policy of Dominion assistance in apprenticeship training and Dominion assistance to vocational schools in the post-war period.

Consideration was also given to the requirements of rehabilitation training of discharged members of the armed forces for absorption into various trades, as well as in an expected program in the development of natural resources.

It was disclosed at the meetings that the number of plant schools had increased to 105, distributed among seven provinces. Mr. R. F. Thompson, director of the Vocational Training Branch of the Department of Labour reported that the plant schools had been found useful in providing training that required specialized types of equipment not available in technical schools. Trainees in these schools were all employees of the firms in whose plants the training courses had been set up.

Scope of Unit Organization

The Director stated further that: "The three units of Foremanship Training—Job Instructor, Job Relations and Job Methods Training, continue to be welcomed by the majority of employers throughout the country and reports indicate that many concrete benefits have resulted in the saving of time, manpower and materials yet without any actual speeding up of the individual workers.

"The classes of the Air Force have continued to expand and several new ground trades have been added to those for which training had already been given. To meet an emergency situation, special summer accommodation was made available for over 3,000 additional trainees in educational classes for pre-aircrew personnel. Thanks to the response of the schools and the Regional Directors, it was possible to open these special classes on two weeks' notice."

Mr. Thompson also reported a slight increase in the number enrolled for rehabilitation training, carried out for the Department of Pensions and National Health.

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to September 1, 1943, were not so reported until after September 1, 1943.

Activities of the Unemployment Insurance Commission

Manuals of Service Trades and Equivalents being Compiled—Unemployment Insurance Registration—Initial and Renewal Claims—Claims Received for Adjudication—The Insurance Fund

AS a prime requisite for the re-establishment of men and women discharged from the armed forces, Manuals of Service Trades and Civilian Equivalents are being prepared. The task involves considerable research and comparative studies and representatives of the three services—Navy, Army and Air Force—as well as of the Department of Pensions and National Health and the Vocational Training Branch of the Department of Labour, are co-operating wholeheartedly. Steady progress is being made and it is expected that the three volumes will be ready for use in all Employment and Selective Service Offices early in the New Year. They will facilitate greatly the re-establishment in industry of all ex-service men and women, including handicaps.

Claims for Benefits

The amounts paid in claims for unemployment insurance benefit during the period from April 1, 1943 to September 30, 1943, was \$426,506.65. In this period 12,263 claims were received at the five regional and four district offices of the Commission, of which 9,299 were allowed, 2,738 not allowed with 226 pending. (See Table II.)

An analysis of the 2,738 claims not allowed by insurance officers revealed the following reasons for non-allowance: 737 claims under Section 28 (i) in which the claimants had insufficient contributions; 141 claims under Section 28 (ii) in which 84 claims were not made in the prescribed manner and 57 of the claimants were not unemployed; 74 claims under Section 28 (iii) in which 56 were not capable of work and 18 were not available for work; 79 claims under Section 43 (a) for loss of work due to labour disputes; 39 claims under Section 43 (b) (i) for refusal of offer of work; 11 claims under Section 43 (b) (ii) for neglect of opportunity to work; 1 claim under Section 43 (b) (iii) for failure to carry out written directions; 1,627 claims under Section 43 (c) of which 173 were discharged because of their own misconduct and 1,454 for voluntarily leaving without just cause; 2 claims under Section 43 (d) for being under 16 years of age; 27 claims under Section 43 (f) of which 19 were in class O contributions and 8 for other reasons.

Appeals and References

During the period April 1, 1943, to September 30, 1943, there were 406 references and 85 appeals made by claimants to Courts of Referees. In addition, there were ten references by insurance officers to Courts of Referees. Of the 611 cases (including 110 not heard at March 31, 1943), 526 had been heard, 37 had not been heard at the end of September and 48 had been withdrawn. The Courts of Referees allowed 124 claims and disallowed 402. (See Table III.)

Appeals to Umpire

Ten claimants sought permission from the Chairman of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii). Permission was not granted in any of these cases. Five appeals were made by claimants or by associations representing claimants and two by insurance officers.

Unemployment Insurance Registration

Reports received from Local Offices of the Unemployment Insurance Commission showed that at November 1, 1943, 135,815 employers with insured employees were registered and 2,926,444 employees had been issued with insurance books.

A breakdown of employers and employees according to Regions in which registration took place is shown in the following table:

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of September, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

According to data submitted by 13,934 establishments, employing 1,870,836 men and women at the beginning of September, there was a continued increase in general industrial employment. This total was greater by 2,294 persons, or 0.1 per cent, than that reported at the beginning of August.

The largest gain of 11,253 employees was recorded by manufacturing establishments, an increase which greatly exceeds the average at the beginning of September in the 22 years for which statistics are available, although it is considerably smaller than in any other September since that of 1936.

The index number of employment (based on the 1926 average as 100) was 186.2 as compared with 185.9 in the preceding month and 179.3 at September 1, 1942.

Information concerning payrolls, which is furnished each month by the co-operating firms, is incorporated in this article. The per capita average weekly wage in the industries submitting returns rose from \$31.06 at August 1, to \$31.28 at the beginning of September, as compared with \$29.29 at September 1, 1942.

Report on employment conditions for October.—A summary of employment conditions for the month of October has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service Offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment; vacancies, and placements, September, 1943.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from the Employment and Selective Service Offices during the four-week period September 3, to September 30, 1943, showed a moderate increase in business transacted when compared with the preceding period of five weeks duration and an outstanding gain over the month of September, 1942, this computation being based on the average number of placements recorded daily. During the period under review there were 260,224 vacancies reported, 220,650 applications for employment and 165,885 placements effected in regular and casual employment.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of October, 1943, the percentage of unemployment among trade union members was .3 as compared with percentages of .4 in September and .8 in October, a year ago. The October figure was based on returns compiled from 2,331 labour organizations with a total membership of 473,867 persons.

The Employment Situation at the Beginning of September, 1943 as Reported by Employers

THERE was a further rise in general industrial employment in the Dominion at the beginning of September, but the increase was considerably smaller than at September 1 in any recent year, being also substantially below the average at that date in the period since 1920. The 13,934 establishments furnishing information to the Dominion Bureau of Statistics reported the employment of 1,870,836 men and women, as compared with 1,868,542 at August 1. The gain of 2,294 workers, or 0.1 per cent, brought the index (1926=100), to 186.2, as compared with 185.9 in the previous

report, and 179.3 at September 1, 1942. The slackening in the rate of expansion at the date under review continues the levelling-off which has recently been indicated in the current figures of employment; this is partly due to shortages of labour, but in some cases results from changes in the type of production required in certain war industries.

Since the increase in employment as a whole in Canada at the beginning of September was less than that usually reported in the early autumn, the seasonally-corrected index number declined, falling from 180.9 at August

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

1, to 179.0 at the date under review; it then reached the lowest point since November of last year.

Manufacturing establishments showed considerably heightened activity at September 1, when they recorded a gain of 11,253 employees. Although this increase is significant, and greatly exceeds the average at the beginning of September in the 22 earlier years for which statistics are available, it is nevertheless considerably smaller than in any other September since that of 1936. The additions to the personnel at the date under review were fairly evenly divided between the durable and non-durable goods divisions, with those in iron and steel and vegetable foods being greatest. On the other hand, further reductions were shown in chemical plants.

Among the non-manufacturing industries, the trends were mixed, that in communications, transportation, services and trade being moderately upward, while the movement in logging, mining and construction was retrogressive. The declines in logging and mining were contra-seasonal.

Payrolls

The firms co-operating in the current survey at September 1 reported the disbursement of weekly salaries and wages totalling \$58,516,943,

as compared with \$58,044,447 at the beginning of August. This increase of 0.8 per cent exceeded that of 0.1 per cent in the personnel, with the result that the per capita average advanced, rising from \$31.06 at August 1 to \$31.28 at the beginning of September. The latter was the highest in the record, exceeding by 14 cents the previous maximum indicated at April 1, when employment was in smaller volume. At September 1, 1942, the indicated average was \$29.29, while that at September 1, 1941, was \$26.04.

To some extent, the increase in the salaries and wages reported at the date under review as compared with August 1 represents the return to a more normal level of operations in certain plants, following the holiday season. However, the latest figure was affected by strikes in some industries, notably coal-mining in Nova Scotia.

In comparison with September 1 of last year, the reported aggregate payrolls showed a gain of 10.1 per cent, accompanying that of 3.8 per cent in the index of employment. The rise in the average weekly earnings amounted to 6.8 per cent. Although these increases in the 12 months are important, it is noteworthy that they are not so marked as those which had been indicated from September 1, 1941, to September 1, 1942.

Sept. 1.....	121.8	148.9	31.28	136.8	169.4	32.01

If the statistics for the finance group are included with those given above for the eight leading industries, the survey shows that the number in recorded employment at September 1 was 1,935,341, as compared with 1,932,994 at August 1. The latest aggregate of weekly payrolls was stated as \$60,526,193, considerably higher than the total of \$60,080,084 indicated at August 1. The per capita average in the nine leading industries was \$31.27, a figure which practically coincided with the average indicated in the eight leading industries for September 1. The average at that date in 1942 had been \$29.31.

Table II summarizes the latest statistics of employment and payrolls for the leading indus-

trial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at August 1, 1943, and September 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 21.8 per cent, while the aggregate weekly payrolls of those workers

TABLE II—EMPLOYMENT AND EARNINGS

Number of Persons Employed at September 1, 1943, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of such Employees, Together with Index Numbers of Employment and Payrolls as at September 1 and August 1, 1943 and September 1, 1942, Based on June 1, 1941 as 100 p.c.

(The Latest Figures are Subject to Revision.)

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

are higher by 48.9 per cent. Including finance, the gain in employment from June 1, 1941, to September 1, 1943, amounted to 21.2 per cent, and that in payrolls, to 47.6 per cent. The explanation given in preceding reports for the much greater rise in the salaries and wages than in the numbers employed may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the payment of a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been increased on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted.

As a result of wartime conditions, there have been especially noteworthy advances in employment and payrolls in factories, in which the rate of expansion in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 36.8 per cent from June 1, 1941, to September 1,

1943, and that of payrolls has advanced by 69.4 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

The production of durable goods* has shown particularly important gains from the beginning of the record of payrolls; thus, the index of employment has risen by 59.3 per cent, while the salaries and wages distributed by the co-operating employers have doubled between June 1, 1941, and September 1, 1943. Although there has more recently been a slackening in certain of the non-durable goods industries, the index number of employment in this group at the date under review was higher by 16.5 per cent than at June 1, 1941, since when there has been an increase of 37.3 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed

*For list of these industries, see footnote to Table II.

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

* Revised.

out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-

time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

* Revised.

The Course of Employment in the First Four Years of the War

The tabulation of the statistics for September 1 provides an opportunity of reviewing the changes in the Canadian industrial pattern which have resulted from the war, without having to make allowance for the seasonal movements which to a greater or lesser extent affect the value of comparisons of the situation in different months of the year.

In the first months of the war, employment showed only moderate gains, a relatively slow rate of expansion marking the initial phases of the transition from a peace-time to a war-time basis. The attainment of a more advanced stage of industrial organization, together with the stimulus provided by the disasters in Norway, the Low Countries and France, resulted in greatly accelerated industrial activity from the early summer of 1940. From May of that year to December, 1942, the trend in recorded employment was almost steadily upward, the brief interruptions in the markedly buoyant movement being due in the main to seasonal causes. In this period, some 600,000 workers were added to the staffs of the co-operating employers, while approximately 500,000 men and women enlisted in the armed forces, with the result that the reserve of unemployed workers became exhausted and other sources of supply were heavily drawn upon to furnish the required manpower. Among these other sources may be mentioned the own-account and small-employer classes, agricultural workers, home-makers and other women, adolescents, and older men and women. The armed services, in addition to drawing from most of the above reservoirs for recruits have of course also taken very large numbers of persons from their former employment in industry.

Increasing shortages of labour and materials were reflected in a decided slackening in the rate of expansion in employment in the latter part of 1942, and more particularly in the early months of 1943. In the latter, indeed, the general trend was downward until May, in an unusual prolongation of the period of seasonal inactivity. The upward movement was resumed at June 1, but the increases in the personnel indicated at that and subsequent dates were on a scale decidedly smaller than those recorded in the same months in earlier years of the war. Such a development was obviously to be expected, in view of the depletion of manpower involved in the enlistment of over 700,000 men and women in the armed forces from the outbreak of hostilities to the latter part of 1943, and in the stupendous expansion in industrial employment which has

taken place in the same period. It is estimated that in the 48 months from September 1, 1939, to September 1, 1943, the firms furnishing monthly returns on employment and payrolls have enlarged their staffs by some 669,000 workers. Other establishments may also have increased their personnel, although it is highly probable that recent events have, on the whole, reacted unfavourably upon the smaller businesses.

Generally heightened activity in the four years in all provinces and in the eight cities for which monthly statistics are segregated is indicated in the report. The expansion in British Columbia, Nova Scotia, Ontario and Quebec has been particularly outstanding, partly a consequence of the industrial distributions existing in those provinces. This factor has also contributed materially to the extremely pronounced gains in Windsor, Quebec, Vancouver and Hamilton.

Among the various industrial groups, manufacturing, for very evident reasons, has responded most impressively to wartime demands. In the period from September 1, 1939, the number in recorded employment has almost doubled, while that in the production of durable goods has increased by practically 189 per cent. In the class of non-durable goods, the index of employment shows a rise of only 44 per cent, the labour stringency particularly affecting activity among the light manufacturing industries engaged on other than war work. In almost all cases, the rates of expansion from 1939 to 1940, from 1940 to 1941, and from 1941 to 1942, exceeded those indicated in the period from September 1, 1942, to September 1, 1943. This is a result not only of shortages of labour and supplies, but is also due to some extent to revisions in production requirements associated with the changing conditions of the war.

Among the non-manufacturing industries, the increases in employment since the outbreak of hostilities have generally been more moderate than those in manufacturing. Although there have been important gains in logging from September 1, 1939, that industry is nevertheless experiencing an acute shortage of labour. This situation is also reflected in the data for mining, in which the lack of workers is particularly serious; despite greatly increased demand for coal and for various metals and minerals required in the war effort, employment in these industries was in smaller volume at September 1, 1943, than when the war broke out.

The growth of employment in communications and transportation in the last four years has been considerable; in the latter, the index at September 1, 1943, reached its highest point

in the record of 23 years. The expansion in trade and services has also been noteworthy. In these two, the widespread replacement of men by female workers has helped the situation, while the use of part-time employees has also assumed increasing importance.

In construction, employment generally has been curtailed during the war, despite the many large defence projects undertaken. However, shortages of labour and materials have had a marked effect upon normal construction activities.

Employment and Payrolls by Industries

Manufacturing.—Employment in manufacturing showed further expansion at September 1, in a seasonal movement which exceeded the average from August 1 to September 1, in pre-war years. The increase was, however, the smallest at the beginning of September in the period since 1936. The distribution of the gains also differed from the normal, a repetition of the situation indicated at the same date in 1942; the increases in the durable goods group were considerably above normal, while those in the production of non-durable goods were less than usual for the season. In both divisions, however, the latest advances were smaller than in the early autumn of last year.

Information was furnished by 7,790 manufacturers, whose staffs aggregated 1,200,408, as compared with 1,189,155 at August 1. The increase amounted to 11,253, or 0.9 per cent. The sums disbursed in weekly payrolls rose from \$37,779,310 at the beginning of August, to \$38,426,948 at September 1; the difference was \$647,638, or 1.7 per cent. The relatively greater percentage advance in the salaries and wages than in the number of employees was partly due to a resumption of operations on a more normal scale following vacations in a number of plants.

The index number of employment in manufacturing at the date under review stood at 229.9 per cent of the 1926 average, a new maximum. The August 1 figure was 227.7, while that at September 1 of last year was 215.6. Since the latest increase over the preceding month was larger than normal, the seasonally-adjusted index showed a further upward movement, rising from 222.7 at August 1 to 223.5 at the beginning of September.

The greatest expansion in employment at the date under review took place in iron and steel and vegetable food factories; in the latter, however, the gain was considerably below average for the season. Large advances were also indicated in electrical apparatus, non-ferrous metal, animal food, lumber, pulp and paper, tobacco, textile and miscellaneous

manufactured products plants. On the other hand, reductions were shown in the chemical division for the fifth successive month.

The persons in recorded employment in manufacturing establishments at September 1 received the sum of \$38,426,948 for services rendered during the week preceding, as compared with \$37,779,310 reported at August 1. The former amount represented a pay envelope of \$32.01 for the average worker, comparing favourably with the August 1 average of \$31.77, and also with that of \$29.72 at September 1, 1942.

Based on the weekly salaries and wages paid by the co-operating establishments on or about June 1, 1941, as 100 per cent, the index of payrolls at September 1, 1943, stood at 169.4, as compared with 166.6 at August 1, 1943, and 148.5 at September 1, 1942. The increase of 14.1 per cent in the reported payrolls at the date under review as compared with twelve months earlier, considerably exceeds that of 6.6 per cent in the number of persons employed by the co-operating manufacturers. The reasons for the disparity in the rates of gain have already been given. In the manufacturing industries, the upgrading of employees as they acquire experience is of especial and increasing importance, tending to offset the effect of the large scale dilution of labour consequent upon the shortage of workers which has become acute with the development of the war effort. As has previously been pointed out, the changing industrial distribution of the wage-earners in recorded employment has also contributed materially to the relatively greater gain in payrolls, there being a growing proportion of workers in the more highly-paid heavy industries. At September 1, 1943, such industries provided work for 57.3 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at June 1, 1941, the proportion was 50.6 per cent. The effect of this change in distribution is emphasized by the fact that the latest per capita average earnings of persons engaged in these classes stood at \$35.14, an amount which was higher by \$7.11 than at June 1, 1941, while in the light manufacturing industries the September 1 average, standing at \$27.67, has risen by only \$4.30 in the 27 months.

From the institution of the payroll statistics early in 1941, there have been extremely marked advances in salaries and wages distributed to persons employed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured product, electrical apparatus and tobacco industries. The advances in those industries have been accompanied by noteworthy, though relatively smaller

gains in employment. In practically every case, and notably in the industries just mentioned, the per capita average earnings in the various branches of manufacturing were considerably higher at the date under review than at September 1, 1942.

Many factors contribute to the differences found in the average weekly earnings in the various industries. Prominent among these is the sex distribution of workers in the various industries, a factor which is associated with that of age, the women workers, in general, tending to belong in the younger age groups, where earnings normally are less than among more experienced employees. The presence or absence of overtime work also substantially affects the per capita average earnings.

Logging.—There was a contra-seasonal decrease in employment in the bush at the beginning of September, when data were received from 499 firms having 38,539 employees, as compared with 40,737 in their last report. Employment generally was quieter than at the beginning of September, 1942, there being a falling-off of 12.7 per cent in the index, which stood at 128.8 at the date under review. The reported weekly payrolls, at \$1,092,275, were practically the same as at August 1, 1943, while the latest index was higher by 2.9 per cent than at September 1, 1942.

The per capita average earnings at the date under review were \$28.34, as compared with \$26.81 paid on or about August 1. The figure at September 1 of last autumn was \$23.03. As has previously been stated, the statistics of aggregate and per capita average earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings; these differ greatly in various parts of the country, the average in British Columbia being decidedly higher than in any other province.

Mining.—Continued curtailment of mining operations was reported at September 1; the 474 employers then furnishing information had a combined working force of 73,918 persons, 486 fewer than at the beginning of August. The decline took place in the metallic ore division, while the mining of coal and of other non-metallic minerals absorbed slightly larger numbers of workers. The index of employment in the mining group at September 1 was 158.1, as compared with 166.8 at the same date in 1942. This was a decline of 5.2 per cent.

The payrolls reported at the latest date amounted to \$2,640,792, as compared with \$2,674,406 in the preceding period of observation. The falling-off of 1.3 per cent partly reflected loss of working time due to industrial disputes in the coal fields. The per capita average earnings were rather lower, falling from \$35.94 at August 1, to \$35.73 at the beginning of September; at the same date in 1942, the figure had been \$35.64.

Communications.—Slight improvement of a seasonal character was recorded in the communication group as a whole at September 1. The increase, which was rather smaller than usual for the time of year, took place in the telephone division, telegraphs releasing some employees. The reported staffs included 28,684 men and women, whose weekly payrolls amounted to \$860,867. At August 1, the indicated workers numbers 28,620, and their earnings were given as \$829,749. The increase in employment was 0.2 per cent and, partly as a result of wage-adjustments, that in salaries and wages was 3.8 per cent. The per capita average rose from \$28.99 at August 1, to \$30.01 at the first of September, as compared with \$28.19 at the same date of last year. Based on the 1926 average as 100, the latest index of employment was 107.4; this was fractionally higher than the September 1, 1942, figure. The index number of payrolls has risen in the twelve months by 6.7 per cent.

Transportation.—There was a further advance in transportation as a whole; street railway operation, cartage and storage, and shipping and stevedoring were more active, but employment in steam railway operation was somewhat quieter. The general gain in the group was seasonal. Employment reached a new all-time maximum at September 1, when the index stood at 120.4, as compared with 110.0 at September 1, 1942. The staffs of the 592 firms and branches furnishing returns totalled 152,065, as compared with 151,223 at August 1. The weekly salaries and wages disbursed at September 1 were given as \$5,380,187, a sum which was 0.1 per cent lower than the August 1 payroll of \$5,387,731. The per capita average weekly earnings fell from \$35.63 at August 1, to \$35.33 at the date under review, as compared with \$34.83 at September 1, 1942. Since then, there has been an increase of 9.5 per cent in employment, and of 10.7 per cent in the index of aggregate payrolls in transportation.

Construction and Maintenance showed a seasonal decline, which substantially exceeded the average at September 1 according to the experience of the years since 1920. Railway

work was rather brisker, but building and highway construction and maintenance released employees. Statistics were tabulated from 1,554 contractors with a total working force of 174,453, as compared with 181,971 at August 1. This was a decrease of 7,518 employees, or 4.1 per cent. The reported weekly payrolls were lower by 2.4 per cent. The latest aggregate was \$5,255,758, as compared with \$5,382,487 in the last report. The per capita average earnings rose from \$29.58 paid at August 1, to \$30.13 at the date under review; those at September 1, 1942, were \$28.44.

The index of employment in construction was lower than at the beginning of September of last year, when it stood at 146.5, as compared with the latest figure of 138.3. This decline of 5.6 per cent was accompanied by an insignificant decrease in the indicated payrolls.

Services.—Little general change was noted in services at September 1, when the 642 co-operating establishments reported 44,059 men and women on their payrolls, as compared with 44,038 in the preceding month. There was an increase in the salaries and wages disbursed at the beginning of September; these aggregated \$823,600, while the August 1 total was \$816,281.

As compared with September 1, 1942, there was a gain of 4.3 per cent in employment at the date under review, when the increase in the reported payrolls in the same comparison amounted to 11.9 per cent. The per capita average earnings, at \$18.69 at the beginning of September, were higher by 15 cents than at

August 1. At September 1, 1942, the average had been \$17.46. Attention must be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 63 per cent of the total reported in the service division as a whole at the beginning of September.

Trade.—There was a further small advance in employment in trading establishments at September 1, when the gain approximated the average for the time of year. A personnel of 158,710 was reported by the 2,325 co-operating employers, who had had 158,394 employees at the first of August. The payrolls disbursed by these firms, however, were lower, falling from \$4,082,191 at that date, to \$4,036,516 at September 1. The latest average per employee was \$25.43, as compared with \$25.77 at August 1, and \$24.31 at September 1 of last year. Since then, the index number of employment in trade has slightly declined, but that of payrolls has risen by three per cent.

Financial Institutions.—Statistics were tabulated from 756 banks, trust companies, insurance companies and other financial institutions, whose staffs aggregated 64,505, an increase of 53 from August 1. The salaries and wages paid these employees amounted to \$2,009,250, giving a per capita weekly average of \$31.15, as compared with \$31.58 in the last report, and \$29.31 at September 1, 1942. In the intervening 12 months, the number employed in the co-operating financial institutions has advanced by 0.6 per cent, while the index number of payrolls has gained by 5.1 per cent.

Report on Employment Conditions for October, 1943

THE following summary of employment conditions for the month of October has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

The Dominion-wide manpower picture for October reflected the fluctuation in labour needs caused by the change-over from summer occupations to those of fall and winter.

Industry had become adjusted to the loss of assistance occasioned by the reopening of schools and universities, and was balancing this loss by the recruitment to essential war industries of agricultural workers now finished with their harvesting. The help of members of the armed forces had been of material value in areas where the bringing in of crops

was of primary importance, and the anticipated return to Canada of several thousand members of the Canadian Forestry Corps promised to relieve the pressure of drastic labour shortage in the logging industry.

The shipbuilding lay-offs had proved disappointing to those employers who looked for added workers from this source, but the recent freezing order was already proving beneficial in curtailing labour turnover, and the constantly increasing employment of women in essential industry was another ameliorating factor. While the over-all labour shortage threatened to continue indefinitely, industry as a whole was striving to carry on as effectively as possible with the manpower at its command.

Maritime Region

Agriculture.—The agricultural season was drawing to a close in the maritime region. The apple and potato crops, delayed by wet weather, were almost completed. Fifty men were secured from the province of Quebec to assist in the potato harvesting, and 300 soldiers worked in Carleton and Victoria counties under the Army Farm Duty plan. It was anticipated that much of the assistance used in picking would be required, at the close of the harvest, to grade, ship and build containers for the movement of the potatoes.

In Prince Edward Island, approximately one-tenth of the potato crop was still in the ground, and in the Saint John River valley, five per cent (nearly 500,000 bushels) was yet to be dug. Another week of fine weather, without frost, was needed to complete the digging of this crop, which promised far to exceed in value any harvest of previous years. Owing to adverse weather conditions, seven to ten days of fine weather was necessary to complete apple-packing in Nova Scotia. Fall ploughing was well under way throughout the region, and many men were already being released to other industries.

Fishing.—The fishing season was practically ended, and many fishermen were seeking employment ashore. With the exception of smelt fishing, for which there had been a few temporary releases from industry, fishing would be over by the middle of November. The fish plants in the region were carrying on, with very few requests for workers except at St. Stephen, where there was a slight shortage of labour.

Logging.—In the maritime region, the logging industry registered the same drastic labour shortage which was on record from coast to coast. The situation was regarded as definitely serious, but it was expected that the release of 600 soldiers from the Forestry Corps overseas, for woods operations in the region, would materially alleviate the difficulty and the close of the fishing season was another helpful factor. A number of lumber operators had been given permission to send their own canvassers to recruit men in restricted areas. At Campbellton, a contract for 4,000 cords of fuelwood was being given by the municipality, in order to relieve the critical fuel situation; temporary camps to accommodate the woodcutters were being erected, and operations would continue as long as the road was open for trucking.

Mining.—The coal mining situation in the region showed little change. Absenteeism continued at the same high level, presenting a

problem for which no solution has yet been found. To speed up the transfer of soldier miners, four interviewing officers were despatched from the regional office to cover the military camps throughout the Maritimes for the purpose of contacting every ex-miner, impressing on him the seriousness of the situation and persuading him to return to the coal mines. As a result, 125 men had already been procured.

Manufacturing.—In the manufacturing field there was a continued definite shortage of labour, especially in the shipbuilding industry. At Halifax, all types of skilled help were required, and semiskilled workers were also at a premium. H.M.C. Dockyard had orders on file for at least 200 unskilled labourers, and the Halifax shipyards were in like need of skilled, semiskilled and unskilled workers. It was hoped that shortages might be alleviated when the Industrial Mobilization Survey got under way in this region.

The recent freezing order was having the desired effect insofar as the aircraft industry was concerned, but there was still a great demand for skilled, semi-skilled and unskilled labour, with no local supply available. All men who could possibly be transferred under the Compulsory Transfer Orders were being moved to that industry, and to shipbuilding.

Amherst reported that help was available except in the aircraft industry, but at Halifax all types of labour were urgently needed for high priority industries. At Newcastle the completion of sawmill operations was releasing many workers for lumbering, but New Glasgow and Saint John were unanimous in their need for skilled labour; some applicants were being found in the female division, and older men and boys were also being pressed into service.

Construction.—Construction's crying need was for carpenters, but common labourers were also in great demand. It was anticipated that this need would soon diminish, as the present acute shortage was due to increased efforts of various construction companies to complete their contracts before winter sets in. Moncton reported an acute shortage of skilled masons for local construction projects, and was also unable to fill the heavy demand for skilled labourers and carpenters for a new hangar under erection for the T.C.A. All construction jobs throughout the region were proceeding behind schedule, owing to the lack of labourers and general tradesmen, although at Halifax the use of men when not needed in the Longshoremen's Labour Pool was of material benefit.

Quebec Region

Agriculture.—With a few exceptions, such as the Rouyn and Rivière du Loup areas, agricultural work (even including the fall ploughing) was completed, and wherever possible farmers had been referred to woods operations and meat packing plants, or, if unable to leave their farms, to work in local war industries. The only demand for farm labour was for a few year-round agricultural assistants.

Logging.—The winding up of the harvest was a boon to the logging industry, where thousands of men were still required. In the case of the larger companies fuelwood contracts were superseding pulpwood cutting, with the result that the pulpwood industry, already far behind last year's quota, was still further handicapped. The new system of recruiting loggers, whereby field men were sent out through the region, had been put into effect, and results were expected shortly. The release of farmers from their summer duties was also advantageous, but the over-all shortage remained definitely disturbing.

At Dolbeau, about 1,800 loggers were urgently required, with few applications on file; at Chicoutimi, there were 1,425 vacancies reported, and practically no applicants; at Matane, 1,500 men were required for log operations, and 2,000 for pulpwood cutting, with few applicants; at Val d'Or, approximately 500 more men were needed for fuelwood cutting and 1,000 for pulpwood cutting; at Campbell's Bay over 1,200 men were still in demand, with many labourers available refusing to go into the bush.

Mining.—Although mining was feeling the pinch of the labour shortage in its lack of underground workers, the base metal mines were operating satisfactorily in the Quebec region, except at Rouyn, where 600 experienced men could be readily absorbed, husky smelter men especially.

Manufacturing.—While agriculture and logging have seasonal labour difficulties, manufacturing presents a year-round manpower problem in the Quebec region. The aluminum industry seemed quite capable of filling its small requirements, but labourers were scarce at Asbestos and Chicoutimi, for the arsenals at Quebec and for Montreal's essential factories and foundries. Machinists also were in heavy demand in Montreal, as were semi-skilled workers for the aircraft industry, and women for shell filling plants, while at Valleyfield both men and women were needed for the smokeless powder works.

Reports regarding the shipyards again varied as to labour requirements. Quebec and Lévis

required experienced tradesmen, and Sorel heavy labourers, but Montreal was laying off welders, shipwrights, riveters and other skilled tradesmen. In the Montreal area flour mills, food manufacturers and food warehouses were feeling the labour shortage acutely, although the situation in the packing plants had eased somewhat with the referral of men from surrounding districts.

The disturbing logging situation of necessity was reflected in the pulp and paper industry, which suffered not alone from lack of workers, but also from an insufficient supply of pulpwood.

There was a general shortage of skilled machine operators in the textile mills of the region, especially at St. Jean and Montreal, but the freezing order had benefited the clothing industry in general to some extent.

Construction.—With the approach of winter, there was an increased demand for construction labourers and carpenters at Montreal, St. Jean and Ste. Hyacinthe, but very few men were available, or interested in outside work. At Chicoutimi, where there was much activity on the Arvida construction works, an effort was being made to fill large orders by transfers from completed projects, but with little result: 500 labourers in all were urgently and immediately needed.

Sherbrooke reported a shortage of qualified men in all trades, with the few experienced applicants referred to A and B priority industries. In smaller places, where highway projects comprise the major construction undertakings, manpower requirements were usually filled by local farmers when orders were not large.

Ontario Region

Agriculture.—The labour requirements of agriculture throughout the Ontario region had, on the whole, been adequately met. Corn-picking machines solved one part of the manpower problem, and the migration of workers from the tobacco and tomato harvesting areas met the demands of beet harvesting. Apple picking and packing, and fall ploughing—retarded by heavy rains—would mark the conclusion of the season. The sole labour demand was for the occasional permanent farm hand. Farmers were applying for permits for winter occupation, and along with the men returning from the western harvest, they were being referred to the bush or to war industry.

Logging.—In common with other regions, Ontario was unable to cope successfully with the demands of logging. At the height of the fuelwood and pulpwood cutting season, the labour shortage had assumed proportions which

the recruiting of agricultural aid only partially reduced. At Bracebridge about 1,000 men would be needed to bring operations to capacity production; Pembroke was still short some 800 men and Kapuskasing had filed orders for 430 logmakers and 1,540 other bushmen, of whom only 82 were presently available. Local contracts were held up because of this extreme shortage, and a canvass of the entire area for additional workers had had discouragingly small results.

Perth had circularized the farmers returning from the western harvesting, informing them of the shortage of wood cutters, and was hoping by this means to meet the local demand shortly. Throughout the entire region logging camps were running under the serious handicap of labour shortages, mounting as high as 50 per cent at Sudbury and 75 per cent in a number of other limits.

Mining.—Mining, too, was handicapped by a scarcity of workers. Underground labour was urgently needed at Sudbury: experience was not essential but physical fitness was imperative for this work. General labourers of good physique were still in demand at the Soo, and women would be engaged in the ratio of one to every two men. The lime quarries in Ingersoll were continually short of men, but no workers were available for this type of work; men brought in from outside would only remain a short time before becoming dissatisfied. A new mica plant was shortly to open at North Bay, but here there was a good waiting list of female applicants. At Timmins the need for gold miners was acute, as the mines there had reached the lowest percentage of workers with which they were enabled to operate without loss.

Manufacturing.—The diversion of farmers to essential industries had somewhat alleviated the labour deficiencies insofar as manufacturing was concerned, but the consensus of reports still recorded an over-all shortage of manpower. However, employers in general seemed to accept the fact that workers were not available in large numbers: plants had given up the hope of staff increase, and were adjusting their production aims to fit their present employees, rather than make the changes required to use more female help. This acceptance of existing labour conditions was reflected in the steady drop in orders for male help.

The forced curtailment of logging operations had a resulting unfortunate effect on the output of the pulp and paper industry. At Sault Ste. Marie one of the plants, far short of its quota of loggers, had been forced to lay off some 60 men, who were for the most part

absorbed into other lines of employment. In the paper mills at Kapuskasing female workers were even replacing males as woodyard labourers, and various pulp and paper plants were taking on women to fill a drastic shortage of labour for barker operations.

Heavy demands for all types of skilled and semi-skilled labour continued in the iron and steel industry, with a definite shortage of applicants for the work. Brantford was among the most needy of the manufacturing centres, and Kingston still had large requirements, with its total needs for industry amounting to about 500 men and 300 women labourers and helpers. Chemical manufacturing plants at Brantford and Niagara Falls were likewise greatly understaffed. At Midland skilled tradesmen—welders, pipefitters, electricians—were needed immediately in the local shipyards in order to get a corvette out before the freeze-up.

In Peterborough all factories engaged in war work were running on two or three shifts a day, with a reported shortage of toolmakers, mechanics, and other skilled workers, as well as unskilled labour, textile workers and tanner help. On the other hand, slackness in Guelph's war industries had made possible a considerable number of placements in non-essential industries where the need was urgent, and in London one industrial concern had laid off 350 workers, 50 per cent of whom were men, and all of whom were being readily absorbed as factory workers.

Construction.—The greatest problem in the construction industry was to obtain labourers and carpenters: the continued open weather accounted for the continuing steady request, but the few men who were presently becoming available demanded factory jobs for the winter months.

Prairie Region

Agriculture.—The end of October brought the harvesting in the prairie provinces to a successful conclusion. Threshing, ploughing and spring seeding were practically concluded, and as the season drew to a close agriculture was releasing many of its workers for transfer to other essential industries. These men were being referred to packing plants, coal and base metal mines, logging and pulpwood camps, etc.

Agriculture's only unfilled requirements were for a few dairy workers, and a larger number (in some cases, married couples) for fall and winter chore work: these vacancies remained empty, largely owing to the low wages offered.

Fishing, Hunting and Trapping.—These vitally important seasonal industries in the Fort Frances area seemed to present no labour difficulties. All fishermen would be active

until the freeze-up, and the annual spawning operations of the Department of Game and Fisheries were adequately supplied with men. About the same number of trappers as formerly were available for the opening trapping season, and there were plenty of guides, mostly Indians, available for the hunting season.

Logging.—In the prairie region as elsewhere, logging requirements caused the greatest concern to lumbermen and the employment service alike. Pulpwood cutting had been neglected because of the urgency of the fuelwood problem, with a resultant serious shortage which, if not remedied, would drastically curtail paper production.

The heavy demand for fuelwood cutters continued: as the quota for each district was filled, by the end of October, cutters would be transferred over to sawlog and pulpwood cutting. The close of the agricultural season brought some relief to the logging situation, but the over-all shortage of workers was grave. At Fort Frances members of the 17th Forestry Corps had arrived from Scotland, but their disposition was not as yet known. A record of 324 vacancies at Edson, 300 at Yorkton and several hundred at Kenora, told its own story of dire labour need. A requisition for war prisoners to work in an essential logging camp had, thus far, brought no results. Labour was also still urgently needed in prop and bush camps in Alberta: this is all-year work, due to the contract demand of mine timber supplies.

Mining.—Mining, too, continued to feel the pinch of labour shortage. Some slight improvement was reported, due to farmers accepting seasonal employment at the close of their agricultural duties: a number of these held certificates, but Blairmore, Estevan, Lethbridge and other coal fields were unanimous in their appeal for certified miners. The housing situation was the most serious drawback to employment in this industry: the production of coal could be substantially increased if living accommodation were available. The strike of 6,500 miners at the close of the month brought production to a halt for the time being.

The labour requirements of the metal region were beyond possibility of supply. The absorption of agricultural workers was affording some relief, but orders were out of all proportion to the applicants available. There was a steady demand for workers in the oil wells, but these were very difficult to obtain.

Manufacturing.—In the manufacturing field, while an over-all shortage of labour still prevailed, the immediate problem was the demand of the packing plants. Every effort

was being made to satisfy their demands, and during the latter part of the month it was reported that Regina's meat packing plants were adequately supplied with workers, and whenever possible applicants were being transferred to Manitoba, where a lack of manpower was still unsatisfied.

At Port Arthur skilled and unskilled men were still urgently needed in the shipbuilding yards, as well as in grain elevators and other high priority industries. Fort William's immediate demand was for aircraft workers, and farm labour was being recruited from the prairies for the vital elevator work of the Twin Cities. Across the entire prairie region manufacturing centres reported many unfilled vacancies—the flour mills at Kenora were running three shifts, for the most part to fill overseas orders, and extra workers were requested; Medicine Hat was vainly requisitioning male and female helpers in brick, pottery and glass industries, where the low wage scale offered no inducement; Calgary was very short of machinists and electric welders for the foundries and machine shops, male and female helpers for the meat packing plants, and operators for the textile and fur trades, but a steady demand for labourers was being fairly well satisfied by agricultural workers.

Construction.—The prairie region was making every effort to complete all possible construction before the winter set in. The wind-up of Canadian highway operations in the Dawson Creek area was proving a boon to contractors: some 2,000 men were thereby released for work elsewhere, and were being directed to the Edmonton zone to relieve the urgent needs of wartime housing projects and the airport construction there, while the large percentage from Ontario were, for the most part, returning to former employers for whom they had worked for some years.

Pacific Region

Agriculture.—With the passing of the peak of agriculture's seasonal activities, employment conditions in this industry were reverting to normal winter status. Harvesting of fruit and vegetables was almost completed in the Duncan and Okanagan districts; at Penticton the high school remained closed until the end of the month, with nearly all students working in orchards, canneries and packing houses, but Kelowna was not so well supplied with apple pickers, as student workers had returned to school and voluntary help was practically nil. The only demand for any number of agricultural workers was the revival of requests for permanent farm help and

dairy workers, with little response because of the generous wages offered in other industries.

Logging.—The logging industry continued to present the gravest manpower problem throughout the Pacific region. Logging operators in the coastal area and in the interior were still anxiously awaiting the arrival of prairie farm workers for woods employment. In the meantime, Vancouver reported 1,250 vacancies on file, with only 20 of these from the lumber camps in the Queen Charlotte Islands, where many of the men on strike were presently returning to work.

At Nanaimo, lack of accommodation and transportation made it difficult to fill orders for the fallers required; at Port Alberni there was a heavy demand for skilled and unskilled men, but few available; at Prince George all kinds of bushmen were urgently needed; Trail reported that Doukhobors were being returned to the logging industry wherever possible, and Cranbrook operations were threatened with closure owing to the shortage of loggers and sawmill workers.

Mining.—The slight improvement in manpower for mining continued. Some ex-miners had reported for placement following some of the recent changes in war industry, but unfortunately many other applicants were unsuited for mine work. The heaviest demands for coal miners came from the Princeton, Kamloops and Prince Rupert areas; every effort was being made to secure men for coal and base metal mines alike, but recruitment was slow, and the lack of accommodation for married men continued as a definite impediment. Coal production in this region, too, ceased temporarily with the miners' strike at the end of October.

Shipbuilding.—At the close of the month, some 1,700 men were still required for shipbuilding. Approximately equal numbers were required for the three shipbuilding centres of Victoria, Vancouver and Prince Rupert. In Vancouver, the main requirements were for electricians, sheet metal workers, pipe fitters, stagers, shipwrights and numerous helpers. The same deficiencies were apparent in the Victoria yards, while Prince Rupert required men of all degrees of skill.

In other branches of manufacturing there was, on the whole, no excessive manpower shortage. The demand for highly skilled men still existed, but was attributable in part to employers' endeavours to get more highly skilled men to replace those of lesser training.

Aircraft workers, both male and female, were in demand, and there were orders on file for employees for woodworking establishments, where lower wages than in other industries made the engagement of helpers more difficult.

Although the freezing order had decreased the labour turnover, there was still a heavy demand for workers in the sawmills throughout the region. Here, too, operators were hoping to utilize prairie farm labour, and planning to renew their closed-down night shifts as soon as such labour was available. Pulp and paper plants shared in the acute labour shortage, especially for the heavier types of work. The Vancouver local office reported that orders for these plants, together with shingle and sawmills, approximated some 850 men.

Construction.—Construction, which had for a time eased off slightly in its labour requirements, was again on the increase in the New Westminster, Courtenay and Prince George areas. National Defence and Wartime Housing projects were absorbing all available men, and Prince Rupert was still struggling with an inadequate supply of carpenters, bridge-men and helpers, both for work in the city and on the Prince Rupert-Cedarvale Highway. Prince George again reported an urgent need for construction labourers, and these, as well as electricians and carpenters, were also required for the power plant under construction at Brilliant.

In Vancouver the bricklaying situation was returning to normal, but the shortage of plasterers remained acute, and the attempt to enlist them for temporary work from carpenters presently in other occupations in the shipyards had met with no success.

Transportation.—Throughout the Dominion, the statement was unanimous that no satisfactory answer could be found for the labour demand. The railway companies made a coast-to-coast demand for additional men for train crew and track maintenance. The problem of shipping crews would remain acute on the Great Lakes until the end of the season, and would continue indefinitely on the Pacific coast. Freight-handlers and garage mechanics were as scarce as previously.

Services.—The usual shortage of waitresses, domestic servants and hospital assistants prevailed from coast to coast, but it was noteworthy that many young girls reported available for employment refused to accept this type of work.

Report of Employment and Selective Service Offices for the Period July to September, 1943

R EPORTS received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the quarter July to September, 1943, showed gains of 101.7 per cent and 156.4 per cent, respectively, in vacancies listed and placements effected, when compared with those reported during the corresponding quarter of 1942.

From the chart appearing elsewhere, which accompanies the article on the work of the Employment and Selective Service Offices for the month of September, it will be noted that the curve of vacancies in relation to applications followed a downward course during July then rose sharply during August but dropped again during September, while the curve of placements showed an incline in July, then a decline in August and a moderate upward trend during September, the levels at the close of the quarter being higher for vacancies and placements than those shown at the end of the corresponding period last year. During the period July to September, 1943, there was a ratio of 119.3 vacancies and 75.4 placements for each one hundred applications for employment, as compared with 97.7 vacancies and 48.6 placements during the corresponding period a year ago.

During the three months July to September, 1943, the offices reported that they had re-

ferred 698,216 persons to positions and had effected a total of 531,410 placements, of which 520,260 were in regular employment and 11,150 in casual work. Of the placements in regular employment, 324,435 were of men and 195,825 of women. A comparison with the corresponding period of 1942, shows that 207,236 placements were then made, of which 188,638 were in regular employment and 18,598 in casual work. Applications for employment during the period under review were received from 417,187 men and 287,746 women, a total of 704,933, in contrast with the registration of 426,639 during the same period last year. Employers notified the offices during the quarter July to September, 1943, of 841,054 vacancies, of which 544,870 were for men and 296,184 for women, as compared with 416,784 opportunities for work during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 10,923; of applicants registered 6,757; and of placements effected 6,902, in contrast with a daily average of 5,413 vacancies, 5,541 applications and 2,692 placements in regular and casual employment during the same quarter of 1942.

Applications for Employment; Vacancies and Placements, September, 1943

R EPORTS received from Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period September 3 to September 30, 1943, showed an increase of 14.3 per cent in business transacted, when compared with the preceding five-week period, July 30 to September 2, 1943, and a gain of 75.3 per cent over the month of September, 1942, this computation being based on the average number of placements recorded daily.

The accompanying chart shows the trend of employment since January, 1941, as repre-

sented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies took a downward course while that of placements followed an upward trend. The ratio of vacancies to each one hundred applications was 117.9 during the four weeks ending September 30, 1943, in contrast with 126.2 during the preceding five weeks and 108.9 during September of last year, and the ratio of placements to each one

Unemployment in Trade Unions at the close of September, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons, who are without work on account of sickness, a strike or a lockout, or who are engaged at work outside their own trades, are not considered as unemployed. As reports from unions making returns vary from month to month, with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Reports were tabulated for September from 2,331 labour organizations, having a total mem-

bership of 473,867 persons, of whom, 1,398, or a percentage of .3 were listed as unemployed; most of those without work being temporarily laid off. In the previous month the unemployment percentage was .4 and in September, a year ago, it was .8. The Dominion percentage of .3 is the lowest in trade union records and as a result the situation for union members generally, was at this date at the highest employment level ever attained since the figures among this class of workers were collected for the first time for the quarterly period ending with December, 1915. Following the year 1918, the report was changed to a monthly basis and since then has been continued as such. The slight increase in work afforded during September as compared with the preceding month, was due, in a large measure, to higher employment among coal

miners, a minor increase in activity for members in the non-metallic minerals group and also, to the slightly higher employment level, as reflected in reports received from union members in the building and construction trades.

The unemployment percentages by provinces are shown in table I. It will be observed that in September these figures ranged from .1 per cent in both Nova Scotia and Alberta to .7 per cent in Saskatchewan. As compared with August conditions, the employment level in Nova Scotia was appreciably higher; this was due to a moderate expansion in activity among coal miners. In New Brunswick, Quebec

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

bership of 473,867 persons, of whom, 1,398, or a percentage of .3 were listed as unemployed; most of those without work being temporarily laid off. In the previous month the unemployment percentage was .4 and in September, a year ago, it was .8. The Dominion percentage of .3 is the lowest in trade union records and as a result the situation for union members generally, was at this date at the highest employment level ever attained since the figures among this class of workers were collected for the first time for the quarterly period ending with December, 1915. Following the year 1918, the report was changed to a monthly basis and since then has been continued as such. The slight increase in work afforded during September as compared with the preceding month, was due, in a large measure, to higher employment among coal

and Manitoba, minor increases in available work were manifested, while conditions in Ontario, Alberta and British Columbia remained unchanged. On the other hand, in Saskatchewan, there was a minor contraction. In comparison with the situation in September, 1942, considerably better conditions were observed in Nova Scotia, New Brunswick, Quebec and Alberta, while in Ontario, Manitoba, Saskatchewan and British Columbia minor expansions, only, were in evidence.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. At the end of September, these figures ranged from .1 per cent in Saint John to .3 per cent in the cities of Montreal, Toronto and Winnipeg. In comparison with August reports, slightly

higher employment levels were indicated in Montreal and Winnipeg, while the unemployment percentages in Saint John, Regina, Edmonton and Vancouver remained unchanged. On the contrary, in Halifax and Toronto, there were minor declines in available work. In comparison with the situation in September, a year ago, substantial betterment was observed in Saint John, Montreal and Edmonton, while gains of lesser degree were reflected in reports received from unions in Halifax, Toronto, Winnipeg and Regina; the situation in Vancouver was identical with that shown in September, 1942.

The accompanying chart illustrates the trend of unemployment from January, 1938 to date. The curve in September declined slightly, thus reflecting the highest employment level of the year to date. In comparison with September, a year ago, the point of the curve was appreciably lower, thus denoting a rather noteworthy expansion in available work, since that period.

For the manufacturing industries 846 returns were tabulated, having a combined membership of 275,422 persons, of whom, 427, or a percentage of 0.2 were without work. This percentage as in July and August, remained unchanged; in September, a year ago, the unemployment percentage for these workers was .4. Although the group percentage was identical with that of August, fluctuations occurred within the various trades. A slightly higher employment level was apparent for union members in the iron and steel division and likewise, for those in the animal products group; a slight improvement for leather workers was responsible for the latter betterment. Among hat, cap and glove, wood and chemical members, also, there were minor increases in work available. Among workers in the vegetable products group, as well as among those engaged in the production of electric current, textile and carpet, rubber, clay, glass and stone and mineral products, full employment prevailed at both dates. The percentage of those without work among members in the garment trades remained unchanged, while a slightly lower employment level was observed among papermakers and also, for members in smaller groups such as those of printing, general labourers and non-ferrous metals; the latter covers such occupations as metal polishers, etc., aluminum, jewellery and mine, mill and smelter workers. As compared with conditions in September, 1942, members in the printing trades and those in the animal products division, reflected appreciable employment expansion, while increases of lesser degree were manifested among papermakers and union members in the iron

and steel group. As in September, 1942, no unemployment was reported by electric current employees, etc., textile and carpet, mineral products, rubber and chemical workers. On the other hand, members in the garment trades, in which group are included both men's and women's clothing workers, reflected a slight employment contraction.

Returns were tabulated from 58 unions of coal miners, having a total membership of 20,811 persons, all of whom were working, as compared with 0.5 per cent of unemployed members in the preceding month and 0.4 per cent in September, 1942. In comparison with August, all members were reported to be at work in New Brunswick, Alberta and British Columbia, while in Nova Scotia the full employment returns indicated a moderate betterment. As compared with September, 1942, conditions in Nova Scotia were slightly better, while in New Brunswick, Alberta and British Columbia no unemployment was apparent at either date.

Returns were received covering 10,125 members in the metallic ores group and 3,837

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

workers in the non metallic minerals division. The unemployment percentages were .3 and zero as compared with those of .3 and 3.3, respectively, in August; among non metallic mineral workers there were 2.7 per cent without work in September, 1942.

Unions in the building and construction trades returned 205 reports, having a total membership of 34,979 persons, of whom, 340, or a percentage of 1.0 were without work, in comparison with percentages of 1.3, in the previous month and 3.2 in September, 1942. In comparison with August, carpenters and joiners manifested a slightly higher employment level, while among bridge and structural iron and electrical workers, there were minor advances to full employment. A slight improvement was indicated, also, by bricklayers, masons and plasterers and granite and stone-cutters, while among painters, decorators and paperhangers and wood, wire and metal lathers, no unemployment was in evidence at either date. The percentage of union members reported to be without work among steam shovel men remained unchanged, while on the other hand, a minor employment contraction was manifested for hod carriers and unclassified building workers and plumbers and steamfitters. As compared with the situation in September, a year ago, considerably more work was apparent in reports received from unions of carpenters and joiners, while for hod carriers and unclassified building workers an appreciable employment increase was in evidence, likewise. Slight advances were indicated by electrical workers, painters and decorators and paperhangers, and plumbers and steamfitters, while, on the contrary, among steam shovel men, whose membership is small, there was a minor employment recession.

In the transportation industries, 883 returns were tabulated, having a combined membership of 86,131 persons, of whom, 350, or a percentage of .4 were without work. This percentage was identical with that of August; in September, 1942, the percentage of unemployed members was .8. In comparison

with August conditions, reports from street and electric railway employees reflected the same percentage at both dates, while for teamsters and chauffeurs, etc., no unemployment was apparent at either date. About 79 per cent of the total group membership were in the steam railway division. Among these workers, there was a slight employment decline, while among the comparatively small membership in the navigation group, also, there was a minor recession in available work. In comparison with conditions in September, a year ago, steam railway employees reflected an appreciably higher employment level, while the situation for navigation workers, likewise, showed noteworthy improvement, although a comparatively small number of workers were involved; among street and electric railway employees and teamsters and chauffeurs, etc., there were minor increases in activity.

In the service group, as will be seen in table II, the percentage of unemployed members, in September, as was the case in August, 1943, and in September, 1942, remained very low. In this group are included occupations such as civic employees, hotel and restaurant employees, barbers, theatrical employees, stationary engineers and firemen and unclassified workers. Among union members in the retail and wholesale trades, no unemployment was in evidence, as was the case in the previous month and in September, a year ago.

Reports were received from unions of lumber workers and loggers covering 5,196 members. The returns showed, as in the previous month, all of these to be fully employed, as was the case also, in September, a year ago.

Table I shows by provinces the average percentage of union members, who were unemployed each year from 1932 to 1942, inclusive, and, also, the percentage of unemployment for September, of each year from 1932 to 1941, inclusive, and from September, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in Table I.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

Pilots—Alberta Hours of Work Act—Pensions in Alberta—Manitoba Workmen's Compensation—Minimum Wages in Quebec and Saskatchewan—Saskatchewan Public Service

ORDER 12, issued November 10 under the National Selective Service Civilian Regulations, (L.G., Jan., 1943, p. 19), exempting the temporary employment of certain classes of persons during the Christmas rush in the retail trade or Post Office Department from Part II (Civilian Employment) of the regulations is dealt with in the Manpower section. New by-laws have been issued for the Pilotage Districts of Bras d'Or Lakes, Nova Scotia and Shediac, New Brunswick.

In the provincial field, Alberta has exempted from the Hours of Work Act cooks, cookees and waiters employed by Abasand Oils Limited, provided that they receive a specified minimum wage. It has also raised from \$25 to \$30 the maximum monthly pension payable to teachers under the provincial pension scheme and has authorized an agreement to implement the Dominion Order in Council providing for an increase in old age and blind pensions. Manitoba has passed a number of new regulations under the Workmen's Compensation Act and Quebec has revised the minimum wage order governing taverns in Montreal and district. Saskatchewan has re-issued all its minimum wage orders and passed new regulations governing Public Service employees.

Canada Shipping Act

New by-laws for the Pilotage Districts of Bras d'Or Lakes, Nova Scotia, and Shediac, New Brunswick, were approved by Orders in Council P.C. 7520, September 30, and P.C. 7626, October 1, gazetted October 16. Both sets of by-laws, although differing in details, deal with the examination and licensing of pilots, pilotage dues, pilot vessels, duties, behaviour and discipline of pilots, etc. Candidates for a pilot's licence must be British subjects resident in Canada, 21 years of age or more, and of good character. They must pass eyesight and hearing tests and prove physical and mental fitness for their duties.

Alberta Hours of Work Act

Cooks, cookees and waiters employed by Abasand Oils Limited in Alberta have been exempted from the Hours of Work Act by an Order of the Board of Industrial Relations

dated August 31 and gazetted October 15. The Order only applies to those paid the following minimum monthly wages and supplied with board and lodging: chief or head cooks, \$175; assistant cooks, \$125; cookees, \$75; waiters, \$60. The Hours of Work Act limits hours for men to 9 a day and 54 a week and requires one day's rest in seven. The Order was passed after the Board of Industrial Relations in accordance with the Act had inquired into the application of the Act to these employees.

Alberta Old Age Pension Act

By an Order in Council gazetted September 30, the Provincial Treasurer of Alberta has been authorized to enter into a supplementary agreement with the Minister of Finance for Canada to provide for the payment of wartime increases not exceeding \$5 a month in old age and blind pensions. The terms of such agreements were laid down in the Dominion Order in Council P.C. 6367 (L.G., Sept., 1943, p. 1295). The Alberta Order stipulates that validating legislation is to be introduced at the next session of the Legislature and that no portion of the increased cost of the pensions is to be charged to Municipalities, Improvement Districts or Special Areas.

Alberta Teachers' Retirement Fund Act

The maximum pension payable under this Act is to be raised from \$25 to \$30 a month after December 31, 1943, by an amendment in the by-laws (L.G., 1941, p. 958) gazetted October 15.

Manitoba Workmen's Compensation Act

A number of regulations passed under this Act during the past two years were gazetted on October 2. One, approved May 20, 1941, excludes from Part I of the Act (which relates to the accident fund) all training schools under the Empire Air Training Scheme including Flying Training, Observation and Navigation Schools. Another regulation approved October 29, 1942, excludes any industry carried on or controlled by any government other than the governments of Manitoba, of any municipality or municipal district in Manitoba or of the

Dominion of Canada. The exclusion also applies to industries carried on by a contractor or sub-contractor on behalf of such a government. However, the Workmen's Compensation Board may, on application from the employer, bring any industry so excluded within the scope of the Act on such terms and conditions as it may prescribe.

Two other regulations, dated June 19 and 20, 1942, relate to four air transport companies now controlled by the Canadian Pacific Railway Company, viz.: Canadian Airways Limited, Arrow Airways Limited, Starratt Airways and Transportation Limited and Wings Limited. One regulation extends the application of the accident fund part of the Act to air transport as carried on by the Canadian Pacific Railway Company through these four Companies, and the other withdraws them from Class G, in which all industries except specified railway companies and industries operated by provincial or municipal governments are placed for purposes of assessment, and places them in Class A which covers the Canadian Pacific Railway Company.

There have been three additions to the schedule of compensatable diseases. A regulation approved May 20, 1941, added nitrous fume poisoning from any process in which nitrous fumes are evolved, and poisoning by benzol (benzene) or its homologues and nitro and amido derivatives and its sequelae arising out of any process involving the production, liberation or utilization of any of these substances. In both cases, munitions workers are specifically mentioned as being eligible for compensation for such diseases. A final regulation, approved February 5, 1943, adds aircraft workers to the classes of workers compensated for dermatitis and other skin infections.

Quebec Minimum Wage Act

A new Order 23 governing taverns in Montreal and district was gazetted and became effective on October 23, replacing the Order issued in 1941 (L.G., 1941, p. 959). The hourly wage rates have not been altered but a minimum weekly rate has been established for bartenders and waiters and a number of changes have been made in other provisions.

The application of the former Order was limited to Montreal and cities and towns on the Island of Montreal or totally included within a five-mile radius of the Island. The revised Order covers all municipalities entirely or partly situated on the Island or within a five-mile radius of it. A new clause expressly exempts stationary engineers and firemen covered by Order 6 (L.G., July, 1943, p. 1034) from this Order.

The categories into which employees under the Order are classified have been revised. There are now six categories instead of five, as follows: 1, regular bartenders; 2, bartender apprentices; 3, temporary bartenders; 4, regular waiters; 5, temporary waiters; and 6, cleaners. As before, a bartender's apprentice is defined as an employee who has not completed 648 hours of work in a tavern. Bartenders and waiters are now classed as temporary employees if they work less than 25 hours a week instead of 40 as before.

Regular bartenders, irrespective of the hours worked, must now be paid a minimum weekly wage equivalent to what they would earn in a 54-hour work-week, or \$24.30; and similarly, regular waiters must receive at least \$17.55 a week. Overtime pay is additional. It must be granted for all weekly hours in excess of 54, or daily hours in excess of 12, or consecutive hours extending over more than one day in excess of 12. One and one-half times the wage-rate must be paid for overtime. All waiting is included in hours of work but a new clause declares that meal-periods or times when an employee's services are not required are excluded. Other provisions relating to payment for a minimum of three hours when called to work, the performance of cleaning work by bartenders and waiters and limiting work-spells to six hours are unchanged. The provisions concerning permissible wage deductions, registers, uniforms, posting and references, while not altered substantially, have been made uniform with similar provisions in general Order 4 (L.G., 1942, p. 586; Jan., 1943, p. 154). All provisions of Order 4 not inconsistent with this Order apply to workers governed by this Order.

Saskatchewan Minimum Wage Act

All nine Orders under this Act have been re-issued, rescinding Orders passed in 1940 and 1941. The new Orders which were gazetted October 23 and come into effect November 8 are identical with the earlier Orders as amended except for a slight change in Orders 1 and 6 noted below. Regulation No. 1 of the Minimum Wage Board has also been re-issued. It requires employers to post copies of all minimum wage orders applicable to their employees.

Orders 1, 2 and 3 were last issued in July, 1941, (L.G., 1941, p. 961) and apply to all cities and a five-mile radius surrounding them in Saskatchewan. Order 1 governs retail and wholesale establishments, mail-order houses and all other shops not covered by Orders 2, 3, 4 or 5. A new clause has been added to

the section restricting the number of inexperienced employees to permit this stipulation to be relaxed if the employer obtains written permission from the Secretary of the Minimum Wage Board. Order 2 applies to factories, paint shops, plumbing and tinsmithing shops, fuel, lumber and building supply yards and to all offices connected with such factories or shops. Order 3 governs warehousing, draying, cartage, transfer and delivery.

Orders 4, 5 and 6 were last issued in September, 1941 (L.G., 1941, p. 1271) and also apply to cities and a five-mile radius. Order 4 applies to hotels, boarding and rooming houses, restaurants and refreshment rooms. Order 5 covers beauty parlours and schools and barber shops and schools. Order 6 governs bowling alleys, billiard halls, skating and curling rinks, dance halls, theatres, shooting galleries and other establishments operating games of skill. A new clause exempts men or boys admitted to skating rinks to sweep the ice from the provision requiring workers to be paid for at least two consecutive hours on any day they are called to work.

Orders 7 and 8 were last revised in 1940 (L.G., 1940, pp. 1038, 1258). They cover virtually the same groups of industries as Orders 1 to 6 but apply to the towns of Canora, Estevan, Humboldt, Kamsack, Lloydminster, Melville, Shaunavon and Wynyrd and within

a five-mile radius surrounding them. Order 7 governs factories, theatres, dance halls, retail and wholesale establishments, mail-order houses, beauty parlours, barber shops, fuel, lumber and building supply yards and the business of warehousing, draying, cartage, transfer and delivery. Order 8 applies to hotels, boarding houses, restaurants and refreshment rooms.

Order 9 was first passed in December, 1941, (L.G., 1942, p. 60). It governs the lumbering and logging industry, including the operation of saw-mills, shingle-mills and lath-mills anywhere in the province.

Saskatchewan Public Service Act

New rules and regulations governing the employees of the Public Service of Saskatchewan were gazetted October 23. They deal with hours of work, attendance, leave, retiring gratuities, allowances and compensation, overtime, resignations and other subjects.

New rules and regulations were also gazetted on October 23 to govern employees of provincial mental hospitals.

Saskatchewan Public Service Superannuation Act

Regulations under this Act were gazetted October 23. They deal with contributions, allowances and administrative procedure.

Recent Legal Decisions Affecting Labour

Quebec Court Rejects Discharged Seaman's Claim for Wages

A judgment of the Montreal Recorder's Court ordering a shipping company to pay \$169.59 in back wages to a seaman was quashed with costs by Mr. Justice Duclos in Montreal Superior Court on September 22. Two earlier judgments of the Recorder's Court involving two other seamen employed by the same company under similar circumstances were upheld by Chief Justice Bond in Montreal Superior Court on May 1 (L.G., Aug., 1943, p. 1177).

The seaman in question had been articulated at Montreal and was to be paid off in a Canadian port at the end of the voyage. At Salford, England, he was dismissed for being absent without leave, and was paid the wages due him up to that date. He was also provided with passage and maintenance back to Montreal in accordance with the requirements of the Canada Shipping Act. He claimed wages from the date of his dismissal to the time of his return to Montreal on the

ground that his contract did not expire until he was paid off in a Canadian port. The case was heard by the Recorder of the city of Montreal under section 206 of the Canada Shipping Act which permits seamen's claims for wages not exceeding \$250 to be dealt with in a summary manner by any judge of the Quebec Superior Court, Sessions of the Peace or County Court, by any stipendiary or police magistrate or by any two justices of the peace. The Recorder had the authority of two justices of the peace.

The claim was granted, but the company appealed under a writ of certiorari on the ground that the case was not a simple claim for wages and therefore the Recorder lacked jurisdiction to deal with it. The Court upheld this contention. It considered that the seaman had been legally dismissed at Salford under the terms of the Canada Shipping Act, since he had been brought before the shipping master at the port and the latter had investigated the grounds of the discharge, determined the wages due to him and paid them on behalf

of the company. "This", the Court declared, "clearly indicated that the shipping master was satisfied that the discharge was legal." Therefore, the seamen's contact was at an end and no wages could be due after the date of his dismissal. The court cited several definitions of seamen's wages which limited them to compensation for services performed, and pointed out that the seaman had not performed any services for the company after his dismissal and therefore had earned no wages. The jurisdiction of the Recorder's Court was limited to ascertaining if any wages were due and determining the amount. *Furness, Withy and Company Limited v. Recorder E. J. McManamy*, Montreal Superior Court, September 22, 1943.

Agreement Prohibiting Bakery Salesmen from Soliciting Customers of Former Employer held Valid by Quebec Court

An appeal against a judgment dismissing an action brought by a Montreal bakery firm to enforce an agreement with a former employee was allowed with costs by the Quebec Court of King's Bench on June 29. The agreement which the worker had signed when he was hired as a salesman declared that if he left the company's employ, he would not attempt to sell bakery products to his former customers for a period of a year. A penalty of \$200 was specified for any breach of this agreement.

The evidence showed that the worker had violated the agreement, but the lower Court had held that the agreement was invalid for two reasons: (1) it had not been signed by the company but only by the worker and a representative of the company; and (2) it was contrary to the Quebec Collective Labour Agreements Act as it did not stipulate that the worker must be paid the minimum wage of \$18 a week required by a decree governing the bakery industry passed under the Act. The Court considered that the penal clause was not enforceable unless it rested on a valid agreement.

The appeal Court, however, found the agreement valid. On the first point, it held that, irrespective of whether the employer had properly signed the agreement or not, the worker had freely consented to it when he signed and delivered it to his employer and accepted employment and remuneration from the company. The Court did not consider that the agreement was unreasonable or in restraint of trade since it was limited to a specified zone and for a fixed period.

On the second point, the Court declared that the Collective Labour Agreements Act only

prohibited the prescribing of a wage lower than the minimum established by a decree under the Act for a particular industry. The agreement signed by the worker had stipulated no wage but had merely declared that he was to be paid on a commission basis. He had, in fact, at all times received a wage above \$18. There was nothing in the Act to require that the wage must be specified or to prevent workers from being paid on a commission basis as long as they received the minimum wage.

Since the agreement was valid, the Court had no alternative but to enforce the penalty clause. Under the Quebec Civil Code it had no power to reduce the penalty although Chief Justice Létourneau was of the opinion that it was extremely rigorous to exact a penalty of \$200 from a bakery salesman who had only taken two customers from his former employer. *Caron-Jetté Limitée v. Drapeau; la même v. Corbeil*, *Rapports Judiciaires de Québec*, Cour du Banc du Roi, 494.

English Employer Held Responsible for Accident Caused by Faulty Condition of Ladder

Damages amounting to £700 and funeral expenses were awarded by a King's Bench Division Court in London, England, on July 19, to the widow of a crane-man who had been killed when a rung of a ladder leading to the crane broke. The case was reported in the September issue of the British *Ministry of Labour Gazette*. The plaintiff charged negligence at common law and a breach of the section in the Factories Act which stipulates that "all ladders shall be soundly constructed and properly maintained".

The defendant company denied negligence and gave evidence of the care taken to ensure the safety of the workers. The company had a joint Safety First Committee and all defects reported to foremen were immediately remedied. The Committee examined the plant and machinery including the ladders at short intervals, and had examined the ladder in question two or three weeks before the accident and found nothing amiss. However, examination of the ladder after the accident had shown that the screw which held the broken rung had broken in half due to corrosion, possibly caused by sulphur fumes from a nearby foundry. All the other screws and rungs were in perfect condition. The defendant contended that the statutory duty to keep ladders in good repair was not absolute but was discharged if all practical measures to see that the ladder was in an efficient state had been taken.

The Court disagreed with this view, holding that the statutory duty to keep all ladders in an efficient state was as absolute as the statutory duty to fence all dangerous parts of machinery. It declared that the fact that the rung gave way established beyond question that the ladder was not in good repair and the defendant had, therefore, violated the requirement of the Factories Act, even though this particular failure was one which apparently nobody could have anticipated. *Cole v. Blackstone and Company Limited*, King's Bench Division, London, July 19, 1943.

Scottish Court holds that Fencing of Machinery must Protect Workers against Careless Movements

In another case reported in the same Gazette, an appeal against the acquittal of an employer charged under the Factories Act with failure to fence dangerous machinery properly was allowed by the High Court of Justiciary at Edinburgh on August 25. The case arose out of the injury of a boy whose sleeve was caught in the cogs of two gear wheels on a breaker carding machine. The gear wheels were fenced up to a height of seven feet two inches from the ground but the boy in question was required to work on a platform four feet two inches from the

ground and within two or three feet of the gear wheels.

The lower Court held that the statutory requirements to fence dangerous machinery had been fulfilled when the worker was sufficiently protected while carrying out his work in the ordinary way. The appeal Court, however, rejected this criterion for determining if the gear wheels were securely fenced. It considered that the fencing was not adequate unless it would prevent accidents occurring in all circumstances which might be reasonably anticipated. Such circumstances included, "a great deal more than the ordinary staid, well-regulated conduct of operatives engaged in the ordinary course of their work."

The occupiers of factories were bound to take into account . . . the possibility of negligent, ill-advised or indolent conduct on the part of their employees, and even skylarking and other irregular conduct, especially where boys were employed.

On the basis of this criterion, the Court held that the employer had failed to fence the gear wheels properly as the upper part of the boy's body was within two feet of the unfenced portion of the wheels and any careless movement of his arm might cause an accident. *Lyon v Don Brothers, Buist and Company Limited*, High Court of Justiciary, Edinburgh, August 25, 1943.

Recommendations on Training of Women for War Jobs in United States

THE United States War Manpower Commission's Women's Advisory Committee recently recommended, as a measure vital to the Government's war production program, the immediate wide-scale development of adequate in-plant training programs for women workers.

"Even when a production job requires very little training for the actual performance of the work itself, some training and adjustment to factory conditions and procedures are nevertheless necessary before an inexperienced woman can be placed effectively in any department of the plant," declared Miss Margaret Hickey, Chairman of the Committee.

"To help maintain a satisfactory degree of morale and to keep women working at their highest efficiency and producing to their maximum capacity, carefully planned step-by-step training on the job should be given by well-chosen, skilled supervisors or leadmen. Most effective results have been obtained in plants where management has given as much weight to training plans as to other production problems."

On the basis of War Manpower Commission reports and studies of current employment problems and needs considered at today's session of the women's advisory group, the Committee recommended for women workers a four-fold plant training program as follows:

- (1) Orientation and pre-production training;
- (2) On-the-job training under trained instructors;
- (3) Supplementary training for those who wish to increase their skills;
- (4) Transfers and retraining when this would be in the interests of increased war production.

As an aid to its program of assisting industry in setting up training systems, the War Manpower Commission has just released a new bulletin prepared by its Bureau of Training under the title, *Training Women for War Work*. The Bureau of Training also has compiled a series of reports from Regional Chiefs of Training which are assembled under the title, *Training Womanpower*.

Prices

Prices, Retail and Wholesale, in Canada, October, 1943

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

A decline of 0.1 to 119.3 in October, broke an exceptionally steady rise in the official cost-of-living index dating from February, 1943. This minor recession left the index 2.4 points above its February level, and 1.4 points above the level at which the last cost-of-living bonus was authorized in July 1942.

Declines in the food group were mainly responsible for the October decrease. Potato prices fell sharply in response to a Wartime Prices and Trade Board order restoring price levels of a year ago, and lamb, beef, carrots and turnips also were reduced. Butter and eggs averaged higher, but the food index fell from 133.5 to 132.9. The fuel and light index also moved lower from 113.4 to 113.3. The influence of these two group indexes was partially offset by increases from 111.5 to 111.9 in

rents, and from 120.6 to 121.1 in clothing. Other groups remained unchanged, home furnishings and services at 118.2 and miscellaneous items at 108.3.

Changes in cost-of-living indexes for eight regional cities between August and October were fractional. Four declined, one remained unchanged, and three advanced. The greatest increase was 0.2 points (Montreal and Toronto) and the greatest decline 0.6 points (Saint John, N.B.).

Comparative indexes for these cities in Table II show the relative increase in living costs since August, 1939. They cannot be used, however, to compare absolute living costs from city to city, since the August 1939 family living budgets are not comparable.

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939 = 100.

† The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

‡ Commodities in the cost-of-living index excluding rents and services.

TABLE II—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF OCTOBER, 1943

Base: August, 1939=100

(c) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the change indicated by these reports.

(d) Rents marked (d) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Each city budget contains the same items, but the quality of budget items varies, depending upon buying habits and preferences in different areas.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centered around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities

included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The cost-of-living bonus provided for by the Wartime Wages Control Order (P.C. 5963, July 10, 1942, replacing P.C. 8253) must be based on the official cost-of-living index as adjusted to base 100.0 for August, 1939. For each rise of one point in the index the amount of the bonus or its increase shall be:— (1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941, (L.G. 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized quarterly in the LABOUR GAZETTE under the title, *Price Control in Canada*.

Wholesale Prices

The Dominion Bureau of Statistics' monthly index of wholesale prices on the base of 1926=100 rose a further 0.7 points to 101.9 between September and October; a net advance of 4.8 points has occurred since the beginning of the year. October changes were confined to five of the eight main groups. Among vegetable products higher quotations for wheat, rye, hay, rosin and onions more than offset decreases for bananas, lemons and potatoes to advance the group index 1.4 points to 94.1. Animal products registered an increase of 1.2 to 109.6 in the same interval with higher prices for calves, whitefish, fowl, butter and eggs responsible for the gain. Lower items in this series included steers, hogs and lambs. A further upward gain in eastern spruce moved the wood, wood products and paper group 0.3 points

higher to 113.9 while an increase of \$6 per ton for car axles was reflected in a gain of 0.1 to 115.8 in iron and steel products. Recording the only group decline, chemicals and allied products dropped 0.2 to 100.3 on lower quotations for quebracho extract.

Sharp advances for both field and animal products were responsible for an increase of 5.7 points to 103.6 in the composite index of Canadian farm products. The additional subsidy of 30c per cwt. for fluid milk, which became effective on October 1, coupled with gains for fowl and eggs overbalanced weakness in live stock to lift animal products 7.4 points to an index level of 125.0 during the month under review. Field products moved up 4.7 points to 90.8 in the same interval due to continued upturns for wheat, rye, onions and hay. Potatoes were moderately weaker.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—monthly, Prices and Price Indexes (Canada); quarterly Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 the number of commodities was 236; 1926 to 1933 inclusive, 502, and since January, 1934, the number is 567.

Price Movements in Canada and Other Countries

A declining tendency was apparent in the price levels of several other countries during the third quarter of 1943, although in Canada further moderate increases were recorded. The Canadian wholesale price index advanced 1.7 points to 101.2 between June and September to break through the 1926 average level for the first time since July of that year. How-

ever, comparable indexes for the United Kingdom and the United States declined fractionally during his period. The wartime increase in wholesale prices for Canada and the United States has been almost the same; 37.5 per cent for the United States and 38.9 per cent for Canada. The United Kingdom rise of 65.3 per cent has been substantially

(a) First of month. (b) Middle of month. (c) Last week of month. (d) Quarterly. (e) New War-time price series on base December 1942 = 1000, computed quarterly beginning March, 1943. (f) Yearly averages are for period from July of preceding year to June of year following. (g) July. (h) June.

larger, but the greater part of it came before the end of 1940. The trend in all three countries has been roughly parallel in 1942 and 1943. The New Zealand index also fell fractionally in the third quarter of 1943.

Third quarter movements in living cost indexes have been similar to those described above for wholesale prices. The official Canadian index advanced 0.9 points while the United States Bureau of Labour index dropped

0.9 points. The United Kingdom series showed no net change, a small increase in July being balanced by a later decline. Australian and New Zealand cost-of-living series each recorded a decrease of approximately one per cent.

Further detail concerning price movements for other countries may be found in Table VI, which includes the latest records available.

Fatal Industrial Accidents in Canada During the Third Quarter of 1943

DURING the third quarter of 1943 there were 325 fatal industrial accidents, including deaths from industrial diseases reported by workmen's compensation boards, etc. This compares with 344 fatal accidents in the third quarter of 1942. Of the 325 fatalities in the period under review, 134 occurred in July, 108 in August and 83 in September. Fatal accidents during each year are recorded by quarterly periods in the issues of the *LABOUR GAZETTE* for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 52 fatalities for the first half of 1943 and seven fatalities for 1942.

In this series of reports, it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the *LABOUR GAZETTE* and newspaper reports.

Classified by groups of industries, the fatalities occurring during the third quarter of 1943 were as follows: agriculture, 35; logging, 17; fishing and trapping, 7; mining, non-ferrous smelting and quarrying, 41; manufacturing, 78; construction, 40; electricity, gas, and water production and supply, 4; transportation and public utilities, 73; trade, 12; finance, 1; service, 17.

Of the mining accidents, 19 were in "metaliferous mining," 17 in "coal mining," four in "non-metallic mineral mining and quarrying, n.e.s." and one in "structural materials."

Of the accidents in manufacturing, five were in "vegetable foods, drink and tobacco," one in "animal foods," three in "textiles and cloth-

ing," one in "leather, fur and products," one in "rubber products," seven in "saw and planing mill products," one in "wood products," two in "pulp, paper and paper products," 15 in "iron, steel and products," six in "non-ferrous metal products," three in "non-metallic mineral products," five in "chemical and allied products," 27 in "ship-building," and one in "miscellaneous products."

In construction there were 18 fatalities in "buildings and structures," 16 in "highway and bridge," and six in "miscellaneous."

In transportation and public utilities, there were 41 fatalities in "steam railway," three in "street and electric railways," 14 in "water transportation," two in "air transportation," seven in "local and highway transportation," four in "storage," one in "telegraphs and telephones," and one in "express."

In trade there were five fatalities in "wholesale," and seven in "retail" trade.

Of the fatalities in service, 10 were in "public administration," three in "custom and repair," and four in "personal, domestic and business."

During the period under review there was one serious disaster which occurred in Halifax basin, on July 6, when a tug belonging to Halifax shipyards sank following a collision with a freighter. The tug was used for conveying welding equipment and workers to repair ships in the basin, and 19 of the 24 workers on board were drowned.

Other accidents involving the loss of two or more lives were as follows:

An engineer, a fireman, a conductor, a brakeman, and three cablemen were killed, when a gravel train plowed into a caboose, near Cranberry, Manitoba, on July 17.

Four members of an oil tanker crew died of burns following an explosion and fire on a gasoline laden vessel, while en route from Lake Huron, Ontario, on July 26.

Four coal miners trapped in a mine, lost their lives following an explosion which oc-

curred while an electric cutter was being used, near Lethbridge, Alberta, on August 9. Another two coal miners died when overcome by methane gas in a mine at Cadomin, Alberta, on July 16.

An explosion of coal gas in the basement of a bakery plant resulted in the deaths of three employees at Montreal, on August 26.

At Haysport, B.C., on August 31, two fishing patrol boat workers were drowned when they fell from the dock.

When a truck skidded on gravel and fell 150 feet into a lake, at Muskwa, B.C., on August 19, a machine helper and a waitress engaged on duties connected with highway construction were drowned.

A pilot and a pilot trainee were killed in a plane crash, near Cornwall, Ontario, on August 6.

When a train struck a truck, at Rosser, Manitoba, on August 26, the driver and a labourer were killed.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1943 has been compiled which contains 52 fatalities of which six were in logging, one in fishing and trapping, four in mining, non-ferrous smelting and quarrying, 16 in manufacturing, two in construction, 19 in transportation and public utilities, two in trade, and two in service. Four of these accidents occurred in January, four in February, two in March, four in April, 11 in May, and 27 in June.

A further supplementary list of accidents occurring in 1942 has been made. This includes seven fatalities of which one was in logging, one in fishing and trapping, one in manufacturing, two in construction, and two in transportation and public utilities. One of these accidents occurred in June, three in October, two in November and one in December.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at September 30, 1943

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act as amended, and under the various provincial concurrent acts, as at September 30, 1943. (The text of the Old Age Pensions Act was given in the *LABOUR GAZETTE* for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$365 a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$65* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control

and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (*L.G.*, May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$140* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$340*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$140.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

* Amended by Order in Council P.C. 6367, August 10, 1943, passed under the authority of the War Measures Act (*L.G.*, Aug., 1943, p. 1068).

Labour and Industry in British Columbia, 1942

Twenty-fifth Annual Report of Provincial Department of Labour

INDUSTRIAL payrolls for 1942 established a new high in the history of British Columbia, according to the twenty-fifth Annual Report of the provincial Department of Labour. Following the precedent set in 1941, the greatest increase was in the shipbuilding industry; lumber and metal trades also showed substantial increases, but metal mining and printing and publishing showed relatively small decreases.

Average monthly employment totals rose to a new high in 1942, the month of November showing a total of 143,760 against a high of 110,771 for October, 1941. Shifting of manpower to essential war industries created new employment records in shipbuilding, contracting, metal trades and like industries. In certain of the less essential industries, such as garment making, house furnishings, printing and publishing, etc., the diminishing monthly totals of male workers was offset by sharp increases in the number of females employed.

Increases were recorded in the average weekly wages as a result of increased war-time production, longer working hours, reduction of casual employment and the payment of the cost-of-living bonus. The only average wage decrease was in jewellery manufacturing which declined fractionally 13 cents. The average weekly wage for all adult male wage-earners was \$35.24, an increase of \$4.57 over the previous year and establishing a new high in the records of the provincial Labour Department.

Working hours increased slightly, the average week for all employees being 48.12 hours, as compared with 46.90 hours in 1941.

Industrial, Statistics, Payrolls, etc.—Statistics were compiled by the Department from reports received from 4,845 firms, a decrease of 270 from 1941. A total industrial payroll of \$252,046,389 was reported by these firms. To find the total payroll of the province this sum was augmented by the following items: Returns received too late to be included in the summary, 130,304; estimated payroll of employers in occupations included in the Department's inquiry not sending in returns, \$1,350,000; transcontinental railways, \$17,066,253; estimated payrolls of additional services not included in the industrial survey, viz., Governmental workers, wholesale and retail firms, ocean services, miscellaneous, \$32,300,000.

These items brought the payroll of the province up to a total of \$302,892,946. This represents an increase of \$63,367,487 over the 1941 record.

Payrolls in the shipbuilding industry increased from \$10,534,309 in 1941 to \$47,203,906 in 1942, followed by contracting with a gain of \$15,273,867 and miscellaneous trades and industries with an increase of \$6,802,331. The lumber industries increased by \$4,675,203, followed closely by metal trades up \$4,521,271; food products, an increase of \$2,438,247; pulp and paper mills up \$1,856,792; wood manufacturing (N.E.S.) up \$1,460,887; public utilities up \$1,094,330; smelting, an additional \$1,048,874; coal mining, an increase of \$671,191; coast shipping, \$615,285; explosives and chemicals, \$374,733; breweries, \$346,865; garment making, \$298,798; builders' materials, \$212,843; leather and fur goods, \$78,243; laundries, cleaning and dyeing \$72,472; house furnishings, \$70,968; jewellery manufacturing, \$50,481; oil refining, \$45,082; paint manufacturing, \$5,459; and cigar and tobacco manufacturing, up \$940.

Decreases were noted in metal-mining, with a loss of \$2,004,060, and printing and publishing, down \$83,866.

Apprenticeship.—The Director of Apprenticeship in his report stated that "of the 1,233 apprentices in designated trades, 315 are at present in the armed forces.' It is pointed out that the development of an apprenticeship system throughout the Dominion has been accentuated by the war "as shortages of trained craftsmen have been apparent in practically every trade and craft . . . British Columbia . . . has extended its apprenticeship system to cover a broad field of trades and occupations and has thus been able to make a definite contribution to the Dominion's war effort, particularly in the metal trade industries."

At the end of the year there were 1,369 apprenticeship contracts in force, including 136 contracts in occupations not yet designated under the "Apprenticeship Act." The number of apprentices who had successfully completed their apprenticeship, as at the end of 1942, was 729.

During 1942, 2,190 inspections and re-inspections of factories were made. In his report the Factories Inspector pointed out

that in recent years many mechanical exhaust systems had been installed in new and in expanded factories for the removal at points of origin of harmful fumes, gases and dust. "These will prove to be a very beneficial legacy from the war." It is stated also that there was continued progress in connection with the provision of facilities relating solely to the welfare of industrial workers. In some instances special buildings had been erected by employers to provide dining and reading rooms and recreational facilities for their employees.

Women and Children in Industry.—During 1942 the number of women entering industry increased greatly according to the report. "Around the clock, month after month, shoulder to shoulder with men on the production line, women have performed their part in the processing of metals so vital to the war effort, and in the construction of ships, aeroplanes, guns, and also in manufacturing, assembling and testing parts of equipment requiring a high degree of precision."

The report of the Factory Inspector also deals with the employment of children under 15 years during the school vacation; the issuance of temporary overtime permits to women workers where the work was of an urgent nature; and the matter of industrial homework in the garment industry. In the case of the latter, the practice was commenced by an industry that had not operated in the province hitherto, but as rates of pay were sub-standard and the danger of spreading communicable diseases was indicated, the practice was discontinued and the work was transferred to a factory "where it can be properly regulated."

Labour Disputes and Conciliation.—Of the fifty strikes recorded during 1942, 13 were within the ambit of the province. A total of 18,804 employees were affected by these disputes and of that number 1,030 were within the authority of British Columbia. Of the total 35,024 man-days lost, 1,929 were attributable to the 13 strikes under provincial jurisdiction. Of the 11 awards made by Boards of Conciliation, 7 were unanimous.

Important amendments were made to the Industrial Conciliation and Arbitration Act during the year. The main changes were in the collective bargaining sections of the Act, requiring employers to bargain collectively with the trade union to which a majority of their employees belonged, and forbidding an employer to interfere with or contribute financially or other support to an employees' organization. This legislation was reviewed in the LABOUR GAZETTE for May, 1943, page 691.

Report of Board of Industrial Relations

The ninth annual report of the Board of Industrial Relations give details of the new Orders and Regulations covering the hotel and catering, baking, fruit and vegetable, shingle, mercantile, and manufacturing industries, and respecting janitors, janitresses, stationary steam engineers, and bus drivers.

Women and Girl Employees.—There was an increase of 10,257 female workers over the 1941 total shown in the returns received from 6,357 employers. The total number of female employees reported in 1942 was reported to be 44,461. The average weekly wages for female employees over 18 years, or experienced, was \$17.54 and for employees under 18 years, or inexperienced, was \$10.52, as compared with \$16.04 and \$9.74 respectively, in 1941. The percentage of female employees under 18 years, or inexperienced, was 7.69 as compared with 6.70 in 1941 and the average hours worked per week was 41.96 as compared with 41.82 in the previous year. Aggregate wages and salaries for one week totalled \$755,686.39, an increase of \$221,392.21 over the 1941 figure. These figures do not include domestic workers, farm labourers or fruit pickers, which are excluded from coverage by provision of the "Female Minimum Wage Act." Bank and federal employees are not covered by provincial legislation.

Inspections and collections.—During the year the inspection staff of the Board made 10,727 personal inspections, as compared with 12,104 in 1941. The reduction was due to depletion of the staff, as some personnel had enlisted in the armed services and others were loaned to the Federal government for the duration of the war.

Under the "Female Minimum Wage Act," 195 firms made adjustments for 309 women and girls in the sum of \$5,889.10; while adjustments under the "Male Minimum Wage Act" were made for 184 employees by 115 firms to the amount of \$7,133.63. In addition to the above settlements which were made without recourse to the Courts, Court proceedings were instituted in 44 cases; convictions were obtained in 37 of these and seven were either dismissed or withdrawn.

Under the "Hours of Work Act" the 4,845 firms reporting to the provincial Department of Labour submitted information regarding hours covering 154,191 male and female employees for 1942. A segregation shows 84.70 per cent worked 48 hours or less per week, 7.51 per cent worked from 48 to 54 hours per week and 7.79 per cent worked in excess of 54 hours per week.

Notes of Current Interest

Labour leaders and Department of Labour officials honoured by His Majesty

Officials of the Department of Labour and labour leaders in Canada were honoured at the investiture held by His Excellency the Governor General at Government House on

November 24 in receiving the insignia of the decorations bestowed by His Majesty the King for meritorious service.

The honours bestowed are regarded in the Department of Labour as a tribute, not only to the services of the officials concerned, but also as a gracious recognition of the Department's work in labour relations under war conditions.

The labour leaders and officials and their awards, are as follows:—

Commander of the Order of the British Empire:

W. L. Best, Vice-President and Legislative Representative, Brotherhood of Locomotive Firemen and Enginemen.

Tom Moore, former president of the Trades and Labour Congress.

Officer of the Order of the British Empire:

Arthur H. Brown, Executive Assistant to the Deputy Minister of Labour.

George Hodge, National War Labour Board.

J. A. McClelland, National War Labour Board.

Member of the Order of the British Empire:

E. N. Compton, Conciliation Officer, Department of Labour.

F. E. Harrison, Senior Labour Conciliation Officer, Department of Labour.

Harry Hereford, Director of Planning, National Selective Service, Department of Labour.

Miss M. Mackintosh, Chief of Labour Legislation Branch, Department of Labour.

E. McG. Quirk, Conciliation Officer, Department of Labour.

Labour loses outstanding leader

Death claimed one of Canada's outstanding Labour leaders, Patrick Martin Draper, President-emeritus of the Trades and

Labour Congress of Canada, on November 23, 1943.

With the exception of about two years, as a printer's apprentice in his native village of Aylmer, Quebec, Mr. Draper served his working lifetime with the Government Printing Bureau at Ottawa. He was one of the original staff at the Bureau and when he retired in September, 1933, he had risen by successive stages to the position of Director and Superintendent of printing.

From 1900 to 1935 he was Secretary-Treasurer of the Trades and Labour Congress of Canada and from 1935, until he retired because of ill-health in 1939, he was President. He was a trusted advisor in labour matters of the late Sir Robert Borden during the first World War and was one of the Canadian delegation to Paris to assist in drafting the terms of peace. Out of Versailles emerged the ILO and Mr. Draper was the Workers' delegate from Canada at the first ILO conference in Washington in 1919, where he was elected to the governing body of the ILO.

The tributes paid Mr. Draper at the time of his death by the Right Honourable, the Prime Minister, and by Honourable Humphrey Mitchell, Minister of Labour, epitomize the importance and value of his life's work:

Mr. King said: "Draper was strong in his advocacy of labour reforms and fearless in his expression of opinion. He was not less outspoken where he regarded demands of his own associates as unreasonable or excessive, than when he felt they were urgently required and labour's interests were being ignored.

"In dealing with labour problems his method of approach was not provocative. It invariably was that of seeking so to present labour's claims as to invite co-operation and lessen antagonism on the part of those to whom his words were addressed. The public, not less than labour, owe very much to Mr. Draper, Tom Moore and others of their immediate associates, who for so long, shared the direction of the labour movement in Canada . . . Their wise direction enabled labour to hold the ground along which it has advanced."

Mr. Mitchell gave expression to the following tribute:

"In the passing of Mr. Draper I have lost a personal friend and counsellor of many years standing. For more than half a century he had been a tower of strength to the labour movement in Canada." (See also L.G., 1939, pp. 972 and 1006.)

International trades union conference planned for 1944

Action by the British Trades Union Congress in summoning a conference of representatives of labour organizations from all the United Nations, implements resolutions passed by leading trades union organizations in America, Canada and Britain in 1943. The suggestion was formally made by the British Trades Union Congress at its convention in Southport early in September; and both the AFL and the CIO at their conventions in October and November respectively passed forceful resolutions along similar lines. The Trades and Labour Congress of Canada and the Canadian Congress of Labour in their conventions also favoured international labour co-operation.

The proposed world trade union conference is to be dedicated to the rebuilding of the international trade union movement and, if present plans are matured, will be held in London in June, 1944. Four Canadian labour organizations have been asked to send representatives, namely: Trades and Labour Congress of Canada, Canadian Congress of Labour, the Canadian and Catholic Confederation of Labour, and the Canadian Federation of Labour.

A committee of the general council of the British Trades Union Congress, under the

chairmanship of Sir Walter Citrine, has prepared the following provisional agenda to form the basis for discussions:

- (1) Furtherance of the war effort;
- (2) the attitude of trades unions toward the peace;
- (3) the matter of trades union representation at the peace conference and on preparatory commissions for relief, rehabilitation and post-war reconstruction;
- (4) the rebuilding of the international trade union movement.

It is intended that the conference be "purely exploratory and consultative" and that no decisions reached will necessarily be binding on the parent organizations represented. By bringing together representatives of trade union organizations from all of the United Nations, irrespective of their backgrounds, it is hoped that constructive suggestions may be evolved which will be of great value in formulating solutions to trade union problems common to each of the nations that will participate.

As the delegates from neutral countries may not wish to take part in the discussions that may have a direct bearing on the war, it is unlikely that they will share in the first week of the conference.

Appointment of chairman of Committee on Demobilization and Re-establishment

By order in council (P.C. 7953, Oct. 26, 1943), Mr. Walter S. Woods, Associate Deputy Minister of Pensions and National Health, has been appointed chairman of the General Advisory Committee on Demobilization and Re-establishment. Mr. Woods replaces the late Brigadier General H. F. McDonald.

The Committee was established in October, 1940, "to act as a general co-ordinating agency among various government departments in matters of demobilization and rehabilitation, and to bring before the Cabinet Committee on Demobilization and Re-establishment recommendations for legislation in respect of these matters."

Various legislative measures have been taken as a result of the recommendations of this committee (certain of which have been reviewed in the LABOUR GAZETTE: May, 1943, p. 587, 1942, pp. 35, 754, 920, etc.).

These measures relate to post-discharge allowances, training, and provision for opportunities; treatment of disabilities; pensions; reinstatement in civil employment, and other matters.

**Employment
and industrial
statistics**

The table below shows the latest statistics available reflecting industrial conditions in Canada.

Continued expansion in industrial activity was indicated by the index of employment at the beginning of October. This index calculated by the Dominion Bureau

of Statistics was 187.6 at the beginning of October, 186.2 at September 1 and 181.3 at October 1, 1942. The October 1943 figure is slightly higher than in any other month and is 3.5 per cent higher than at the corresponding date in 1942.

The slight increase in the month under review from the level of the previous month

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended November 25, 1943.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public. (7) Figures for four weeks ended November 27, 1943, and corresponding previous periods. (8) MacLean's Building Review.

was reported to be fairly evenly divided between manufacturing and non-manufacturing industries. In the former group the increase of 0.6 per cent was due to higher employment in vegetable foods, rubber, iron and steel, non-ferrous metals and electrical apparatus plants while curtailment was indicated in lumber, pulp and paper, animal food, chemical, and electric light and power plants.

The report of the Bureau states that, "of the total number in recorded employment in the eight leading industries at the beginning of October, 477,757, or 253 per thousand, were females, and 1,407,520, or 747 per thousand, were males. The former proportion showed a considerable gain as compared with that of 227 females per thousand employees reported at Oct. 1, 1942. In the 12 months, there was an increase of rather more than 15 per cent in the number of women workers, while the number of males remained practically stationary".

The salaries and wages disbursed by the employers reporting employment to the Bureau totalled \$59,343,323 at October 1, an increase of 1.3 per cent as compared with September 1. The average weekly earnings per employee rose from \$31.30 at the beginning of September to \$31.48 for October as compared with \$29.51 at October 1, 1942.

Productive operations as indicated by the index of the physical volume of business advanced considerably in October. This index reflecting the trend in mineral production, manufacturing, construction, electric power output and in the distribution of goods was 239.5 in October, 236.7 in the preceding month and 207.2 in October 1942, the increase during the year being 15.6 per cent. Two groups, namely, manufacturing and construction recorded advance during the month, the most important in its effect on the index being manufacturing, while the other three principal groups were lower.

For the first ten months of 1943 the business index which is also calculated by the Dominion Bureau of Statistics averaged about 17 per cent higher than for the similar period of 1942, reflecting the marked expansion due to war demands. It was stated in the report issued by the Bureau that having practically reached a stage of full employment, further important advances are not expected and during recent months the output of war plants has tended to raise the index but isolated cases of curtailment are commencing to have an effect. The index number of employment averaged 7.4 per cent higher for the period January to October, 1943, than for the corresponding period in 1942. Manufacturing production rose 22 per cent in the same comparison; consumption of firm power was

10 per cent higher; the value of exports 26 per cent; of imports 4.3 per cent; and the value of retail sales 3.8 per cent higher. The value of contracts awarded declined 28 per cent; the receipts of gold at the mint 21.9 per cent and the production of coal 5.5 per cent.

Survey on employment in Canadian industry

Detailed statistics on the working population of Canada, necessary in order that the Government's manpower program may be planned and administered in the most effective manner, are currently being obtained from employers across the country. Employers are being asked to complete, as at January 8, 1944, a return showing information on the age, sex and marital status of their employees working in Canada.

Similar information was obtained last year, when employers submitted returns as to the workers in their employ on January 30, 1943. At that time it was found that the working population of Canada totalled approximately 4½ million male and female workers. Of these over a million were engaged in war industry, including almost a quarter of a million women, while a similar number were occupied in high priority civilian employment (L.G., July, 1943, p. 895). Detailed statistics were obtained for every type of industry.

The present survey will bring these statistics up to date. It will enable the Department of Labour to assess with precision the movements of the working population that have taken place during the past year, from one type of employment to another, and from low to high priority industry; and to measure the extent to which women have taken part in industrial occupations. With this information obtained, and on the basis of employers' estimates as to the number of employees they will need at June 30, 1944, the Government will be greatly facilitated in continuing its program of directing the flow of manpower according to the needs of the country's war effort.

The Report on Employment as at January 8, 1944, must be completed by all employers, insured and non-insured, with the following exceptions: (1) Farmers and horticulturists; (2) Employers of domestic servants, except where the employed person is employed in a club, or in any trade or business carried on for purpose of gain; (3) Governments, federal, provincial, municipal and foreign, with respect to their employees engaged in regular governmental activities, including police and fire protection, public works, and the distribution of water by municipalities. (It will, however, be necessary for all governments and govern-

mental agencies, such as commissions and boards, to file reports for *business* activities operated directly and indirectly by them.)

The report forms, when completed, are to be mailed or delivered to the Local Employment and Selective Service Office nearest to the reporting unit.

Cost-of-living index advances fractionally

The Dominion Bureau of Statistics cost-of-living index advanced from 119.3 on October 1, to 119.4 on November 1, 1943. This

was due entirely to an increase of 0.2 points to 133.1 in the food index. Small declines in fresh fruits and vegetables between October 1 and November 1 were overbalanced by further advances for eggs and butter. Meats remained firm. Other budget group indexes remained unchanged for November, as follows: rentals 111.9, fuel and lighting 113.3, clothing 121.1, home furnishings and services 118.2, and miscellaneous items 108.3.

Industrial Disputes Investigation Act

Seven applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of November. Six boards submitted their reports; three boards were established, and the constitution of four boards was completed during the month. Nine disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in seven cases. Three applications were withdrawn during the month and one application rejected. In one case the dispute was referred to an Industrial Disputes Inquiry Commission. The settlement of two disputes was reported.

Placement of handicapped workers

Employment and Selective Service Offices across Canada will shortly open special sections in the larger local offices, known

as Special Services Sections, to specialize particularly in the placement of workers who are physically handicapped, either through war service or civilian accidents. One expert in this line of placement work will soon be appointed to each of the 5 regional offices—Moncton, Montreal, Toronto, Winnipeg and Vancouver. Officers in the larger local offices are now being trained to deal with the placement of handicapped workers, and it is expected that the co-operation of employers and social agencies will be enlisted.

From information available to the Department of Labour, it would appear that in these times of labour shortages employers in

a great many cases are realizing that physically handicapped workers are highly efficient in certain types of employment, so that it is hoped to take advantage of the heavy demands for workers of all types to assist in rehabilitating those who are handicapped, as they would be less certain of securing a start in employment at other times.

Organized women help secure workers for textile trade

A two-week campaign conducted in Hamilton during November to secure additional women workers for local textile plants has resulted in a total of 420

additional women being referred to textile jobs. Of this number, 175 were inexperienced workers; 353 registered for full-time work, 67 could only put in part-time work.

Realizing the requirements of the armed forces and the serious effect on health which would result from a shortage of warm clothing and essential materials for infants and children, the Hamilton Local Council supported this direct appeal to women to accept employment in the textile industries.

Simultaneously, successful campaigns were conducted for textile workers in St. Catharines, with the co-operation of the St. Catharines Local Council of Women and in Welland, sponsored by the Welland Women's Institutes.

"The numbers enlisted by this campaign have been most helpful in meeting the urgent needs of textile mills in the Hamilton and Niagara districts", stated Mrs. Rex Eaton, Associate Director of National Selective Service.

(An account of recent campaigns for recruitment of part-time and full-time women workers in Toronto, Ottawa and Halifax appeared in the October issue of the *LABOUR GAZETTE*, on page 1336.)

Lord's day legislation qualified

During the harvest season in Ontario *The Profanation of the Lord's Day Act, 1839*, was invoked against certain individuals who, owing to

the wartime emergency, worked in the harvest fields on Sunday.

While the prosecutions in these cases were withdrawn before being brought to trial, the federal authorities deemed it advisable to qualify the application of any Act or law relating to the observance of the Lord's Day.

Accordingly, on the recommendation of the Minister of Justice and under the authority of *The War Measures Act*, Order in Council, P.C. 8535 passed November 4, 1943 provides:

No action or prosecution for a violation of any Act or law relating in any way to the

observance of the Lord's Day (meaning that period of time referred to in the Lord's Day Act as the Lord's Day) in force in any province of Canada when the Lord's Day Act came into force shall be commenced without the leave of the Attorney General of the province in which the offence is alleged to have been committed.

Recommendations for reduction of juvenile delinquency in Toronto

The Toronto and District Welfare Council recently submitted to the Toronto City Council recommendations for the reduction of juvenile delinquency. Although dealing specifically with local problems, the memorandum is designed to be of use to other public authorities. The Council's memorandum discusses the family and general social conditions which have been contributing to the growth of juvenile delinquency since the outbreak of the present war, the private and public agencies dealing with the problem and measures for improving and extending the work of these agencies.

According to the report, many jobs open to immature boys and girls are undesirable from the point of view of their welfare: the hours of work are long, young people under sixteen are employed at night in war industries and, until early morning, in bowling alleys and other places of commercial amusement.

The memorandum emphasizes the growing scarcity of trained social workers in Canada at a time when their services are more needed than ever before. The war and the greater opportunities for employment which it has afforded have substantially reduced the number of people in Canada needing financial assistance from public authorities or from the voluntary, social agencies. On the other hand, the demand for personal services, which is the main responsibility of the voluntary agencies, has greatly increased. Many social workers have taken up other work, often in government services. These workers are often lost to the social agencies because of the low standards and hard working conditions obtaining in social work. The public is not yet sufficiently aware, the memorandum points out, that if good social work is to be maintained, the positions available must be of a type which will attract suitable and adequately trained people.

Recommendations are made for the improvement and extension of the methods by which private and public social welfare agencies deal with the problem of juvenile delinquency. These include setting up psychiatric clinics in juvenile courts, making available psychiatric service in schools for difficult pupils and establishing provincial training schools for delinquents and serious offenders on a "cottage" plan, each unit accommodating about 20 or 30 children. Under this scheme, delinquent boys

and girls would learn how to live happily with other people, a process which is most easily begun in small groups.

The memorandum also recommends the establishment of observation homes where children awaiting hearing in a Juvenile Court may be placed, not only for detention but also for psychiatric observation. Such a home is also suitable for the reception of children, after their appearance in court, for a further period of observation and study in order to determine the type of care most suitable for them. An observation home of this type is in operation in Toronto under municipal authority.

Urgent and growing need Manning Canada's social services

for social workers in Canada was also considered by fifty persons who attended the all-day conference on Recruiting and Training of Social Work personnel which was held in Ottawa on December 6.

The meeting was under the joint auspices of the Canadian Welfare Council and the Canadian Association of Social Workers and drew representation from the Department of Pensions and National Health, National Selective Service, Dominion Government Committee on Reconstruction, Dependents' Allowance Board, Dependents' Board of Trustees, Department of Labour, the Navy, the Army, and the Air Force. The seven schools of professional social work, the national group work field and voluntary social agencies across Canada, were also represented.

The various government departments in which social work skills are essential to adequate development of service were outlined by Mr. Jack Pembroke, Assistant Deputy Minister, Department of National Defence; by Lieut.-Col. J. D. Griffin, R.C.A.M.C., and by Dr. Leonard C. Marsh, Research Adviser for the Dominion Government's Committee on Reconstruction. Following the presentation of facts by delegates representing a variety of regions, the present and estimated vacancies were evaluated by Dr. George F. Davidson, Executive Director of the Canadian Welfare Council. This revealed the immediate need of approximately 715 social workers.

The discussion of the group at the afternoon session, which dealt with methods of recruiting, training and finance, resulted in the decision that immediate steps must be taken to strengthen the already existing educational facilities and to provide new and auxiliary training plans. The staffs of civilian services, depleted throughout the war years in order quickly to supply trained people for the government departments, must be replaced if these local social services across the

Dominion—on which the government departments rely in such large measure—are to carry on.

A continuing Committee was appointed to prepare a brief for presentation to the appropriate Dominion government departments.

**Employment
activities of
U.S. and
Canadian
government
agencies**

A recent report from the War Manpower Commission deals with placement activities of the United States Employment Service.

During September the USES made 909,000 placements, which brought total placements for the year to 6,980,000. This represents a 39 per cent increase over the same period last year, the report states, and reflects the growing importance of the USES in filling the manpower needs of the nation.

The number as well as the proportion of female placements reached an all-time high in September, according to the report. Such placements exceeded 345,000 and constituted 38 per cent of total placements. The rising ratio of female placements was attributed to two causes: the continuing influx of women into the labour market; and the high turnover rates among women workers.

In Canada, the number of placements reported by local Employment and Selective Service offices during a corresponding four-week period from September 3 to September 30 amounted to 165,885. During the first 39 weeks of 1943 a total of almost a million and a half placements were made. The enormous increase that has occurred in business transacted by government employment offices since the imposition of manpower controls may be illustrated by comparing this figure with the number of placements made in the last pre-war year. During the entire year 1938, placements by local offices numbered only 382,295.

Of the 165,885 placements effected in Canada between September 3 and September 30, about 70,000, or almost 43 per cent were women workers. A summary of the activities of local offices in Canada during October appears elsewhere in this issue under the title *Applications for Employment; Vacancies and Placements; October, 1943.*

Elaborating on its findings, the United States report further reveals that placements of non-white workers were 144,000 during the month of September. Although non-whites represent less than 16 per cent of total placements, they constitute more than one-half of all the placements in service occupations.

Recruitment of trainees for pre-employment and refresher courses is fast disappearing, the

report states. From 53,000 trainees recruited in January, the number fell continuously to a new low of 13,000 in September.

**Britain creates
Ministry of
Reconstruction**

Creation of a Ministry of Reconstruction to direct the vast task of rebuilding Britain after the war was announced by Prime Minister Churchill early in November. The Minister of the new department is Lord Woolton, who as Minister of Food was in charge of Britain's food rationing program.

Press notices of the appointment suggest that the transitional period from a war time to a peace time economy will demand the solution of such problems as the re-absorption of millions of men and women from the fighting forces and from conscript industry; recreation of the myriad businesses temporarily curtailed or suspended because of the exigencies of war; the rebuilding of physically shattered shops and homes; the transforming of manufactories from war to peace use and the numberless co-relative financial commercial and social questions that will arise with the approach and the advent of peace.

**Recent rulings
on wage
incentive plans
in United States**

To receive approval from the United States National War Labour Board, wage incentive plans must be agreed upon jointly by management and union, if

a union is bargaining agent for the plant involved.

In two resolutions issued October 2 the Board outlined its policies with respect to incentive wage plans. The resolutions read as follows:

"(1) Consideration by the National War Labour Board of proposed wage-incentive plans will be limited to voluntary submissions by employers and to joint submissions agreed to by employers and unions in each situation in which a union is the collective bargaining representative of the employees. Incentive wage payment programs will not be ordered in dispute cases since that would be incompatible with the need for co-operative effort, which is basic to the success of such progress.

"(2) Action by the National War Labour Board on proposed wage incentive plans will be limited to a determination of whether or not the proposed plan is in conformance with the national stabilization program, i.e., whether or not it would result in unauthorized wage-rate decreases or wage-rate increases, or in an increase in the general level of production costs. Those proposing a plan will assume full responsibility for the technical details.

National War Labour Board approval of any plan will be a certification that it is consonant with the stabilization program and will not constitute approval of the merits of the plan as an incentive program. Any approval by the Board of any such programs will be accompanied by a requirement for periodic review in order to permit an appraisal of whether or not the incentive wage plan has actually operated within the limits of the stabilization program."

It is pointed out by Dr. G. W. Taylor, Vice-Chairman of the Board, that: "The approval of a wage incentive proposal by NWLB is not an approval of the technical details of the plan. . . . The full responsibility for such matters must be assumed by those who develop a wage incentive program". The function of the Board is to make sure that the plan does not involve a wage decrease, an inflationary wage increase, or that it will result in unwarranted increase in production costs. Plans given the approval of NWLB are subject to periodic review.

It is pointed out by the Office of War Information that traditionally labour is opposed to incentive plans, as it feels that it has the responsibility of "eliminating all forms of stretch-out so that after the war it will not find itself in the position of having lost the right of determining work standards by free collective bargaining". However, the labour members on the Board have concurred, in specific cases where "it is possible that production may be improved by the introduction of properly established incentive systems."

Reference was made in the August LABOUR GAZETTE (p. 1132), to a pronouncement by the U.S. War Production Board listing ten essential features of a wage incentive plan.

In Canada the National War Labour Board has been authorized under the new Wage Control Order to direct an employer to introduce or extend an incentive wage system "where the Board considers that such introduction or extension is practicable and that it will increase the volume or quality of production without increasing the employer's cost of production per unit".

Growth of labour-management committees in United States

More than three thousand labour-management production committees are now functioning in the United States, according to a report issued by the War Production

Board on November 12. The committees cover more than 6,000,000 workers in war plants, shipyards and mines. Over a thousand

of them have come into existence since last June.

"These new committees", the report declares, "indicative of the spirit of joint co-operation between management and labour to win the war quicker, have been set up in plants in every region of the country, in all types of industries and in every size plant from less than 100 to more than 40,000 employees. Approximately 75 per cent of the committees are in plants with local affiliates of national labour unions, 16 per cent in plants with independent unions and 10 per cent in non-union plants."

According to the report, the number of new committees officially registering in the War Production Drive, which was set up in Washington to sponsor the formation of the committees, is increasing at an accelerating rate.

An enlargement of the functions of the committees is also noted. "Most of the committees, new and old", it is stated, "are increasing the tempo of their work, meeting more frequently, assuming more duties and responsibilities, and handling more difficult production problems than heretofore." This greater volume of war work being carried on by the committees is ascribed in part to the better relations established between representatives of management and labour as they learn each others' problems.

It is due also, according to T. K. Quinn, director-general, to shortages in both manpower and materials, "which make it imperative for the intelligent leaders of war industries to devise new ways of finding shortcuts and other methods of extending war production with the tools, materials and labour forces on hand."

Among the methods by which the War Production Board is encouraging the growth of labour-management committees is by the publication of the *Labour Management News*, a weekly paper which deals with the activities of the committees and disseminates information about them. The paper describes the operation of suggestion systems in different plants, and publicizes certain of the ideas brought forward by workers under such programs. Methods of attacking such production hindrances as waste and bottle-necks are discussed; and accounts are given of the manner in which labour and management in co-operation have dealt with the causes of absenteeism and with accident prevention. The paper makes particular reference to publicity and promotional methods.

Awards to U.S. workers for production ideas

American war workers have, since March, 1942, won over 1,000 national honours for suggestions which have increased and accelerated the output of weapons and equipment for the fighting forces, the U.S. War Production Board announced recently.

As of November 1, 14 workers had received citations of individual merit, the highest award, 269 had received certificates, and 698 had received honourable mention for production ideas.

The suggestions were received through labour-management committees throughout the country according to the announcement. Two committees, one involving an AFL Metal Trades local and the other a local of the CIO Auto Workers, had won respectively 83 and 79 national honours for the suggestions of the workers they represented.

U.S. Labour Board extends retroactive date in prolonged negotiations

The United States War Labour Board recently revised the retroactive date for a wage increase when evidence was presented that the company concerned had unduly prolonged negotiations.

The original decision of the Board had granted 10,000 telephone workers, represented by an independent union, an increase of \$2 a week retroactive to September 6, 1942. The union then pointed out that this date penalized it for continuing negotiations with the company for several months in a peaceful manner instead of resorting to strikes. Because the Board was advised by its referee that the company had prolonged negotiations unduly, it changed the retroactive date for pay raises of \$2 a week from September 6, 1942, to June 1, 1942.

The company petitioned the Board for reconsideration of this decision, but the Board denied the petition, asserting that it agreed with the referee's finding that "under normal conditions the wage negotiations would have been completed by June 1, 1942". Representatives of industry on the Board dissented.

CIO workers lease housing project

Tenants of Greenmont Village, a 500-home housing project situated just outside of Dayton, Ohio, have formed a mutual housing corporation and have leased the project from the government. The overwhelming majority of the tenants are CIO members employed in several nearby industries.

According to the United States Press Service of Washington, D.C., the project cost approximately \$2,200,000 and rents total \$190,000 a year. There are 100 one-bedroom units, 300 two-bedroom units and 100 three-bedroom units. Rents range from \$28 to \$33 a month exclusive of utilities.

The corporation will manage the project in accordance with the provisions of the lease and under a management program adopted by its Board of Trustees and approved by the Federal Public Housing Authority. All revenues are to be deposited to the corporations' account and cheques are to be drawn on this account only to meet the expenses of administration and operation as provided in the budget adopted by the trustees and approved by the FPHA.

An option to purchase the property at any time after two years, or after the war emergency ends, is included in the agreement. The purchase price is to be determined by an appraisal made jointly by a representative of the government and a representative of the corporation. If these appraisers fail to agree, an independent appraiser may be selected and his appraisal shall be binding upon both parties.

After the sale, each resident member will exchange his lease with the corporation for a mutual ownership contract. He will continue to make monthly payments which will cover his share of the cost of management and operation, taxes, interest and amortization payments for his equity in the project. A member may at any time sell his equity to the corporation, and he cannot retain his membership in the corporation or his control of his house if he moves from the project. Or, if he prefers, he may sell his equity to an individual who is acceptable to the corporation.

After a member has made the required payments for amortization on his home, the only cost to him will be his share of the costs of management, operation and taxes.

Industrial injuries to young persons increasing in U.S.

Reports received by the Children's Bureau of the United States Department of Labour indicate that the number of industrial injuries suffered by minors is increasing. Nation-wide figures are not available, but Illinois reported a 60 per cent rise in accidents to young persons under 18 in 1942 as compared with 1941. Compensation awards to minors in New York State showed a corresponding increase from 1941 to 1942. In Wisconsin the number of workmen's compensation cases involving young persons in 1942 was 135 per cent higher than

in 1941. While part of this rise is due to the increased employment of young persons, it is stated by the Children's Bureau, "a large part is also undoubtedly due to the fact that these youths have higher accident rates in proportion to their number in the working force than have adults". Pennsylvania reported in 1942 "an increase of accidents out of proportion to the number of 16- and 17-year-old children employed."

British experience has shown that young persons under 18 have a higher accident rate than adults. It is attributed to inexperience and the fact that boys and girls are more irresponsible and reckless and lack mature judgment. "Unwise placement of the young worker, failure to observe child-labour laws, inadequate training and supervision and crowded working conditions also play their role in causing accidents." Ohio ascribed the increase in accidents in that State "to indifferent education of the young worker in the hazards of his job, both in vocational schools and in industry, and to failure to insist upon the observance of safety regulations".

A considerable number of injuries involved boys and girls employed illegally. Many were below the minimum age for employment or were working in hazardous occupations closed to young persons under 18 by the Fair Labor Standards Act. For example, a boy just under 16 was killed while employed on a truck carrying heavy goods although this type of work is included in the list of hazardous occupations. A 14-year-old boy was killed by a delinting machine in a fertilizer plant despite the 16-year minimum for employment in manufacturing occupations under the Fair Labor Standards Act. In New York and Wisconsin where increased compensation must be paid to minors injured while illegally employed, the number of such compensation awards in 1942 was double the 1941 figure.

Employers are urged by the Children's Bureau to take special precautions to protect young persons from injury and place them in non-hazardous occupations. Other recommendations of the Bureau were that boys and girls should be trained in safe practices and proper supervision provided at all times; that machines should be adequately guarded and attention paid to good housekeeping; that prompt first-aid treatment should be available for all injuries, however slight. Strict compliance with child-labour laws is urged; also

that compensation to young persons suffering permanent disability should be based on future earning power.

Trade union membership in Australia

Trade union membership in Australia during 1941 exceeded one million, according to the Commonwealth Bureau of Statistics. Although the number of separate unions declined from 331 in 1940 to 374 in 1941, the number of trade unionists rose from 955,862 to 1,075,680.

The population of Australia in 1941 is reported by the Bureau to have been slightly over 7,000,000, excluding full-blood aboriginals.

Governing body of I.L.O. meets in London

For the purpose of deciding upon the date, place and agenda of a regular session of the International Labour Conference, a meeting of the I.L.O. Governing Body was scheduled to be held in London, England, on December 16.

Mr. Edward J. Phelan, acting director of the I.L.O., stated in a press report late in November that: "It is expected that the forthcoming session of the International Labour Conference will define the steps to be taken by the United Nations to give effect to the social principles outlined in the Atlantic charter."

The report further points out that in normal times the governing body meets four times a year to supervise the work of the I.L.O. and to plan agenda of the I.L. conference. Except for the meeting held in New York in October, 1941, it has not met since February, 1940.

During this period an Emergency Committee set up in 1939 in anticipation of the outbreak of war and re-established at the New York meeting, has discharged the functions of the Governing Body. The latter comprises 32 members, 16 representing governments, eight representing employers and eight representing labour. The countries represented are Great Britain, the United States, Belgium, Brazil, Canada, Chile, China, France, India, Mexico, Netherlands, Norway, Poland and Yugoslavia. Two seats are vacant.

The Canadian Government is represented by Vincent C. MacDonald, K.C., Assistant Deputy Minister of Labour; while Hugh W. Macdonnell of Toronto is a member of the employers' group and Tom Moore, former president of the Trades and Labour Congress of Canada, is a labour member.

Wage Control

New Policy of Wage Control

Prime Minister Announces Changes in Wage Structure and Forecasts Code of Labour Relations

TWO important developments in the Government's labour policy were announced by the Prime Minister of Canada, Right Honourable W. L. Mackenzie King, in a radio address broadcast on December 4, entitled "The Battle Against Inflation". These consisted of certain changes in the method of controlling wages; and the introduction of a Code of Labour Relations.

In the Government's wage control machinery two changes were outlined by the Prime Minister. "War Labour Boards", he declared, "in dealing with applications for wage adjustments, will no longer be bound to apply a standard of comparing wages in one plant or industry with wages in other plants or industries. Instead, the standard in adjusting wages will be the removal of gross inequalities and injustices."

The other change in wage machinery has to do with the cost of living bonus. "The payment of cost of living bonuses at varying scales," the Prime Minister stated, "has given Canada a complicated structure of wages and bonuses. These complications have proven a constant source of misunderstanding and friction. The policy of the Government is that all practicable measures shall be taken to keep the cost of living at present levels. If that is achieved, there will be no occasion for additional cost of living bonuses. No further bonuses are to be paid. The existing cost of living bonuses are to be added to and to become part of basic wage rates."

"The government believes that by holding the cost of living at the present level, it will afford a more adequate safeguard of the basic living standard of labour than was provided

by the cost of living bonus. If the cost of living rises more than 3 per cent and remains at that level for two consecutive months, the government will review the whole program of price control and wage control and take appropriate action."

These two changes were effectuated a few days after the Prime Minister's speech by a new Wage Control Order, which was passed on December 9 (see page 1603).

The Code of Labour Relations, which had not yet been made public at the time this month's *LABOUR GAZETTE* went to press, arose from the public inquiry into industrial relations undertaken by the National War Labour Board last May and June. The Prime Minister stated that the labour code, which is to apply to war industries, "will define and prohibit unfair labour practices and, subject to the wage stabilization policy, will provide for compulsory collective bargaining. The Code will be enforced by a National Wartime Labour Relations Board, distinct and separate from the National War Labour Board, which will continue to have jurisdiction over wages."

In announcing these developments the Prime Minister described the progress since the outbreak of war of the battle against inflation. "From now until the end of the war," he declared, "the loss of this battle at any stage would greatly injure the whole of our war effort..... After the war, success in the battle against inflation will contribute more than all else towards the solution of post-war problems."

The text of the Prime Minister's speech follows:—

The Battle Against Inflation

THE world's attention, during the present week, has been centred upon the conferences of the leaders of the four great powers in the Middle East. The conferences remind us anew of the world-wide scale on which the present war is being waged. They reveal more clearly the immensity of the task still to be accomplished before the enemy is defeated.

We needed this wider perspective to restore our sense of proportion.

Our eyes have been focussed upon areas in which the Allies have had spectacular successes. These successes have caused many people to feel that the war might be drawing to a close. This state of mind has become far too general; so general, in fact, that it

threatens to reduce the momentum of the entire war effort.

Many have come to believe that we should now be mostly concerned with post-war problems, forgetting that the winning of the war is still the major problem. Before the energies of men and of nations can be diverted from wholesale destruction to the work of reconstruction, the enemy must be defeated, and the war must be won.

I would be the first to emphasize the necessity of anticipating and preparing to meet the problems likely to arise once hostilities cease. Canada, like other of the United Nations, has been giving earnest attention to such of these problems as we can now foresee. However much we plan, these problems cannot be met and solved until victory is won. The sooner victory is achieved, the easier the solution of post-war problems will be.

The Need to Continue an Utmost Effort

It may well be—and we fervently pray it will be so—that 1944 will witness the surrender of Nazi Germany. It may be that once Germany surrenders, Japan will realize that her fate is likewise sealed. It is hardly probable that the meaning of unconditional surrender, now made so clear, will cause either Japan or Germany to yield any more readily. We may be sure the Nazi leaders in Germany, and the militarist leaders in Japan, realizing what their own fate is certain to be, will seek to force their peoples into ever more violent conflict.

The one hope of the enemy is to hold out until the United Nations show signs of weariness under the strain of war. Any sign of weakness or indifference in any of the free countries will encourage the enemy to hold on longer. Endurance is what counts for most in a long struggle. This war has become a war of endurance, and it is the last round that will spell victory or defeat.

The end of the war will come only when one or other of the opposing forces is convinced of the absolute certainty of defeat. Anything which tends to make the enemy believe that defeat is not certain will prolong the war.

What we most need to remember to-day is that we are still in the thick of a fight against ruthless aggression and monstrous crime waged by terrifically powerful foes. From now on, we must, above all else, maintain and, so far as we can, increase the great war effort we have built up over the past four years. We dare not risk any of the gains that have already been won at so great a sacrifice of human life.

Of one thing we may be sure. If the war is not ended before the snows of winter disappear

from Europe, the spring and summer of the coming year will witness for British, American and Canadian forces campaigns more severe and costly in human lives than any they have yet fought. Upon this the Combined Chiefs of Staff are all agreed. Here surely is a call to every one of us to do everything in our power to shorten the war. It is equally a call to every one to avoid anything which might bring comfort to the enemy, thereby prolonging the war and adding to the loss of human lives.

Battles on the Home Front

And this brings me to what I am most anxious to say to-night about another battle, the battle against inflation. On the home front, this is now the most critical battle of all. From now until the end of the war the loss of this battle at any stage would greatly injure the whole of our war effort. The winning of this battle will contribute much toward victory. After the war, success in the battle against inflation will contribute more than all else towards the solution of post-war problems.

There are two kinds of national effort essential to the waging of modern war. One is concerned with armies, navies and air forces in active combat with the enemy. The other, with the organization of the whole nation to back up the armed forces with the utmost strength the people can muster. One side is symbolized by the warrior; the other, by the worker. The key to victory is a partnership unbroken and unbreakable of the warrior and the worker. The warrior cannot fight without the weapons forged by the worker. The freedom of the worker depends upon the success in battle of the warrior.

The workers are not only wage earners; they are all who, directly or indirectly, are labouring to keep Canada strong in war. They include housewives, workers in mine and forest, in factory, shop and office; farmers and fishermen; business and professional men and women.

Production and Inflation

On the home front there have been two battles to fight; the battle of production and the battle against inflation. In the battle of production, Canada has done magnificently. We have doubled our production since the beginning of the war, and half of all we produce is now being used to wage war. Our ships, our planes, our tanks, our guns, our munitions, our food: are all powerful weapons in helping to accomplish the defeat of the enemy.

But, strange as it may sound, our success in the battle of production has increased our difficulties in the battle against inflation.

By doubling our production, we have doubled the income of the Canadian people. But because we are using half our production for war, we have been unable to increase the quantity of goods for the people to buy with their larger incomes.

If we were now spending twice as much money as we had to spend in 1939, prices would be up and the value of every dollar would be down. What cost fifty cents in 1939 would cost a dollar to-day. We would be experiencing what the economists call "inflation".

The Evil Consequences of Inflation

Inflation is not something new in the world. Many countries have experienced inflation, and the experience has always been bad. The evils of inflation have been experienced most frequently and at their worst at times of war. The process is something like this:—First, prices go up. Then wages and salaries may go up, but they never go up quite as fast. The extra money paid in wages and salaries tends to send prices up again. A few sharp, unscrupulous people may make a good thing of inflation by speculation and profiteering. But, sooner or later, the great mass of the people suffer.

During the last war, and the years immediately following, wages rose sharply, but in few cases did they more than keep pace with the increase in the cost of living, which doubled. When prices fell, wages also began to fall. Worse still, this fall in prices was soon followed by unemployment. We have sought to avoid that experience this time. We have avoided it thus far. If humanly possible, we are determined to avoid it to the end of the war and in the post-war period. What I wish to impress upon you to-night is that, if we are to win the battle against unemployment in the post-war period, we must first of all win the battle against inflation.

Meanwhile, I wish to say with equal emphasis that, in a time of war, inflation is one of the quickest and surest ways of weakening the home front. That is why, from the very start of the war, we in Canada set out to prevent inflation. To help pay for the war, a large part of the extra income caused by increased production has been gathered into the national treasury by such measures as the 100 per cent excess profits tax, the income tax, which is particularly heavy on medium and large incomes, and borrowings through victory loan and war savings campaigns. As all of us know, taxes and borrowings have greatly reduced the amount of money left in our pockets to be spent. Much as we may dislike the war taxes, they at least help to keep up the buying power of every dollar each of us has left to spend.

The Establishment of the Price Ceiling

But we found, two years ago, that we could not win the battle against inflation with taxes and borrowing alone. Prices began going up too rapidly. Each dollar was buying less and less. The time had come for a more drastic weapon. We then decided to fight inflation with direct control of prices. A so-called "ceiling" was placed over virtually all prices. We all welcomed the "ceiling" on the prices of things we had to buy. But, someone has to sell everything we buy. And it is impossible to control the price of what we buy unless the price of what is sold is also controlled.

It is here that the battle against inflation has called for self-denial and self-discipline. Everyone can see an immediate advantage in increasing his income, whether it is by getting higher prices for what he sells, or a higher salary or wages for his work. It is not so easy to see that a higher money income will not be of any advantage if, because prices are going up, all our money buys less and less. The fact that the vast majority of Canadians realize that inflation will hurt themselves is a tribute to their intelligence. The fact they also realize that inflation would hurt the war effort is a tribute to their patriotism.

The Importance of Price Control

The battle of production began four years ago. For two years it was an uphill struggle. But Canada's success in that battle has been the marvel of all our Allies. We also began to prepare for the battle against inflation four years ago; but the battle itself was not actually joined until two years ago when the price ceiling was adopted. In that battle, too, Canada has done well. Since the outbreak of war, the cost of living in Canada has risen only a little over 18 per cent as compared with 53 per cent in the corresponding period of the last war. From 1939 until the price ceiling was imposed, the increase was 15 per cent. So successfully has the price ceiling been maintained that the cost of living has since risen little more than 3 per cent. In the corresponding two years of the last war, it rose 33 per cent, which is just ten times as much.

The battle against inflation is being waged by the people of Canada in co-operation with their government. The price ceiling is the front line in that battle. If we fail to hold that line, the whole structure of our war effort will be impaired. We would endanger the continued and uninterrupted production of munitions of war and of foodstuffs. We would be lessening the value of war savings, and indeed of all savings, both compulsory and voluntary.

We would be cutting down the value of the allowances of soldiers' dependents, and of the pensions of disabled soldiers themselves. Worst of all, by jeopardizing production through industrial strife, we would be adding further risks to the lives of our fighting men. If the battle line begins to crumble, if the price ceiling breaks down, in the long run all stand to lose.

The Necessity of Controlling Costs

When the government undertook to control the cost of living in 1941, it was made perfectly clear that the price ceiling could be maintained only by controlling the cost of producing goods. That meant controlling farm prices and controlling wages. We knew that farm prices could not be controlled without the support of the farmers, and we knew that wages could not be controlled without the support of Labour. In other words, the Farmers and Labour were asked to go into and hold the front line in the battle against inflation, just as they have held the front line in the battle of production.

But, in the fight against inflation, the farmers or the wage-earners were not asked to bear all the burden. The burdens have been placed on those best able to bear them. We have had in Canada, during this war, a planned levelling up and levelling down of spendable incomes on a scale never before attempted in a democratic country. The levelling down has been borne by those with moderate and large incomes. Their profits and incomes have been taxed heavily and their salaries have been rigidly controlled. The levelling up has been of particular benefit to farmers and wage earners. Farmers will agree that, apart from exceptional cases, farm incomes to-day are equal to the best they have ever enjoyed. Similarly, most workers will, I am sure, agree that their yearly earnings are greater than they were in 1939.

Defending a Basic Standard of Living

Now that we have reached the stage where half our total production is used to fight Germany and Japan, no section of the community can expect, while the war lasts, to continue to improve its standard of living.

That does not mean that gross inequalities or injustices should not be remedied; but it does mean that if we are to hold the line on the home front until victory is actually achieved, all must be prepared to play their full part in the battle against inflation.

The purpose of price control is not to improve the standard of living. It is to protect and maintain a basic standard of living. It is this basic standard of living which must be defended against all assaults of the enemy of inflation.

A Floor Under Farm Prices

When the price ceiling was adopted, the government knew that some farm prices were out of line. Farmers know that much has since been done to bring farm incomes into better balance with the incomes of other groups. I wish to-night to thank the farmers of Canada for their magnificent contribution to the battle of production. I wish, as well, to appeal to them to continue to help hold the front line against inflation by continuing to support the price ceiling.

On its side, the government recognizes that farmers are anxious about their post-war prospects. They do not want to face a disastrous fall in farm prices within a year or two after the war. If, to help win the war, the farmers are asked to accept a ceiling on prices, we believe they are entitled to a floor under prices to insure them against an agricultural depression after the war. As an essential part of its post-war policy, the government intends to ask Parliament, at the next session, to place a floor under the prices of the main farm commodities.

Wage Stabilization

In order to hold the price ceiling, it was necessary to control wages. But while almost all prices were frozen, the government did not "freeze" all wages. We know there were inequalities and injustices in the wage structure which needed to be remedied. When wages were stabilized two years ago, a National War Labour Board and regional War Labour Boards were established. To these Boards was given the power to adjust wages which were found to be low by comparison with wages paid for similar work under comparable conditions. In the past two years, the War Labour Boards have dealt with 40,000 applications for wage adjustments affecting two and a half million workers. Adjustments to remove inequalities were made in 90 per cent of the cases. The result of these adjustments, now in force, has meant a total increase in payment to Canadian wage earners of more than \$150,000,000. This is conclusive evidence that wages were not frozen.

If, however, wages generally were allowed to rise, it would be quite impossible to hold the price ceiling. Wages are a large element, often the largest element, in the cost of everything we buy. That is why, if prices were to be controlled, it was necessary to control wages.

When the price ceiling was established two years ago, none could be sure how far it would be possible to hold down the cost of living. To safeguard wage earners against increases in the cost of living, there was established at the same time, a compulsory cost of living bonus. The purpose of the bonus was to offset a part of any increase in the cost of living.

Generally speaking, Labour has recognized that wage control is essential to protect the basic standard of living and has loyally supported the policy.

Canada's record in industrial relations during the war has been highly creditable. Within the present year, however, there have been signs of strain and of a need for new measures to promote industrial harmony. As a first step the National War Labour Board was reconstituted to give it a more judicial character. The Board has since conducted an enquiry into the whole field of industrial relations.

Some weeks ago the Board produced its findings in the form of a Majority and a Minority Report. These reports have been carefully studied by the government in considering modifications of its labour policy.

I am now in a position to say that the government is prepared to accept, as a basis for a revised labour policy, the main proposals on which the Majority and Minority Reports agree.

Modifications of Wage Control

In the battle against inflation, as I have said, the price ceiling is the front line. That line the government is resolved to hold. To abandon wage control would, as I have already shown, make it impossible to hold that line. In the policy of wage stabilization there will therefore be no fundamental change. Two important changes, however, will be made in the method of controlling wages.

The War Labour Boards, in dealing with applications for wage adjustments, will no longer be bound to apply a standard of comparing wages in one plant or industry with wages in other plants or industries. Instead, the standard in adjusting wages will be the removal of gross inequalities and injustices.

The other change has to do with the cost of living bonus. The payment of cost of living bonuses at varying scales has given Canada a complicated structure of wages and bonuses. These complications have proven a constant source of misunderstanding and friction. The policy of the Government is that all practicable measures shall be taken to keep the cost of living at present levels. If that is achieved, there will be no occasion for additional cost of living bonuses. No further bonuses are to be paid. The existing cost of living bonuses are to be added to and to become part of basic wage rates.

The Government believes that by holding the cost of living at the present level, it will afford a more adequate safeguard of the basic living standard of Labour than was provided by the cost of living bonus. If the cost of living rises more than 3 per cent, and remains at the level for two consecutive months, the

Government will review the whole program of price control and wage control and take appropriate action.

The revised Wage Control Order will be made public at the beginning of next week.

A Code of Labour Relations

I have referred to the recommendations of the two reports of the National War Labour Board which the Government is prepared to carry out. The most important of these recommendations is that there should be a code of labour relations to apply to war industries. A code of labour relations is already in the final stages of preparation. The labour code will define and prohibit unfair labour practices and, subject to the wage stabilization policy, will provide for compulsory collective bargaining. The Code will be enforced by a National Wartime Labour Relations Board, distinct and separate from the National War Labour Board, which will continue to have jurisdiction over wages.

In peace time, the authority to make laws to enforce the right of collective bargaining belongs to the provinces. As a result of recent conferences with the provincial authorities, agreement has been reached in principle on a basis of co-operation in instituting and administering compulsory collective bargaining.

The Code of Labour Relations will be enacted in the near future. When the Code is published, the Majority and Minority Reports of the National War Labour Board will also be made public.

In concluding, I wish to thank Labour, as I have thanked the Farmers, for their magnificent contribution to the battle of production. I wish also to appeal to Labour, as I have appealed to the Farmers, to continue to help hold the front line against inflation, by continuing to support the price ceiling.

On another occasion I hope to speak about the plans of the Government to achieve, once the war is won, what I have previously defined as a national minimum of social security and human welfare; not for Labour only, but for all the people. That national minimum should embrace useful employment for all who are willing to work; standards of nutrition and housing, adequate to ensure the health of the whole population; social insurance against privation resulting from unemployment, from accident, from the death of the breadwinner, from ill health, and from old age. Those are our post-war objectives.

I have confined my address to-night to the battle against inflation. That battle we must win to assure victory in war; that battle we must also win to provide a solid foundation on which, after the war, to build a greater and a better Canada.

Revision of Wartime Wages Control Order

Cost-of-Living Bonuses to be Incorporated into Basic Wage Structure— Future Wage Adjustments to be Granted only to Correct "Gross Inequality or Gross Injustice"

A NEW order in council embodying certain changes in the Government's wage control machinery, was announced by the Minister of Labour, Honourable Humphrey Mitchell, on December 9, in the following statement:

Order in Council P.C. 9384 revoking Wartime Wages Control Order (P.C. 5963) and substituting what will be known as Wartime Wages Control Order, 1943, was signed to-day.

The stated purposes of this Order are:—

- (a) to provide for the establishment of wage rates incorporating therein cost of living bonuses payable in respect of the rise in the cost of living;
- (b) to stabilize the wage structure in Canada established in this manner in order to maintain stability in prices and prevent increases in the general cost of living; and
- (c) to provide machinery for an orderly rectification of any gross inequalities and injustices in wage rates so established, insofar as this is possible consistently with the paramount principle of the maintenance of stability in prices.

As the Prime Minister stated in his radio broadcast last Saturday, the Canadian cost of living index has risen less than four points in the two years since price regulation and wage control were introduced; and it is the firm policy of the government to use every means within its power to ensure continued stability of living costs around present levels. In the light of this policy provision for additional cost of living bonuses appears unnecessary and the new order consequently provides that existing bonuses shall be incorporated as a part of basic wages.

If any appreciable and continued change in living costs should occur there will be a general review of stabilization policy and the measures employed under it.

Under the administration of the War Labour Boards, adjustments in wage rates that were deemed to be out of line have been granted in cases affecting some two and a quarter million

employees and the aggregate of increases thus approved is more than \$150,000,000 a year. Provision for adjustments is continued in the new Wages Control Order under terms that give somewhat altered powers to the War Labour Boards.

The formula under the old Order was that wages might be increased if they were found to be low as compared with those "generally prevailing for the same or substantially similar jobs" in the same or a comparable locality.

The new Order bases future upward adjustments simply on the rectification of "gross inequality or gross injustice", coupled with the ability of the employer to pay an increase without raising prices. Similar provisions are made with regard to wage decreases.

Wage adjustment applications already pending will be dealt with under the terms of the old Order though the incorporation of cost of living bonuses with basic wages is still required.

Another change in the Order is of special importance to the lowest-paid workers. Provincial minimum wage-fixing authorities are now free to revise or amend their wage orders without reference to the National Board provided they do not establish a new minimum rate above 35 cents an hour. Few, if any, minimum wage orders in Canada fix a rate for women as high as 35 cents and many of these orders apply also to men.

The Order provides for a National War Labour Board of six members, one of whom shall be chairman and one vice-chairman, the other members being selected as representative of (though not officially representing) the general public, employers, and employees respectively.

In order to secure uniformity of practice, the National Board is given closer supervision over the Regional War Labour Boards, which are required to report to all their decisions and directions to the National Board for review.

Appeals from the decisions of Regional Boards may be made to the National Board with the consent of either Regional or National Boards.

Summary of Wartime Wages Control Order, 1943

Among the important provisions of the Wartime Wages Control Order, 1943, involving changes in existing conditions, are the following:

Section 2—(1) and (2)

The National War Labour Board is to consist of six members, one of whom shall be

the Chairman and one Vice-Chairman; of the other four members, two shall be appointed as representative of the public, one as representative of employers and one as representative of employees.

Section 4—(1)

The National Board is charged with the administration of the Order and more speci-

constituting a quorum shall be a decision of the National Board and in the event of a tie the Chairman, or in his absence, the Vice-Chairman, shall have a casting vote.

(7) There shall be a National War Labour Committee consisting of eight or more members, for the purpose of consulting with and assisting the National Board, the members of such National War Labour Committee to be appointed by the Governor in Council to hold office during pleasure and to be selected as to four or more of such members having regard to the interests of employers and as to an equal number of such members having regard to the interests of employees.

(8) The members of the National Board shall be paid such salaries as may be fixed by the Governor in Council and such expenses as may be incurred by them in the discharge of their duties.

(9) The members of the National War Labour Committee shall be paid such salaries, per diem allowances or expenses as may be fixed by the Governor in Council.

Staff

3. (1) The National Board may appoint an officer to be the Chief Executive Officer of the National Board who shall be paid such salary as may be fixed by the Governor in Council.

(2) The Department of Labour shall furnish such technical and clerical assistance to the National Board as may be possible, and the National Board, with the approval of the Governor in Council, may employ such other officers and employees as may be necessary for the conduct of its business and may, with such approval, fix their remuneration.

Duties and Powers of National Board

4. (1) The National Board shall be charged with

- (a) the administration of this Order including the supervision, direction and control of the work of the Regional Boards constituted under this Order, and
- (b) such other duties as may be assigned to it by the Governor in Council or by the Minister of Labour.

(2) The National Board shall, as directed by the Minister of Labour or from time to time as it deems advisable, investigate wage conditions and labour relations in Canada and report thereon together with such recommendations as it may deem advisable, to the Minister of Labour.

5. (1) The National Board shall have all the powers and authority of a Commissioner appointed under Part I of the Inquiries Act.

(2) The Chairman or any member of the National Board may administer oaths.

6. The National Board may, with the approval of the Minister of Labour, make such by-laws as may be necessary

- (a) to enable it to carry into effect the duties imposed upon it by this Order;
- (b) to provide for the supervision and control of its officers, clerks and employees; and
- (c) to assign to the Regional Boards duties and responsibilities under this Order and to confer upon Regional Boards authority to exercise, in the discharge of such duties and responsibilities, all or

any of the powers of the National Board under Part II of this Order except the powers conferred on the National Board by subsection (2) of section 15, and paragraphs (a) and (c) of section 29 of this Order.

Regional War Labour Boards

7. (1) There shall be nine Regional War Labour Boards (hereinafter referred to as Regional Boards), one for each province, each of which shall consist of three or more members, one of whom shall be Chairman, one or more appointed as representative of employers and an equal number appointed as representative of employees.

(2) The Chairman of the Regional Board for each province shall be appointed by the Governor in Council.

(3) The Chairman of each Regional Board may designate a person to be Vice-Chairman thereof to preside over the Regional Board in his absence who shall for such purpose be a member of the Board, but where the Chairman is a person other than a provincial Minister, no such appointment shall be made except with the approval of the Minister of Labour of Canada.

(4) The members of each Regional Board appointed as representative of employers and employees shall be appointed by the Governor in Council, on the recommendation of the Minister of Labour after consultation with the Minister of Labour or other appropriate Minister of the province concerned, and with employer and employee organizations, as the case may be, and shall hold office during pleasure; and the head office of each Regional Board shall be at such place as may be determined by the Regional Board.

(5) A majority of the members of each Regional Board shall constitute a quorum of the Regional Board.

(6) The Vice-Chairman and members of the Regional Board appointed as representative of employers and employees shall be paid such per diem allowance or expenses as may be fixed by the Governor in Council.

(7) Where the Chairman of a Regional Board is a person other than a Provincial Minister he may be paid such salary, per diem allowance or expenses as may be fixed by the Governor in Council.

(8) Each Regional Board may, with the approval of the National Board, appoint an executive officer to be the Chief Executive Officer of the Regional Board and such officer shall be paid such salary as may be fixed by the Governor in Council.

Duties and Powers of Regional Boards

8. (1) A Regional Board shall be charged with such duties and responsibilities under this Order as may be assigned to it by the National Board and shall exercise such powers of the National Board under this Order as it is authorized to exercise under the by-laws of the National Board.

(2) Where any Regional Board purports to make any direction under the provisions of this Order, it shall be conclusively presumed for the purpose of any proceedings in any court pursuant to this Order that the power to make such direction is validly and effectively con-

ferred on such Regional Board by the by-laws of the National Board.

(3) A Regional Board shall have all the powers and authority of a Commissioner appointed under Part I of the Inquiries Act.

(4) The Chairman or any member of a Regional Board may administer oaths.

Review of Regional Board Decisions

9. A Regional Board shall report to the National Board every decision or direction made by it under this Order forthwith upon the making thereof, and shall make such other reports or returns in respect of the performance of its duties and responsibilities or the exercise of its powers under this Order as the National Board may require.

10. (1) The National Board shall arrange for the review of every decision or direction of each Regional Board and may of its own initiative, vary or revoke any such decision or direction.

(2) Where on a review under the powers conferred by this section, the National Board varies, or revokes any decision or direction of a Regional Board, the decision or direction of the National Board shall be effective only from the date of the making thereof.

Appeals

11. (1) Any person interested in or affected by any decision or direction of a Regional Board may appeal to the National Board if

(a) the Regional Board making such decision or direction grants leave so to appeal and the request for such leave to appeal has been made within thirty days of the announcement of the decision or direction of the Regional Board, or

(b) the National Board grants leave to so appeal and the request for such leave has been made within sixty days of such announcement.

(2) On any such appeal the National Board may make the decision or direction which in its opinion the Regional Board ought to have made and the decision or direction of the National Board shall constitute the decision or direction of the Regional Board as if originally made by it.

(3) "Direction" shall have the same meaning in this section and in subsection (2) of section 8, and sections 9 and 10 of this Part as in Part II of this Order.

Expenses

12. The administrative expenses of the National Board and of the Regional Boards, other than the salaries and usual travelling expenses of Dominion or Provincial officials, shall be paid out of the War Appropriation.

PART II

WAGE RATES

13. (1) In this Part, unless the context otherwise requires:

(a) "cost-of-living bonus" means a periodic supplement to the wages paid to an employee in respect of changes in the cost of living;

(b) "direction" includes any authorization or determination made by the National Board under the authority of this Order;

(c) "employee" means any person employed by an employer under a contract of service except a person employed in domestic service in a private home or employed to do work of a casual nature other than in the trade or business of the employer;

(d) "employer" means any person, firm or corporation employing any person and shall include His Majesty the King in the right of Canada, but shall not include:

(i) any department or agency of the Government of Canada subject to the provisions of Order in Council P.C. 6702, of August 26, 1941, as amended; or

(ii) any department, branch or portion of any provincial Government; or

(iii) any agent of the Crown in the right of any province; or

(iv) any municipality and any undertaking operated by the council or by a committee of the council of the municipality, but shall include a corporation carrying on an undertaking in any municipal area, which corporation is separate from the municipality, notwithstanding that the municipality or council exercises a measure of control over such corporation; or

(v) any person, firm or corporation operating any hospital or any religious, charitable or educational institution or association, if such hospital or such institution or association is not carried on for purposes of gain; or

(vi) any person, firm or corporation engaged in agriculture, horticulture, fishing, hunting or trapping;

(e) "incentive rate" means a piece work rate or a rate calculated on the basis of a commission on the volume or value of results or any other rate calculated on a basis other than solely on the basis of time worked;

(f) "National Board" includes, except in subsection (2) of section 15, and paragraphs (a) and (c) section 29 and in section 31 of this Part, a Regional Board in respect of employers and matters in respect of which the Regional Board, is by the by-laws of the National Board, authorized to exercise the powers of the National Board under this Order;

(g) "normal working hours" means the hours normally worked by an employee on a full-time basis in the standard work week established by practice or collective agreement and not considered to be overtime, and where an employer has established a standard work week in accordance with instructions of the National Board for the purpose of computing cost-of-living bonus payable under the Wartime Wages Control Order, means the hours comprised in such standard work week;

(h) "occupational classification" means a classification of employees on the basis of

- (i) the performance of similar work or duties; and

- (ii) the exercise of a like type and degree of skill and accuracy in the performance thereof,
- and where only one employee is employed to perform work or duties of a particular kind or to exercise a particular type and degree of skill and accuracy in the performance of any work or duties of a particular kind, means the job or position occupied by such employee;
- (i) "previous authorized bonus" means a cost-of-living bonus authorized or required to be paid by an employer to his employees in any occupational classification by or pursuant to the Wartime Wages and Cost-of-Living Bonus Order (Order in Council, P.C. 8253, dated October 24, 1941), or the Wartime Wages Control Order, or the Wartime Salaries Order or any Order in Council specially applying to the employer or by or pursuant to any declaration, determination, direction, instruction, order or General Order made under the authority of the said Orders;
- (j) "previous authorized single rate" or "previous authorized range" means the single rate or range, not including cost-of-living bonus, authorized or required to be paid by an employer to his employees in any occupational classification in respect of work performed during normal working hours by or pursuant to the Wartime Wages and Cost-of-Living Bonus Order (Order in Council, P.C. 8253, dated October 24, 1941), or the Wartime Wages Control Order, or the Wartime Salaries Order or any Order in Council specially applying to the employer or by or pursuant to any declaration, determination, direction, instruction, order or General Order made under the authority of the said Orders;
- (k) "range of rates" or "range" means a group of two or more wage rates, inclusive of the highest and lowest wage rate in such group, paid by an employer to employees in one occupational classification where more than one rate is paid by the employer to employees in the classification.
- (l) "Schedule 'A'" means "Schedule 'A'" to this Order;
- (m) "single" with reference to a wage rate means a rate which is payable to all employees in one occupational classification and in respect of which no range is paid by the employer;
- (n) "time rate" means a wage rate calculated solely on the basis of time worked;
- (o) "wages" include wages, salary, commissions, gratuities, emoluments or other remuneration paid to, or other benefit having a pecuniary value conferred on an employee by an employer in respect of the services of the employee, including any share of profits or bonuses dependent upon the profits of the employer and all other forms of "income" as defined by section 3 of the Income War Tax Act if such income is related to the services rendered by the employee, and includes payments or benefits aforesaid made to or conferred on persons other than the employee in respect of the services rendered by the employee;
- (p) "wage rate" or "rate" means the basis of the calculation of the wages paid to an employee whether such basis of calculation is with reference to a period of time worked or on a piece work basis or as a commission on volume or value of results or on any other incentive basis, and where the basis of calculation of the wages paid to an employee is a combination of such bases of calculation, means each such basis; and
- (q) "Wartime Wages Control Order" means the Wartime Wages Control Order made by Order in Council, P.C. 5963, dated July 10, 1942, as amended.
- (2) For the purpose of this Order, an employee in any office, factory, shop or undertaking, whether his compensation is called wages or salary,
- (a) who is actually engaged in and whose principal duty is the performance of work not of a supervisory character, is below the rank of foreman or comparable rank;
- (b) who has direct supervision of the employees engaged in such work and whose duties are mainly supervisory, is a foreman or of a rank comparable to a foreman,
- if such employee does not, in either case, discharge duties and responsibilities of an executive character.
- (3) If the Lieutenant-Governor in Council of a province by order consents, or if a Minister of the Government of a province authorized on that behalf by the Lieutenant-Governor in Council of such province signifies in writing to the Minister of Labour of Canada that he consents to the application of the provisions of this Order in respect of a municipality in such province, the provisions of this Order shall on and after the date of such consent be applicable to such municipality as an employer, notwithstanding sub-paragraph (iv) of paragraph (d) of subsection (1) of this section.
- (4) If any person, firm or corporation included within the provisions of sub-paragraphs (v) and (vi) of paragraph (d) of subsection (1) of this section has employees engaged in other employments than those specified in such sub-paragraphs, such person, firm or corporation shall, notwithstanding anything contained in the said subsection (1), be an employer subject to the provisions of this Order in respect of such other employees.

Purposes of Order

14. It is the purpose of this Order

- (a) to provide for the establishment of wage rates incorporating therein cost-of-living bonuses payable in respect of the rise in the cost of living;
- (b) to stabilize the wage structure in Canada established in this manner in order to maintain stability in prices and prevent increases in the general cost of living; and
- (c) to provide machinery for an orderly rectification of any gross inequalities and injustices in wage rates so established, insofar as this is possible consistently with the paramount principle of the maintenance of stability in prices, and this Order shall be administered and enforced to give effect to these purposes.

Establishment of Wage Rates

15. (1) Every employer shall establish a single rate or range in the manner prescribed in the rules set out in Schedule "A" for each occupational classification of employees in his employment which single rate or range shall be effective for the first payroll period commencing on or after February 15, 1944,

(a) in respect of which the previous authorized single rate or the highest rate in the previous authorized range is less than \$175 per month or

(b) in respect of which the previous authorized single rate or the highest rate in the previous authorized range is a rate of \$175 per month or more, but the employees in which are not above the rank of foreman or comparable rank,

provided that, where the previous authorized single rate or the highest rate in the previous authorized range for an occupational classification of employees is a rate of \$250 or more per month, the employees in the classification shall be presumed to be above the rank of foreman or comparable rank unless the nature of their duties and responsibilities and their relationship to other employees indicates clearly that they are not above the said rank.

(2) The National Board may, by order, make additional rules not inconsistent with the rules set out in Schedule "A" as to the manner in which an employer shall establish single rates or ranges for the occupational classifications of his employees specified in subsection (1) of this section.

(3) The National Board may direct the manner in which a rate or range shall be established by an employer for an occupational classification of his employees to give effect to the rules set out in Schedule "A", or any additional rules made under sub-section (2) of this section.

Stabilization of Wage Rates

16. No employer shall, except in accordance with a written direction of the National Board, in any payroll period commencing on or after February 15, 1944, pay wages to an employee in an occupational classification for which he is required to establish a single rate or range under section 15 of this Order, at a rate other than a single rate or a rate within a range established in the manner therein prescribed for such classification.

17. No employer shall pay wages to an employee for the performance of work or duties, or for the exercise of a type and degree of skill and accuracy in the performance of any work or duties, not performed or not exercised by his employees in any occupational classification prior to the date of this Order, or who are employed in any establishment in which, or at any site of operation at which, the employer commences operations after the date of this Order

(a) at a rate of less than \$195 per month, or

(b) at a rate of \$195 or more, if the employee is not above the rank of foreman or comparable rank,

until he has obtained a direction of the National Board establishing a single rate or range for the occupational classification in which such employee is employed; provided that where the employer proposes to pay wages to any such employee at a rate of \$250 per month or more,

the employee shall be deemed to be above the rank of foreman or comparable rank and subject to the provisions of the Wartime Salaries Order unless the National Board determines that he is not above the said rank.

18. No employer shall, except in accordance with a written direction of the National Board, alter any term of employment directly or indirectly increasing or decreasing a single rate or the rates within a range established by him under section 15 of this Order or by or pursuant to a direction of the National Board under this Order.

19. No employer shall pay wages to an employee, or employ an employee on terms which are in contravention of or otherwise than in compliance with any direction or order made by the National Board under this Order given or made to, or in respect of, such employee.

Powers of the National Board

20. The National Board may

(a) authorize or direct an employer to increase a single rate or the rates within a range established by him under this Order for an occupational classification of his employee only if and to the extent that the National Board finds that such increased rate or range is necessary to rectify a gross inequality or a gross injustice and is also consistent with the ability of the employer to pay the increase in cost to which such increase may give rise in the business or industry in which the rate or range is to be paid without increasing the price of the product therefrom or of the services rendered therein.

(b) direct an employer to decrease a single rate or the rates within a range established by him under this Order for an occupational classification of his employees only if and to the extent that the National Board finds that the rate or range is so high that it is unsound or causes gross inequalities.

(c) authorize or direct an employer

(i) to alter a term of employment in a manner which will increase or decrease, directly or indirectly, a single rate or the rates within a range established under this Order for an occupational classification of his employees; or

(ii) to establish a single rate or range for a new occupational classification of his employees in respect of which section 17 of this Order is applicable; or

(iii) to establish a range of rates for an occupational classification for which such employer pays only a single rate established under this Order; or

(iv) to establish incentive rates or ranges payable in conjunction with time rates or ranges established under this Order; or

(v) to convert a time rate or range established under this Order to an incentive rate or range or an incentive rate or range established under this Order to a time rate or range,

in such manner or at such rate or range as in the opinion of the National Board

is fair and reasonable and is consistent with and will give effect to the purpose of this Order having regard to all the circumstances deemed by it, in its discretion, to be material.

21. Where the National Board authorizes or directs an employer to increase a single rate or the rates within a range for an occupational classification of his employees, the Board may authorize or direct the employer to increase single rates or rate within ranges for other occupational classifications of his employees, in order to maintain differentials in relation to the rates so increased, only if and to the extent that the Board finds that the conditions prescribed by paragraph (a) of section 20 of this Order to the powers of the Board to authorize or direct increases in such single rates or the rates within such ranges, exist, and only in smaller amounts where the rates are higher than the rates so increased.

22. The National Board may direct an employer to introduce or extend an incentive wage system in the place of or to be paid in conjunction with a time wage system for any occupational classification in his employment where the Board considers that such introduction or extension is practicable and that it will increase the volume or quality of production without increasing the employer's cost of production per unit.

ANCILLARY PROVISIONS

Provincial Minimum Wage Legislation

23. Notwithstanding anything contained in this Order, an employer may, without direction from the National Board, increase a wage rate paid by him to an employee to the minimum wage rate for such employee established at any time by or pursuant to powers conferred by provincial minimum wage legislation, if such minimum wage rate is not in excess of thirty-five cents per hour or such higher rate per hour, if any, established for such employee by or pursuant to such legislation on November 15, 1941, or in excess of an equivalent rate where such rate is other than an hourly rate; and this Order shall not be deemed to authorize or require an employer to pay to an employee a wage rate less than such minimum wage rate or to relieve the employer from liability of any kind, under such provincial legislation or otherwise, for failure or omission so to do.

Adjustment of Incentive Rates

24. An employer may, notwithstanding anything contained in this Order

(a) change an incentive rate or range established by him under this Order or by or pursuant to a direction of the National Board for an occupational classification of his employees,

(i) if such change is made to compensate for the addition, removal or alteration of a work element forming part of the operation or series of operations performed by the employees in such occupational classification, and is strictly commensurate with such addition, removal or alteration, and

(ii) if that portion of the employer's cost of production representing the labour cost of such operation or series of operations is not increased, and

(iii) if a flat rate or time rate or range of such rates is paid in conjunction with the incentive rate or range so established, if such flat rate or time rate or the rates within such range are not increased or decreased and are retained as part of the changed rate or range.

(b) convert a time rate or range established by him under this Order or by or pursuant to a direction of the National Board for an occupational classification of his employees to an incentive rate or range if there was established by him under this Order an incentive rate or range in respect of the same operation or series of operations and if the conversion is effected in accordance with the same method of calculation followed by the employer in calculating such incentive rate or range.

Individual Employees

25. Nothing contained in this Order shall be deemed in any way to prohibit an employer

(a) from increasing or decreasing the rate paid to an individual employee within the limits of a range established by him under this Order or by or pursuant to a direction of the National Board for the occupational classification in which the employee is employed, or

(b) from increasing, or after consultation with the employee, or his representatives or in accordance with the terms of a collective agreement, if any, from decreasing the rate paid to an individual employee upon the promotion or demotion of the employee from one occupational classification to another occupational classification, if the wage rate paid to the employee after his promotion or demotion is the single rate or is a rate within the range established by the employer under this Order, or by or pursuant to a direction of the National Board, for such occupational classification.

Payments to Employees Other Than Wages

26. No employer shall make any gratuitous payment or other gift of any kind whatsoever having a pecuniary value, other than a monetary Christmas gift not in excess of twenty-five dollars, to any of his employees in any occupational classification for which he is required to establish, or to obtain a direction of the National Board establishing a single rate or range under this Order; provided that where an employer paid to his employees in any such occupational classification prior to November 15, 1941, or thereafter pursuant to any authorization of the National Board, a voluntary periodical bonus other than a cost-of-living bonus, he may continue or discontinue the payment of such bonus to such employees, but if he continues payment thereof, the yearly rate of payment shall not exceed the rate of payment established by practice of the year ending November 15, 1941, or by such authorization.

27. Where an employer purports to make any payment by way of loan to any of his employees in any occupational classification for which he is required to establish or to obtain a direction of the National Board establishing a single rate

or range under this Order, in addition to the wages paid to the employee under the contract of service between the employer and the employee,

- (a) if such payment is made periodically at the same time or times as wages are payable under the contract of service, or
- (b) if such payment is made otherwise than as provided in paragraph (a) of this section, unless it is proved that such payment was made in good faith as a loan which it is intended at the time of the making of the payment by both the employer and the employee will in fact be required to be repaid in full by the employee to the employer.

such payment shall, for the purpose of this Order or any proceedings taken pursuant to this Order, be conclusively presumed to be a payment of wages.

Additional Powers of National Board

28. The National Board may, for the purpose of this Order, determine

- (a) the previous authorized single rate or the rates within the previous authorized range payable by an employer to his employees in an occupational classification;
- (b) the previous authorized bonus payable by an employer to his employee in an occupational classification;
- (c) the rate or range required to be established by the employer for an occupational classification of his employees in accordance with section 15 of this Order;
- (d) whether an alteration in a term of employment of an employee will directly or indirectly increase or decrease a rate or the rates within a range established by the employer under this Order for the occupational classification in which the employee is employed;
- (e) the occupational classification in which an employee should be classified;
- (f) in any case of doubt or dispute with regard to the rank of the employee, whether such employee is above the rank of foreman or comparable rank;
- (g) any other matter necessary to be determined for the making of any direction by the Board.

29. The National Board may, by order,

- (a) make such regulations as it deems necessary to give effect to the provisions of this Order;
- (b) require an employer to make returns or reports furnishing information with respect to the work or duties performed by or terms of employment or working conditions of his employees in any occupational classification, the single rate or range or the amount of any cost-of-living bonus paid to such employees at any time prior to, on or after November 15, 1941, or such other information in respect thereof as the National Board deems advisable;
- (c) exclude an employer from any of the provisions of this Order either in whole or in part or in respect of any employee or class of employees or in respect of any area designated by the National Board, if, in the opinion of the National Board, it is impracticable to administer any of

such provisions in respect thereof or in any other case, if, in the opinion of the Board it is in the public interest so to do and if the Wartime Prices and Trade Board concur.

30. (1) Where any power is conferred on the National Board under this Order to give any direction or order the power shall be construed as including a power exercisable in the like manner and subject to the like consent and conditions, if any, to rescind, revoke, amend or vary the direction or order.

(2) Any direction given by the National Board pursuant to this Order may be subject to such terms or conditions as the Board deems necessary to give effect to the purposes of this Order and may require the employer to give effect to such direction commencing with such date, either before or after the making thereof, as the Board, in its discretion, prescribes.

Directions Final and Conclusive in any Court

31. Any finding, direction or order given or made under the authority of this Order by the National Board, or by a Regional Board, until varied or revoked by the National Board on review or appeal, shall be final and conclusive for the purpose of any proceedings in any court taken pursuant to this Order and shall be accepted by and shall not be subject to review in such court.

Applications

32. Where it is provided in this Order that any direction or order may be given by the National Board an application may be made by an employer or by or on behalf of an employee for such direction or order.

OFFENCES AND PROCEEDINGS

33. (1) Every employer, or officer or agent thereof, who

- (a) causes a lockout of any of his employees, to deter or prevent any of his employees from making an application to a War Labour Board constituted under this Order; or who
- (b) contravenes or omits to comply with any of the provisions of this Order or of any direction or order made under the authority of this Order by a War Labour Board constituted under this Order,

shall be guilty of an offence and liable on summary conviction to a fine of not less than \$100 and not more than \$5000 or to imprisonment for a term of not less than one month nor more than one year or to both such fine and such imprisonment; and each payment of wages to an employee in contravention of any provision of this Order or of any direction or order made under the authority of this Order, shall constitute a separate offence under this section.

(2) In any prosecution under this Order the burden of proof that the payment by an employer of wages or any payment of any kind whatsoever to an employee is made in accordance with the provisions of this Order or a direction or order made under the authority of this Order by a War Labour Board constituted under this Order, or that any lockout caused by an employer was not caused to deter or prevent any of his employees from making application to a War Labour Board constituted under this Order, shall be upon the accused.

34. Every employer who discharges or threatens to discharge or who in any way discriminates against an employee who

- (a) has furnished information in support of any application or in any investigation made under the provisions of this Order; or who
- (b) has given any information to a War Labour Board constituted under this Order regarding the wages or rates payable to such employee or any other employee of his employer; or who
- (c) has initiated or taken part in any application made to any War Labour Board constituted under this Order,

shall be guilty of an offence and liable on summary conviction to a fine of not less than \$100 nor more than \$5000; provided that it shall be a good defence to any prosecution under this section if it is proved that the discharge or threat of discharge or of alleged discrimination against any employee was made or done in good faith and not by reason of any act or conduct of the employee described in paragraphs (a), (b) or (c) of this section.

35. (1) Every employee who strikes or takes part in any strike

- (a) to obtain an increase in a single rate or range established under this Order, or pursuant to any direction of a War Labour Board constituted under this Order, or
- (b) to obtain the alteration of a term of an employment which would, directly or indirectly, increase any such rate or range, or
- (c) for the purpose of obtaining any direction from or of influencing the decision of a War Labour Board constituted under this Order or in protest against or to obtain any alteration in any such direction

shall be guilty of an offence and liable upon summary conviction to a fine of not less than \$25 nor more than \$100 or to imprisonment for a term of not less than one month nor more than three months or to both such fine and such imprisonment in respect of each day or part of a day on which he is on or takes part in any strike, but no fine of more than \$1000 or imprisonment for a term of more than one year shall be imposed under this section.

(2) Where, in any prosecution of an employee under this section, it is proved that such employee went on or took part in any strike, the burden of proof that such strike was not in contravention of subsection (1) of this section shall be upon the employee, but this provision shall not deprive the employee of the benefit of any reasonable doubt which may exist after all the evidence has been put before the magistrate or justice by whom such prosecution is tried.

(3) The provisions of this section shall apply in respect of an employee who goes on or takes part in any strike, notwithstanding that an Industrial Disputes Inquiry Commission appointed under Order in Council, P.C. 4020, dated June 6, 1941, as amended, or a Board of Conciliation appointed under the Industrial Disputes Investigation Act, has been established to inquire into or to investigate or report on any dispute between an employee and his employer in connection therewith and whether or not such Commission or Board has made any report thereon.

36. (1) Any person who incites, encourages or aids any employer to do or to omit to do any act or thing in contravention of this Order or any employee to go on or to continue on strike in contravention of this Order shall be guilty of an offence and liable on summary conviction to a fine of not more than \$2,000 or to imprisonment for a term of not more than one year or to both such fine and such imprisonment.

(2) Where, in any prosecution of any person under this section, it is proved that such person incited, encouraged or aided any employee to go on or continue any strike, the burden of proof that such strike was not in contravention of this Order shall be upon the accused, but this provision shall not deprive the accused of the benefit of any reasonable doubt which may exist after all the evidence has been put before the magistrate or justice by whom such prosecution is tried.

37. No prosecution shall be commenced in respect of any offence or offences under this Order or in respect of any offence or offences committed under the Wartime Wages and Cost of Living Bonus Order (Order in Council, P.C. 8253, of October 24, 1941), or the Wartime Wages Control Order, except with the consent in writing of the Minister of Labour and such consent shall be sufficient if it purports to be signed by the Minister of Labour and if the name of the accused is set out therein and if it indicates that the Minister of Labour has consented to the prosecution of the said person under this Order or under the said Orders for an offence or offences.

38. Any document purporting to contain or to be a copy of any by-law, direction or order of the National Board, or of any Regional Board, and purporting to be signed by the Chairman of any such Board, or by the Chief Executive Officer or Secretary of the National Board, or Chief Executive Officer of a Regional Board, shall in any proceedings under this Order be evidence of the by-law, direction or order therein contained or of which it purports to be a copy.

39. The Minister of National Revenue shall, pursuant to section 8 (b) of the Excess Profits Tax Act and subsection (2) of section 6 of the Income War Tax Act, disallow as an abnormal expense the amount of any wages found by him to have been paid, or certified to him by the National Board as having been paid, in contravention of any of the provisions of this Order or of the Wartime Wages Control Order.

40. (1) Where a person has entered into a munitions contract which provides, in effect, that such person shall be paid the cost of carrying out the contract or any part thereof with or without a profit or fee, or that the prices specified in the contract may be adjusted or reduced to an amount which represents the cost of the services to be carried out or rendered under the contract plus a fair and reasonable profit, if such person makes any payment of wages to any of his employees engaged in carrying out the work under such contract at a rate in excess of the single rate or range established under this Order for the occupational classifications in which such employees are employed, such person shall not be entitled under the contract to a payment in respect of the amount of increase in cost occasioned by reason of such payment and the amount of such increase shall not be deemed to constitute part of the cost of the contract or in any way be taken into consideration in

calculating such cost or the profit or fee, if any, to be paid to such person under the contract.

(2) "Munitions Contract" in this section has the same meaning as in section 13 of the Department of Munitions and Supply Act, as amended, and this section shall be read and construed as one with such section.

41. This Order shall have full force and effect notwithstanding any Dominion or provincial statute or law.

SCHEDULE A

RULES FOR ESTABLISHMENT OF RATES OR RANGES OF RATES

1. In these rules unless the context otherwise requires words and expressions have the same meaning as in Part II of the Order and a reference to a rule by number means such rule in this Schedule.

ESTABLISHMENT OF WAGE RATES

Time Rates

Single Time Rates

2. (1) Where there is a previous authorized single time rate payable for an occupational classification, the employer shall establish a single time rate for the classification in the place of such rate by adding to the previous authorized single rate,

- (a) if it is an hourly rate—the amount arrived at by dividing the amount of previous authorized bonus by the number of normal working hours in each week;
- (b) if it is a daily rate—the proportionate daily amount of the previous authorized bonus;
- (c) if it is a weekly rate—the amount of the previous authorized bonus;
- (d) if it is a monthly rate—the amount arrived at by multiplying the previous authorized bonus by four and one-third;

(2) A rate established in accordance with paragraph (1) of this rule shall be established at the nearest cent unless by established practice the employer's wage rates are fixed at the nearest half-cent in which case it shall be established at the nearest half-cent.

Ranges of Time Rates

3. Where there is a previous authorized range of time rates for any occupational classification, the employer shall establish a range of time rates for the classification in the place of such range, by adding to the highest and the lowest rate in the previous authorized range, the amount which would be added to each such rate under rule 2 if each such rate were a single time rate.

Authorized Bonuses in Different Amounts

4. Where an employer pays previous authorized bonuses of different amounts to employees in any one occupational classification

- (a) if the previous authorized rate for the classification is a single time rate—the employer shall establish a range of time rates for the classification in the place of

such single rate, the lowest rate in the range to be established by adding the lowest amount of previous authorized bonus to the previous authorized single rate and the highest rate in the range to be established by adding the highest amount of previous authorized bonus to the previous authorized single rate;

- (b) if there is a previous authorized range of time rates—the employer shall establish a range of time rates for the classification in the place of such range, the lowest rate of the range to be established by adding the lowest authorized bonus to the lowest rate in the previous authorized range and the highest rate in the range to be established by adding the highest authorized bonus to the highest rate in the previous authorized range in the manner prescribed in rule 2 as if each such rate were a single time rate.

Incentive Rates

5. Where there is a previous authorized single incentive rate or a previous authorized range of incentive rates for an occupational classification the employer shall establish a single incentive rate or range of incentive rates for the classification by incorporating into the previous authorized single rate or rates in the previous authorized range the previous authorized bonus in such manner as will

- (a) result in the employees therein continuing to receive as wages for equal service performed during normal working hours substantially the same amount of compensation as they would have received if the payment to them of the previous authorized rate or range and previous authorized bonus had been continued, and
- (b) not result in an appreciable increase in the employer's labour cost of production per unit represented by payment of the previous authorized rate or range and the previous authorized bonus to employees therein.

Combined Rates

6. Where there is a previous authorized single incentive rate or range of incentive rates and a previous authorized single time rate or range of time rates for any occupational classification

- (a) where the said rates or ranges are payable in the alternative to employees in the classification and are not payable simultaneously in respect of the same work done, the employer shall establish rates or ranges for the classification in the place of such rates or ranges by incorporating the previous authorized bonus into each such rate or the rates in each such range in accordance with the foregoing rules as if such rate or range were a separate rate or range to which the relevant foregoing rules were applicable,
- (b) in any case other than that set out in paragraph (a) the employer shall establish rates or ranges in the place of such rates or ranges in accordance with rule 5 as if it was applicable in respect of both such rates or ranges.

Manpower

Progress of Compulsory Employment Transfer Program

Numbers Transferred to More Essential Employment—New Order Broadening Scope of Program—Seventh Transfer Order Issued —Medical Examinations of Men Claiming Physical Unfitness

RECENT developments in the compulsory employment transfer program of the Department of Labour have included:

- (1) Passage of an order in council broadening the scope of the transfer regulations.
- (2) Issuance of the seventh compulsory transfer order.
- (3) Provision that men claiming physical unfitness for transfer (or for remaining in jobs in which they are "frozen") may be directed to report for a medical examination.

Number Transferred to More Essential Employment

A statement has been issued by the Department of Labour as to the number of men dealt with under transfer orders numbers one to six. The figures refer to transfers up to November 16, by which date 14,810 men had been moved to more essential employment.

As of the same date, 15,896 men had been granted permits to return indefinitely to their previous employment, after consideration of the applicant's present employment, health and age.

The cases of 21,317 men were being gone into further, with a view to their transfer to more essential work. These men include some cases of pending appeals against directions to accept transfer; some for whom higher priority jobs cannot be found in their own localities, and for whom transfers to other districts have to be arranged; some awaiting further word as to their status under the military call-up, and others who have to be fitted into employment vacancies of particular types.

Of the total of 90,685 men registered to November 16 under the compulsory orders, 2,310 were returned soldiers who are not regarded as subject to transfer under the orders issued so far.

During the period May to November, 25,872 men were granted temporary permits to return to previous employment, after consideration of their domestic circumstances. 5,824 men have been permitted to remain at their jobs for reasons of health. 1,200 men registered under the orders have been reported as having joined the armed forces, while 3,319, very largely students returning to school, have left the employment field.

LABOUR TRANSFERS UNDER COMPULSORY EMPLOYMENT ORDERS 1-6

Number interviewed	90,685
Directed to more essential employment..... (agriculture; coal and other mining; lumbering and logging; other high priority industry)	14,810
Cases being studied with a view to transfer.....	21,317
Returned soldiers not subject to transfer.....	2,310
Granted permits to remain temporarily in present employment	
Married persons or single with dependents.....	25,872
For reasons of health.....	5,824
Granted permits to remain indefinitely in present employment	
For reasons of health, age or present employment.....	15,896
Number joining armed forces since registration.....	1,200
Number ceasing employment..... (largely students returning to school)	3,319
Refusing direction and referred to Alternative Service Officer.....	137

These transfers were apart from ex-coal miners returned to the mines under separate orders, nor do the figures include any men registered under the seventh compulsory employment transfer order described below.

Compliance with Orders

Selective Service enforcement officers have ascertained from reports received by the Unemployment Insurance Commission from regional and district enforcement officers, as well as from insurance revenue inspectors, that, of the more than 8,000 cases interviewed with respect to compliance with compulsory employment transfer orders, almost all infractions as occurred were due to ignorance of the regulations, misunderstandings, and errors on the part of the local offices, etc.

It was indicated further, that where non-compliance was discovered, the workers in question were requested to register immediately with their nearest Employment and Selective Service Office. There was evidence that this had been done in practically every case. Each Regional Enforcement Officer has indicated that he does not consider any case of non-compliance brought to his attention to be serious enough to warrant prosecution.

Labour Transfer Program Broadened

An Order in Council passed on October 7 broadens the scope of the labour transfer program. Under the order (P.C. 7763) any person employed in any industry specified by the Director of National Selective Service may be directed to change his employment, either to another industry or within the same industry.

The Director of National Selective Service is empowered by the order to establish advisory committees in the industries he so specifies. Such committees would be representative of employers and employees and would be consulted regarding employment transfers.

Persons refusing direction under the order may be treated as conscientious objectors and required to perform Alternative Service.

In accordance with Section 209 of the Regulations, employers will receive notice in writing from Selective Service of the direction of an employee to other employment; men whose transfer would necessitate a change of residence will receive financial assistance; and once transferred they will not be allowed to terminate their new employment or be released by their employer within six months without a written permit from a Selective Service Officer.

The order amends National Selective Service Civilian Regulations (P.C. 246, Jan. 19,

1943, as amended) by adding a new section, immediately following 210C. The new section is as follows:—

210D. (1) A Selective Service Officer may, in accordance with directions and instructions issued by the Director, direct any person employed in any industry specified by the Director by notice in writing to enter other employment in another industry, or in the same industry, at the expiration of seven days after such notice.

(2) The provisions of Subsections (3), (5) and (6) of Section 209 of these Regulations shall apply mutatis mutandis in respect of any person directed to accept employment pursuant to Subsection (1) of this section.

(3) If any person refuses to comply with an order of a Selective Service Officer made under Subsection (1) of this section, the Selective Service Officer shall forward the name and address of such person to the Alternative Service Officer as defined in Section 250 of these Regulations and such person shall be deemed to be a person to whom Part IIA of these Regulations applies and may be required to perform Alternative Service within the meaning of the said Part IIA in like manner as any other person for whom Alternative Service may be prescribed under the said Part IIA; provided, however, that the provisions of Section 252 shall not be applicable to such person.

(4) The Director may establish an Advisory Committee representative of employers and employees of any industry specified pursuant to Subsection (1), and, where such a committee has been established for an industry, a Selective Service Officer shall, in accordance with directions and instructions issued by the Director, consult the committee before transferring employees engaged in the said industry to other employment within or outside of that industry.

Seventh Compulsory Transfer Order

Compulsory Employment Transfer Order No. 7 was announced by the Minister of Labour, Honourable Humphrey Mitchell, on November 15. The Order applies to the following types of employment.

1. The underwriting, selling, broking or administering of policies of Insurance of any and every kind, including but not restricted to life, fire, accident, sickness, automobile, marine and general insurance.

2. (a) Short term credit companies including but not restricted to establishments engaged in sales financing, industrial credit, money lending and pawnbroking;

(b) The managing or supervising of the investment of bonds, stocks and securities, including establishments engaged in investment trust and investment advising

(c) Trust Companies mortgage companies; establishments engaged in investment and loan business, including bond houses, financial agencies, stock exchanges and grain exchanges.

3. Real Estate (finance and operation).

4. Travel agencies.

5. (a) Year-round hotels (employees of year-round hotels in the following occupations are

excepted from the requirements of this Order:—skilled mechanical maintenance men, stationary engineers, chief chef, laundry washmen and extractor operators, engineer-firemen and hotel manager);

(b) Seasonal hotels; rooming and boarding houses; auto courts and tourist camps; organization hotels and lodging houses.

6. The manufacturing of millinery, bedspreads, trimmings and embroideries.

7. The manufacturing of academic caps and gowns, vestments, theatrical costumes, commercial uniforms.

8. Establishments primarily engaged in washing and polishing automobiles.

No employer engaged in any of the above industries, activities, or occupations may retain in employment after December 1, 1943, any male person who has attained or who later attains his sixteenth birthday and who has not attained his forty-first birthday, unless such person has presented to the employer a permit in prescribed form issued by a Selective Service Officer.

The Order which was issued under National Selective Service Civilian Regulations applies to both married and single men in the age groups and employments specified. The men affected were required to report by December 1 to the nearest Employment and Selective Service Office; men living too far away could apply in writing.

Previous occupations and industries designated under compulsory transfer orders were listed in the *LABOUR GAZETTE* for September, page 1211.

Medical Examinations of Persons Subject to Job Control

A person who is "frozen" in his present employment, and claims that he is physically unfit for his work, may be directed by a Selective Service Officer to report for medical examination at a specified time and place, according to an Order in Council passed on

November 13. The order also applies to persons directed to transfer to other employment who claim physical unfitness. Transportation expenses may be provided.

The Order, P.C. 8746, adds a new section to National Selective Service Civilian Regulations, as follows:—

211A (1) A Selective Service Officer may at any time by order in writing, direct any person to whom Part II of these Regulations applies and who claims that he is physically unfit to continue in his present employment, or to take employment to which he has been directed pursuant to these Regulations, to report for medical examination at such time and place as may be indicated in such order;

(2) A Selective Service Officer may in accordance with directions and instructions issued by the Director advance such person an amount not exceeding his necessary travelling expenses, including meals and lodging, from his place of residence to the place of examination and return.

Position of Registered Nurses Under Employment Regulations

By virtue of Section 200 (1) (b) (vi) of the National Selective Service Civilian Regulations, registered nurses, persons undergoing training to become nurses and practical nurses in private homes, have been exempt from the provisions of Part II of the Regulations. As a result, a registered nurse, regardless of the nature of her employment, was not required to give notice of separation, nor did she require a permit to seek and enter any employment.

This part of the Regulations has now been amended by P.C. 8309, October 26. Henceforth a registered nurse is to be exempt from the provisions of Part II only while she is employed as a registered nurse.

P.C. 9236, December 2, amends National Selective Service Civilian Regulations by making changes in references in certain sections of the Regulations, necessitated by recent amendments.

Advisory Committee on Teaching Profession

HON. Humphrey Mitchell, Minister of Labour, announced on November 16 that he had set up a committee under National Selective Service Civilian Regulations, to advise on the effective use of the services of school teachers during the war.

The committee was established after consultation with the Canadian Teachers Federation, and consists of six members. Arthur MacNamara, Director of National Selective Service, will be chairman of the committee. Miss Beryl Truax of Montreal, President, and Dr. C. N. Crutchfield of Shawinigan Falls, Que., Secretary-Treasurer of the Teachers' Federation, will both serve on the

committee. The other three members, selected in consultation with the Federation, are R. E. Shaul of Edmonton; O. V. B. Miller of Montreal; and Frank Patten of Ottawa.

Threatened shortages of school teachers led to regulations under National Selective Service (L.G., July 1943, p. 903) requiring that teachers secure special Selective Service permits before leaving the profession. The committee now appointed will be available for consultation in regard to problems which may arise in connection with the shortage of teachers, and the application of the Selective Service Regulations.

Soldier-Workers Assigned to Relieve Manpower Shortages

Undertake Employment in Railway Work, Woods and Lumbering Operations—Payments Authorized to Unemployed Soldier Miners

MEMBERS of the armed forces have been made available to help meet manpower shortages in two additional important types of civilian work, under recent orders in council. Soldiers with experience in coal mining had already been encouraged to accept special leave and undertake this essential activity; while during the summer a substantial number of members of the forces were assigned to farm duty. The present orders apply to woods and lumbering operations, and maintenance work on railways.

Maintenance Work on Railways

Provision for the use of low category personnel from Canada's home defence forces for the "development, operation and maintenance" of Canadian railways was made in a recent order in council (P.C. 8217, October 26).

This action has been taken to "alleviate the acute manpower shortage confronting this industry with its unprecedented volume of wartime and civilian traffic", the order states.

Personnel made available for this work will be deemed to be performing military service for the purpose of the Pension Act, the National Resources Mobilization Act, the Militia Act, the War Measures Act and all regulations and orders made thereunder. They will thus continue to be subject to military discipline. As in the case of soldiers on farm duty (L.G., Aug., 1943, p. 1075) men doing railway work will continue to receive their regular pay and allowances, but on completion of their assignment they will receive such additional sums as they may have earned in excess of the amount already paid them. The financial arrangements are being made by the Department of Labour in conjunction with the Department of Finance.

Those subject to the order are "R" recruits and members of the home defence forces of the Canadian Army called up under the National Resources Mobilization Act, 1940, and having a medical grading lower than Pulhems profile 2222222.

Woods and Lumbering Operations

A number of units and formations of the Canadian Forestry Corps have for some time been engaged in lumbering operations in the United Kingdom. After consultation with the Minister of Supply of the United Kingdom, through the Canadian Department of Munitions and Supply, it was decided that the services of certain of these men could be

better utilized if they were returned to Canada and employed in woods or lumbering operations in this country or in other operations relating to the procuring, production, manufacture or delivery of wood or wood products destined for the United Kingdom.

Accordingly an order in council was passed on October 22 (P.C. 8197) authorizing the use of members of the Canadian Army in work of this kind. Such men will remain subject to military discipline. The place of employment and the nature of the work of men who are granted leave or ordered to undertake such duties is to be determined by the Department of National Defence in consultation with the Departments of Labour and of Munitions and Supply. Financial arrangements are under the direction of the Departments of Labour and National Defence.

Numbers of members of the Forestry Corps have already returned to Canada to take part in this work which is described in the order as "essential for the efficient prosecution of the war." They have been allocated mainly to work in British Columbia and in the Maritimes.

Custodial Duties in Penitentiaries

An order in council of November 30 (P.C. 9041, passed under the authority of the National Resources Mobilization Act, 1940) gives authority to call up men for custodial duties in penitentiaries.

It had been reported to the Minister of Labour that the penitentiaries were having difficulties in securing sufficient men for service as guards. Under this order in council, any man who is not fit for military training but is fit for duty at a penitentiary, may be required to report under National Selective Service Mobilization Regulations, if in an age group already designated for military call-up purposes. The man will then be directed to accept the employment at the penitentiary.

Men so called up will not become members of the military forces, but will be employees of the Department of Justice, through the Penitentiaries Branch.

Payments to Unemployed Soldier Miners

A national emergency having been proclaimed in Canada's coal industry, many members of the armed forces have voluntarily returned to coal mining for the duration of the emergency, on special leave without pay. Since conditions may arise where a soldier

miner's services cannot be utilized temporarily in coal mining through no fault of his own, an order in council has been passed authorizing payments in such cases. Payments may be made retroactive so as to cover unemployment that occurred prior to the passing of the order, and are chargeable to the War Appropriation.

Passed on November 6, the order (P.C. 8561) amends National Selective Service Civilian Regulations by adding a new paragraph as follows:

Sec. 210A (7) (ii). If, for any reason, through no fault of his own, the services of a coal mine worker who is a member of His Majesty's Armed Forces on leave without pay, cannot for a temporary period be utilized in coal mining, a Selective Service Officer may pay such coal mine worker from and after the date of the cessation of his employment in a coal mine and until he again enters employment to which he is referred by a Selective Service Officer, at the rate of forty cents per hour on the basis of an eight-hour day and forty-eight hour week, and such payments may be made in respect of a cessation of employment which occurred prior to the date of this Order or occurs after the date of this Order.

Selective Service Appointments

A NUMBER of changes and new appointments in the Directorate of National Selective Service were effected on November 18 under Order in Council P.C. 8896.

When the plan for the broadening and decentralizing of National Selective Service was approved by the Government in August, 1943 (L.G., Sept., 1943, p. 1214) it was anticipated that a judge would be appointed Vice-Chairman of the Administrative Board. It was found that members of the judiciary were reluctant to accept the position because of the fact that it was purely administrative; therefore the idea of appointing a judge was discarded.

Effective November 19, 1943, Mr. C. W. Foster, who was formerly Associate Director with supervision over essential civilian services, has been appointed Vice-Chairman of the Administrative Board.

Major J. B. Cowell, a mining engineer from Vancouver, has been appointed Regional Director of National Selective Service for the Pacific Region. Major Cowell until recently was Controller of Administration in the

Inspection Board of the United Kingdom and Canada.

Mr. Hector Dupuis of Montreal has been appointed Regional Director of National Selective Service for the Quebec Region, with headquarters at Montreal.

In the Mobilization Division, which has charge of calling up men for military service, Major-General Riley is transferring to Winnipeg and will exercise supervisory functions in connection with the mobilization work in the Western Region from Port Arthur, west. This plan has been developed because it is felt that there is a need for a Director in Western Canada in order that administrative matters can be dealt with immediately; this appointment follows out the general plan of decentralization. Major-General Riley becomes Regional Associate Director, and will have his headquarters at Winnipeg.

The post held up to date by Major-General Riley, that of Director in Charge of Mobilization, is being taken on by Mr. S. H. McLaren who has been chief assistant in the work since the Labour Department took it over a year ago.

Canada's Farm Labour Program

Contribution of Plan to Food Production Reviewed in Address by A. MacNamara, Deputy Minister of Labour, at Dominion-Provincial Conference

AT the Dominion-Provincial Agricultural Conference, held in Ottawa commencing December 6, Mr. A. MacNamara, Deputy Minister of Labour and Director of National Selective Service, addressed the representatives on the progress of the farm labour program. The text of his address is as follows:—

Mr. Chairman, Honourable Minister and Gentlemen:

I wish to thank you most sincerely for the kind invitation to appear at this conference. This is the second time. Last year you asked me to talk to you on farm labour and again this year.

At the time I addressed you last year our plans were in the embryo stage. It was clear to me, however, that a great deal had to be done for the farmer in 1943 if he was expected to keep up his production and I told you

quite frankly that I felt the farmer had every right to demand the necessary manpower.

Dominion-Provincial Co-operation

I think, Mr. Chairman, my report to you this year will be more satisfactory. Things have been done about farm labour in 1943. A comprehensive national program has been developed.

Good results have been secured. Before elaborating on the measures which have been taken, I wish to make one point abundantly clear. I may use the pronouns "we" "us" and "our", during the course of my remarks. When I do, I am using them truly in the plural sense. When I say "we", or talk about "us" I refer to the joint effort of the Dominion Department of Labour, and every provincial Government in Canada.

The Dominion Department of Agriculture has also taken an active interest in our program. Doctor Barton is a valuable member of the National Selective Service Advisory Committee. Mr. P. D. MacArthur, representing the farm organizations, is also a member, and has helped us to keep our feet on the ground.

We have tackled this farm labour job together all over the country. Last Spring we invited every province to join forces with us in an attack on the farm labour problem. We did this, knowing that the farm help shortage would not be met by merely placing additional workers on farms, because the additional workers just did not exist. We realized that the main solution must come from more intensive local community organization and action. Our Employment Offices, located, for the most part, in the larger centres, were not in a position to take on this extra job alone, in addition to the increasingly difficult industrial employment problems which were daily pressing themselves upon them. We knew that the Provincial Governments with their trained agricultural staffs in the field, were logical partners. They have the facilities for doing most of the necessary organizational work in the rural areas. I am happy to say that all of them accepted our invitation.

We are proud of our farm labour agreements. Out of these agreements have developed extensive farm labour programs in every province. When you hear of "Emergency Farm Labour Service" in one province, a "Farm Labour Bureau" in another, a "Farm Help Service" or a "Farm Service Force" somewhere else, they represent the farm labour agreements in action. I am pleased to see that several of the Provincial Ministers who signed the farm labour agreements on behalf of their respective provinces are here to-day. I expect that on Wednesday

most of the others will be here, because, with the exception of two provinces, all Provincial Ministers signing the agreements were the Ministers of Agriculture. For us, the partnerships have been most pleasant associations. We have reason to believe that our partners feel the same way.

Tribute to the Effort of Farm People

In discussing some of the measures taken to ease the farm help shortage, we want to do so, Mr. Chairman, with a genuine sense of humility. We are glad that what has been done has helped. It is extremely gratifying to hear from all parts of Canada that the handling of the farm labour situation has met with general satisfaction. We are well aware, however, that the shortage of help on farms has been largely met by the farmers themselves with their wives and their children. I say, advisedly, that the shortage of help has been met, because the farm production record shows that to be true. We know that the extra farm help, which our plans have provided falls far short of replacing the total number of men and women who have left the farms since the outbreak of war. It is estimated that 400,000 men and, probably, at least 100,000 women, have left the farms since 1939. Tens and tens of thousands of young farmers are serving gallantly, and with honour, on the battle fronts in all theatres of war. Thousands of others went into the munitions factories during the first two years of the war, when it was so vital to the continued existence of our Allies, and ourselves, that fighting weapons be supplied in ever increasing volume.

What have those left on the farms done while their fathers, their sons and daughters, their brothers and sisters have left by the thousands? You know better than I do, what they have done. They have pushed the production of urgently needed food products steadily upward with each year of the war. We have witnessed these farm people, fewer in number, doing more work on the farms than has ever been done in the history of the country. They are milking more cows, feeding more pigs, raising more beef, producing more poultry and eggs, planting more crops. This great result has been achieved mainly by elderly men and women and young boys and girls working much harder than they should have to work. Thousands of men and women have come back out of well-earned retirement to help fight Canada's war on the farm front. Older men and women realize this extra strain will probably impair their health. It may shorten their lives, but they have concluded that, in a total war, casualties are inevitable in all age brackets and all fronts.

I think my own Minister put it pretty well in his manpower speech in the House last Spring, when he said that, when the history of Canada's effort in this war is written, the chapter describing what was done by our farmers will be glorious pages in that book.

What this has meant to Britain, only one of our Allies, was set forth clearly the other day by the Right Honourable Malcolm MacDonald, when he reported that, since the beginning of the war, Canada has sent to Britain 2,100,000,000 pounds of bacon and pork products; 460,000,000 pounds of cheese; 110,000,000 tins of evaporated milk and about 100,000,000 dozens of eggs. I quote the following excerpt from his remarks:—

"Without the help of Canadian farmers, the war would have been lost two years ago. To survive the full fury of the early dark days of the war, Britain had to be in possession of, in addition to a fearless spirit and a strong right arm, sufficient food to keep body and soul together until the forces of freedom all around the world came to her rescue. That food was provided in large measure by Canadian farmers."

I have made these few observations, Mr. Chairman, to make clear that we are under no illusion as to the source of the major contribution in meeting the labour shortage on farms. It has been the farm people themselves straining a greater and greater effort as their numbers became fewer and fewer. Realizing this, it is even more satisfying that our efforts have been productive of some results and have provided some help for them.

Stabilization of Farm Employment by Selective Service Regulations

I referred a moment ago to the exodus of men and women from the farms. Obviously, something had to be done to check this drain when farm production needed not only to be maintained, but increased to higher and higher levels. We are not going to pretend that the application of our Selective Service Regulations for stabilizing employment on farms has entirely prevented people leaving agriculture. We do know that, in the main, this drain has been checked, and we can say, without fear of contradiction, that if these regulations had not been in effect and had not been administered as they have been by our Employment Offices, there would be considerably fewer people on our farms to-day than is the case.

Mobilization Regulations

Then there are our Mobilization Regulations as they pertain to farm workers. With the introduction of National Selective Service in 1942, including regulations for stabilizing manpower on farms, the Mobilization Regulations were amended. The main amendment included a special provision for postponement of farm workers, to make more certain that

men essential in agriculture secured postponement when they made application.

One reason for granting a large degree of autonomy to the individual Mobilization Boards for making decisions regarding postponements, was to get results with the minimum of delay in the calling of men for military training. Naturally, with thirteen Boards across the country, we could not expect absolute uniformity in the interpretation and administration of the regulations. We did have complaints from agriculture.

In February last, we sent out an interpretative letter to the Chairmen of all the Boards. This letter dealt, exclusively, with the subject of farm postponement. We stressed the difficulties of the farm labour problem, emphasized the need for keeping essential agricultural workers on the farms and referred to the special provisions in the regulations applying to men employed in agriculture. Since then a great improvement has resulted, and I believe there is now general satisfaction in all provinces with the consideration agriculture is receiving by the different Boards.

This Summer, meetings were held with most of the Mobilization Boards. Federal and provincial officials interested in the farm labour programs attended. These meetings have proved to be most beneficial and have resulted in much closer co-ordination of effort.

I wish to state here, publicly, that I am most appreciative of the co-operative attitude which the Chairmen and members of the different Mobilization Boards have shown, not only to the farm problem, but to all other labour shortages.

Dominion-Provincial Organization

I have referred to our farm labour agreements with the provinces. I have mentioned that out of these agreements have developed extensive programs to mobilize transport and place farm labour. In each province we have a Dominion-Provincial Committee on Farm Labour. On this committee, in most provinces, is the Provincial Minister, who signed the agreement, his Deputy Minister, other provincial officials and regional and local officials of our Employment Service. Several of the committees have farmer representatives. These farm labour committees decide on the kind of program which would meet best the conditions prevailing in their particular province. A provincial official was then appointed to develop and direct the organization to carry out the program. These men are the Directors of our Dominion-Provincial Farm Labour Program. I am pleased that they are here to-day. To them, and to members of the provincial field staffs, I want to express my sincere thanks for the splendid effort they have made.

Role of Employment Offices

Our Employment Offices have figured prominently in the joint efforts. To effect the best possible co-ordination of our offices in the joint program, we appointed agricultural employment advisers in the different regions. I am glad that they are also here for our conference, and I welcome them most cordially to the staff of our Employment Service. Their job is a necessary one, and from reports I get, it has been well done. As these men gain more experience in the field of farm labour, I am sure that our Employment Service will become increasingly effective in dealing with agricultural labour problems.

Conscientious Objectors

Early this Spring we obtained approval of an Order in Council changing the whole basis for employment of Conscientious Objectors, postponed as such by Mobilization Boards. It became obvious that these men should be engaged in more important work than that which they were doing in Alternative Service Camps. The Order in Council provided for this and singled out agriculture for special consideration. That was logical when most of them were from farms. I think you will agree that special consideration has been given agriculture, when out of a total of slightly more than 7,000 Conscientious Objectors, who have received postponement by the Boards as Conscientious Objectors, over 5,600 work on farms. An effort has been made to place these men on high productive farms requiring help the year 'round.

Organized Transfers of Farm Labour

I believe one of the most valuable features in our farm labour agreements has been the paying of transportation of workers when placed on farms. This has greatly increased the mobility of farm labour. Transportation costs for moving people within a province have been shared equally by the province concerned and the Dominion. Where movement was across provincial boundaries, the Labour Department paid the entire cost. This has enabled us to organize three fairly large excursions of farm workers. Over two hundred girls from Alberta went out to British Columbia early in the Summer for berry picking in the Fraser Valley. I gather that our farm labour officials in British Columbia have an unusually keen eye for this kind of labour. Apparently, the Alberta girls must have been required to meet a high standard of type and appearance, because I am informed that our Regional Agricultural Employment Adviser never missed meeting a train while they were coming in to Vancouver.

We are particularly proud of our excursion early last July of some 750 Saskatchewan farmers to Ontario, because this made history. We have been accustomed to annual farm excursions to the west for the grain harvest, but this year is the first time to my knowledge when it has been put in reverse. The Saskatchewan men stayed down here for about two months for haying and early harvest returning home just in time to take off their own crops. This additional source of experienced help did much to relieve a very difficult problem in Ontario, where farm operations generally were so far behind because of weather conditions.

Ontario farmers expressed their gratitude to the west for this assistance in the most eloquent way. That is by actions; not merely by words. They responded magnificently to our appeal this Fall for men to go west to help harvest the prairie grain crop. More than 3,700 experienced men made the trip. I think most of you men are familiar with the success of this excursion. We have heard from more than one source that never before has such a good class of men gone west for harvest and given such satisfactory service at the job. Our files in the Department of Labour are not exactly congested, Mr. Chairman, with letters of a complimentary nature. Because of this, I can assure you that the numerous letters we have received during the past few weeks, commenting on the handling of the farm labour situation, have been a great source of encouragement to us, and have been gratefully received.

Now we do know that a favourable harvest season on the prairies this year aided our efforts. As long, however, as people look upon the labour supplied as the major factor in getting the job done in record time, we are quite content that their minds should not be changed. After all, we took a lot of abuse last Spring for delayed farming operations in Eastern Canada, when the weather was really mostly responsible.

Other Sources of Farm Labour

You will have an opportunity this evening to hear more about other sources of farm help which have been developed, such as the help which has been received from students and townspeople, women, treaty Indians from the Reserves, prisoners of war and internees.

Assistance From the Armed Forces

I do want to say a word about the help we got this year from the Armed Services. This was very substantial. Many of you may be surprised to learn that, during September and October, close to 12,000 men representing all three branches of the Services were doing

farm work. The big majority of these were out on compassionate farm leave, working on their home farms. We did, however, have 2,500 soldiers out on our farm duty plan. Under this plan men were not given leave, but were detailed for farm work as part of military duty. This was a new project. We did not know how it would work out. We had some apprehension about the quality of work which might be done by soldiers who were sent out to farm work. Reports from all over the country indicated much greater satisfaction by farmers with this plan than we anticipated. There were very few cases where the men did not do a competent and conscientious job. Of course, there was the odd instance where a little trouble occurred. One of our provincial farm labour directors tells us that he had one man on four different farms in as many days. He was chased off the third farm with a pitch fork. How he spent his time from dusk until dawn during these four days, had better not be described at this meeting.

Soldiers on farm duty harvested grain on the Prairies, put up hay in British Columbia, picked apples, other fruits and vegetables in Ontario, Quebec, and Nova Scotia and potatoes in New Brunswick and Prince Edward Island. During October, in addition to 550 soldiers, there were over 500 Navy men picking apples in the Annapolis Valley. This special arrangement with the Navy was largely handled by the Director of the Farm Labour Program in Nova Scotia.

Soldiers under the farm duty plan were moved from Ontario and Quebec to the Prairies and the Maritimes and from the West Coast as far east as Manitoba. Transportation costs were paid under the same terms as applied for other farm help. When the movement was inter-provincial, the Department of Labour paid the bill, and for moving the soldiers around within a province, the expense was shared equally by the Dominion and the province. Transportation costs covering the first 500 miles were paid by the Department of Labour as assistance to men from the Army granted compassionate farm leave to return to their own farms. Before leaving for farm work, soldiers, whether on farm duty or compassionate leave, were issued with a suit of work overalls. The expense for these is charged to the Department of Labour.

You will hear more about the help from the Armed Forces as it is to be discussed in more detail this evening. I do wish to say how much we are indebted for the splendid co-operation we have received from the Department of National Defence officials when working out all details.

We are in the midst of an intensive campaign to encourage farmers or farm workers,

who can leave their farms during the Winter without reducing dairy and livestock production, to accept work in other essential industries. The fundamental principle of our campaign is that farm workers needed on the farm during the Winter are not to leave. The place for them is on the farms. We are getting excellent help from the provinces in this campaign. The organizations developed to supply farm labour under our agreements are now helping to encourage farm labour, where it can be spared, and, on the advice of our Employment Service, directing the men recruited to specific jobs. Through this campaign we are sending men into the woods where vital work has to be done. From this source of labour we met, just in the nick of time, an urgent demand for extra help in the meat packing plants, which enabled them, during the last few weeks, to handle the heaviest hog runs on record. Demands of many of the base metal mines are being taken care of by this campaign. Many farm workers have been recruited for the coal mines. All will be required to return to agriculture next Spring. They are issued with temporary employment permits, which expire the end of March, to provide greater assurance that they will go back to the farms.

I have, Mr. Chairman, sketched rather hurriedly, an outline of the general organization which has been developed to meet this problem, and some of the things which have been done to provide additional help for the over-worked farm people.

Mr. Shaw has referred to our session this evening. We extend you all a cordial invitation to attend. On Thursday, we are continuing our farm labour session in order that Provincial Ministers and their Deputies can spend some time with us following the conclusion of this conference. Any of you who can find time to attend will be more than welcome.

I hope, sir, that this review of our farm labour activities will not suggest that we are satisfied that the problem has been solved. We know that it hasn't. We know that there are thousands of high producing dairy and livestock farms requiring permanent help. We consider this is the phase of the problem which must receive our most concentrated attention this Winter. We do feel, however, that from what has been done this season, your conference can plan a production program for 1944 without undue concern that a shortage of farm labour will be a serious limiting factor to attaining the desired production objectives. I want to thank you for permitting our men to sit in on some of your sessions. I am most grateful for this opportunity to review our farm labour program with you.

Industrial Welfare

Progress in Formation of Dominion-Provincial Wartime Day Nurseries

AS of November 18, 1943, 25 day nurseries, established under Dominion-Provincial agreements, had been approved by the Minister of Labour. These are all located in Ontario and Quebec. Of 19 nurseries approved in Ontario, 15 are operating and 4 are being made ready. The 6 nurseries in the province of Quebec are all located in the city of Montreal.

Recently an agreement was signed between the Dominion and the province of Alberta to cover the establishment of day nurseries for working mothers, but the actual establishment of nurseries had not yet been decided under this agreement.

The nurseries provide day care for children from 2 to 6 years of age, but in addition the agreements with the provinces provide care before and after school, as well as the noon

day meal, in the case of some projects. There are now operating 17 of these school day care projects, and 6 more have been approved and will be under way shortly.

The province of Ontario has further school and nursery projects under survey, some of which will undoubtedly receive Dominion approval shortly.

In commenting upon day nursery agreements being sponsored by the Dominion and the provinces, Mrs. Rex Eaton, Associate-Director of National Selective Service, said: "In all these projects emphasis is placed upon the nutrition and health of the children being cared for. The results we are obtaining in this regard are highly satisfactory—and I think the fact that we have had no complaints is a good indication that the work is going forward in splendid fashion."

Importance of Physical Examinations to Factory Health Program

THE importance of physical examinations of workers is emphasized in a report of the medical director of General Motors Corporation of the United States, a summary of which is published in the *Monthly News Bulletin*, issued by the Health League of Canada. The objectives of such examinations are enumerated as follows:

- (1) To safeguard the workmen against employment under harmful working conditions.
- (2) To assist them in the early discovery of preventable or remedial sickness.
- (3) To promote early contact for them with their own private physicians when treatment is indicated for conditions of non-occupational origin.
- (4) To obtain data and facts which will enable the employer or compensation authority to reach a just decision on claims of questionable origin.

The pre-employment examination is divided into two classes: (1) "before employment" by which prospective employees are examined before they are hired to ensure placement in suitable work which can be performed with safety; and (2) "on transfer", a supplemental examination received when workmen are transferred to jobs differing in nature and physical requirements from their original assignments.

The periodic health examinations:—These are subdivided in the Bulletin as follows: (1) "upon re-entrance"—in which workmen are examined or interviewed when they return to work after absence caused by sickness or injury; (2) "according to occupational exposures"—when workmen are engaged in harmful occupations; for this keener medical observation is desirable; (3) "to fix responsibility"—ailments are sometimes attributed by the employees to occupational conditions or accidental injuries and it is necessary "that the doctor be sufficiently thorough to permit a just decision as to responsibility"; (4) "for consultation purposes"—the advice of an industrial physician is often required to give treatment for personal illness or illness in their families; (5) "at least once a year"—seventy or eighty per cent of the employees are given the benefit of one or several examinations during the year, and the remaining 20 or 30 per cent who "escape" these benefits are called in for examination at the end of the "physical" year.

Complete copies of this report may be obtained from the Industrial Division of the Health League of Canada.

Rest Periods for Industrial Workers

REGULAR rest periods to reduce fatigue and increase production are becoming increasingly popular in industry and are being strongly recommended by the British Ministry of Labour and National Service and the Women's Bureau of the United States Department of Labour. They are particularly needed in wartime when hours are lengthened, lunch hours shortened, persons unaccustomed to factory work are employed, operations are speeded up and strain and tension increase. They have been found very beneficial where the work is monotonous, unpleasant, strenuous or requires close concentration. In many cases they have resulted in increased production and in almost all cases the morale and well-being of the workers have improved. However, the Women's Bureau warns that rest pauses are "no substitute for healthful working conditions" but are only one factor to be considered in combatting fatigue.

The information given below is drawn from a number of British and American studies on rest periods most of which were made before the war. While it is known that the practice of allowing rests has been greatly extended during the present war, little material is available to show the extent or the effects of such periods in war industries.

It is well known that all workers take unofficial rests during any work-spell. Such rests may occur while the worker is waiting for material or a tool-setter or they may merely be brief stops for conversation, a snack, a drink or a visit to the rest-room. The British Health of Munition Workers Committee observed during the last war that a typical group of women workers took about one hour's rest during a 10-hour working day, but the rests were taken in a most irregular manner and often at unsuitable times. The committee recommended organized rest periods which reduce time-wasting by allowing a set period for conversation, snacks, etc., and which can be taken at the moment when most needed.

Legal Requirement of Rests

Official rest periods were first granted to women workers but most authorities now agree that they are equally valuable for men in occupations where they have been found beneficial. If women and men are working together, the granting of pauses to women only may interrupt the smoothness of operations.

Where rest pauses are required by law, however, the stipulations usually apply only to women and young persons. In Great

Britain the Factories Act, 1937, provides that women and young persons must be granted a half-hour break for a meal or rest at the end of $4\frac{1}{2}$ hours of work but may continue for 5 hours if there is a 10-minute rest during the spell. The emergency orders issued during the war relaxing the hours' provisions of the Act usually repeat this stipulation regarding breaks although the order for the engineering industry permits a 6-hour spell if a 15-minute rest pause is granted. In Canada, Quebec requires factories which have been exempted from the provisions of the Industrial and Commercial Establishments Act prohibiting night work for women and young persons to grant two 10- or 15-minute rest pauses a day (L.G. July, 1943, p. 1035). In Manitoba, both male and female part-time workers in retail and wholesale stores (excluding department stores and mail order houses) and delivery services connected with them must be allowed a 15-minute rest period after three hours of work.

Industrial Practice

Intervals for rest are often granted voluntarily by employers. The practice is fairly common in Great Britain and is being more widely adopted on this side of the Atlantic. Rest periods are more frequently allowed for women than for men and are more common in plants where there are continuous processes, repetitive work or work-spells exceeding four hours.

A study conducted by the National Institute of Industrial Psychology in 1938 covering 1050 factories of all sizes scattered throughout Great Britain showed that over half were granting official rest pauses, one-third had no rest period and the rest permitted unofficial rests. In the United States, the Industrial Relations Section of Princeton University made a study in 1942 of approximately 120 war plants employing women. Only one-fifth of these plants were giving rest pauses (L.G., 1942, p. 739). Of 155 war plants where women were replacing men or doing men's work, which were surveyed in 1943 by the National Industrial Conference Board of New York, about one-half provided for rest pauses to women and 31 per cent to men. Quite a number of collective agreements signed recently in Canada in the aircraft, metal, leather, motor vehicle and other industries make provision for rest periods.

In all the above studies it was found that the usual period for rest was 10 minutes, but in a number of cases it was 15 or 5 minutes. The U.S. Women's Bureau recommends a 5

or 10-minute break in each four-hour spell. The Industrial Health Research Board of Great Britain which has made a number of experiments with rest pauses declared that the period should be long enough for recuperation from fatigue but not so long as to reduce the speed attained by practice. Towards the end of the day, longer pauses will be needed to overcome fatigue but a pause that is too long interferes with the rhythm of the work, makes it more difficult to start again and may reduce production. In all cases the length of the pause should be known to the workers so that they will be mentally prepared to start work at the end of the period. In plants which had only one break in a day, it was usually in the morning when spells were longer and food was needed to supplement inadequate breakfasts.

Mid-spell is the usual time for a rest period but experiments have shown that this is not always the best point. It should come when output has just reached its peak and before a decline sets in. This generally occurs about two or two and a half hours after the beginning of the spell but it is not the same for every occupation and every person. It is generally agreed, however, that even though different workers may reach a maximum fatigue point at different times, it is better to have a whole group rest at the same time so as not to lose the benefits of mass effort and relaxation.

In some repetitive and monotonous work such as handkerchief folding or ironing in laundries, labelling or parcelling operations, it has been found advisable to grant several short pauses instead of one long one in each spell. For example, when workers assembling bicycle chains in an English factory were given a five-minute rest every hour, their working day was reduced by seven per cent but their output increased 13 per cent. Shorter and more frequent pauses may also be necessary in operations such as chocolate-dipping where there is danger of the chocolate hardening if left too long. The staggering of rest-pauses is another solution of this difficulty.

Most writers stress the need for study of the work-curve in any operation to find "the optimum duration and incidence of rest-pauses" and to adapt them to the occupation and the worker.

Use of Rest Pauses

The manner of using rest periods varies. Over 80 per cent of the plants granting rest pauses covered by the survey of the National Institute of Industrial Psychology reported that food was eaten during the period. In many cases employers declared that the inter-

vals were introduced primarily to permit workers to supplement their inadequate breakfasts. In the United States and Canada the snack-pause is also common. A number of American firms organized exercises and games to occupy the break. In nearly all cases the pause afforded an opportunity for changing the position from standing to sitting or vice versa, for moving about and for conversation. While complete relaxation was recommended for those doing strenuous work, sedentary workers usually benefit from movement of some sort, but strenuous games or exercise have been found in some cases to induce fatigue rather than relieve it. An American plant observed that 20 of its best workers on monotonous sedentary tasks spent their rest periods in complete relaxation, and some slept. Other workers moved around or danced. Group singing or listening to music have been found beneficial.

Where possible the rest period should be spent outside the work-room so as to avoid spoilage of materials, the creation of litter and contact with dangerous machinery. However, in 60 per cent of the plants covered by the National Institute of Industrial Psychology survey, this rule was not followed due to lack of canteen and rest-room facilities. It should be noted that the Institute survey was made in 1938, and under war conditions the provision for lunch-rooms, canteens, etc., has been greatly extended. If these facilities are limited the rest pauses should be staggered. Where poisons are used in the industrial process, or dangerous gases or fumes are present, workers should never be permitted to take food in the work-room (this is usually prohibited by law), and they should if at all possible be provided with a place outside the work-room for relaxation. In many plants the rest pause affords an opportunity for free ventilation of the work-room.

Experience has shown that the value of the pauses is greatly increased if food is eaten. In many cases fatigue is merely hunger. This is more likely to be the case when there is an interval of five or six hours between meals due to long spells and added travelling time. In England the National Institute's survey showed that over 80 per cent of the workers brought their own food, but this situation has changed with the growth of industrial canteens during the war. Of the employers covered by the 1938 survey who provided food or drink, nearly one-half paid for the drinks and one-third for the food supplied. Many of the others sold it at cost and some provided heating facilities and crockery. By far the most popular drink was tea and food usually

consisted of bread or sandwiches, cakes and buns. In the United States, soft drinks, fruit and candy are often made available in traveling wagons or vending machines. In large plants special provision must be made to ensure that all workers are served promptly.

Effect of Rest Pauses

Experiments conducted by the Industrial Health Research Board have demonstrated that the introduction of rest pauses will result in an increase in production despite the loss in working time. The experiments were all confined to workers paid on a piece-work basis and engaged in monotonous, repetitive work such as labelling, parcelling, folding handkerchiefs, ironing, assembling bicycle chains, etc. Other experiments in other countries have shown similar results. For example, in Great Britain after the introduction of a 10-minute rest period in the morning, girls labelling small packages increased their production by 13 per cent, those sewing the uppers of shoes, by 11 per cent and those tying small packages, by 8 per cent. In a New England textile mill the granting of rest pauses resulted in a 20 per cent increase in production in the spinning department. The effect is most marked in operations where the worker rather than the machine sets the pace. In hemstitching handkerchiefs, a semi-mechanical operation, the British Industrial Health Research Board observed that a decline in production followed the introduction of a 10-minute rest pause. The effect of rest periods varies among individuals. The increase in working speed of girls folding handkerchiefs after the introduction of a rest ranged from 2.7 per cent to 6.5 per cent.

Other effects noted were an improvement in the quality of the work and a reduction in accidents. The effects may not be immediately evident. Dr. H. M. Vernon for the British Industrial Health Research Board observed that girls assembling bicycle chains took six months to become adjusted to the rest pauses and output did not rise appreciably until after this period.

The U.S. Women's Bureau considers that "the more tiring and monotonous the work, the greater the increase resulting from a rest". The National Industrial Conference Board declared that

Their desirability and their practical utility are largely determined by the particular type

of work, the composition of the work force, the length of the work spell, and the special operating conditions in the individual establishment.

It recommended, however, that even if no increase in output was evident, rest periods should be retained because of their effect on health, welfare and morale. In three factories in or near London it was found that although hours of work were the same, labour turnover on comparable operations was 21 per cent in the factory which gave two 15-minute breaks with tea, 52 per cent in the one which allowed a three-minute pause with tea and 94 per cent in the factory which granted no rest pause. While there are other factors involved, it is recognized that rest pauses have an important psychological effect. A 4½ or 5-hour spell does not appear nearly so formidable if it is known that a break is coming at the end of two or two and a half hours. An American firm reported that it reduced from 250 to 5 per cent the annual turnover in a mule-spinning room by introducing four 10-minute rest periods a day which gave the workers opportunity for social intercourse.

Some employers complain that rest periods are abused, that they interfere with smoothness of operation and break the swing of the work. Others consider that there are sufficient irregular rests caused by waiting for materials or tool-setters. One stated that "there's no need for such provision here, since 95 per cent of our employees work sitting down". Piece-workers are afraid their earnings will decline and employers that production will drop. On the whole, however, experience with rest pauses seems to show that all these objections can be met. The National Institute of Industrial Psychology reported that well over 80 per cent of the firms in its survey expressed satisfaction with rest periods. Adequate discipline can prevent abuses. Organized rests have been found less time-wasting than unorganized ones. In most cases production and piece-work earnings go up. Nor do time-workers suffer as deductions are seldom made for time lost during rest periods. Under the U.S. Fair Labor Standards Act an employer must pay for any break of 20 minutes or less. One writer expressed the opinion that "No matter what wages he may pay, the employer who does not authorize rests will pay for those authorized by his competitor".

Medical Care and Rehabilitation Schemes for Dockers and Merchant Seamen in Great Britain

Merchant Seamen

SPECIAL arrangements have been made in Great Britain for the medical treatment and rehabilitation of dockworkers and merchant seamen. The schemes have been approved by shipowners and seafarers and the Transport and General Workers' Union. Canada has also made provision for free medical treatment for Canadian merchant seamen who become sick or disabled while serving in war zones (L.G., Oct., 1943, p. 1417), and those unable to return to sea are eligible for rehabilitation grants and training under the Post-Discharge Re-establishment Order (L.G., May, 1943, p. 587).

Dockers

Following the decasualization of dock employment in Britain under wartime schemes to ensure maximum use of a limited supply of labour (L.G., 1942, p. 130), it was possible to make a study of attendance among dockworkers. A survey in Manchester revealed that 40 per cent of dockers' absences were due to neglected injuries, rheumatism, sciatica and gastric troubles. With the co-operation of the Transport and General Workers' Union plans were made by the Government for establishing rehabilitation centres to provide corrective treatment for these and other ailments in order to make disabled dockworkers fit for service as soon as possible. The first centre was opened by the Minister of Labour and National Service on September 4 at Salford.

The centre can accommodate 50 patients and includes social, gymnastic and physiotherapy departments. While the main object is to return dockers to work as soon as possible, the centre acts as a check on the tendency to resume work prematurely. It also arranges for the transfer to other work of dockers unable to return to their former work. Dockers are under no compulsion to make use of the centre. It is under the financial control of the Regional Port Director assisted by a committee of persons interested in dockers' welfare. A welfare officer of the Ministry of Labour and National Service collaborates with the medical officer in charge of the centre. Local medical men will be encouraged to take an interest in the work of the centre.

Free hospital treatment is provided by the Government for officers or seamen who become ill or are injured while at sea. The scheme applies to all British subjects and Allied Nationals serving in the British or Allied Merchant Navies. Treatment is also available for seamen who suffer fractures while ashore at any place or who are injured or become ill while ashore away from their home area. In these cases, however, the seamen are expected to pay as much of the cost of treatment as they can reasonably afford and the Government pays the rest.

Treatment is provided in hospitals under the Government's Emergency Hospital Scheme which includes most of the general hospitals in the country and a number of specialized treatment centres for dealing with fractures, head injuries, neurosis, etc. The scheme makes no provision for the treatment of tuberculosis, mental illness or infectious diseases which are left to local public health authorities.

Seamen suffering amputations due to war service are fitted with artificial limbs free of charge. The cost of supplying artificial limbs to those who lose limbs from other causes is paid on a contributory basis by the worker or his employer, but in certain cases the full cost is met by the Government.

Seamen with disabilities caused by war service or resulting from disease or accident which prevent them from resuming their former employment are placed in land jobs or provided with training to prepare them for such employment. The local offices of the Ministry of Labour and National Service keep in touch with hospitals, interview persons requiring jobs and offer advice on opportunities for employment or training. During the war disabled seamen are trained for and placed in war jobs but if necessary, additional training for peacetime work will be provided at the end of the war. Specialized training courses are also available for disabled seamen in such trades as draughting, instrument making, welding, spray painting, radio testing, electrical installation, watch repairing, etc. Training for other occupations including professional and technical posts may also be arranged to suit individual cases.

Minimum Safety and Health Standards for American Shipyards

SAFETY and health for workers in shipyards are the object of certain minimum standards which were adopted early in 1943 by the United States Maritime Commission and the Navy after a national conference on the subject in December, 1942.* The standards were drafted by experts who surveyed shipyards on all coasts, and have been endorsed by medical and safety departments and labour-management committees in many yards. Some of the standards are mandatory and others advisory.

Each yard must submit a monthly report of all disabling injuries to the Bureau of Labour Statistics. A disabling injury is defined as any injury which prevents a man from reporting for work on the next regular day or shift after the accident or one which calls for a standard time-charge being made regardless of whether time is actually lost. The Bureau's figures for the first quarter of 1943 indicate the effect of the more stringent safety requirements. The injury frequency rate dropped from the 1942 national average of 37.9 disabling injuries for every million employee-hours worked to 32.5. Individual frequency rates are calculated for each yard and safety experts under the direction of the Maritime Commission and the Navy concentrate on yards with bad records.

Over one-third of all accidents reported in the first quarter of 1943 were caused by falling, moving or flying objects. Twenty per cent were due to falls and fifteen per cent to slips and over-exertion in lifting heavy objects. A great number of eye injuries, fractures of feet and toes, and burns and scalds, including "welders' flash" cases were reported. In two-thirds of the accidents, unsafe working conditions were apparent and in 90 per cent, unsafe work practices such as failure to wear goggles were observed.

Minimum Safety Standards

"It is absolutely essential", the two agencies state, "if a successful accident-prevention program is to be installed and operated, that top plant management take an active and interested part in the work". Management is responsible for providing a safe working environment, appointing a safety staff, training employees in safe methods, keeping accident records, enforcing rules, attending safety meetings and taking executive action to correct unsafe conditions.

Safety Staff and Committees.—Every shipyard must have a full-time safety director

responsible to the highest ranking managerial executive. There must be an assistant safety director if 3,000 or more workers are employed and one safety engineer or inspector is to be added for every 1,500 workers over 3,000. Safety engineers are to be divided among the shifts.

The safety director is responsible for formulating and executing the accident-prevention program in the yard and advising the management on safety matters. He must see that legal requirements are complied with, accident records properly kept, and regular inspections made. He co-operates with the training department in planning safety training, and with the medical department in seeing that workers are placed in jobs suited to their physical capacity.

Safety committees are required in all yards. There must be a central committee to formulate policy and co-ordinate the medical, safety and production departments, a supervisors' committee to stimulate and educate supervisors, and an inspection committee for each department and each hull to keep constant watch for unsafe practices and conditions. General labour-management safety committees may be added to assist in the accident-prevention campaign. Inspection committees should have two workers and one supervisory employee from each job. The safety director or a safety engineer should accompany an inspection committee to correct at once any hazards which are immediately dangerous to life, limb or health. Specialized inspection committees composed of experts are suggested for cranes, boilers, staging, etc. All yards must use the prescribed forms for recording accidents, safety recommendations and corrective action taken.

Safety Training.—All workers must be carefully instructed in safe practices and warned of hazards before they commence work. Such training must also be given by apprentice and craft-training schools. Yards are required to have bulletin boards on which safety rules and recommendations are posted and a section of any company magazine or newspaper must be devoted to safety. Rule books for workers and the use of films and public address systems for safety education are recommended.

Employees must have all necessary personal protective equipment and be instructed in the proper use of it before beginning work. Practically all shipyard workers are exposed to eye-hazards and need impact-resisting goggles. Those working near welding operations must wear "antiflash" goggles and be protected by welding screens. A supply store must be established in each shipyard at which workers

* *Minimum Requirements for Safety and Industrial Health in Contract Shipyards*, U.S. Navy Department—U.S. Maritime Commission, 1943.

may procure safety hats, shoes, goggles, etc. Shoes may be sold at cost but goggles and hats must be supplied to each worker. They should be fitted to the individual and sterilized before being re-issued.

Welders and Burners.—Welders and burners must be instructed in the special hazards of their jobs and supplied with protective equipment. Welders must wear a protective hood, leather jacket, long-sleeved wool shirt with buttoned collar, leather gloves, a safety hat, goggles with filter lens and sideshields, and safety shoes or pull-on boots with cord or leather soles and heels. Burners need the same outfit except for the leather clothing and welder's helmet. Women welders should wear long underwear (woollen in winter), khaki trousers and shirt or overalls, welder's leather uniform, leather gloves and safety shoes. Whenever possible, outer clothing, unless of wool, should be flame-proofed. Burners' uniforms must be laundered weekly or oftener if oil or grease is spilled on them.

Electric welders and burners are required to inspect the area in which they are working to see that there is nothing on which sparks could start a fire. They must know where the fire-extinguishing equipment is and how to use it. Welding leads and gas lines are to be inspected at least once each shift and defects repaired at once. All gas lines must be clearly marked to indicate the type of gas carried and must be turned off at the manifold at lunch and quitting time or when the burner leaves his work. The dangerous practice of blowing oxygen on the clothes to dust them or using it for ventilating or cooling purposes is strictly forbidden.

Women welders new to shipyard work should be watched for signs of fatigue and temporarily transferred to lighter work if fatigue is evident.

Other Safety Measures.—Numerous precautions to be taken in the use of cranes are set out in the pamphlet. Crane operators must be given a physical examination upon employment and at least yearly, with particular emphasis on eye examinations. All yards are required to maintain a high standard of housekeeping. Aisles, passages, stairs and staging must be clear of obstruction, debris, snow and ice, and must be of sufficient width. Guard rails are required about all deck openings and midrails are recommended where women are employed. Free access to exits and fire-extinguishing equipment must be maintained and inflammable materials stored and used according to the standards of the National Fire Protection Association.

Lighting should conform to the minimum standards laid down by the Illuminating Engineering Society. A safety engineer should inspect all tools issued from the tool-room daily and workers' personal tool kits should be inspected monthly. Workers should be instructed in the proper methods of lifting heavy objects. Wherever possible, mechanical lifting equipment should be used. All dangerous machines must be adequately guarded. Wooden guards are acceptable if metal ones are not available but State regulations must be complied with. Staging and ladders must conform to recognized codes.

Minimum Health Standards

All workers must be given a physical examination to ensure proper placement and periodic medical examinations are required for all persons working in dangerous occupations such as welding, spray-painting, grinding, etc.

Medical Department.—Yards with from 3,000 to 5,000 workers should have two full-time doctors and six full-time nurses. An extra doctor and three more nurses should be added for every additional 5,000 workers. One ambulance for every 15,000 workers should be provided and an ambulance driver must be available on each shift.

The medical department should include a waiting room, treatment room, doctors' and nurses' offices and a ward equipped with three beds for the first 5,000 employees and an additional one for every 10,000 thereafter. There may also be special rooms for eye cases, physiotherapy and minor surgery. Yards with over 5,000 workers should have X-ray facilities. First-aid sub-stations staffed by nurses are recommended if the main dispensary is remote from many operations or unduly crowded. If women are employed, separate waiting and treatment rooms must be provided. Standard forms and nomenclature are recommended for use in medical departments to simplify administration and the keeping of records. The department should make a daily report to the safety department on new cases.

It is compulsory for the medical staff to inspect the yard frequently in order to become familiar with operations and watch for conditions likely to endanger health. Special attention must be given to cafeterias and canteens, water supply, sewage and waste disposal. Food-handlers should be given pre-employment examinations. Salt tablets must be made available in all yards. The medical staff is also responsible for air-raid precautions work and must establish emergency

first-aid dressing stations at strategic points and train yard employees in first-aid to assist at these stations.

The medical staff must collaborate with the safety department in maintaining accident and absence records. It is jointly responsible with the safety department for protecting workers from industrial disease and must be fully informed as to the composition of the various chemicals and substances used in the operations.

Protection Against Industrial Disease.—Shipyard workers in such operations as welding, sand blasting, spray painting, etc., are exposed to such diseases as lead poisoning, asbestosis, silicosis, zinc fume fever, dermatitis, conjunctivitis from Fiberglas, and poisoning from solvent vapours. In addition they may suffer eye injuries from welding arcs and flying objects. Preventive measures suggested include special ventilation, isolation of the operation, the provision of showers, the wearing of respirators and goggles and periodic medical examinations. Dermatitis can be controlled by the use of protective salves and creams but efforts should be made to eliminate or curtail the use of irritating substances. Loose clothing, with cheesecloth to protect the neck and arms, and goggles should be worn by workers handling Fiberglas.

The safety department is responsible for maintaining supplies of the different types of

respirators needed, instructing workers in their use and sterilizing all equipment before it is transferred from one employee to another. Respirators should be of a type approved by the U.S. Bureau of Mines which maintains a laboratory to test protective equipment of this kind.

Ventilation.—The safety department is responsible for the provision of adequate ventilation. Air analyses and tests will be made by the safety consultants of the Navy and Maritime Commission. Every yard must have on each shift a ventilation supervisor specially trained in this field and responsible to the safety director. He will be assisted by inspection, repair and maintenance crews sufficient to maintain good working conditions. He is required to instruct other members of his staff in standard ventilation methods.

Means of providing both local exhaust to carry off fumes and general ventilation in enclosed spaces are described. Local exhaust must be supplied in all places where welding is being done in a confined space. The end of the suction hose must be within six or eight inches of the welding arc to be effective. Ventilation of confined spaces may be facilitated by the temporary removal or cutting through of certain plates. The ventilation department should be notified in advance of construction plans so that ventilation needs may be anticipated.

Accidents Resulting from the Human Factor

A RECENT issue of the *Bulletin* of the Industrial Accident Prevention Associations quotes Dr. K. S. Bernhardt of the Department of Psychology, University of Toronto, as describing certain highlights of the human factor in accidents in the following terms:

- (1) Ignorance; for example, unawareness of what is dangerous;
- (2) Pre-disposition to accidents; for example, slow reaction time or faulty sense of balance;
- (3) Attitudes of workers; such as one disposed to take chances;
- (4) Bad habits; such as hurry or confusion; and

(5) Preoccupation with something else; such as fatigue, worry, feelings of resentment, etc.

The correction of these conditions is essentially a problem for plant management and supervisors and much can be done in this connection through the assistance of a good plant safety committee, the *Bulletin* declares, and recommends its Pamphlet No. 36 as of assistance in setting up such a safety committee.

A reduction in the number of accidents reported to the Workmen's Compensation Board of Ontario occurred during October, 1943. In this month there were 10,943 accidental injuries reported to the Board, including 39 fatal cases. In October, 1942, the figures were 11,815 and 57. In the last twelve months the accidents in Ontario industry have averaged over 11,000 per month.

Increase in Wage Rates in Canada

Survey of Index Numbers of Wages from 1901-1942

GENERAL wage rates in Canada have reached their highest level in the last forty-two years according to the annual survey recently completed by the National War Labour Board.

A table of index numbers of wages has appeared since 1921 in the annual report on Wages and Hours of Labour in Canada issued by the Department of Labour as a supplement to the Labour Gazette. The last report in the series published was No. 25—supplement to the October 1942 Labour Gazette—and covered the years 1929, 1940 and 1941. No report in the series was issued this year.

The collection and compilation of wage statistics was transferred to the National War Labour Board early in 1942 in order to facilitate the work of administering the Government's wartime wages control policy.

The table of index numbers of rates of wages contains figures showing changes in wages for some of the main occupational and industrial groups from 1901 to 1942, and for certain other groups from 1911, 1913 and 1920 to 1942. The purpose of the table is to show the general trend of the movement in wage rates. The base used (wage rates in 1935-39 as 100) is the same as that used for the official cost of living index number issued by the Dominion Bureau of Statistics, thus making possible direct comparisons between numbers in both series.

The general wage index number for all of the industries covered by the calculation in 1942 was 127.5 as compared with 119.2 in 1941, an average increase of 7 per cent. This in turn compares with an increase of 10 per cent in 1941 over 1940, and 3 per cent in 1940 over 1939. The percentage increase in wages from 1939 to 1942 was approximately 21 per cent. For the same period the cost of living index advanced 17 per cent.

By occupational or industrial groups in order of appearance in the table, the percentage increases in 1942 over 1941 were as follows: Building Trades 6.0, Metal Trades 5.8,

Printing Trades 4.8, Electric Railways 7.8, Steam Railways 1.8, Coal Mining 4.6, Common Factory Labour 8.6, Miscellaneous Factory Trades 8.7, Logging and Sawmilling 11.0, Metal Mining 6.9, Steamships 12.4, Laundries 10.3, and Telephones 5.2 per cent.

The wage data (including cost of living bonus), on which the above calculations are based were collected for June 1942, but the compulsory cost of living bonus payable in August (60 cents per week or 2.4 per cent) was included. The average for all groups in the table ("General Average Weighted") is obtained by averaging the group figures weighted according to the approximate number of workers in each group as shown by the decennial census of 1921 and 1931, the average of the figures for these two dates being taken in each case.

The weights are as follows (in thousands): Building Trades 143, Metal Trades 131, Printing Trades 25, Electric Railways 18, Steam Railways 161, Coal Mining 28, Common Factory Labour 110, Miscellaneous Factory Trades 363, Logging and Sawmilling 77, Metal Mining 30, Steamships 16, Laundries 19, and Telephones 18.

Weighting within groups, although desirable, has not been done. In such groups by occupations or industries weighting makes comparatively little difference as rates of wages for the various classes of labour tend to rise and fall to the same extent even in different localities. In most of the groups the index numbers, being calculated from samples, the averages are automatically weighted by the number of samples. This number of samples varies according to the number of workers in the different occupations and industries. Also the rates selected as samples are predominant rates, that is, rates paid to the largest number of workers in the various occupations.

For further details regarding the calculation of the index numbers of wage rates, refer to *Report No. 25—Wages and Hours of Labour in Canada*, page 14.

INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA 1901-1942
(Rates in 1935-39=100).

NOTE.—Rates include cost of living bonus.

Year	Building Trades	Metal Trades	Printing Trades	Electric Railways	Steam Railways	Coal Mining	Common Factory Labour	Miscellaneous Factory Trades	Lozing and Sawmilling	Metal Mining	Steamships	Laundries	Telephones	General Average Weighted*

*Weighted according to average number of workers in each group in 1921 and 1931 except metal mining where years 1921, 1931 and 1938 were used.

† Including some increases effected near the end of the year.

‡ Including a 10 per cent decrease for certain classes toward the end of the year.

(a) Seven trades from 1901 to 1920, eight from 1921 to 1926, nine from 1927 to 1942; 13 cities to 1927, 14 cities to 1930, thereafter 31 to 42 cities.

(b) Five trades from 1901 to 1926, four from 1927 to 1942.

(c) Two trades from 1901 to 1920, four for 1921 and 1922, two for 1923 and 1924, six from 1925 to 1942.

(d) Two classes from 1901 to 1923, five classes 1924 to 1942; from 1901 to 1930, 13 cities; thereafter 35 decreasing to 24.

(e) Twenty-three classes from 1901 to 1940; sixty classes 1941 and 1942.

(f) Four classes 1901 to 1920, twelve classes 1921 to 1942.

(g) The number of samples (and industries) increased from time to time since 1920; machine operators, helpers, etc., also included.

Report and Recommendations of Royal Commission on Western Coal Mines

REFERENCE was made in the November issue to the report of the Royal Commission, appointed to investigate the demands of the coal miners of Western Canada (p. 1495). At the time that brief summary appeared the text of the Commission's report was not available for publication. It has now been issued and in view of its importance it is being reproduced in the following pages. During the month the National War Labour Board issued its decision in regard to the coal miners of District 26, Nova Scotia. This report is also published in full and will be found in the section dealing with the decisions of the National War Labour Board on page 1645.

First Interim Report of the Royal Commission appointed under Letters Patent of the 14th day of October, A.D. 1943, pursuant to a Minute of Meeting of the Privy Council, approved by His Excellency the Governor General, on the 14th day of October, 1943, being P.C. 8020.

Sirs:—

Pursuant to the terms of Order in Council P.C. 8020, dated October 14, 1943, as subsequently amended, we have conducted an inquiry into the wage rates paid to persons employed in the operation of coal mines in the Provinces of Alberta and British Columbia, and into matters relevant to or affecting the application of the Wartime Wages Control Order (Order in Council P.C. 5963 of July 10, 1942), and now submit an interim report thereon.

Sittings of the Commission were held at Calgary on October 29 and 30, and November 10 and 11, and in Edmonton on November 12. Every opportunity was given to all interested parties to appear, tender evidence and to make submissions. Representations were made on behalf of the United Mine Workers of America, District 18, by its officers and counsel, and on behalf of the Western Canada Bituminous Coal Operators' Association, the Drumheller Coal Operators' Association, and the independent operators and others, by their representatives and counsel.

At the opening session at Calgary on October 29, 1943, Mr. Robert Livett, President of the U.M.W.A. District 18, informed the Commission that the U.M.W.A. objected to the terms of the order constituting this Commission in so far as it only contained power to recommend measures to be taken, without authority

to put such recommendations into effect, and that the U.M.W.A. were not satisfied to have such recommendations go to the National War Labour Board for implementation. Having taken such objection, he indicated his willingness to have the commission proceed with the inquiry. The case for the U.M.W.A. was then placed before the Commission and at its conclusion the Western Canada Bituminous Coal Operators' Association proceeded with its representations. The Commission adjourned late in the afternoon, to resume its sittings on October 31. In the interval, strike notices were sent out and, on reconvening the following morning, the Commission was faced with the fact that a strike had been called for Monday, November 1.

A determined effort was made by the Chairman and other members of the Commission to secure a reconsideration by the U.M.W.A. of their intention to go on strike, without avail. In the opinion of the Commission, the action of the U.M.W.A. was ill-conceived, unwarranted and against the national interest. In the face of the situation which then confronted it, the Commission declined to continue with its inquiry and adjourned to meet again at the call of the Chairman.

As a result of conferences between the U.M.W.A. officers and the Honourable, the Minister of Labour, and others, held during the week of November 1, it was agreed that the miners would return to work, and that this Commission would be given the powers of a Regional War Labour Board under the provisions of the Wartime Wages Control Order (Order in Council P.C. 5963, July 10, 1942). These powers were subsequently granted.

Pursuant to such agreement, the miners were requested to return to work, and the Commission resumed its inquiry at Calgary on November 10.

Practically all the men involved in the strike are now back at work.

The main sittings were concluded on November 12, although there are two minor issues upon which it may be necessary to hear further representations.

In its demand, the U.M.W.A. has set forth three specific claims:

1. Two dollars a day increase for all day wage and contract employees;
2. Time and one-half and rate and one-half for the sixth day's work in any one week;

3. Two weeks' holiday with pay at the basic wage rate after twelve months' employment.

The existing rates were established by mutual agreement, dated May 12, 1939, effective December 9, 1938. On April 11, 1940, a supplementary agreement was entered into with respect to a cost of living bonus, and on August 25, 1941, a further supplementary agreement was made revising cost of living adjustments. Each of the supplementary agreements confirmed the 1938 agreement in all other respects, and the agreement of April 11, 1940, contained a clause providing for the continuance of the agreement as amended for the period of the war and one year thereafter, and for such further period as would bring the agreement to expire on March 31.

The U.M.W.A. rely on the provision in the original contract providing that: "In the event of a national emergency the economic situation will be subject to review . . ." This was done by the agreements of April, 1940, and August 25, 1941. No new emergency has developed since the economic situation was last reviewed.

Early in 1943 applications were made on behalf of the employees in the Drumheller, Lethbridge, Edmonton, Princeton and Tulameen fields, to the National War Labour Board, for increases. The applications were dealt with and certain adjustments favourable to the employees were put into effect. Unfortunately for industrial peace, the U.M.W.A. is not prepared to abide by its contractual obligations nor the findings of the National War Labour Board and again seeks to press its demands for a further upward revision of its basic wage rates. It is common knowledge that inflation is one of the great risks of war, and the Dominion Government, in an effort to control inflation, put a ceiling on wages and on prices. It recognized, however, that arbitrary rulings of general application might work hardships in individual cases, and provision has been made to deal with specific applications where an inequality in the wage structure is claimed.

The U.M.W.A. to justify its demands has endeavoured to bring itself within the provisions of the Wartime Wages Control Order which sets the ceiling on wages. Section 25 of that Order provides that, if the National Board finds that a range of wage rates or a single wage rate forming part of the basic scale of wage rates paid by an employer on November 15, 1941, is low as compared with the ranges of wage rates or single wage rates respectively, generally prevailing for the same or substantially similar jobs, etc., in the locality or in a locality which, in the opinion of the Board, is comparable, it may direct such

increased range of wage rates or single wage rate to be paid as it finds fair and reasonable, having regard to all the circumstances deemed by it in its discretion to be material.

In support of its submission that Section 25 is applicable the U.M.W.A. states:

- (1) That the coal miners in District 18 are working for considerably less wages than their fellow mine workers in the United States, despite the fact that approximately 60 per cent of the coal consumed in Canada is imported from the United States, and submits for comparison the wage rates prevailing in what is termed the "Mid-competitive field"—that is Western Pennsylvania, Ohio and Illinois;
- (2) That many men normally engaged in coal mining have taken advantage of increased demand for labour in the ship-building, logging and other industries to leave the mines for more remunerative work in other fields;
- (3) That the action of the Government in freezing miners to their employment is indicative of the fact that miners can secure employment and higher rates of wages in other industries.

Operators, quite properly, have maintained the position that the agreement negotiated with the miners in 1938, and as revised in 1940 and 1941, is still in effect and should continue in effect until the expiration period provided for in the agreement, viz., one year after the war. They also submit that the miners' wages are not low and compare favourably with wages paid in other fields of industry, and that, in view of the Government's announced policy of wage control and price fixing, they cannot be a party to any voluntary increase in basic wage rates.

The Commission finds that the rates of wages paid (including cost of living bonuses) to persons employed in the operation of coal mines in the Provinces of Alberta and British Columbia may be summarized as follows:

Bituminous Field, including Vancouver Island, and the Sub-Bituminous Mines in the Princeton Field:

Surface workers.....	\$5.61 per 8-hr. day
Underground workers.....	6.49 per 8-hr. day
Contract miners, aver....	\$9.00-9.50 per 8-hr. day

Sub-Bituminous Mines, including the Edmonton, Lethbridge and Drumheller Fields:

Surface workers.....	\$5.56 per 8-hr. day
Underground workers.....	6.28 per 8-hr. day
Contract miners.....	\$5.71-9.00 per 8-hr. day

While the daily rates appear to be high, the annual earnings of those employed in mining operations are actually much lower than might be expected.

The average annual earnings of the Alberta and British Columbia coal mine workers as compared with the average annual earnings of the coal mine workers of the Dominion Coal Company, Cape Breton, N.S., are as follows:

Nova Scotia, 1942

Face Workers or contract miners;
Annual average.....\$2,488.20

Alberta and British Columbia, 1942

Excluding those who worked less than
175 days.....\$2,115.50

One reason for the difference in actual earnings is that the Alberta sub-bituminous mines are usually operated for approximately 200 days each year out of a possible 300, while the Cape Breton mine is operated at least 286 days a year. The Alberta and British Columbia bituminous mines at present operate at least 275 days a year but for many years employment in these mines was intermittent.

TABLE SHOWING NUMBER OF DAYS' OPERATION
IN CENTRAL ALBERTA FIELD FOR 1942

Newcastle.....	230
Rosedale.....	192
Star.....	220
Murray.....	219
Maple Leaf.....	265

2,754

Average for all these mines, 229 days.

The following extract from the report of the McGillivray Commission (LABOUR GAZETTE, January, 1939, page 12), is appropriate in the circumstances.

"It is quite evident that a rate which would provide not only a living wage but a very fair wage in a mine which was able to offer work to its workmen for five days a week throughout the year might be wholly inadequate to provide a living wage, to the employees in a mine which was unable to provide more than one work day per week for its employees."

It should be pointed out that the Dominion Government has recognized that a national emergency exists in respect of the production of coal as an essential war commodity, and has taken steps to stimulate the production thereof to ensure an adequate supply. It established the Emergency Coal Production Board in November 1942, to deal with the emergency. It might have been considered that this Board could properly have dealt with the question of miners' wages as part of the emergency situation, but it is apparent that the functions of the Board have been limited mainly to the granting of subsidies to mines where wage increases have been put into effect, beyond the

ability of the operators to meet. The fact remains, however, that even though the Board has not power of itself to increase wages, the principle has been recognized that the production of coal is a primary essential in the war effort and, if increased wages are required to induce men to continue in the mining industry, that the situation could have been met through the functioning of the Emergency Coal Production Board.

The Commission would also like to direct attention to the powers of the Western Labour Board in connection with defence projects. If the mining industry were declared to be a defence project, (and it is apparent that it does form a vital part in Canada's war effort), the Western Labour Board could have been authorized to prescribe the payment of such ranges of wage rates as it might find fair and reasonable, having regard to the necessity of recruiting and maintaining an adequate supply of labour for employment in coal mines, with the minimum dislocation of wage rates in and the supply of labour for other employments, and having regard for all other circumstances deemed by it, in its discretion, to be material.

Attention is directed to the powers of the Emergency Coal Production Board and the Western Labour Board to indicate the attitude of the Government to the importance of maintaining an adequate supply of coal throughout Canada, even at the risk of disturbing the wage ceiling.

Your Commission has given very careful consideration to the whole of the circumstances surrounding the application for increases, and for the purposes of this inquiry finds that the requirement of Sections 25 and 29 (relating to working conditions, etc.) of the Wartime Wages Control Order have been sufficiently satisfied, and, having regard to the emergency conditions existing, your Commission directs:

- (1) An increase in the wages paid to persons engaged in manual employment in the operation of underground coal mines in the Provinces of Alberta and British Columbia of \$1.00 per day for all day wage, contract and other employees not above the rank of foreman or comparable rank;
- (2) Two weeks holiday with pay at the basic daily wage rate to be granted to such employees who between April 1 and September 30 in any year have continued in the employment of any one employer for at least twelve consecutive months, and provided that such employee has not been absent from his employment for more than ninety days (including Sunday, holidays and vacation) during such twelve month period, except through causes beyond his control;

- (3) That the foregoing be effective as of and from November 1, 1943, as to any employees who were at work on that date, and as of and from the date of resumption of work in the case of all other employees.

Counsel for the Western Canada Bituminous Coal Operators' Association pressed us to limit any increase granted to a war time bonus, but the Wartime Wage Control Order does not authorize this.

The Commission would have preferred if the application could have been disposed of by the Emergency Coal Production Board or the Western Labour Board as it is of the opinion that the circumstances surrounding the application were peculiar to the coal-mining industry as a defence project and have no bearing upon other industries not directly connected with the furtherance of the war effort or the comfort and safety of the citizens of Western Canada.

Notwithstanding its finding that the applicants have brought themselves within Section 25 of the Wartime Wages Control Order the Commission frankly admits that the increases actually recommended are in the nature of a compromise necessitated by the action of the miners at the outset of the winter season and the shortage of coal reserves in the west. Time has been a factor in the preparation of this report and the Commission regrets that it did not have an opportunity for more careful consideration of the problems involved. It sympathizes with the efforts of those responsible for the application to better conditions in the industry but unanimously condemns the methods adopted by the U.M.W.A. in the existing circumstances.

The directions of the Commission will necessitate an increase in the selling price of coal, or financial assistance to the operators to keep the mines open.

The Commission has required the mine owners to submit financial statements, and our accountant has prepared the accompanying tabulation showing the financial position of the companies involved and the operators' claims for price increase or subsidy. We are not

satisfied that these claims are all sound, but if established they would appear to justify a price increase of 40 cents a ton to the selling price of coal. As the average family burns 10 tons of coal each winter this increase would not be burdensome, and we believe most consumers would prefer to pay it rather than run the risk of a strike which would deprive them of fuel and bring suffering and possibly death to many persons.

The Commission is not making any specific recommendation on this issue because after further study it may be considered best to give financial assistance to the mines rather than to increase the price of coal. We enclose a computation of the cost of the Treasury of assuming the wage increase.

A further report as to the necessary increase in the price of coal will be submitted if it is required.

The Commission finds the present system of collecting income tax is partly responsible for dissatisfaction and absenteeism amongst the miners and recommends that the scheme of collection of income tax from mine employees approved by representatives of the Minister of Finance, of the U.M.W.A. and of the Western Canada Bituminous Coal Operators' Association be made compulsory in Alberta and British Columbia so as to take effect with the first instalment of increased pay on November 30, 1943.

The Commission was fortunate indeed to secure the services of Mr. F. E. Harrison as secretary; Mr. K. C. Teare, C.A., as accountant and Mr. H. H. Parlee, K.C., as counsel.

Dated at Edmonton, Alberta, this 17th day of November, 1943.

All of which is respectfully submitted.

(Sgd.) G. B. O'CONNOR, *Chairman.*

(Sgd.) T. W. LAIDLAW, *Commissioner.*

(Sgd.) L. D. HYNDMAN, *Commissioner.*

Minister of Labour
and

The NATIONAL WAR LABOUR BOARD,
Ottawa, Ont.

Decisions of National War Labour Board Regarding Vacations with Pay

SINCE its reorganization in February, 1943, the National War Labour Board has dealt with a number of applications for vacations with pay in Canadian industry. The majority of these applications have been granted; and in the course of its various Reasons for Judgment the Board has stated the considerations which have led to its decisions.

In June 1943, in granting the application of Division No. 4 Railway Employees Department (A.F.L.)¹ the reorganized Board made its first pronouncement on the subject of vacations with pay, reading in part as follows:

The general desirability of vacations with pay can hardly be questioned in peace time. In war time as well it may be particularly desir-

able in conditions where the element of industrial fatigue becomes an important factor in the field of industrial production.

After referring briefly to the situation in Sweden, England and the United States, the Board listed a number of "fundamental considerations" in regard to the granting or withholding of vacations with pay, as follows:

First of all a Board must keep in mind that it is exercising a judicial discretion and is not to deal with the matter as if it had the right to legislate arbitrarily an employer into granting vacations with pay.

Secondly, a most important consideration is that there is a war on and uninterrupted production and services are the prime need in such a time.

Consideration should also be given to the problem of manpower. Vacations with pay should not be granted where conditions are such that an industry will as a result lose too-much important production or where to keep it up will make the cost unduly high.

Another factor is of course the importance of the product in the war effort or the national interest. . . .

After consideration of such fundamentals perhaps the most practical criterion is a comparison of the class of employees concerned with the same class in similar industry.

If after such tests and any others that may seem important to the Board concerned, it is determined to impose vacations with pay, there should be further consideration given to the conditions which should accompany such an imposition—namely as to the period of such vacation, as to the length of employment before a person becomes eligible for the privilege and as to what conditions should prevail before such a right should be forfeited in whole or in part.

In the same case the Board established the principle that employees (as well as employers, and employers and employees jointly) had the right to make application to the Board for vacations with pay.

In its decisions the Board has frequently made reference to a statement of policy on the subject of vacations with pay which was issued to Regional Boards in 1942 by the National War Labour Board then differently constituted. This statement occurred in Directive Bulletin No. D.B. 17, which reads as follows:—

Text of D. B. 17

Vacations with pay plans as established prior to November 15, 1941, or as altered subsequent to that date, on authority of a War Labour Board, or within the limits prescribed by any ruling of a War Labour Board, shall be continued in effect, except as they may be modified

by agreement between employers and employees with the approval of a War Labour Board.

If a War Labour Board finds justification for approving an application by an employer, or a joint application on behalf of an employer and his employees as a result of collective bargaining, for permission to inaugurate a new annual vacation with pay plan, it is recommended by the National War Labour Board that, at least for the time being and to permit such further study and consideration of conditions as may be required, as well as to maintain general uniformity of practice in the matter throughout the country under war conditions, any approval granted should be subject to the following qualifications:

- (a) a vacation with pay should be granted only after the employee has completed one year's continuous service, i.e., a minimum of, say, 300 days of actual work, the vacation to be allowed for and during the following twelve months' service.
- (b) a vacation with pay should not exceed the equivalent of one-half day for each 25 days of actual work, due allowance to be made for authorized leaves of absence because of sickness or other justified causes. Thus, an employee who has rendered regular service during one year or more at the date of the approval of a vacation plan would be entitled to six days vacation with pay at some time during the succeeding twelve months.
- (c) vacation pay should not be allowed for vacations not taken; in such cases any unused vacation privileges should be allowed to accumulate until conditions permit them to be exercised.
- (d) (i) if an employee, not having been dismissed for cause, leaves the service of his employer for reasons beyond his control at a time when an unused period of vacation with pay stands to his credit, he should be paid the amount due him in lieu of vacation calculated to the date of his leaving such service.
- (ii) if an employee leaves the service of his employer of his own accord, or is dismissed for cause at a time when an unused period of vacation with pay stands to his credit, he should be paid the amount due him in lieu of vacation calculated to the end of of his last completed twelve months of service.

It is further recommended that War Labour Boards, in considering applications for approval of new vacation with pay plans should give permission for their inauguration only when they are satisfied that it is feasible for the employer to arrange his operations in such a way as to make the actual vacations generally available to those who would be entitled to them without impairing the quantity and regularity of war production. To this end, employers in connection with any approved plan should be impressed with the importance of staggering or spreading the vacations over the longest possible period of time.

¹ L.G., June, 1943, p. 753

Vacations with Pay Refused to Seasonal Workers

An application for vacations with pay which was refused by the Board was dealt with on September 30. This case involved work of a seasonal nature performed by wharf freight handlers in Montreal and Saint John. In its Reasons for Decision the Board declared in part:—

However desirable the condition [vacations with pay] may be, its basic foundation is upon the principle that the overworked human machine should have a period of rest in the interests of productivity and the workers' well being and health. The workers concerned here are seasonal workers. As far as the employing Railway Companies are concerned these workers' services are not in demand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

On October 8 the question was considered of granting pay for time not worked on six public holidays.² The company (Dominion Tar & Chemical Company Ltd.) and the union (Local

174, United Gas, Coke and Chemical Workers of America, CIO) already had an agreement including holidays with pay, and were seeking the additional concession of payment for statutory holidays in a joint application as an appeal from the Regional Board for Ontario. The application was refused by the National Board, which gave its opinion that "to give approval to this branch of the application would be inconsistent with the purpose and spirit of the Order." (P.C. 5963.)

Most Recent Decisions

In the current issue of the *LABOUR GAZETTE* appears the most recent declaration by the Board on the subject. In granting vacations with pay to certain Railway Brotherhoods the Board calls attention to the extent to which the practice is being accepted as a general condition of work, and quotes a statement by the Right Honourable Winston Churchill on the desirability of "reasonable minimum holidays". The text of the Reasons for Decision in these cases appears on page 1635.

Other decisions in which the Board has granted or withheld vacations with pay have appeared in the *LABOUR GAZETTE* in the following instances: August, p. 1137; October, p. 1350; November, pp. 1489, 1491, 1492.

² L.G., Nov., 1943, p. 1490.

Industrial Psychology in New Zealand

THE November issue of *News*, published in London by the British National Institute of Industrial Psychology, outlines the functions of the Industrial Psychology Division, set up a year ago by the War Cabinet of New Zealand. The Division makes it possible for "firms engaged in war production, trade union officials and others" to call in "expert advice on all matters relating to the human factor in industry". Through the medium of a quarterly *Bulletin* it provides information as to the activities of the Division and summarizes useful information gleaned from the experience of other countries.

Such topics as hours of work, working conditions in factories, reduction of fatigue and accidents, the placement and training of new

workers and other related problems have been studied in many parts of the world, and these studies are proving of direct value in evolving adequate solutions. It is pointed out that "the correct handling of these human problems can materially assist war production, as well as helping to maintain the health and well-being of the workers".

With these purposes in view, the Division of Industrial Psychology offers a free survey service to manufacturers engaged on essential national work. Or, if preferred, the Division is prepared to send a trained investigator to any centre in the Dominion of New Zealand to offer expert counsel to industrialists and to industrial workers.

Decisions of the National War Labour Board

RECENTLY the National War Labour Board has issued decisions in the following cases:—

Eaton-Wilcox-Rich Limited, Windsor, Ont., and United Automobile Workers of America (CIO).

J. S. Nairn and Cape Breton Quarrymen's Union (George's River, N.S.).

Ottawa Master Painters' Association and Brotherhood of Painters, Decorators and Paperhangers of America.

Canadian Vickers, Limited, Fairchild Aircraft, Limited and Noorduyn Aviation Limited, and International Association of Machinists (Montreal Aircraft Lodge 712).

Central Aircraft Limited (London, Ont.).

Canada Packers Limited, Swift Canadian Company, Limited, Burns and Company and Gainers Limited, Edmonton, Alta.

Dominion Oilcloth and Linoleum Company, Limited, Montreal, Que.

Brotherhood of Maintenance-of-Way Employees and Railway Association of Canada.

International Brotherhood of Firemen and Oilers, Round House and Railway Shopworkers and Canadian Pacific Railway Company.

Canadian Brotherhood of Railway Employees and other Transport Workers and Canadian National Railways.

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company.

Dominion Coal Company Limited, Acadia Coal Company Limited and Old Sydney Collieries Limited and United Mine Workers of America, District No. 26.

Re: Eaton-Wilcox-Rich Limited, Windsor, Ontario, and United Automobile Workers of America (CIO)

Reasons for Decision

(Oral Decision)

This is an appeal from the Ontario Regional War Labour Board in respect of an application for upward adjustment of a cost-of-living bonus. The Company is at present paying a cost-of-living bonus of 60 cents per week, and the application is jointly by the Company and the union, to have that increased to the full cost-of-living bonus.

We are not inclined to lightly disturb the findings of a Regional Board, but in this case it appears to us, from the reasons given by the Regional Board, that perhaps some over emphasis was placed upon the position of a comparatively small number of the workers in a certain class. Particular emphasis seems to have been placed on what the result would be in wages of automatic operators and automatic set-up men, and some of the classifications of machine operators. In these classifications there probably are not more than thirty five or forty employees, whereas the total number of employees in the company is in excess of two hundred. We prefer to look at the matter from the point of view of the

great majority of employees in the plant, and we find that in this particular industry, which may be described as manufacturing of precision parts, automotive, and for munitions, including guns, in the Windsor area there are five plants. In these other plants the cost-of-living bonus is \$4.25 weekly, and our comparison of rates paid does not incline us to the view that the wage situation would be very much disturbed if the application were granted and the appeal allowed.

Of course, our only authority to increase cost-of-living bonus as applied for, is to be found in the proviso at the end of section 34 of the Order in Council. We feel that it is not stretching the point at all to reach the conclusion that the adjustment in this case is being made within an industry in the particular area. Accordingly we will allow the appeal so that the company will be directed to pay the full cost-of-living bonus, instead of the 60 cents weekly.

The adjustment will be retroactive to the date of the application to the Regional Board, September 16, 1943.

November 10, 1943.

Re: J. S. Nairn and Cape Breton Quarrymen's Union (George's River, N.S.)

Reasons for Decision

The Union applies for leave to appeal from a decision of the Nova Scotia Regional Board dated April 9, 1943. The application was for wage increases to all classifications and full cost-of-living bonus. The Regional Board directed payment of the full bonus but refused to increase the basic rates on the ground that the rural location of this industry did not permit comparison with rates paid in the nearby steel plant and coal mining operations. Section 25 of the Order (P.C. 5963) gives a Board fairly wide scope in the determination of what are comparable jobs, particularly when the classifications involved are largely unskilled or semi-skilled. For the reason that the employees are part-time farmers, the Regional Board seems to have precluded itself from dealing with the merits of this application on the usual comparative basis. Because of the principle involved, we think leave to appeal should be granted.

The Union based the rates applied for largely upon the rates paid by a wartime temporary quarry operation at Point Edward, N.S. We were informed at the hearing that it has now been discontinued and we are of opinion that because of the special emergency conditions under which it was begun and carried out, it did not in any event afford a sound basis of comparison. But we do think that resort may be had to the rates for unskilled and semi-skilled labour generally prevailing in the district and as to the shovel operators, the rates paid in the Sydney steel plant can afford a guide. Upon that basis, we have concluded that the following adjustments should be made:—

	Present Rate	New Rate
Shovel Operators	·62	·80
Truck Drivers	·44	·52
Labourers	·42	·48
Watchmen	no change	

We have not dealt with all the classifications mentioned in the application because upon the evidence developed at the hearing it was not at all clear to what extent it could be said they had actually been established. Using the above rates as an indication of the Board's views, the parties can undoubtedly come to an understanding concerning the other rates and the matter will remain open for further application to this Board.

The Regional Board, in ordering payment of the full bonus, proceeded entirely without legal authority. There had been a general increase of wages in January, 1941 and section 34 (3) clearly restricted the Regional Board's discretion, unless the adjustment was ordered to rectify an anomalous situation within an industry—a situation which was not shown to exist here. We find that the employees were receiving all they were legally entitled to by way of bonus and the Regional Board's decision on that point should be set aside. The additional bonus paid by the employer following the decision under review will be set-off against the increases now ordered and these will be effective in the usual manner from the date of the Regional Board's decision.

The appeal is allowed to the extent mentioned and there will be a finding and direction in accordance with the above.

November 17, 1943.

Re: Ottawa Master Painters Association and Brotherhood of Painters, Decorators and Paperhangers of America

Reasons for Decision

(Oral Decision)

We feel, gentlemen, that we can dispose of this appeal without any reservation.

In the first place it is to be noted that the Direction and Finding appealed from is dated the 26th February 1943, effective from January 1, 1943. The original application for leave to appeal, apparently, was made on April 5 and leave was granted by the Ontario Regional War Labour Board on May 17, 1943.

In effect the decision of the Ontario Regional Board confirmed a recommendation that had been made by the National Joint Conference Board of the construction industry about

August 15, 1941. We have had cases of this kind in the construction industry before, and while we have tried to point out that a recommendation of the National Joint Conference Board is perhaps not legally binding on the parties, still the very fact that the Board is composed of employers and employees, its recommendation is one which carries a good deal of weight, and should be paid a good deal of attention. No doubt the Regional Board was actuated to a degree by this principle, although the principle is not one that is definitely laid down in the order in council.

There is a basic test under the order in council which is to be found in section 25, which sets out that wages may be adjusted

when they are found to be low in comparison for the same or a similar job in the same or a comparable locality. On that score we are of the impression that sitting in appeal we cannot very well disturb the finding of the Regional Board, in that we find that the rate appealed from is the same as the rate in Kingston, ten cents less than the rate in Toronto and the same rate as in Hamilton and within the range of rates in Windsor and so on. These are in a sense reasonably comparable localities, especially the City of Kingston.

Then, from the point of view of the appellant, there is another difficulty involved, namely that the direction of the Ontario Regional Board was actually implemented and

put into effect before a move was made with regard to appeal. We have dealt with this principle once before in the case of a union in the B.C. Electric Railway case, where the Regional Board having made a certain direction the union adopted it in writing and then subsequently appealed on it. At that time we tried to lay down the principle that an appellant could hardly adopt a direction that he was appealing from and then subsequently appeal.

On these various grounds we feel that we cannot disturb the decision given by the Regional Board, and accordingly the appeal will be dismissed.

November 17, 1943.

Re: Canadian Vickers, Limited, Fairchild Aircraft, Limited, and Noorduynt Aviation Limited, and International Association of Machinists (Montreal Aircraft Lodge 712)

Reasons for Decision

This is an application for review of the Board's decision dated March 26, 1943* granting full cost-of-living bonus from March 23, 1943 instead of July 1, 1942 as asked by the Union. The matter first came before the Board as an appeal from the Quebec Regional Board; this time we deal with it following an understanding contained in correspondence between the Chairman of the Board and Mr. Paul Fournier, president of the Montreal Trades and Labour Council. Under the terms of the understanding, the review is to be limited to the sufficiency of cost-of-living bonus payments made between June 30, 1942 and March 23, 1943 under the law in force prior to the amendment adding the proviso to section 34 (3) of P.C. 5963 by which the Board was authorized to adjust the bonus to the maximum level.

With regard to the Board's powers prior to March 23rd, 1943, the Union's counsel relied upon section 46 of the Order. His contention is that the words

"The National Board may, with respect to any employer or employee, or any class of employers or employees, direct that any increase or decrease in a cost-of-living bonus or that the commencement of the payment thereof be made at a time and in respect of intervals other than those specified in section 34."

gave the Board an unfettered discretion to order these employers to pay the full bonus from July 1, 1942. With that proposition we are unable to agree. The intent and purpose of Section 46 is to empower the Board to

except employers from the provisions of a *general order* made under section 34 (1) and (2). This is shown by subsection 2 of section 46 which provides that no action is to be taken under it by a Regional Board.

Subsection 3 of section 34 is a provision having nothing to do with general orders; it gives both Regional Boards and this Board authority to adjust in particular cases the amount of a bonus beyond the amount fixed in the general orders. That it should have been placed among a set of provisions dealing exclusively with the making of general orders may be bad draughtsmanship, but no more. Just because subsection 3 of section 34 and section 46 were placed where they are in the Order does not permit us to draw under the latter section a power which would enable us to disregard, by directing back payments of the bonus as we saw fit, the restrictions otherwise clearly placed upon our authority with respect to an employer's obligation as to cost-of-living bonus.

Although strictly outside the scope of the question under review, the Union was given full opportunity to argue that the amendment of March 23, 1943 had a retrospective effect, a contention against which the Board had previously decided.

On this question, the first rule in the interpretation of a statute is to ascertain its meaning from the language used. Here, what was given the War Labour Boards was a power to remedy "unequal and unfair combinations of wage rates and cost-of-living bonus within an industry" by adjusting the bonus "through the use of a month" other than that of the last general increase in wage rates. This does

*L.G. April, 1943, p. 445.

not mean that, once the increased bonus has been calculated "through the use" of a given month, the Board has the power to impose upon an employer the further obligation of paying it from a date prior to the enactment of the legislation. Retrospective payment is a means of adjustment which the legislating body did not see fit to enact. It went no further than to permit the Board to adjust inequalities by raising the amount of a bonus for the future. Remedial legislation should of course receive a liberal construction but even then the rule is that, unless there is a clear intention in the wording of the enactment itself, retroactive effect should not be given when the legislation creates a new obligation on the employers as was the case here.

It was also argued that by virtue of the Board's by-law No. 11 (5), the National Board's decision should take effect from the date (August 25, 1942) of the decision of the Regional Board from which the appeal was taken, "as if originally made by" the Regional Board. Not only does the argument strain the meaning of the by-law, but to give effect to it would be to impose a substantive obligation by means of a mere regulation of procedure.

Coming to matters more relevant under the exchange of letters between the Chairman and Mr. Fournier it becomes necessary to state briefly the history of cost-of-living bonus payments made by these companies.

The Union's first contract was negotiated in 1940 and expired June 30th, 1941. The negotiations for renewal of the agreement involved increases in rates and led to a Conciliation Board under the Chairmanship of Mr. Justice Fortier. On September 26th, 1941 the Board recommended a schedule of rate increases and suggested that all adjustments in wages during the term of the coming agreement should be made by means of a cost-of-living bonus in accordance with the provisions of P.C. 7440, the order in effect at that time. Prior to the announcement of the Board's report two of the companies had begun paying a bonus representing the rise of the index from November 1st, 1940. The Conciliation Board's report was in large measure adopted by the parties and it served as the basis for the new collective agreement signed on November 19, 1941. The agreement provided that July 1, 1941 was to be the index base date for calculation of the cost-of-living bonus and that the bonus, if any, then

being paid would be cancelled and any amount paid on account deducted from back wage increases accruing from July 1, 1941.

The Union contends that it should be relieved of these terms of the bargain on the ground that the parties misinterpreted the recommendation and it asserts that, P.C. 7440 placing the index date at August, 1939, the workers are entitled to the full bonus for the period under review. We have carefully examined Mr. Feiner's interpretation of the relevant clauses of P.C. 7440 and we cannot agree with it. What the Conciliation Board did was quite in conformity with the prevailing Order-in-Council, namely it recommended rates which in their view brought the wages paid by the employers up to a fair and reasonable level and, *for the future*, that adjustments be made by means of a cost-of-living bonus measured from the effective date of the increase in wages. Obviously, the parties themselves so construed the recommendation and signed the contract. Nor can we alter the terms of agreement on another ground asserted by the Union, namely, the mistaken assumption that the contract had to be concluded before the coming into operation of P.C. 8253. As a matter of fact, the contract was not signed until after November 15, 1941 the effective date of the new Order-in-Council prohibiting war increases without the authority of a War Labour Board. In any event, a perusal of the records discloses that the effect of P.C. 8253 upon this agreement did not become a matter of concern until after it had been signed. Collective agreements, like private agreements, are not to be interfered with except in clear cases of fraud or mistake or as authorized by the Wages Control Orders. We are of opinion that this is not a case where there is justification for intervention.

The first bonus payments began on February 15, 1942 in the amount of 90 cents weekly. On August 15, 1942 the bonus was increased, by the Board's general order, to \$1.50 weekly, the amount paid until the amendment of March 23, 1943 and the Board's decision increasing the bonus to the full amount.

Our review of the matter leads us to the conclusion that all legal requirements as to the payment of the bonus during the period under examination appear to have been lived up to.

Accordingly no finding and direction will be necessary.

November 19, 1943.

Re: Central Aircraft Limited (London, Ontario)

Reasons for Decision

The Company appeals from a decision of the Ontario Regional Board refusing permission to increase basic wage rates of senior foremen and assistant foremen from \$70.00 and \$60.00 per week respectively to \$75.00 and \$70.00 for a 60-hour week. Leave to appeal was granted by the Regional Board.

When computed on an hourly basis, we find that the rates applied for are not out of line

with the rates paid to similar classifications in comparable plants nor would the differentials above the rates paid to lead hands and journeymen be unreasonable.

We approve the rates applied for, subject however to the condition that they be adjusted if and when the normal work week is reduced from 60 hours.

The appeal is therefore allowed.

November 23, 1943.

Re: Canada Packers Limited, Swift Canadian Company Limited, Burns and Company and Gainers Limited, all of Edmonton, Alberta, and Packing Plant Employees Federal Union No. 78, Edmonton, Alberta

Reasons for Decision

This is an appeal by the Union from the Regional Board of the Province of Alberta. The application concerned two matters. One was a request for a five cent general increase and the other a demand by the Union for uniform rates in the plants for each classification at the highest rate paid in any one of the plants. Gainers Limited was not a direct party to the appeal but has consented to be bound by any direction to the other three Companies. The question of the direct wage increase was settled while the appeal was pending so there is only one issue left to decide—namely that of uniformity in rates.

During the course of argument the Board suggested that the matter could best be resolved by a competent referee who could deal with the matter in the plants concerned in the City of Edmonton and have the benefit of conferences with management and Union officials. The suggestion of the Board was acceded to by the parties.

The Board was fortunate in securing the services of Professor J. C. Cameron, head of the Industrial Relations Department of Queen's University. Dr. Cameron spent several days in Edmonton going into the matter. In general he has reached the conclusion that full effect cannot be given to the Union's request but has worked out ranges of rates for classifications to be common in all four plants except in the case of present incumbents receiving pay above the top of the range. In the result quite a number of classifications receive automatic increases to bring their pay to the minimum of the range.

We believe that we should endorse wholly Professor Cameron's report without further hearings. Finding and direction will be issued as recommended in the report and will be forwarded together with copies of the report to the parties interested for their guidance. In the circumstances here we feel it would be fair to make any increases resulting retroactive to the date of the appeal, October 1, 1943.

November 24, 1943.

Re: Dominion Oilcloth and Linoleum Company, Limited (Montreal, Que.)

Reasons for Decision

The Company appeals from findings and directions of the Quebec Regional Board dated July 13, 1943, leave having been granted by the Regional Board. There are two matters involved: *first* the determination under the rules set out in section 13 (P.C. 5963) of the rank of a number of classifications; *second*, wage increases to the chief clerk (credit department) and to the private secretary and confidential clerk.

On the first question, our discretion must be governed by the presumption enunciated in section 13 (2), when an employee receives

a salary at the rate of \$250 or more per month he is to be deemed to be above the rank of foreman or comparable rank, unless the nature of his duties and responsibilities or his relationship to other employees indicates clearly that he is not above that rank. All of the employees concerned are paid well in excess of \$250 per month—two of them in fact in excess of \$10,000 yearly. After a careful examination of the duties and responsibilities of the chief chemist, purchasing agent and sales managers, we cannot say that they are clearly not "of an executive character". On the other hand the plant manager, chief accountant, and comptroller all have under

them employees doing supervisory work. The two foremen are in reality division superintendents and are above the rank of foremen for the purposes of the Wages Control Order. All of these employees are under the provisions of the Wartime Salaries Control Order (P.C. 1549).

With respect to the other branch of the appeal, we do not think that there is ground

upon which we can disturb the decision of the Regional Board.

We refrain from dealing with the rank of the foreman-aircraft division, as this is a new matter and was not submitted to the Regional Board.

The appeal is therefore dismissed.

November 24, 1943.

Re: Brotherhood of Maintenance of Way Employees and Railway Association of Canada

Reasons for Decision

This is an application by the Brotherhood for increased rates of pay and vacations with pay.

We propose to retain the matter as far as wage increases are concerned for determination at a later date. We do this because there is still pending before us an application from some seventeen other Brotherhoods for pay increases and we deem it inadvisable to proceed in an individual application without having before us, as we expect soon to be the case, all comparative factors in the whole railway wage structure.

We have, however, reached the conclusion that we should deal with the question of vacations with pay and now proceed to do so.

Our conclusions on the matter have been somewhat delayed because we deemed it advisable to procure a good deal of information on such an important matter involving so many employees not contained in any of the briefs submitted. Accordingly, through proper diplomatic channels, we have endeavoured to obtain authentic information as to what is the present practice in other countries particularly on the railways. This has all taken some little time.

There have been numerous public pronouncements on the advisability of vacations with pay in war time conditions. We shall not deal with them exhaustively being content to select a statement of the men best qualified to pronounce with authority upon the subject generally. We refer to the statement of the Right Honourable Mr. Winston Churchill as follows:

First of all, if we are to win this war—and I feel solidly convinced that we shall—it will be largely by staying power. For that purpose you must have reasonable minimum holidays for the masses of the workers, there must . . . be one day in seven of rest as a general rule, and there must be, subject to coping with bottle-necks and with emergencies which know no law, a few breaks and where possible one week's holiday in the year. Since what I will call

the Dunkirk three months datum period, we have undoubtedly relaxed to that extent. Sunday work is practically eliminated, and brief periods of leisure have been allowed to break the terrible routine strain of continuous employment. I am quite sure that if we had not done so, we should have had a serious crack which would have cost far more in production than these brief periods of rest from labour.

There have of course been pronouncements as well by different Labour Boards including ourselves (Division 4 case).¹ What is perhaps still more important than mere pronouncements on the matter, is the extent to which the vacation with pay is being put into practice as a general condition of work. This Board in its earlier days when differently constituted accepted the principle in its supplementary decision bulletin No. D.B. 172, although it laid down the restriction that the only type of application it was prepared to receive was one by the employer or jointly by employer and employee. We subsequently expressed disapproval with the restriction and stated that in our opinion it was only fair and in accordance with Section 29 of the Wages Control Order that employees should have the right and opportunity to make application without the consent of the employer being required as a condition precedent. This Board and the Regional Boards have received and dealt with a great number of employer applications, all of which has evidenced to us that a steadily increasing number of employers throughout the country have deemed the vacation with pay a desirable condition of work in war time.

We have been unable to see why the non-operating classes of railway workers should be deemed to be in any unique position which makes it imperative that they should not enjoy a privilege more and more generally extended to others. With a view to ascertaining whether such was regarded to be the case in other countries, we have taken the trouble of surveying the situation on our own

¹L.G., June, 1943, p. 752.

²See p. 1636.

initiative. We find that in the United States the vacation with pay has been enjoyed by all railway workers except the running trades since November of 1941. In England it has been extended to the "conciliation grades" since 1919, to the clerical, supervisory and other salaried staffs since 1919-1921, and to the railway shopmen since 1938.

It will be argued of course that this has arisen through collective bargaining prior to the outbreak of war and perhaps was a concession granted as an offset to some other demand. We do not think the argument is by any means conclusive. The fact is that the condition is steadily becoming more and more prevalent and there seems no good reason why the class of railway worker concerned in this application should not enjoy

the privilege merely because the employer does not approve. All working conditions are not necessarily to be of pre-war vintage. Even the Wages Control Order concedes that (Section 29).

Accordingly, effective January 1, 1944, the privilege of one week's vacation with pay in the calendar year will be extended to the hourly rated employees covered by the application. In the case of employees whether hourly rated or otherwise already enjoying a week's vacation or more there will be no change. The formal direction may well embody the conditions laid down in D.B. 17 unless the parties otherwise agree.

Interim finding and direction accordingly.

November 24, 1943.

Re: International Brotherhood of Firemen and Oilers, Round House and Railway Shopworkers and Canadian Pacific Railway Company

Reasons for Decision

In this case on September 15, 1943* we refused to grant an application for vacations with pay pending disposition of an application for wage increases.

In the light of our consideration of the Maintenance of Way case and others involving

vacations with pay we have now reached the conclusion that our former direction should be withdrawn and the application granted to the same extent and for the same general reasons as in the Maintenance of Way case.

Finding and direction accordingly.

November 24, 1943.

Re: Canadian Brotherhood of Railway Employees and other Transport Workers and Canadian National Railways

Reasons for Decision

This is an application for wage increases and vacations with pay.

As we have done in the case of the Brotherhood of Maintenance of Way Employees, we propose to retain the matter as far as wage increases are concerned pending determination of an application filed with the Board but not yet heard so that in deciding the matter

we shall have before us all comparative factors in the whole railway wage structure.

On the other question of vacations with pay we have decided to grant the application to the same extent and for the same general reasons as in the Maintenance of Way case. The reasons in that case are being released concurrently.

Interim finding and direction accordingly.

November 24, 1943.

Re: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company

Reasons for Decision

This is an application by the Brotherhood for vacations with pay as a condition of work.

We have reached the conclusion that the application should be granted to the same

extent and for the same general reasons as in the Maintenance of Way case.

Finding and direction accordingly.

November 24, 1943.

* L.G., Oct., 1943, p. 1350.

**Re: Dominion Coal Company Limited, Acadia Coal Company Limited and
Old Sydney Collieries Limited and United Mine Workers of America,
District No. 26**

Reasons for Decision

This is an application by the Union for wage increases. There were three main claims: (a) Increase in datal rates of \$1.25 per day; (b) Increase in contract rates of 7.8 per cent and (c) Payment of balance of cost of living bonus under the McTague Board award of 1941. Besides these principal claims there were some 175 claims for particular adjustments. The companies' estimate of the overall dollar cost if all claims were granted is \$15,460,225 yearly, or an increased cost on 1942 production figures of \$3.44 per ton of coal.

On the hearing practically no evidence was offered on the particular adjustment demands. The argument was confined in the main to the question of increased datal and contract rates. We propose to deal with the application on that basis.

The conclusion at which we have arrived makes it necessary to deal with the recent strike in the Alberta and British Columbia coal fields and what has resulted directly or indirectly therefrom.¹

In the first place it should be pointed out that this Board is the one regularly constituted body set up to deal with wages in coal mines. In the next place it should be emphasized that a previous application had been before this Board and was finally disposed of on September 2, 1943. The demands on which District 18, U.M.W.A. Executive called a strike vote on September 21, 1943, were never at any time before this Board. Evidently the Union Executive decided as a matter of policy that direct and illegal strike action was the way to achieve its ends rather than take the risk of justifying them under existing wage legislation before this Board. It appears as if the plan has succeeded. The result has not enhanced this Board's prestige. What is perhaps more important is that once again it has been demonstrated that outlaw methods properly timed make quite an impression. Our work in administering the wages order according to its general intent is not made less difficult by such successful outbreaks although in this particular Nova Scotia case our task in reaching a conclusion is made easier by the results obtained by outlaw action in the West. We cannot see why the coal miner

of Nova Scotia who has brought forward his case in the way lawfully provided should be treated in principle with less magnanimity than the coal miner of the West who has achieved his ends by illegal strike action.

Probably no group of persons has a better opportunity for observing how these breakthroughs spread and fan out than we have. We have watched carefully and with a considerable degree of alarm the spread of increasing wages resulting from the breakthrough in steel. We realize what consequences almost inevitably follow. If it was proper for the O'Connor Commission to base its decision—frankly stated to be a compromise one—to any extent on a comparison with United States coal mine wages and shipyard and logging wages in Canada as invited by District U.M.W.A. 18, then who is to say to the railway worker that the same method of comparison is not open to him. This Board's policy seems to have been in error.

The increased wages in the Western coal mines are being met by price increases in coal. We presume that any increase granted to Nova Scotia coal miners will have to be met in the same way. The production per ton per man per day is considerably less in the Nova Scotia mines than it is in the Western mines. The price increase to compensate must work in the reverse way. It is doubtful if price increases can be held to coal alone because of its importance as a factor of cost in other industry notably the railway industry and paper and pulp to say nothing at all of the manufacture of more homely consumable goods.

It must be apparent to all that the process cannot be allowed to ramble on or otherwise the price ceiling must break. When that happens high money wages will purchase too little of the necessities of life for the worker and his family. There will be none left to burn his pocket. We know that sane labour realizes the consequences bound to follow from a break in the price ceiling. The trouble is that sane labour is in the process of being swallowed in a vortex as is also the work of this Board.

Nevertheless in spite of all these considerations and having in mind probable post-war reverberations when Santa Claus on Parliament Hill will be without sufficient funds to extend present benefits and pay his war debts as well, we feel that we must extend to the Nova Scotia miners substantially the same treatment as has been wrung by Mr. Livett

¹ The Report of the Royal Commission on Western Coal Mines is printed in full elsewhere in this issue on p. 1632.

and his associates from the pockets of the consuming public and from the pockets of workers whose destinies Mr. Livett in a professional capacity is supposed to guide. Accordingly, to paraphrase the direction of the O'Connor Commission "having regard to the emergency conditions existing", this Board directs an increase in the wages paid to persons engaged in manual employment in the operation of underground coal mines owned or operated by the three respondent companies in the Province of Nova Scotia of \$1 per day for all day wage, contract and other employees not above the rank of foreman or comparable rank, even though we doubt it will result in greater production of coal.

As to the vacations with pay, the direction of the O'Connor Commission puts us in a bit of a predicament. This Board and its predecessors have given considerable study to this question. As a result, with the Regional Boards we have established a fairly consistent policy during war time of granting one week's vacation with pay with certain safeguards against absenteeism where vacations with pay were not a condition of work prior to November 15, 1941. The O'Connor Commission has evidently embarked on a policy of its own. We must presume that it was done after the most thorough and careful consideration. Nevertheless we do not propose to adopt it. That would be manifestly unfair to thousands of workers who are presently enjoying one week's vacation with pay. Accordingly, although the privilege was not applied for in this case we direct, effective from January 1, 1944, one week's vacation with pay in the calendar year in substantially the terms of Directive Bulletin D.B. 17 unless the parties otherwise agree.

The question of retroactivity in the circumstances here is troublesome. On the one

hand the miners have remained at work without a contract while negotiations were taking place and this application was pending. On the other it is quite clear that the Companies cannot meet the wage increase from their own resources without an increase in the price of coal or a subsidy. Any increase in the price would not permit recoupment for retroactive wages.

On the argument before us on the question of retroactivity it was pointed out that while Mr. John L. Lewis's U.M.W.A. policy in the United States was "no contract no work", that policy had not been adopted in Nova Scotia and that there was a strong feeling that it should be adopted. The Livett policy in U.M.W.A. District 18 in the Western coal mines judged from acts seems to be to make a long term contract and while it is still in force breach it by illegal strike to obtain better than the agreed wages and working conditions. U.M.W.A. policy generally in war time is rather difficult to rationalize. There appears to be one thing in common between Mr. Lewis and Mr. Livett in war time—namely, to by-pass constituted authority—and get away with it.

In the circumstances here we feel there is only one equitable solution. We shall not place U.M.W.A. District 26 in any worse position than U.M.W.A. District 18. Accordingly, we adopt another O'Connor Commission formula and make wage increases retroactive to November 1, 1943. If this results in an undue burden on the Companies perhaps the coal administrator can be prevailed upon.

The application on behalf of workers employed at the International Pier at Sydney and certain adjustments spoken to by Mr. Munro will be dealt with at a later date.

December 3, 1943.

Revocation of "No-Strike" Order in Coal Mines

REFERENCE is made on page 1647 of this issue of the LABOUR GAZETTE, to the passing of Order in Council P.C. 8021 of October 14, 1943, prohibiting strikes and lockouts in coal mining during wartime in view of the national emergency in that industry.

Since its adoption, the new Wartime Wage Control Order P.C. 9384 has been promulgated, providing penalties for non-compliance. Accordingly, the government has enacted Order in Council P.C. 9600 of December 14,

1943, revoking Order in Council P.C. 8021. The text of the revoking Order is as follows.

Whereas the Minister of Labour reports that, having regard to the provision of the Wartime Wages Control Order 1943, Order in Council P.C. 9384, of December 9, 1943, it is no longer necessary or desirable that Order in Council P.C. 8021 of October 14, 1943, prohibiting strikes and lockouts in connection with the mining of coal, should continue in effect.

Now therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to revoke and doth hereby revoke Order in Council P.C. 8021 of October 14, 1943.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the *LABOUR GAZETTE* for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Prohibition of Strikes and Lockouts in Mining of Coal

THE following Order in Council, prohibiting strikes and lockouts in connection with the mining of coal for the duration of the war, was passed on October 14.

Text of P.C. 8021

Whereas the Minister of Labour reports that it is advisable, in view of the emergent condition in the production of coal in Canada, to prohibit strikes or lockouts by employees or employers engaged in coal mining in Canada for the duration of the state of war now existing;

Therefore, His Excellency the Governor General in Council, on the recommendation

of the Minister of Labour, and under and by virtue of the powers conferred by the War Measures Act, is pleased to order and doth hereby order as follows:—

1. No employee employed in the operation of any coal mine in Canada shall go on or take part "in any strike during the state of war now existing.

2. No operator of a coal mine in Canada shall cause a lockout from a coal mine in Canada during the state of war now existing.

3. No person shall, during the state of war now existing, incite, encourage or aid any operator of a coal mine in Canada to cause a lockout from a coal mine in Canada or any

employee employed in the operation of a coal mine in Canada to go on or take part in any strike.

4. Every employee who goes on or takes part in any strike in contravention of this order shall be guilty of an offence and liable on summary conviction to a fine of not less than twenty-five dollars nor more than one hundred dollars or to imprisonment for a term of not less than one month nor more than three months or to both such fine and such imprisonment in respect of each day or part of a day that such employee is on strike.

5. Every operator of a coal mine in Canada who causes a lockout in contravention of this Order shall be guilty of an offence and liable on summary conviction to a fine of not less

than one hundred dollars nor more than one thousand dollars or to imprisonment for a term of not less than three months nor more than one year or to both such fine and such imprisonment in respect of each day or part of a day that such lockout exists.

6. Every person who contravenes or omits to comply with section 3, of this Order shall be guilty of an offence and liable on summary conviction to a fine of not more than two thousand dollars or to imprisonment for a term of not more than one year or to both such fine and such imprisonment.

7. Notwithstanding anything contained in this Order no fine in excess of five thousand dollars or term of imprisonment in excess of two years shall be imposed in respect of any offence under this Order.

Recent Proceedings Under the Industrial Disputes Investigation Act

DURING the month of November six Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:—

(1) Between the Paton Manufacturing Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 101, United Textile Workers' Organizing Committee (C.C.L.).

(2) Between the Collingwood Shipyards, Limited, Collingwood, Ontario, and its employees, members of Local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.).

(3) Between the Dominion Textile Company, Limited (General Machine Shop and Merchant Branches), Montreal, P.Q. and its employees, members of the United Textile Workers of America.

(4) Between the Office Specialty Manufacturing Company, Limited, Newmarket, Ontario, and its employees, members of Local No. 7, National Union of Furniture Workers (C.C.L.).

(5) Between Montreal Cottons, Limited, Valleyfield, P.Q., and its employees, members of Local 100, United Textile Workers of America.

(6) Between West Coast Shipbuilders, Limited, and Hamilton Bridge (Western), Limited, Vancouver, B.C., and certain of their employees, members of various trade unions, as follows: Local No. 1, Boilermakers and Iron Shipbuilders' Union of Canada; Local No. 2, Dock and Shipyard Workers' Union of Vancouver and District; Lodge 692, International Association of Machinists; Local No. 115, International Union of Operating Engineers;

Local No. 1, Amalgamated Building Workers of Canada; Local No. 2, Amalgamated Shipwrights, Joiners and Boatbuilders and Caulkers; Local No. 170, United Association of Plumbers and Steamfitters; and Local No. 3, Amalgamated Electrical Workers.

The text of the reports of the Boards will be found at the conclusion of this statement.

Applications Received

During the month of November, seven applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour, as follows:

(1) From employees of P. D. Bates Company Limited, Ridgetown, Ont., members of the Federation of Industrial Workers (C.C.L.). The dispute, which concerns the negotiation of a collective labour agreement was said to affect 59 employees directly and 22 indirectly. On November 15, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(2) From employees of the Acton Rubber, Limited, Acton Vale, P.Q., members of the

*By P.C. 5963, the National and Regional War Labour Boards are specially charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

United Rubber Workers of Acton Vale. The dispute which developed out of a request for union recognition, seniority rights, classification of work, wage rates for each classification, recognition of grievance committee, closed shop and the re-instatement of three dismissed employees, was said to affect 290 employees. On November 9, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. In his report, the Commissioner recommended that the application for a Board be denied, inasmuch as it was ascertained that the dispute did not come within the scope of the Industrial Disputes Investigation Act as amended. Subsequently the application was withdrawn at the request of the applicant union and the interested parties notified accordingly.

(3) From employees of C. S. Hyman Company, Limited, and Hyman Leaders, Limited, London, Ont., members of Local 25, Shoe and Leather Workers Organizing Committee. The dispute, which was said to affect 210 employees, concerns union recognition and the negotiation of a collective labour agreement. On November 15, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. In an interim report, the Commissioner advised the Department that he had obtained the joint consent of the parties to the dispute, to the holding of a vote in the plant to determine the bargaining agency desired by the employees and that they had agreed to abide by the decision of the election. The company also agreed to recognize the union receiving the vote of the majority of the employees. On December 1 the vote was taken and resulted in the majority in favour of the applicant union which requested that the application for a Board be held in abeyance pending the outcome of negotiations for an agreement with the Companies.

(4) From employees of the Saint John Dry Dock and Shipbuilding Company, Limited, East Saint John, N.B., members of Local No. 3, Industrial Union of Marine and Shipbuilding Workers of Canada. The dispute, which concerns union recognition, was said to affect 92 employees directly and 1,500 indirectly. On November 20, Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(5) From employees of the Aluminum Company of Canada, Limited, Shawinigan Falls, P.Q., members of the International Union of Aluminum Workers. The dispute, which arose

out of a request for union recognition and the negotiation of a collective labour agreement, was said to affect 2,500 employees.

(6) From employees of Knechtels, Limited, Hanover, Ont., members of Local No. 3, National Union of Furniture Workers (C.C.L.). The dispute, which concerns the negotiation of a collective labour agreement covering employees of the company's aircraft division, was said to affect 59 employees. On November 30, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(7) From employees of the Canadian Bridge Company, Limited, Plant No. 3, Windsor, Ont., members of Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America. The dispute, which developed out of the refusal of the company to agree to amendments to the present agreement establishing a voluntary check-off of union dues, was said to affect 787 employees.

Boards Established

On November 5, a Board of Conciliation and Investigation was established to deal with a dispute between the Canadian Marconi Company, Montreal, P.Q., and its employees, members of Division No. 59, Canadian Marconi System, Commercial Telegraphers' Union (L.G., Oct., 1943, p. 1356). Mr. Bernard Rose, K.C., Montreal, P.Q., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been unsuccessful in his efforts to bring about a settlement and recommended that a Board of Conciliation and Investigation be established. The personnel of the Board is as follows: His Honour Judge Ian M. MacDonell, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs Walter A. Merrill, K.C., Montreal, P.Q., and Drummond Wren, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

A Board of Conciliation and Investigation was established on November 15, to deal with a dispute between the Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga Mills), Montreal, P.Q., and its employees, members of the United Textile Workers of America (L.G., Oct., 1943, p. 1356). Mr. Bernard Rose, K.C., who was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been unable to affect a mutually satisfactory settlement of the dispute, and recommended that a Board be established. The personnel of the Board is

as follows: Honourable Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed on the joint recommendation of Messrs D. A. Paterson and Paul Fournier, both of Montreal, P.Q., employer's and employees' nominees on the Board.

On November 27, a Board of Conciliation and Investigation was established to deal with a dispute between the Dominion Rubber Company, Limited (Papineau Factory), Montreal, P.Q., and its employees, members of the Distillery, Rectifying, Brewery and Wine Workers International Union (L.G., Nov., 1943, p. 1498). Mr. Bernard Rose, K.C., Montreal, P.Q., who was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, recommended that a Board be established in view of the fact that the company declined to recognize the applicant union. Mr. Paul Fournier, Montreal, P.Q., was appointed a member of the Board on the nomination of the employees, and at the end of the month the employing company had been requested to nominate a person to be appointed to the Board.

Other Boards Fully Constituted

The Board of Conciliation and Investigation established on October 22, to deal with a dispute between the Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ontario, and its employees, members of Local 189, United Rubber Workers of America (L.G., Nov., 1943, p. 1497) was fully constituted on November 13. The personnel of the Board is as follows: The Honourable Justice W. D. Roach, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs J. J. Robinette, and F. Andrew Brewin, both of Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The constitution of the Board of Conciliation and Investigation established on October 13, to deal with a dispute between the Scott Tool and Machine Company, Montreal, P.Q., and its employees, members of Aircraft Lodge 712, International Association of Machinists (L.G., Nov., 1943, p. 1498) was completed on November 10. The personnel of the Board is as follows: Mr. J. Wright, Montreal, P.Q., chairman, appointed on the joint recommendation of Messrs George S. Thom, Ville la Salle, P.Q., and Paul Fournier, Montreal, P.Q., employers' and employees' nominees on the Board.

Industrial Disputes Inquiry Commission at Arvida

In December, 1942, an application was received for the establishment of a Board of Conciliation and Investigation from employees

of the Aluminum Company of Canada, Limited, Arvida, P.Q., members of the International Union of Aluminum Workers No. 22022. Ten thousand employees were said to be affected by the dispute which concerns union recognition. Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to make an investigation (L.G., Jan., 1943, p. 68). Subsequently, in April, 1943, Mr. R. Trepanier, Industrial Relations Officer, Dominion Department of Labour was successful in obtaining a temporary settlement of the dispute on the following basis: (1) the International Union of Aluminum Workers would be given representation on the Parity Committee administering the agreement between the Company and the National Catholic Syndicate of Aluminum Workers. (2) the International Union would agree to maintain the terms of the existing agreement; and (3) that a representation vote would be taken between November 15 and November 30, to ascertain the employees' desires with regard to their bargaining agency.

In September, 1943, representatives of the International Union indicated that they were anticipating that the representation vote would be taken under the supervision of the Dominion Department of Labour in conformity with the temporary settlement reached in April. The National Catholic Syndicate stated that it had not agreed to the taking of a representation vote but had expressed its willingness to participate in such a vote if, at the time the vote was contemplated, there was either Dominion or Provincial legislation compelling the taking of such a vote. On the other hand, the Company suggested that an examination of the membership records of both unions be made.

On November 19, under the provisions of Order in Council P.C. 4020, the Minister of Labour established an Industrial Disputes Inquiry Commission for the purpose of determining the proper bargaining agency of the employees upon the expiration of the existing agreement between the Company and the National Catholic Syndicate. The Commission was composed of Mr. Cyprien Miron, Chief Conciliation Officer of the Quebec Department of Labour, chairman; and Messrs Louis Philippe Boily and Philip Cutler, members on the nomination of the National Catholic Syndicate and the International Union respectively. Subsequently, on November 23, Mr. Adrien Villeneuve replaced Mr. Cutler as a member of the Commission.

Pending the receipt of the Commission's report, the Company and the National Catholic Syndicate have made a joint application to the Provincial Department of Labour for an extension of the termination date of

their agreement beyond November 30 as provided in the agreement.

Other Disputes Referred to Industrial Disputes Inquiry Commissioner

An application for the establishment of a Board of Conciliation and Investigation was received on October 19, from employees of the Horseshoe Lake Mining Company, Ormiston, Sask., members of Local 2, Sodium Sulphate Workers Union (L.G., Nov. 1943, p. 1496). On November 15, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Man., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

On November 8, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between Grover Mills, Limited, Montreal, P.Q., and its employees, members of the National Clothing Workers' Union, Inc. (L.G., Nov. 1943, p. 1497). In his investigation the Commissioner found that the dispute did not come within the scope of the Industrial Disputes Investigation Act as amended, inasmuch as only two per cent of the company's total production consisted of war work, and therefore recommended that the application for a Board of Conciliation and Investigation be denied. The interested parties were advised that a board would not be established.

An application for the establishment of a Board of Conciliation and Investigation was received on October 27, from the employees of the Dominion Rubber Company, Limited, Kitchener, Ontario, members of Local 80, United Rubber Workers of America (L.G., Nov. 1943, p. 1497). On November 2, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to inves-

tigate the dispute. Notwithstanding the good relationship existing between the parties, the Commissioner was unable to bring about an agreement, and consequently on the recommendation of the Commissioner a Board was established to deal with the dispute and Mr. F. A. Brewin, Toronto, Ont., was appointed a member of the Board on the nomination of the employees.

On November 1, Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was authorized as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute between Purdy Brothers, Limited, Halifax, N.S., and its employees, members of Local No. 1, Industrial Union of Marine and Shipbuilding Workers of Canada (L.G., Nov. 1943, p. 1497). The Commissioner was successful in having the company and the union reach an amicable settlement of the dispute, and on November 10, the representative of the union requested that the application for a Board be withdrawn. The agreement between the company and the union is summarized in the article "Recent Collective Agreements" appearing elsewhere in this issue.

Other Settlement

On November 30, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., who was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between Canadian Vickers, Limited, Montreal, P.Q., and its employees, members of Local 13, Boilermakers and Iron Shipbuilders Union of Canada (C.C.L.) (L.G., Nov. 1943, p. 1496), notified the Department that he had been advised by the representative of the union that the application for a Board was being withdrawn as an amicable understanding had been reached between the parties in settlement of the dispute between them.

Report of Board in Dispute between Paton Manufacturing Company, Limited, Sherbrooke, P.Q., and its Employees

On November 1, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Paton Manufacturing Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 101, United Textile Workers' Organizing Committee (C.C.L.) (L.G., Oct., 1943, p. 1358).

The personnel of the Board was as follows: His Honour Justice Alfred Savard, Quebec, P.Q., chairman, appointed by the Minister of

Labour in the absence of a joint recommendation from Messrs. D. A. Paterson and Guy M. Desaulniers, both of Montreal, P.Q., the employer's and employees' nominees on the Board.

The report of the Board was signed by the chairman and Mr. Desaulniers, employees' representative. Mr. D. A. Paterson submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

In the matter of the Industrial Disputes Investigation Act and of the dispute between The Paton Manufacturing Company Limited, Sherbrooke, P.Q., and employees members of Local 101, United Textile Workers Organizing Committee (C.C.L.)

TO THE HONOURABLE
THE MINISTER OF LABOUR,
OTTAWA, ONTARIO.

Sir:—

The Board of Conciliation and Investigation which was appointed by you to enquire into the above mentioned dispute has the honour to report and recommend, as follows:—

The first session of the Board was held in Montreal, Que., on Friday, October 22, and subsequent sessions were held on Saturday, October 23, and Saturday, October 30.

The employees were represented by:

Messrs. Arthur Williams, M.L.A. of Oshawa, and G. H. Boisvert, of Sherbrooke, Que.

And the Paton Manufacturing Company, Limited, was represented by:—

Messrs. F. R. Daniels and Anderson.

On the 13th of July, 1943, Local 101 Textile Workers Organizing Committee had filed an application for the appointment of the Board of Conciliation and Investigation. The nature and the cause of the dispute were the fact that the Company refused to deal with the union's representatives before being satisfied that the union represented the majority of the plant employees.

On the 26th of July Mr. J. W. Booth, managing director of the Company, advised Local 101 as follows:—

"The Paton Company agrees to recognize the Union as the bargaining agent of its employees and will undertake to open negotiations for an agreement within 3 days after, or July 29, 1943."

The 22nd of October, Messrs. Williams and Daniels had a conference to discuss the details of the contract but the final outcome was that the Company took the stand that it would not discuss and sign any agreement until the different War Labour Boards had finally adjudicated on the wages rates.

It was suggested by the employees that the contract be signed immediately by the Company, 'with the reserve' that the final wages shown be inserted at a later date after the final decision of the Labour Boards, and the wages of the contract to be the wages which should prevail during the life of the agreement.

The employees were holding for an immediate signing of the contract and the Company wanted to wait until after the decisions of the War Labour Boards. It was suggested by this Board and finally agreed by both parties that they would wait to discuss and negotiate a contract, until the final decision of the War Labour Boards, subject to the following conditions:

First: The Company for ordinary matters and labour relations with its employees, agreed to negotiate with a committee consisting of its own employees and union representatives Williams and Boisvert, as a temporary modus vivendi pending the final consummation of a joint agreement between the Union (TWOC Local 101) and the Company.

Second: The Company agree to meet the union representatives Williams and Boisvert at an early date after the decision of the War Labour Boards has been made known with a view of concluding a union agreement.

Third: The Board agree to reconvene to deal with any difficulty which might arise if asked to do so by either party.

Fourth: The union undertakes to do its part to clear away any obstacle regarding wages and other demands by making an immediate application to the War Labour Board.

It is to be hoped that no unnecessary delays will occur, and that both parties should soon be in a position to discuss and conclude an agreement which will cover all matters covering relations between the Company and its employees members of the union.

The whole respectfully submitted,

(Sgd.) Alfred Savard,

(Sgd.) Guy M. Desaulniers.

Montreal, Que.,

October 30, 1943.

Minority Report

Montreal, 3rd November, 1943.

Re: The Paton Manufacturing Co. Ltd., Sherbrooke, P.Q., and its Employees members of Local 101, United Textile Workers Organizing Committee (C.C.L.)

THE HON. HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA, ONT.

I refer to the majority report of the Board of Conciliation appointed by you herein, signed by the Chairman, The Honourable Mr.

Justice Savard and by Mr. Guy M. Desaulniers, the representative of the employees and dated October 30, 1943.

I very much regret the necessity, as the representative of the employer Company on the Board, of submitting a minority report which, however, I hereby do.

With the general outline of the case and the proceedings before the Board as stated in the majority report, I am in agreement with the exception of the provisions of condition first appearing on page 2.

In explanation, the Company did agree to negotiate with a committee of its own employees who are members of the Union, on problems or grievances arising within the plant, pending the execution of an agreement. The Company, however, *did not* agree and *does not* agree to discuss such matters with non-employees (Messrs. Williams and Boisvert, paid union officials) until the matter of wages, etc., has first of all been disposed of by the appropriate War Labour Board.

Report of Board in Dispute between Collingwood Shipyards, Limited, Collingwood, Ontario, and its Employees

On November 8, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Collingwood Shipyards, Limited, Collingwood, Ontario, and its employees, members of Local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada (L.G. Oct., 1943, p. 1357).

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ontario, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. L. A. Forsyth, K.C., Montreal, P.Q., and Drummond Wren, Toronto, Ontario, appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Drummond Wren, employees' representative on the Board. Mr. L. A. Forsyth, K.C., submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

Re: Industrial Disputes Investigation Act, and re dispute between Collingwood Shipyards Limited, Collingwood, and its employees, members of Local 4, Industrial Union of Marine and Shipbuilding Workers of Canada.

At the last moment the representatives of the Union pressed the Board to recommend such procedure. Instead of recommending the practice, however, the majority report makes it appear as a condition to which the Company agreed, which is emphatically not the case. The majority report errs in the foregoing regard, and the undersigned is confident that his contention will be sustained on your referring the matter to the Chairman of the Board.

It is considered, moreover, that, in view of the recognition of the Union by the Company and the opportunity thereby given to the Union of bringing the matter of wages before the Labour Board for adjustment (which might have been done last July) such matters as discussions with non-employees could very well wait a while longer, with the prestige of no official of the Union becoming impaired.

I have the honour to be, Sir,

Your obedient servant,

(Sgd.) D. A. Paterson.

TO THE HONOURABLE

HUMPHREY MITCHELL, M.P.,

MINISTER OF LABOUR,

OTTAWA, ONT.

Sir:—

The Board of Conciliation and Investigation appointed by you to deal with the above dispute, has now the honour to submit its report.

The complaint of the applicants was: "Refusal on the part of the Company to meet a Committee from the Union to negotiate a Union contract covering working conditions, including Union recognition." The answer of the employer to this complaint was that there was an existing agreement with the employees.

It appears that in 1940 a Board of Conciliation was appointed upon the application of a Local of the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, and several other Unions, all of which were affiliated with the American Federation of Labour. The report of the Board is published in the October, 1940, number of the LABOUR GAZETTE. As a result of the report an agreement was signed with the applicant Unions. It should be noted, however, that the Board did not find that these Unions represented a majority of the employees. The agreement signed was between the Collingwood Shipyards, Limited, and its employees, and was signed by the Union representatives on behalf of the employees.

The agreement referred to provided that it should continue to be in force until November 30, 1941, and for each succeeding period of one year, ending November 30, unless notice terminating the agreement be given by either party. Notice of termination was given by some of the Unions in the Autumn of 1941, and negotiations were commenced to settle terms of renewal. At this time the Unions claimed that they represented 90 per cent of the employees. However, to ensure that all parties were represented the employer permitted some employees apart from the AF of L Unions to be present at the negotiations. Discussions continued until January 6, 1942, by which time the terms of a draft agreement had been settled. These terms are in the opinion of the Board rather sketchy; there were two parts to the draft, one relating to working conditions, and the other to wages. It was of course necessary that the provisions relating to wages should be approved by the proper authorities. Such approval however has never been obtained. The employees refused to consummate the agreement until such approval might be obtained; the agreement, therefore, was never signed. It is also clear from the evidence before the Board that its provisions were never actually implemented. On enquiring from the employer if the grievance procedure, etc., and other terms of the agreement were operating, he said that such operation had been "sabotaged" by the present applicants. Whatever may be the facts as to this, the Board is of the opinion that it is impossible for it to find there is an agreement in force at the plant at present.

In view of the foregoing, the Board is at a loss without further evidence to make any recommendation as to the proper bargaining agency for the employees. It is claimed by the applicant Union that they have as paid up members over 75 per cent of the employees, and they say that they doubt if the Craft Unions have any appreciable membership. They have agreed to abide by the result of a representation vote, and have undertaken to retire from the plant if they do not obtain a substantial majority.

The Company's reason throughout for its refusal to agree to a vote has been that they were bound by the existing agreement. For the reasons indicated, the Board is of opinion that there is no such agreement, and therefore recommend that a representation vote should take place, at which the employees may have an opportunity to signify whether they wish to be represented by the applicants or not. It is hoped in view of our findings in regard to the agreement that the Company may agree to the desirability of holding such a

vote to clear up the present troublesome situation. If, however, a vote is not agreed to by the Company, the Board has no further recommendations to offer. It does suggest, however, if a vote takes place, that it would be advisable to reassemble the Board to make recommendations upon the result of such a vote.

All of which is respectfully submitted.

Dated at Toronto this 27th day of October, 1943.

(Sgd.) Ian M. Macdonell,
Chairman.

(Sgd.) Drummond Wren,
Employees' Nominee.

Minority Report

Re: Industrial Disputes Investigation Act, and re dispute between Collingwood Shipyards Limited, Collingwood, and its employees, members of Local 4, Industrial Union of Marine and Shipbuilding Workers of Canada.

TO THE HONOURABLE
MINISTER OF LABOUR,
OTTAWA, CANADA.

Sir:—

The undersigned member of the Board of Conciliation and Investigation established in respect of the above dispute pursuant to the Industrial Disputes Investigation Act reports as follows,—

After hearings of the Board held in the City of Toronto, at which all the interested parties were given an opportunity to present their submissions, it appeared that the so-called dispute arose from the refusal of the employer to meet with representatives of Local No. 4 of the Industrial Union of Marine and Shipbuilding Workers for the purpose of negotiating a collective agreement with its employees, and like refusal by the employer to recognize the said Union as the exclusive bargaining agency of the employees.

It is with great regret that I find myself compelled to disagree in the result with the conclusions of the Chairman of this Board and my colleague, Mr. Wren. Their wide experience in matters of this kind I fully appreciate, and their attitude during the hearings and at our discussions was one evidencing a keen desire to reach a fair, impartial and satisfactory solution of the dispute.

There appears to be little difference between the parties to the dispute as to the facts.

Perhaps the history of labour relations at the plant during the past three years affords

a point of departure from which one can embark upon a study of present conditions as disclosed at the hearings of the Board.

In 1940 the question of Union recognition and the exclusive of a collective agreement at Collingwood Shipyards Limited had resulted in the establishment of a Board of Conciliation and Investigation. The present applicant Union was not, however, interested in or a party to the proceedings before that Board, which had been set up upon the application of various craft unions affiliated with the American Federation of Labor or the Trades and Labour Congress of Canada.

Following upon the report of that Board in October 1940, a collective agreement was concluded between the employing company and its employees which agreement was signed by the craft unions, to which I have referred, on behalf of their membership and had been negotiated by representative employees of the Company assisted by the National or Regional Officers of these unions.

This agreement was, by its terms, to remain in force until November 30, 1941, and thereafter from year to year unless terminated pursuant to the provisions of the agreement on that behalf.

In due time notice was given to the employer by certain of the Unions signatory to the agreement that they wished to re-open or abrogate this agreement and enter upon negotiations for another.

Some point was made before us by a representative of one of the craft unions that his organization had never given notice of termination and had *signed* no new agreement and that therefore the agreement was still in force as between his union and the employer. In the view that I take of the whole case, I cannot give the effect to this contention.

Negotiations for a new contract were entered upon and at meetings held on the 6th and 7th of January, 1942, agreement was reached between those participating in these negotiations upon all matters in issue save that of rates of wages. Upon this subject, which was then the subject of official enquiry and still awaits decision by the National War Labour Board, it is obvious that the parties could make no binding agreement.

The employees were represented in the negotiations last referred to by individuals selected by themselves and had the benefit of the assistance and advice of officers of their Unions, notably Mr. W. J. Coyle, International Vice-President of the International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America. Mr. Wolvin, President of the employing Company, says of that Union that, from a jurisdictional

viewpoint, it represents "much the larger portion of our employee classifications".

Both Mr. Wolvin and Mr. Coyle appeared before the Board and both agreed that during the negotiations of January, 1942, Mr. Coyle acted as the chief spokesman for the employees although there were others present representing them.

The matters agreed upon were reduced to writing and the draft agreement was initialled by Messrs. Coyle and Wolvin. Minutes of a meeting of employees at which the items of the agreement were discussed and approved were produced before us.

The agreement was not signed and has not since been signed and we are informed by Mr. Wolvin, Mr. Coyle and representatives of other craft unions who were interested and were present at the negotiations that the sole reason for the failure to execute it formally was the desire first to have the new wage scales incorporated in it.

It was contended on behalf of the Company and of those unions which had signed the previous agreement that this later agreement was in force and should be recognized by the Board, although, as Mr. Wolvin admitted in answer to the Chairman, the machinery created by it is not now functioning due, as Mr. Wolvin explained, to "sabotage" of the agreement by the applicant Union.

The question which naturally arises is,—was there an agreement in existence under the circumstances which I have narrated above. In my opinion there was a valid agreement consummated by persons duly authorized to represent the parties. I cannot accept the suggestion that it is a prerequisite to the validity and effectiveness of an agreement that it be in writing and signed in a formal way by the parties to it unless some provision of law exists which imposes such a condition. I know of no such provision relative to collective labour agreements.

It is now alleged that since that agreement was reached the employees have changed their Union allegiance and that they now desire to be represented by the applicant Union. It is suggested by Mr. Coyle and those who support his trade union group that advantage has been taken by the applicants of the discontent caused by the failure of the National War Labour Board to settle the wage question and that by promises to remedy that situation the seduction of the employees has been accomplished.

After the conclusion of this agreement the International Unions, through Mr. Coyle and others, continued to press the claims of their members on the wage question, as they had

done before. In the meantime, however, but some six months after the agreement had been reached, the applicant Union entered the labour field at Collingwood and between July of 1942 and May of 1943 had reached a stage of organization which they claim enabled them to assert their right to represent the employees. Before this Board the statement was made that 75 per cent of the employees are now adherents of this Union.

I am of the opinion that the so-called dispute is what is known in trade union parlance as a "jurisdictional dispute", and is in reality a dispute between trade unions and not between employer and employee.

Believing, as I do, that there still exists a valid agreement between Collingwood Shipyards Limited and its employees made in conformity with the principles laid down in P.C. 2685 and in no way conflicting with either the letter or the spirit of any enactment or authoritative decree affecting labour relations, it follows that the outcome of any vote which might now be taken would not and could not alter the intrinsic aspects of my conclusion; and I, therefore, cannot agree with my colleagues that the taking of a representation vote will aid in the solution of the difficulty.

I might add that I have no opinion to express as to the relative merits of the rival unions involved in the controversy, nor do I think that the methods followed by the applicant in this case are altogether foreign to the philosophy of those whom it seeks to displace.

I do feel strongly, however, that in many instances, of which this appears to be one, the welfare of the workmen takes second place to the desire of the leaders of the organization to extend its influence and enhance its prestige.

I also feel that when representatives of employees, duly chosen by them, have in a *bona fide* exercise of their mandate concluded collective bargains with their employers, the best interest of all concerned will be served by requiring that those bargains be honoured and respected regardless of intervening changes of Union adherence or affiliation.

Mr. Wolvin very definitely asserted his preference for dealing with the Company's employees rather than with trade Unions as such, but in practice it appears that the employees in their collective bargaining with the company avail themselves of the assistance and

advice of their trade union officials, who attend at the meetings when negotiations take place, and take an active part in the proceedings; resultant agreements are signed by the trade unions on behalf of their members. This course appears to me to accord with the principles of P.C. 2685 and, as against the practice of recognizing a sole or exclusive bargaining agency, to have the advantage of ensuring that all shades of opinion in the plant can be properly represented on such occasions.

It was made quite clear that the employing company was prepared to accord to the applicant union the same measure of recognition as has been enjoyed by the AF of L or craft Unions since October, 1940, which, of course, means that the applicant Union would be admitted to sign the collective agreement on behalf of its members, and would in due course reflect the strength of its membership in the representation elected by the employees to co-operate with the management in the administration of the agreement.

Such arrangements are to my mind much more truly democratic than a policy of aggressive exclusion of all philosophies but one, and in accepting such a status as was conceded by the Company the applicant Union would display genuine concern for the preservation of harmony in the plant, with no sacrifice of its opportunity to promote and defend the welfare of its members.

In the face of my conclusions as to the existence of the agreement, it is impossible for me to recommend that the status of the applicant Union be enlarged beyond that enjoyed by the other Unions who participated in the negotiations which led up to it, nor can I agree that an interim change in the Union allegiance can be availed of to destroy the agreement before the expiry of its term.

I believe that the proposals made by Mr. Wolvin are fair and reasonable ones and calculated, if accepted and loyally adhered to by the applicant and the other Unions in the plant, to operate satisfactorily in the interest of all parties concerned. I therefore recommend their acceptance as the best and most expeditious method of settling this dispute.

Yours very truly,

(Sgd.) L. A. Forsyth.

Montreal, Que.

November 8, 1943.

Report of Board in Dispute between the Dominion Textile Company, Limited (General Machine Shop and Merchant Branches), Montreal, Quebec, and its Employees

On November 3, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Textile Company, Limited (General Machine Shop and Merchant Branches), Montreal, Quebec, and its employees, members of Local 102, United Textile Workers of America.

The personnel of the Board was as follows: His Honour Justice Alfred Savard, Quebec, P.Q., chairman, appointed on the joint recommendation of Messrs. Walter A. Merrill, K.C., and Paul Fournier, both of Montreal, Quebec, appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Paul Fournier, employees' representative. Mr. Walter A. Merrill, K.C., submitted a minority report.

The texts of the report of the Board and the minority report follow:

Report of Board

In the matter of the Industrial Disputes Investigation Act and of the dispute between: The Dominion Textile Company, Limited (General Machine Shop and Merchants Branch), Montreal, P.Q. and: Employees, Members of the United Textile Workers of America.

To the HONOURABLE the MINISTER OF LABOUR,
OTTAWA, ONTARIO.

SIR.—The Board of Conciliation and Investigation which was appointed by you to enquire into the above mentioned dispute has the honour to report and recommend, as follows:—

The first session of the Board was held at the Court House at Montreal, Quebec, on Saturday, October 2nd, and subsequent sessions were held on Monday, October 4, and on October 22.

The employees were represented by:—

Mr. R. Kent Rowley.

And the Dominion Textile Company, Limited, was represented by:—

Messrs. F. R. Daniels and Bertrand Boissoneault.

In the brief submitted by the employees it was requested that the Board adjudicate on the following points:—

(a) The recognition of the United Textile Workers of America as the sole bargaining agent between the Company and its employees,

in the handling of their relations and grievances with the Dominion Textile Company;

(b) Acceptance of the company, subject to the approval of the National War Labour Board, of the following:—

1. Payment of a cost-of-living bonus of \$4.25 a week;

2. Payment for holiday of one week for all employees in service for a year or more, and of two full weeks for all employees in service for five years or more;

3. General increase of wages of ten cents an hour for all employees.

The brief also requested that the decision of this Board should apply to all mills of the Dominion Textile Company in Montreal, that is, to the employees of the General Machine Shop, Merchants Mill, Mount Royal, Colonial and Hochelaga.

The company took the stand that they did not consider that Mr. Rowley, as labour organizer, should be allowed to make use of the Industrial Disputes Investigation Act to compel acceptance of his union as the sole negotiating agent for all its employees, unless he could legally establish his right in that respect by proving that this union contained in its membership a majority of the employees. The company, however, stated that if this was satisfactorily established, it would be prepared to meet and negotiate with representatives of the union.

The company further submits that while it is not opposed to unions, it is opposed to one or two individuals, especially when such persons are in no way connected with the company nor even with the textile industry, endeavouring to make a living through foisting their self-created unions upon the company when their membership is practically nil.

This summarizes the requests and contentions of the respective parties.

Under the provisions of P.C. 5963, the question of basic wage rates, wartime cost-of-living bonus, and paid holidays, should be dealt with only by the appropriate War Labour Board. The employing company involved in this dispute falls within the category of regional employer, as defined by the National War Labour Board. Therefore, the present Board cannot consider any question affecting basic wage rates, wartime cost-of-living bonus and paid holidays. The findings of the present Board will only apply to the employees of the Dominion Textile Company (General Machine Shop and Merchants Mill), as the application and the order of the Minister of Labour only apply to the Dominion Textile, Com-

pany, Limited, at the General Machine Shop and Merchants Branch.

It follows therefore that the only point left for adjudication by the present Board is as to whether the United Textile Workers of America should be accepted as the bargaining agent of the employees with the company.

The United Textile Workers of America, affiliated with the American Federation of Labor, began organizing a local in the Fall of 1942; and in May, 1943, letters patent were issued by the Head Office of the American Federation of Labor constituting Local 102 for the purpose of looking after the interest of the employees of the Dominion Textile Company who were members of the local in their dealings with the company.

The mode of initiation of employees in the United Textile Workers of America was as follows:

Application for admission was signed by each candidate for membership, who, upon such application, paid an initiation fee of \$2 and stated that he wished the United Textile Workers of America to represent him in all matters relative to employer and employee as to wages and working conditions.

Previous to the issuing of the letters patent the cards and fees paid were kept in the head office of the United Textile Workers of America in Montreal. After the letters patent constituting Local 102 were issued, the funds were kept by the officers of the local; and the cards of the members previously admitted, together with the cards of further applicants for membership, were kept by the treasurer.

Up to the present time the local has neither books nor ledger showing the exact number of members in good standing; their only way of ascertaining such information is by reference to the cards.

A copy of the constitution was filed. It is provided therein that a member, upon joining the union and paying the initiation fee, remains in good standing until struck off the list by the officers for nonpayment of dues or other reasons.

The fact that a member is in arrears does not thereby automatically entail suspension; such suspension has to be decided by the officers of the union and the officers may use their discretion. It was stated that during the organization period, officers will not insist upon, not enforce the payment of monthly dues.

In May, 1943, and up to the end of June, 1943, representatives of the United Textile Workers of America entered into negotiations with the company seeking to have their

union recognized as bargaining agent for the employees; but such negotiations were unsuccessful.

On June 25th the United Textile Workers of America filed an application with the Department of Labour for the establishment of a Board of Conciliation and Investigation, to arbitrate between the employers and employees; the main grievance being the refusal of the company to meet representatives of the union for the purpose of making an agreement covering wages, hours and working conditions.

On June 19th the company sent Mr. Kent Rowley, Canadian representative of the United Textile Workers of America, the following letter:

"We must advise you that before we will consider any dealings with your Union, you must first present us with an audited and sworn statement showing the number of our employees who have been members of your Union for the past three months, and for whom there has been no waiving of dues or initiation fees."

On June 25th, Mr. Rowley replied:

"We would draw to your attention that it was only after June 1st, not before, that we forwarded to you a communication stating that we represent a clear majority of the employees of the General Machine Shop and Merchants Branch, and, therefore, desire to open negotiations. We are rather perplexed, therefore, by your reference to employees who have been members of our Union for the past three months. We may say, however, that at no time has our Organization waived dues or initiation fees requirements, and when we speak of a clear majority of employees in the Union, we are naturally referring only to members in good financial standing.

"Your proposal that we submit an audited and sworn statement of our membership is inadequate, in view of the fact that nowhere do you state that upon submission of such statement you are prepared to negotiate with our Union, and further, because such procedure is not to our knowledge recognized by the Department of Labour. In other words, you do not commit yourselves to accept its results as binding.

"There is, however, a procedure which is recognized by the Department of Labour, that is, the holding of the representation vote. We, therefore, propose officially to you, that a representation vote administered by Officials of the Federal Department of Labour, be held in order to determine the bargaining agency for the employees."

And further on in the letter Mr. Rowley adds:—

"We shall be fully prepared to give adequate proof before an Enquiry Commissioner appointed by the Department of Labour that we represent a majority of the employees concerned."

On June 28th a telegram was sent to the Company by Mr. Clovis Blache, Secretary of Local 102, United Textile Workers of America, reading:—

"Executive appointed Standing Committee to meet Company for purpose discussing employees representation. Propose meeting Friday latest as situation urgent. Employees vote strike authority to executive, but feel meeting with Company can clear up situation."

On the 29th the Dominion Textile Company, Limited, replied as follows:—

"Your telegram of June 28th and your letter of June 25th, together with your application for establishment of Board of Conciliation and Investigation, dated June 25th, reached us concurrently today. We will, therefore, prepare and transmit our reply to the Registrar and send you a copy in accordance with Sec. 20 of the Act."

This reply was sent to Mr. M. M. Maclean, Director of Industrial Relations and Registrar, Department of Labour, Ottawa, on June 30th. It reads as follows:—

"We have declined the invitation of Local 102 U.T.W.A. to enter into negotiations with them as representing our employees, for reasons which appear to us to be sound and proper, as follows:—

(1) We have no ground for believing that the U.T.W.A. has a bona fide membership of substantial proportions amongst our employees as a whole in the two units included in their application.

(2) We have no faith in the integrity of the persons who have been active in the organization activities of the two units concerned.

(3) We know that such membership as has been obtained has been built up on false statements and fantastical promises by the organization.

(4) We can see no element of stability, responsibility or equitability in any agreement which is evolved from negotiations with these factions.

Under the circumstances we do not consider the establishment of a Board of Conciliation and Investigation will serve any beneficial purpose."

On July 1st copy of the reply to Mr. Maclean was forwarded to Mr. Blache, Secretary of Local 102 U.T.W.A.

On July 17th Mr. Rowley wrote Mr. Maclean, as follows:—

"Our delegation appeared before the Enquiry Commissioner July 15th quite prepared to conclude as speedily as possible, and, therefore, offered amicable negotiations with the Company. The Company claimed that they were not satisfied that the Union represented a majority of the employees. We, therefore, stated that, though in principle we insisted that we have every right to the vote, for purposes of satisfying all parties, we would agree to produce our signed original application cards to the Commissioner for proof of our majority. The Company asked for a delay in the proceedings, and the enquiry was adjourned to the following day. On July 16th we appeared with all the necessary evidence and submitted same to the Commissioner. The Company raised countless objections, but principally insisted that the cards be checked

against the Company's payroll. We then asked that the Company give us the guarantee that, in the event that such a check should prove that the Union represents the majority of the members, the Company would recognize us as bargaining agency for the employees. We specifically went out of our way to make clear that by this we did not imply that the Company would have to accept the conditions of our proposed agreement. However, the Company would give us no such guarantee. Under such circumstances, we asked of the Commissioner to recommend the setting up of a Board of Conciliation.

To our astonishment the Company challenged the Commissioner's right to make any such recommendation, even if he was satisfied that we had represented the majority, on some abstruse legal technicality. When the Commissioner insisted that he would make his report, both the Commissioner and the undersigned were threatened with Court proceedings, and the Company's Counsel, Collins, specifically menaced the undersigned that if he persisted in his stand, he would be faced with the treatment of the Marconi Company towards its employees.

We believe that the Dominion Textile Company is definitely challenging the authority of the Department of Labour. Our Union has carefully followed proper procedure and respect the recommendations of the Government. We feel most strongly that your Department must act with energy and decision towards such companies as this.

We would therefore urge that you take steps to establish immediately a Board of Conciliation and Investigation to look into this case so that a decision may be rendered at the earliest possible date."

On July 21st Mr. Rowley wrote Mr. F. R. Daniels, manager of the Merchants Mill, as follows:—

"We are willing to submit our original application cards to be checked against the payroll of the Company as of the date of application for a Board of Conciliation, provided that,

(a) Should such an examination prove that a majority of the employees of the General Machine Shop and Merchants Mill are members of the Union, the Company will immediately agree to recognize the Union as the bargaining agency for the employees of these two plants for a period of at least one year.

(b) The Company will within one week after such proof is afforded open negotiations with the representatives of the Union with a view towards the conclusion of the collective agreement on wages, hours and working days.

It is clearly understood that the recognition of the Union as bargaining agency does not imply acceptance of the wage and other conditions proposed in the contract submitted to the Company, but it does imply that negotiations will take place between the Company and the Unions on these proposals. If in the course of negotiations it is impossible to reach an agreement on wages, same will be referred to an impartial arbitration board, such as the National Wartime Board for decision. In the Interval, the Union would continue to speak on behalf of the employees and would officially be recognized as their representative."

The firm of Coulter & Coulter, Chartered Accountants, was named by Mr. Bernard Rose,

K.C., to count the membership cards of the employees of Local 102, and compare them with the payroll of the Company. Their report was that 637 names appearing on these cards appeared on the payroll of the Company. The total number of employees was 1,030.

On August 9th Mr. Rowley wrote the Dominion Textile Company, as follows:—

"It has now been definitely established even by the procedure which you yourselves proposed, that our Union represents a clear majority of the employees in the Merchants Branch and General Machine Shop. The Company stated before the Enquiry Commissioner that, should such a majority be proven, negotiations would be instituted without delay.

We, therefore, propose to you that a date be set within a delay of a week for the opening of negotiations. We, at the same time, draw your attention to the fact that some period of time has elapsed since we first proposed negotiations, and that in the interval developments have taken place that have been profoundly disturbing to our members, such as negotiations with an organization that does not by any means represent the workers in your mill.

On this and other accounts we must point out to you that should negotiations not be opened by the 18th of this month between our Union and your Company, the question shall be referred to a general meeting of our boards in Montreal for their action.

At the same time, our conference resolved to request that a meeting be held between the management of the Company and the General Committee elected to represent all six mills in the Montreal area for the purpose of discussing problems common to all the mills".

On August 11th the Company replied, as follows:—

"We have had recent word from Mr. Bernard Rose, K.C., Enquiry Commissioner, that his auditor, having compared your membership cards with the payroll of our Merchants Branch and of our General Machine Shop, purports to find that sufficient names are shown on the cards, which are also to be found on the payrolls, to constitute a bare majority of the total number of names on the payrolls. Based on this evidence we are prepared to give consideration to any representations which you may care to make on behalf of our employees in Merchants Branch and in the General Machine Shop.

"We will not participate in any such meetings as suggested in the sixth paragraph of your letter. An attempt on your part to go beyond the limits of Merchants Branch and General Machine Shop in any negotiations entered into with us on the basis of the Enquiry Commissioner's findings will lead to a suspension of such negotiations and you should be governed accordingly."

On August 3rd Mr. Rowley replied, as follows:—

"We gather from the substance of your letter that your Company will open negotiations with our Union. At a special meeting of our Executive Board held last night, a Negotiating Committee was duly appointed for the Merchants Branch and General Machine Shop. It was also decided to propose that negotiations should open next Wednesday, August 18th, at 10 a.m.

This should give adequate time to the Company to make any arrangements required. Will you kindly contact our office by Monday so that we may advise our Committee of the exact place of our meeting."

On August 16th Mr. Rowley wrote the Company as follows:—

"The following are the main points for our discussions:—

(1) Recognition of the U.T.W.A. as bargaining agent, same to include grievance and machinery.

(2) Vacations with pay.

(3) Cost of living bonus.

(4) Wage adjustment.

(5) Hours of work and overtime.

(6) Production problems.

Kindly notify us of the exact time for the opening of negotiations."

On August 25th the Company sent the following message to Mr. Rowley:—

"In order that there be no misunderstanding concerning points adopted this morning, please take note of the following:—

(1) This Company will oppose before the Regional War Labour Board any demands made by your Union for increased wages, additional vacations with pay, or increased cost of living bonus.

(2) This Company will grant your Union exclusive bargaining rights on behalf of the employees of Merchants Mills and General Machine Shop, provided proposed contract is satisfactory in all other respects, including points concerning wages and cost of living bonus, as detailed above."

On August 28th Mr. Rowley replied to this telegram, as follows:—

"We are in receipt of your telegram of the 25th, in which you state the Company will oppose all proposals for increased wages, cost of living bonus, or full week's vacation with pay. In it you also state that you are willing to accord exclusive bargaining rights to our Union in the plants concerned.

May we say that the report of the results of our negotiations to date was presented by the Negotiating Committee to the Executive Board of our St. Henri Local Union. We also reported upon the final proposals which we shall list here, made with the approval of our Boards:

(1) Recognition of Union as exclusive bargaining agent;

(2) Acceptance of the Company's proposal on vacations for this year, provided that it is definitely accepted in the contract that a full week's vacation be given for next year;

(3) The full cost of living bonus of \$4.25 per week;

(4) A general increase of five cents per hour for all employees, and another five cents per hour to all employees with the proviso that this latter is to be paid only to those who do not miss time over their two weeks pay period unless with valid cause.

It was the feeling of the Executive Board that, failing an agreement with the Company on the basis of these proposals strike action would be undertaken. A report upon negotiations was also made to a general meeting of the employees of the six plants of the Company in Montreal. The Company reported

that it felt itself unable to sign an agreement unless wage alterations were included. This position was very strongly supported by the meeting. Subsequently, two motions were adopted, the gist of all which was that it was the opinion of the meeting that failing an agreement on these points above, no employee of the Company's mills in Montreal would work after September 11th, 1943, until such agreement was concluded.

We regret exceedingly to be required to report that such action was undertaken because it appears to us that the points at issue are such that agreement can be found with good will on both sides. However, a blank refusal on the Company's part to even consider wage improvements leaves the employees with very little choice.

We trust sincerely that you have not been misled by false reports with respect to the decisions taken, as one might judge from the statement accredited to the Company in the press. For any one who attended the meeting held August 25th and listened to the unanimous and enthusiastic call for a cessation of work could not doubt that it was a real expression of a determination to employ all measures necessary to right the injustices presently prevailing."

On the 30th of August Mr. Daniels replied, as follows:—

"The only portion calling for any comment on our part is the third paragraph on page 2 of your letter. Since we have already told you definitely that we are neither prepared nor in a position to discuss wage increases or increases in present cost of living bonus with the Negotiating Committee which you have set up, purporting to represent the employees of our Merchants Mill and General Machine Shop, no good purpose can be served by a further meeting with that group.

We notified you in our letter of the 11th of August, 1943, that any attempt on your part to exploit the negotiations between the Negotiating Committee at Merchants Branch and the Company for the purpose of involving our other mills in the Montreal area, would lead to a breakdown in negotiations. It is only too evident from your letter of the 28th of August, and your actions since the 11th of August, that you have ignored that condition, and it would appear that you are doing your utmost to mislead some of our employees in the district into an illegal strike."

The foregoing summarizes the negotiations that took place between the Company and Mr. Rowley. They were broken off in September and on the tenth of that month the appointment of the present Board was authorized by the Minister of Labour.

At the hearing, the representatives of the employees agreed to restrict their demands to the recognition of the United Textile Workers of America as bargaining agent between the Company and its employees. Consequently, the question of wages, payment for holidays and cost of living bonus would be reserved for adjudication by the different War Labour Boards appointed to deal with such matters.

In its brief, dealing with the question of the recognition of the Union, the Company states:—

"The policy of the Company is to discuss matters relating to its employees with any suitable and responsible organization which the employees, in a clear-cut majority of their members elect to join as bona fide members. The Company is and always has been prepared to discuss matters relating to their employees, and to negotiate with any labour union which represents in its bona fide membership the majority of its employees.

The difficulty is that there has never been established to our satisfaction that Mr. Rowley and Miss Parent represented our employees, although they have claimed on many occasions that they do so—they claim that Local 102, which is a union of their own creation, represents the majority of our employees in the Merchants Mill and the General Machine Shop. And further on the Company states:—

"The Company has not any information as to the membership of the Union of Mr. Rowley and Miss Parent. All the Company requires is legal proof of their claim that their Union contains in its body by membership a majority of the employees of our Company in our Merchants Mill and in our General Machine Shop. It is stated that when the Board of Conciliation was first applied for, Mr. Bernard Rose, K.C., was appointed a Commissioner to examine the claims of Mr. Rowley and Miss Parent. According to the Company the only way to establish the membership of Mr. Rowley's Union was to examine the books of the Union and to find out the membership from these books. Both Mr. Rowley and Miss Parent flatly and categorically refused to permit the examination of the books, but instead produced a number of application cards which they claimed were application cards signed by the employees for membership in their Union. It was pointed out at the time to Mr. Rose that application cards for membership meant nothing. An application to become a member in the Union does not constitute that applicant a member until the application is accepted and the amount required to be paid has been paid.

It is further stated that Mr. Rose refused to exercise the Board powers conferred upon him as a Commissioner and decided to take the application cards upon their face value as positive, official and conclusive proof of the parties named therein as being members in good standing of Mr. Rowley's Union and that they were also employees of the Company in the General Machine Shop and in the Merchants Mill. Finally, Mr. Rose directed that the names on the application cards be compared with the payrolls of the Company, and this checkup showed that 627 names contained on the application cards were found to be on the payrolls of the General Machine Shop and the Merchants Mill.

Though the Company was not satisfied with the way Mr. Rose had conducted the enquiry, and with his failure to force Mr. Rowley's Union to prove their paid up membership in a legal way, the Company decided to meet Mr. Rowley to consider representations made by him to see if it were not possible to negotiate an agreement.

Mr. Rowley asked that the company and the Union make a joint request under Wartime

Wages Control Order to increase wages, which the Company refused to accept."

The Company, however, stated that it was prepared to enter into an agreement with Mr. Rowley's Union constituting such union as bargaining agent, that such agreement would include the usual clauses contained in such documents agreed to by the parties but excluding all question as to wages.

Mr. Rowley in his reply stated that such an agreement would be a mere scrap of paper, that it would mean nothing, and that it would not be acceptable to the members of his Union.

That is a summary of the statements contained in the briefs submitted by the parties.

On October 5, 1943, the National War Labour Board, Mr. Justice McTague presiding, heard an application of the United Textile Workers of America, presented by Mr. Rowley, requesting a general increase of ten cents an hour in all the mills of the Dominion Textile Company, Limited, in Montreal, and in the mills of the Montreal Cotton Mills, Limited, at Valleyfield.

The application was dismissed by the Board as it was not clearly shown that Mr. Rowley and his Union had been duly and legally named agents of the employees in these mills. However, the Board stated that seeing that the matter was presently under consideration by two conciliation boards in Montreal, it would reserve the right of the employees to submit the matter again when the conciliation boards would have rendered their decision and made recommendations as to whether or not the United Textile Workers of America were the legal representatives of the two textile companies.

It should be noted that there is only one really active Union at the mill, such Union being Local 102 of the United Textile Workers of America.

At one time the National Catholic Syndicate acted for a group of the employees of the Dominion Textile Company, Limited, but they seem, of late, to have suspended or limited the field of their activities; at any rate, they do not seem to be very active.

Any union claiming to represent a group of employees must clearly show by other evidence than mere statements that they are entitled to represent such group of employees. Of course, in matters concerning labour disputes much latitude and discretion is allowed conciliation boards as regards to evidence submitted and there is no doubt that such boards should not be as strict as a judicial court in that respect. Very frequently such cases are

handled by persons who are not familiar with the laws of evidence and with the procedure that should be followed. Very frequently they have not had the assistance of legal counsel in preparing their briefs. It is therefore incumbent upon the members of Board that judgment should be exercised in considering as to whether or not the employees really desire to be represented by a particular trade union.

In the present case, there are in the neighbourhood of one thousand employees at the mill. A check-up of the names on the application cards with the payrolls of the Company has established that six hundred and twenty-seven names appearing on the application cards were found to be on the payrolls of the General Machine Shop and the Merchants Mill.

Since the check-up was made some employees may have left the Company and may have been replaced; but the check-up shows that a large number of the employees of the Company want to be represented by the United Textile Workers of America as their bargaining agent.

It goes without saying that the organizers and officers of the Local should have sought to have had a proper system of bookkeeping and auditing set up and thereby showing at a glance the number of members in good standing.

It was stated by way of explanation for such lack of evidence that in a period of organization some things are left undone which would be attended to in due course.

However, beyond anything that might be said on either side, there always remains the fact that the majority of the employees have manifested their desire to form a union and have their interests looked after by the United Textile Workers of America.

It was admitted by officials of the company, at the hearing, that if a vote were taken of the employees as a whole, a substantial majority would have stated that they were in favour of being represented by the United Textile Workers of America.

Such is undoubtedly the desire of the majority of the employees of the company, and in itself satisfactory evidence that they are behind this application and its conclusions. It is true that the evidence submitted would not be sufficient, if the law respecting evidence was strictly enforced; but, as already stated, in all matters pertaining to labour and the study of problems arising in that connection Boards can exercise their discretion in appreciating and weighing the evidence.

In this case the Board considers that if a vote were taken a substantial majority would

vote in favour of being represented by the union; and it may be added that on this particular question the officials of the company are also of that opinion.

Therefore, the present Board considers that it is in the best interest of all concerned that the desire and wish of the employees be approved and sanctioned and that the United Textile Workers of America be, accordingly, recognized as the bargaining agent.

It is only fair to add that this arrangement will only avail if both parties put aside their past grievances and make a sincere and honest effort to co-operate in the making of a contract which will render their relations smoother and more peaceful.

It may also be pointed out that it would be in the best interests of the local and its members if the organizers and officers would immediately engage the services of qualified accountants to set their books in proper shape.

It is recommended that the treasurer be bonded. This officer is in charge of large sums of money which he holds in trust for the employees and protection should be given them. Moreover, in the preparation of any memorandum, brief or demand, evidence in support of their contentions should always be presented. It must be understood that the Board will exact something more than a mere statement of the representatives of the Union.

The organizers and officers of the union should bear in mind that they must first and foremost look after the interests of those whom they represent rather than their own prestige or the prestige of their particular union. A great responsibility rests upon them inasmuch as from their actions very serious consequences may follow which will affect thousands of employees and the members of their families.

They must be firm at times, but even then they should be reasonable, tactful, courteous and conciliating in all their relations with their employers.

Trade unions have now become a business and should be run properly as a sound business should be, if the employees of a large industry are to derive the fullest benefit resulting from organized labour.

On the other hand, the company should give a sympathetic hearing to any reasonable demand on the part of their employees; because, after all, they are partners, each contributing their share in the industry and in the making of profits.

The whole respectfully submitted.

Montreal, Oct. 29, 1943.

(Sgd.) Alfred Savard, *Chairman*.

(Sgd.) Paul Fournier.

Minority Report

Re: Conciliation Board established in respect of disputes between Dominion Textile Company Ltd., Montreal, P.Q. (General Machine Shop and Merchants Branches), Employer, and Members of Local 102, United Textile Workers of America, Employees.

TO THE HONOURABLE

HUMPHREY MITCHELL, P.C., M.P.,

MINISTER OF LABOUR,

OTTAWA, ONT.

The Board of Conciliation having been established by the Minister of Labour, composed of The Honourable Mr. Justice Alfred Savard as Chairman, Mr. Paul Fournier, nominee of the Employees, and Mr. Walter A. Merrill, K.C., nominee of the Employer; two public sittings of the Board took place, after which the Board adjourned to deliberate.

After a full discussion between the members of the Board of the submissions and arguments of the parties at the hearings, I find myself unable to agree with the majority of the Board for the following reasons.

The principal question at issue was whether Local 102 of the Union had such a majority of members in good standing as to warrant its recognition as sole bargaining agent for the employees in the two plants.

The Company's representative, Mr. F. R. Daniels, took the position that the Company was and always had been prepared to discuss matters relating to their employees and to negotiate with any labour union which represents in its bona fide membership the majority of its employees, and that the Union had not and could not establish, to the satisfaction of the Company or the Board, its clear right to represent the majority of the workers, by such means as would leave no reasonable doubt on the subject.

The Union, on the other hand, contended through its representative, Mr. R. Kent Rowley, that as a result of an investigation made by Mr. Bernard Rose, who had employed the services of a chartered accountant, it had been established on a comparison of cards of application for membership in the Union with the pay-rolls that out of 1021 employees, 627 had application cards.

The War Labour Board, as recently as the 5th of October, 1943, in the matter of Montreal Cottons Limited and United Textile Workers of America, Local 100 (Valleyfield, Quebec) maintained the principle that "the Union would have to establish its clear right to represent the majority of the workers and establish it by legal means."

I doubt that the War Labour Board, in using the term "*legal means*", meant to convey or hold that such legal proof as is required in a court of justice should be exacted, but I do think the words were intended to mean, such conclusive evidence as will leave no doubt in the minds of the employers or the members of a conciliation or other board that the contention of the Union is founded on facts which can be substantiated.

It would appear to be a fair statement to say that unions have reached that stage in the economic life of this country that they may be said to be comparable to any ordinary business organization and, as such, (considering their claims of a large membership with the consequent handling of considerable sums of money) should keep such records, documents and books of account as the importance of the organization would necessarily require to be kept.

Members of the Board repeatedly attempted, without success, to obtain from the union representative definite information as to the manner in which the records and books of the Local and Union were kept, in order to be able to explore and check the statement that the Union had a bona fide paid-up majority membership of the workers in the plants.

Although the Board had the power under Section 31 of the Industrial Disputes Investigation Act to order production of such books, papers and documents as it required, the majority of the Board decided not to re-open the hearings and exercise that power, accepting Mr. Rowley's statement that the Local was in course of being organized and that the records would not disclose anything else but applications for membership cards.

If, as appears to be the case, the Union has no by-laws, rules or regulations stating specifically how a person becomes and is accepted as a member, when and under what conditions his membership ceases and such other books and records as have become the recognized and universal practice to have kept in all types of organizations, then how can the Union expect their contention to be supported by such unsatisfactory and flimsy evidence as it relies upon.

I am not prepared to accept, as evidence and proof of bona fide and paid-up membership in the Union mere application for membership cards unsupported by some evidence that the applicant has been accepted as a member according to some rule or regulation, together with some entry or entries in books of account which could be checked in order to establish whether the member has actually made his initial payment on appli-

cation and is a bona fide paid-up member at the time the check is made.

I do not accept the answer which was given that, although it may be usual and customary in clubs and other organizations to keep membership lists, books of account, by-laws and rules, etc., it is not adopted by the Union because it would require a large clerical staff, would be complicated and cumbersome, by reason of the large membership.

It is my submission that before a Union can claim the right in a plant to be the sole bargaining agent for the employees, it must, *before any vote is taken by the employees at large*, on the question of whether the employees at large wish to be represented by the Union or not, first—"establish its clear right to represent the majority of the workers and establish it by legal means."

The fact that at one time the Company, in order to avoid a threatened strike, agreed to negotiate with the Union representatives, which came to naught, because the Union representative insisted that the negotiations must include matters dealing with wages, cost-of-living bonus and vacations with pay (see correspondence submitted with application for Board, extracts of which are contained in the majority report), being matters that the negotiating committee knew or should have known were of such a nature that the War Labour Board alone could deal with, does not now relieve the Union from its obligation to satisfy this Board by legal means that it had a majority of members in the two plants.

I cannot agree with the statements on Page 19 of the majority report that the officials of the Company admitted at the hearing that if a vote were taken of the employees as a whole, a substantial majority would have voted in favour of being represented by the Union.

My recollection of what the representatives of the Company stated was that a vote of the employees at large would mean nothing more than a vote in favour of an increase in wages and that a vote of the employees at large was not the proper means of establishing that the Union had a bona fide paid-up majority membership of employees in the Union, which would entitle it to become the sole bargaining agent.

I am fully in accord with the majority of the Board that qualified accountants should be employed by the Union to set their books in proper shape, that the treasurer be bonded and that the Board should exact something more than the mere statements of representatives of the Union, likewise that the organizers

and officers of the Union should bear in mind that they should first and foremost look after the interests of those whom they represent rather than their own prestige or the prestige of their particular Union.

Under the circumstances, I conclude and recommend that Local 102, United Textile Workers of America, should not be recognized as representing the majority of the workers

in the General Machine Shop and Merchants Branch of the Dominion Textile Company Limited.

Montreal, 2nd November, 1943.

The whole respectfully submitted,

(Signed) Walter A. Merrill,

Member of the Board.

Report of Board in Dispute between the Office Specialty Manufacturing Company, Limited, Newmarket, Ontario, and its Employees

On November 2, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Office Specialty Manufacturing Company, Limited, Newmarket, Ontario, and its employees, members of Local 7, National Union of Furniture Workers (C.C.L.) (L.G. July, 1943, p. 922).

The personnel of the Board was as follows: Dr. Alexander Brady, University of Toronto, Toronto, Ontario, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. Bora Laskin and J. J. Robinette, both of Toronto, Ontario, appointed on the nomination of the employees and employer respectively.

The report of the Board follows:

Report of Board

Re: Industrial Disputes Investigation Act and re-dispute between the Office Specialty Manufacturing Company, Ltd., Newmarket, Ont., and employees, members of Local 7, National Union of Furniture Workers' (C.C.L.)

THE HON. HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA, ONT.

Sir:—

The Board appointed by you to investigate the dispute caused by the refusal of the Office Specialty Manufacturing Company to recognize Local 7, National Union of Furniture Workers, begs to submit its report. The background of the dispute may be briefly sketched. Early in January, 1943, the Office Specialty Employees' Welfare Association was organized, and on January 22, 1943, it signed an agreement with the Office Specialty Manufacturing Company which recognized the Association as the sole collective bargaining agency for all the hourly paid workers employed by the Company. A month later, on February 22, Local No. 7 of the National Union of Furniture Workers sought from the Company recognition as the bargaining agency on the ground that it, rather than the Employees' Welfare

Association, represented the majority of the employees in the plant. The Company refused to take any steps to recognize Local No. 7 of the National Union of Furniture Workers, and consequently on March 9, 1943, the Union applied for a Board of Conciliation. Mr. J. P. Nichol, on behalf of the Department of Labour, investigated the dispute, and on May 18 conducted an election in order to determine whether the employees desired to be represented by the Union or the Welfare Association. The result of this election was:

Number of eligible voters.....	309
Number of votes cast.....	298
Number voting for Welfare Association..	140
Number voting for National Union of Furniture Workers.....	155
Number of spoiled ballots.....	3

The vote thus revealed that a majority of the hourly paid employees wished to be represented by the National Union of Furniture Workers, but the Office Specialty Manufacturing Company had not previously bound itself to negotiate with the Union if the latter obtained a majority decision. Hence the vote of May 18 brought no change in the formal arrangements between the parties; namely, the Office Specialty Manufacturing Company adhered to its existing agreement with the Welfare Association and continued to recognize it as the bargaining agency, whereas the National Union of Furniture Workers was naturally more convinced than ever that it should be considered the proper bargaining agent for the employees.

On June 17, you appointed the present board which, after investigating the history of the dispute and hearing evidence from the parties, urged that both parties agree to allow the agreement of the Office Specialty Manufacturing Company with the Welfare Association to run its course till its expiry in October, 1943, and that in the meantime a fresh election should be held and that on this occasion the Office Specialty Company should obligate itself to accept the result of the election. If, in other words, it was still clear that a majority of the employees wished to be repre-

sented by the National Union of Furniture Workers rather than by the Office Specialty Employees' Welfare Association, the Company should negotiate an agreement with the Union. The two parties in good faith accepted this method of resolving their dispute, and further that, while the vote should be conducted by the Industrial Relations Branch of the Dominion Department of Labour, the Board of Conciliation should arbitrate in the case of employees whose right to vote in the election was challenged. The election was duly held on October 22, 1943, and the Board of Conciliation counted the ballots. The result of the election was as follows:

Number of eligible voters.....	306
Number of votes cast.....	287
Number voting to have the Welfare Association as bargaining agent..	128
Number voting to have the Union as bargaining agent.....	154
Number of spoiled ballots.....	5

Report of Board in Dispute between Montreal Cottons, Limited, Valleyfield, Quebec, and its Employees

On November 6, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Montreal Cottons, Limited, Valleyfield, P.Q., and its employees, members of Local 100, United Textile Workers of America (L.G., Oct., 1943, p. 1356).

The personnel of the Board was as follows: His Honour Justice Alfred Savard, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Messrs. D. A. Paterson and Edouard Larose, both of Montreal, Quebec, appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Edouard Larose, employees' representative. Mr. D. A. Paterson submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

In the matter of the Industrial Disputes Investigation Act and of the dispute between the Montreal Cottons, Limited, Valleyfield, P.Q., and employees, members of Local 100, United Textile Workers of America.

TO THE HONOURABLE,
THE MINISTER OF LABOUR,
OTTAWA, ONT.

Thus the employees by a majority of 26 votes (11 votes more than on the previous occasion) expressed their wish to be represented by the National Union of Furniture Workers in bargaining with the Office Specialty Manufacturing Company. By the previous arrangement the Company agreed to bargain with the Union if it received a majority of the votes cast. Your Board recommends that the Company and Union now negotiate a collective agreement in keeping with the prior arrangement, and with that recommendation the Board completes the task for which it was appointed in June. -

All of which is respectfully submitted.

Toronto, Ont.

October 28, 1943.

(Sgd.) Alexander Brady,
Chairman.
(Sgd.) John J. Robinette,
(Sgd.) Bora Laskin.

Sir:

The Board of Conciliation and Investigation which was appointed by you to inquire into the above mentioned dispute has the honour to report and recommend, as follows:—

The first session of the Board was held in the City of Quebec on September 14, 1943, and subsequent sessions were held in Montreal on September 20th, October 1st, 2nd, 4th, and 7th, in the City of Ottawa on October 8th, and in Montreal on October 22nd.

The employees were represented by:—

Mr. R. Kent Rowley, Miss Madeleine Parent and Mr. Trefle Leduc, president of Local 100.

Montreal Cottons Limited was represented by Mr. W. G. E. Aird, general manager, and Mr. G. H. Maudsley.

The Board also summoned Mr. L. P. Lariviere, secretary treasurer of Local 100, United Textile Workers of America, to appear before it, and he appeared on Saturday, October 2, 1943.

The employees concerned in the dispute are all in the service of the Montreal Cottons, Limited.

At one time the National Catholic Syndicates represented the employees in their dealings with the Company, but of late years they seem to have lost ground and are presently inactive; they are taking no part in this dispute.

In the fall of 1942 the United Textile Workers of America, through Mr. Kent Rowley

and Miss Madeleine Parent, began organizing in Valleyfield, and in February, 1943, letters patent were issued to Local 100.

On December 23, 1942, Mr. Rowley wrote to Mr. Aird confirming the offer of his organization to open negotiations with the Company with a view to concluding an agreement covering wages and working conditions.

On December 30, 1942, the Company, through Mr. Aird, replied, as follows:—

"It did not see the need for the intervention in its relations with its employees of an outside party in no way directly concerned in the matter."

The letter goes on to say:—

"If you believe that you have any report to make of your membership which you claim to have amongst our employees, such matters can be placed before us for consideration."

On January 18, 1943, Mr. Rowley sent Mr. Aird a copy of a proposed agreement between the Montreal Cottons, Limited, and the United Textile Workers of America.

On January 23, 1943, Mr. Aird replied to Mr. Rowley, stating that he was of the opinion that no discussion of the terms set forth in the agreement would serve any good purpose and could not be entertained.

On January 26, 1943, Mr. Rowley replied, stating that his union represented the employees of Montreal Cottons, Limited, and was ready to co-operate with the Company, the Government and the public, and he suggested that a vote be taken of the employees of the Montreal Cottons, Limited, under the supervision of the Department of Labour, to determine whether or not a majority of the employees desired to be represented by the International Union.

On January 29, Mr. Aird replied, as follows:—

"The declarations contained in the second and third paragraphs of your letter do not add anything to the situation, and we feel you might be well advised to realize that this Company has a very definite sense of its responsibility to its employees, the Government and the public. Stemming from that sense of responsibility we also have a realistic conception of our duty in the situation engendered by your organizing activities and methods. The proposal contained in the fifth paragraph and elaborated in the sixth paragraph of your letter is by this time a somewhat outworn trick of the organizer's trade and is not acceptable to us.

"You must know that even in cases where such a vote, as you suggest, has been taken, Boards of Conciliation and Investigation have not accepted the result as constituting any proof that the employees voting in favour of representation by a union are actually members of that union.

"Against the background of promises and threats built up in the course of the Union organizers' campaign, the taking of such a vote proves nothing except the gullibility of a number of persons."

And further on, Mr. Aird adds:—

"This Company has nothing to learn at your hands about its responsibility as regards collective bargaining. It is prepared to discuss matters relative to its employees with any suitable and responsible organization which the employees, in a clear-cut majority of their members, elect to join as bona fide members and where, having become members, they decide to entrust to the executive or other representatives of their negotiations the responsibility of presenting their view to, or negotiating agreements with the management of the Company. Such a stand is not consistent with the high pressure methods of the professional organizer, and you probably realize this as we do.

"There are no grounds, at the present time, for assuming that the group which you have organized includes in its membership anything like a majority of our employees. If you desire to maintain that it does, we are quite willing to have you make proof of that fact before a competent authority, such as a judge of the Superior Court, and to accept his finding on that point."

Copies of the correspondence exchanged between the Company and Mr. Rowley are filed with this report and recommendation.

On February 21, 1943, the United Textile Workers of America, Local 100, applied for the appointment of a Board of Conciliation and Investigation.

On August 11, 1943, the Minister of Labour granted the application and the dispute was referred to this Board for adjudication.

The Company states that it is ready to negotiate with any trade union and enter into an agreement with such a union, provided it is shown that the union represents in its membership a majority of its employees, but that up to now it has not been shown that Mr. Rowley and his union represent a majority of the employees.

When the application was filed the number of employees was estimated to be: males, 21 years and over, 1,840; females, 1,440; making a total of 3,270.

Mr. Lariviere, secretary-treasurer of the Local, having been duly sworn, testified that when the application for the appointment of a board was made in February, 1943, the membership of the Local at Valleyfield was 1,800.

The mode of recruiting is, as follows:—

The applicant signs a card whereon it is stated that he applies for membership in the United Textile Workers of America and authorizes the union to represent him in all dealings with the Company respecting relations between the employees and the employer.

In his evidence Mr. Lariviere stated that over 1,800 employees signed application forms. Furthermore lists were signed by about 1,800

employees of the Company authorizing the United Textile Workers of America to represent them.

The Company was not satisfied that these application cards were bona fide, and, the Department of Labour delegated Mr. Bernard Rose, K.C., to investigate and check up the lists with the payrolls of the Company.

The Company would not accept the findings of the check-up because Mr. Rowley had sent agents who made a house to house canvass in certain parts of Valleyfield in order to procure signatures and had produced at one of the sittings, before Mr. Rose, a petition supposed to contain some eighteen hundred names, which, upon investigation as to the validity of the signatures, under the supervision of Mr. Rose, was found to contain 508 names that were not on the payrolls of the Company. Moreover, many names appeared to have been written in the same handwriting; but the explanation, as given to Mr. Rose, was that many of the applicants were unable to write and their names had been signed by others on their behalf.

The Company contended that no attempt had been made to show that any of the persons whose names appeared on the petition were members of the Union.

It may also be stated that no explanation was ever given with respect to the 508 names of which no record was to be found on the payrolls of the Company.

Admitting the contention of the Company, there still remains the fact that about 1,300 cards were shown to correspond with names appearing on the payroll, which is certainly a very substantial proportion of the employees.

At the hearing, the treasurer handed to Mr. Edouard Larose, representing the employees on this Board, 1,432 cards and swore that all of these persons were members in good standing of Local 100. Mr. Lariviere further stated that over \$3,600 had been paid in entrance fees.

During the period of organization, these funds were kept in Montreal, but since the charter has been granted the funds have been kept in a bank account in Valleyfield.

No ledgers were produced indicating the members who were in good standing. The explanation given was that they are still in the process of organization and that so far they have no ledgers.

A copy of the International constitution was filed and it contains the provision that a member remains in good standing until he has been suspended.

The treasurer stated that not a single member has been suspended since the organization of the Local.

In the course of the discussion, Mr. Aird, managing director of the Company, stated that if it were proven to his satisfaction that a substantial number of the employees were members in good standing of the Local, he would give serious consideration to the demand contained in the application.

The secretary-treasurer was asked to produce anything that he had in the way of minute-books, ledgers, and so on. He could not produce any books; all that he had were the cards, showing that over fourteen hundred members were in good standing.

The Company was not satisfied with this statement and refused to accept as correct the figures given by Mr. Lariviere.

Mr. Aird was then asked by the Board as to what the result would be if a vote were taken of the employees as a whole. He replied that all the members of the Local would vote for the Union, that a large proportion of the non-union members would also vote with them, and the result would be that a large majority of the men would vote to be represented by the Union in their dealings with the Company.

The foregoing constitutes the evidence that was placed before this Board by the applicant to show how their membership stood.

This evidence is clearly not the best and would hardly meet the requirements of a court of justice.

Any union claiming to represent a group of employees must clearly show by evidence other than mere statements that they are entitled to represent such group of employees. In matters concerning labour disputes, much latitude and discretion is allowed Conciliation Boards regarding evidence submitted. Such Boards should not be as strict as a judicial court in that respect, the reason being that very frequently, such cases are handled by persons who are not familiar with laws of evidence and with the procedure that should be followed. They have not always available the assistance of legal council in preparing their briefs. It is therefore incumbent upon the members of the Boards that judgment be exercised in weighing and appreciating the facts and evidence submitted, and in considering for instance whether or not the employees really desire to be represented by a particular trade union.

In the present case there are in the neighbourhood of 3,000 employees at the mill. A check-up of the names on the application cards with the payrolls of the company has established that over 1,400 names appearing on the application cards were found on the payrolls of the Company.

It goes without saying that the organizers and officers of the local should have sought

to have a proper system of bookkeeping and auditing set up and showing at a glance the number of members in good standing.

It was stated by way of explanation for such lack of evidence that in a period of organization some things are left undone which would be attended to in due course.

However, beyond anything that can be said on either side, there still remains the fact that employees have manifested their desire to form a union and have their interests looked after by the United Textile Workers of America.

It was admitted by Mr. Aird that if a vote were taken of the employees at large, a substantial majority would have stated that they were in favour of being represented by the United Textile Workers of America.

Such is undoubtedly the desire of the majority of the employees of the Company, and in itself satisfactory evidence that the men are behind this application and its conclusions.

In this case the majority of the Board considers that if a vote were taken, a substantial majority would vote in favour of being represented by the union; and it may be added that on this particular point the officials of the Company agree.

In its brief, page 6, paragraph 7, the Company outlines a system of its own which it considers would be much preferable. This is what it says:

"It has been recognized by the Company that one of the difficulties which has existed between employers and employees in the past has probably been lack of keen personal interest of the employer in his employees, chiefly in industries where thousands of employees are employed. To overcome this difficulty, the Company has created a department personnel for the sole purpose of establishing that very necessary and important personal relations with the employees. Employees can come to this department and lay all their trouble before it, personal, financial and otherwise, and the members of this department are particularly entrusted to give their people sympathetic, practical and prompt advice and assistance."

This is a step which undoubtedly redounds to the credit of the Company, but unfortunately, it should have been taken long ago. It may well be that the Company has tarried too long, inasmuch as its employees do not seem to place much confidence in their Company's new deal for them, and prefer dealing with the Company through the agency of a trade union.

Therefore, the present Board considers that it is in the best interest of all concerned that the desire and wish of the employees be approved and sanctioned and that the United Textile Workers of America, be, accordingly, recognized as the bargaining agent.

It is only fair to add that this arrangement will only avail if both parties put aside their past grievances and make a sincere and honest effort to co-operate in the making of a contract which will render their relations smoother and more peaceful.

It may also be pointed out that it would be in the best interests of the Local and its members if the organizers and officers would immediately engage the services of qualified accountants to set their books in proper shape.

It is recommended that the treasurer be bonded. This officer is in charge of large sums of money which he holds in trust for the employees and protection should be given them. Moreover, in the preparation of any memorandum, brief or demand, evidence in support of their contentions should always be presented. It must be understood that the Board will exact something more than a mere statement of the representatives of the Union.

The organizers and officers of the Union should bear in mind that they must first and foremost look after the interests of those whom they represent rather than their own prestige or the prestige of their particular union. A great responsibility rests upon them, inasmuch as from their actions very serious consequences may follow which will affect thousands of employees and the members of their families.

They must be firm at times, but even then they should be reasonable, tactful, courteous and conciliating in all their relations with their employees.

Trade unions have now become a business and should be run properly as a sound business should be, if the employees of a large industry are to derive the fullest benefits resulting from organized labour.

On the other hand, the Company should give a sympathetic hearing to any reasonable demand on the part of their employees; because, after all, they are partners, each contributing their share in the industry and in the making of profits.

Montreal, October 28, 1943.

Alfred Savard, *Chairman.*

Edouard Larose.

Minority Report

Montreal, November 4, 1943.

Re: Industrial Disputes Investigation Act and the Dispute between Local 100 of the United Textile Workers of America and the Montreal Cottons Limited, Valleyfield, Que.

THE HON. HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA, ONT.

Sir:

I beg to submit as representative of the employer on the Board of Conciliation appointed here in the following Minority Report:

1. SESSIONS OF THE BOARD

Sessions of the Board were held at the City of Quebec on September 14, 1943, at Montreal on September 20, October 1st, October 2nd, October 4th, October 5th, October 7th and October 22nd, and in Ottawa on October 8th.

2. REPRESENTATIVE OF PARTIES

The Union was represented by Mr. R. Kent Rowley, its organizer, Miss Madeleine Parent, another organizer, and Mr. T. Trefle Leduc, President of Local 100, Mr. L. P. Lariviere, Secretary-Treasurer of Local 100, appeared at one session. The Montreal Cottons Limited was represented by Mr. W. G. E. Aird, its Managing Director and Mr. J. H. Maudsley.

3. CAUSE OF DISPUTE

The cause of the dispute may briefly be summarized as follows:—

Local 100 demanded to be recognized as the bargaining agent for all the employees of the Montreal Cottons Limited. The Montreal Cottons Limited refused to recognize Local 100 as bargaining agent for all its employees unless and until the Union established that it had within its paid-up membership the majority of the employees of the Company, and the Company only asked that proper proof of membership in the Union be made.

4. FACTS

The facts of the case are briefly as follows:—

After carrying on a campaign of organization, Mr. Rowley approached the Company and was informed that it was prepared to discuss matters relating to its employees with any suitable and responsible organization which the employees, in a clear cut majority, elected to join as bona fide members. That had been the

accepted policy of the Company for years and before the appointment of this Board the Company made clear on several occasions that it was quite prepared to deal with Local 100 as bargaining agent for its employees once it was established to the Company's satisfaction that the Local comprised in its paid-up membership a majority of the employees of the Company. An application for a Board of Conciliation was thereafter made by Local 100 and Mr. Bernard Rose, K.C., was appointed as commissioner to investigation as to the merits of the claim. No copy of the report of Mr. Rose was filed with the Board and its contents are unknown but it appears that the Union refused to produce before Mr. Rose any proof of membership despite the fact that Mr. Rose in his quality of commissioner at least twice ordered the Union to produce its membership records. The Union, instead of complying, went out into the streets of Valleyfield from door to door and had a petition signed, which was later presented to Mr. Rose apparently as a substitute for membership records. It purported to contain some 1,800 names but, upon investigation, it was shown by the government's own investigators that 508 of those names were not even on the payroll of the Company. Moreover, as stated in the majority report, many names appear to have been written in the same handwriting and the contention of the Union in that regard is that many of the applicants were unable to write and their names therefore had been signed by others on their behalf. Again before the Board, the Company insisted that membership records of the Union be produced but although the Chairman and the Company's representative on the Board urged that that be done, the Union failed to produce them after agreeing to do so. At the hearing, before the Board, Mr. L. P. Lariviere, the Treasurer of the Union, handed to Mr. Larose, the representative of the employees, 1,432 forms of application for membership and Mr. Lariviere swore that the persons named thereon were members in good standing of Local 100. No attempt was made to check Mr. Lariviere's statement that the cards actually were membership cards of employees of the Montreal Cottons Limited, and when one considers the result of the previous investigation made by Government auditors, which showed that, out of a list containing 1,800 odd names, 508 people whose names appeared therein were found to be not even employees of the Montreal Cottons Limited, the serious question immediately arises as to what an examination of the 1,432 alleged membership cards produced by Mr. Lariviere would show, he being one of the parties who appeared before Mr. Rose, the Commissioner. Despite the "evidence" before

the Board showing the result of the previous investigation with regard to the 508 names above mentioned in respect of which the majority report states:—

"It may also be stated that no explanation was ever given with respect to the 508 names of which no record was to be found on the payrolls of the Company"

the majority members of the Board did not consider it necessary or felt it was hopeless to investigate the alleged membership cards. All members of the Board were in agreement, however, that the cards submitted established nothing in the way of proof of membership.

5. PROCEEDINGS BEFORE BOARD

The only question before the Board was whether or not Local 100 did represent the majority of the employees of the Montreal Cottons Limited and as stated no evidence that it did was presented. In the majority report the lack of evidence is clearly admitted, as appears from the following extracts from the majority report.*

On page 6:—

"No ledgers were produced indicating the members who are in good standing. The explanation given was that they are still in the process of organization, and that so far they have no ledgers."

The only comment to make on this is that the organization started in October 1942, which is over a year ago. The undersigned cannot accept the explanation as satisfactory.

On page 7:—

"The secretary-treasurer was asked to produce anything that he had in the way of minute books, ledgers and so on. He could not produce any books; all that he had were application cards, showing that over 1,400 members were in good standing.

The Company was not satisfied with this statement and refused to accept as correct the figures given by Mr. Lariviere."

"This evidence is clearly not the best and would hardly meet the requirements of a court of justice."

On page 8:—

"Any union claiming to represent a group of employees must clearly show by evidence other than mere statements that they are entitled to represent such group of employees."

The foregoing is exactly what the Company contended before the Board at all times, that is, that the Union must prove by evidence and not by general statements what it claims. In other words, while the Union leaders may make fantastic claims as to membership, etc., the undersigned submits that *the Union must establish those claims by unassailable evidence before the Board.*

On page 8 we find:—

"It goes without saying that the organizers and officers of the local should have sought to have a proper system of bookkeeping and auditing set up and showing at a glance the number of members in good standing.

"It was stated by way of explanation for such lack of evidence that in a period of organization, some things are left undone which would be attended to in due course."

On page 10:—

"It may also be pointed out that it would be in the interest of the Local and its members if the organizers and officers would immediately engage the services of qualified accountants to set their books in proper shape."

Also on page 10:—

"Moreover, in the preparation of any memorandum, brief or demand, evidence in support of their contentions should always be presented. It must be understood that the Board will exact something more than a mere statement of the representatives of the Union."

The last statement, in the opinion of the undersigned, is an admission that the majority members of the Board accepted the statements of the representatives of the Union although the Union is advised, for future purposes, that evidence ought to have been presented, as *another* Board would likely not accept their statements. The undersigned's only comment on this revealing paragraph is that the recommendations therein given should have been insisted upon, and the attitude of *another* Board practised, in the present case.

Despite the contents of the above extracts and despite the lack of proper proof, recognition is recommended by the majority members.

In the democracy the rule of law still governs and so far as the undersigned is aware, unions have no greater rights before the law than companies. If a union contends that it represents the majority of the employees of any company, surely it is proper that it should prove its contentions, when seeking to be accepted as a contracting party.

6. UNION'S FAILURE TO KEEP BOOKS

The Company tried before Mr. Rose to obtain proof of membership but the Union ignored the orders of the Government Commissioner, and before this Board the Union claimed that it had no books. As a matter of fact, it came out before the Board that the Union did not even have a constitution. In the copy of the International Constitution which was filed there is a provision that a member remains in good standing until he has been suspended and the treasurer

*See this issue; pp. 1666-1669.

of the Union stated that not a single member had been suspended since the organization of the Local. Consequently, if the Union has no books, what system does it use to keep track of its membership in default of ledgers? How does the Union know who has paid dues? How can the organizer control attendance at meetings of the Union? How can the organizer do the many things in respect of which records and books are essential? Is the Union responsible? *It is fantastic of the Union to ask acceptance of its statement that no books exist and in the same breath to ask acceptance of its claim that it represents the majority of the employees.* There is no mystery about union membership although there may be secrecy. Membership could be determined by some independent third party in a proper way—preferably by a chartered accountant. Such party could have been named by the Board. There was absolutely no danger that the names of the members would come into the possession of the Company, if that were feared. If unions are not required to make proof of their membership as in the present case, if they may ignore with impunity the orders of a Government Commissioner, there can never be any proper basis of employer and employee relationship.

The function of a Board of Conciliation and Investigation is to conciliate either before or after it has investigated a dispute, but where no conciliation is possible, the function of a Board is to investigate and to report upon the ascertained facts.

7. CRITICISMS OF MAJORITY REPORT

My specific criticisms of the majority report and the reasons upon which they are founded are the following:—

1. The evidence of Mr. Lariviere, the secretary-treasurer of the Union is incomplete. He stated that in February 1943, the membership of the Union was 1,800 but, at the hearing before this Board, he caused to be produced 1,432 application cards, although he swore that not a single member had been suspended since the organization of the Union. No explanation was given of this important discrepancy. If the membership was 1,800 in February 1943, and no members were suspended, how could the membership fall to 1,432 about eight months later.

2. On page 5 of the Majority Report it is stated:—

"In his evidence, Mr. Lariviere stated that over 1,800 employees signed application forms. Furthermore lists were signed by about 1,800 employees of the Company authorizing the United Textile Workers of America to represent down.

"The Company was not satisfied that these application cards were bona fide, and, the Department of Labour delegated Mr. Bernard Rose, K.C., to investigate and check-up with the payrolls of the Company."

No application cards or forms were ever presented to Mr. Rose as the Union refused to produce any records before him although twice ordered to do so. The check which was made under Mr. Rose's supervision was a check of the petition circulated from door to door in Valleyfield, which contained 508 names not found on the payrolls of the Company. The lists which were supposed to have been signed by about 1,800 employees of the Company, as stated in the above mentioned extract from the majority report, were the so-called 1,800 application forms referred to in the above quoted extracts from the majority report, and were not additional thereto. The majority report is not clear in this regard and the undersigned is simply stating the facts to make the record accurate.

3. The reasons why the majority members came to the conclusions that they reached are apparently contained in the three following paragraphs of the report, on page 9:—

"It was admitted by Mr. Aird that if a vote were taken of the employees at large, a substantial majority would have stated that they were in favour of being represented by the United Textile Workers of America.

"Such is undoubtedly the desire of the majority of the employees of the Company and in itself, satisfactory evidence that the men are behind this application and its conclusions.

"In this case the majority of the Board considers that if the vote were taken, a substantial majority would vote in favour of being represented by the Union; and it may be added that in this particular point, the officials of the Company agree."

The majority members of the Board freely admit that the Union submitted no evidence of any kind as to its membership, as appears from their own report and particularly from the extracts thereof quoted herein, but they had to justify their conclusions and the above three paragraphs furnish the reasons.

The majority members overlook the fact that there is only one union involved, not two, and therefore there was no reason for a vote. A vote to determine representations, where only one union is concerned, would be farcical and the reasons are so obvious that they merit little discussion. It is not difficult to understand why a substantial majority would favour being represented by the Union if such a vote were held. The Union would be course promise the employees that, if they supported the Union, the Union would obtain what it has been demanding from the Company, that is:—

(a) Ten cents per hour increase in all wages, that is approximately \$1 a day increase for each employee.

- (b) Vacations with pay.
- (c) Full cost of living bonus.
- (d) Minimum starting wages.

The Company on the other hand would have nothing to offer. It could not increase wages or grant vacations with pay. Obviously any such vote would only resolve itself into a question "Are you in favour of an increase in salary" and I think all would vote "Yes" to such a question. That is the basis upon which the majority members of the Board have made their decision.

The majority report states that the Company officials agreed that the majority of the employees would vote for a union, but that is not quite accurate. What Mr. Aird stated at the meeting was that the employees would undoubtedly vote for a Union under the circumstances outlined above.

(4) On pages 9 and 10 of the majority report reference is made to the fact that the Company has established a Department of Personnel. It is clear that the majority members have erred in referring to the creation of this Department as the Company's method of settling labour disputes. It is obvious from reading the paragraph quoted that the Department was created solely to take keen personal interest in the problems of the employees and to give them sympathetic, practical and prompt advice and assistance in the many personal and financial difficulties which from time to time beset them, and which have an adverse effect on their morale and capacity to produce.

8. RESPONSIBILITY OF LOCAL 100

The reading of the majority report raises at once in the mind of any unbiased observer the question whether or not Local 100 is a responsible Union and one which a Company with over 3,000 employees should deal with. A Union which keeps no ledgers after a whole year of existence, which has no minute books or any books of account, which produced a list of names supposed to represent employees of the Company, in respect of which, after checking, 508 names could not be found on the payrolls of the Company, does not engender confidence. The majority report itself admonishes the Union on its business practices. I quote from Page 8 of the Report:—

"It goes without saying that the organizers and officers of the local should have sought to have a proper system of bookkeeping and auditing set up and showing at a glance the number of members in good standing.

"It was stated by way of explanation for such lack of evidence that in a period of organization, some things are left undone which would be attended to in due course."

On page 10 the majority report recommends that the Union employ qualified accountants, that the Treasurer be bonded, that the organizers and officers first and foremost look after the interest of those whom they represent rather than their own prestige and finally the report goes on to say that trade unions have now become a business and should be run properly, *as a sound business should be*. Very definitely, however, Local 100 is not run that way.

9. CONCLUSIONS

In the light of all the submissions to the Board, I reach the conclusion without difficulty that the Union definitely failed to establish its title to act as bargaining agent for the employees of The Montreal Cottons Limited. I fear that the majority report recommendations are based upon compassionate grounds. It cannot be otherwise, for facts in support of the claim of the Union are lacking. Sympathy, however, should have nothing to do with determining the merits of this case. The findings of the Board should have been based upon facts and on facts alone.

10. RECOMMENDATIONS

In view of the obvious failure of the Union to establish by regular means its claim to represent a majority of the employees in the plant, and in view of the statement of the Company before the Board by its accredited representative, Mr. W. G. E. Aird, that it is prepared to enter into a labour agreement with any Union which can establish claim to 51 per cent of the employees in the plant as members in good standing, and in view of the fact that a labour agreement between a Company and a labour association is a matter of legal importance, the right and title to act as contracting parties to which should be unquestioned. I respectfully but strongly recommend, in the best interests of all concerned, that you appoint, as speedily as practicable, a Special Commissioner possessing auditorial qualifications to scrutinize and report upon the membership records of Local 100 of the United Textile Workers of America in Valleyfield, with specific reference to the plant of The Montreal Cottons Limited, in order that the claim of the union may be finally and definitely determined.

I have the honour to be, Sir,

Your obedient servant,

(Sgd.) D. A. Paterson,
Member.

Report of Board in Dispute between West Coast Shipbuilders, Limited, and Hamilton Bridge (Western), Limited, Vancouver, B.C., and certain of their Employees

On November 8, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the West Coast Shipbuilders, Limited, and Hamilton Bridge (Western), Limited, Vancouver, B.C., and certain of their employees, members of various unions, as follows: Local No. 1, Boilermakers and Iron Shipbuilders' Union of Canada; Local No. 2, Dock and Shipyards Workers' Union of Vancouver and District; Lodge No. 692, International Association of Machinists; Local No. 115, International Union of Operating Engineers; Local No. 1, Amalgamated Building Workers of Canada; Local No. 2, Amalgamated Shipwrights, Joiners, Boat Builders and Caulkers; Local 170, United Association of Plumbers and Steamfitters; and Local No. 3, Amalgamated Electrical Workers (L.G., August, 1943, p. 1091).

The personnel of the Board was as follows: His Honour Judge J. O. Wilson, Ashcroft, B.C., chairman, appointed on the joint recommendation of the other two members; Messrs. H. W. Herridge, M.L.A., Nakusp, B.C., and Fred W. Fearman, Vancouver, B.C., appointed on the nomination of the employees and employer respectively.

The report of the Board was signed by the chairman and Mr. F. W. Fearman, employer's representative. Mr. H. W. Herridge, M.L.A., submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a Dispute between West Coast Shipbuilders, Limited, Hamilton Bridge (Western), Limited, and certain of their Employees, members of various trade unions, as follows: Local No. 1, Boilermakers and Iron Shipbuilders' Union of Canada; Local No. 2, Dock and Shipyards Workers' Union of Vancouver & District; Lodge 692, I.A.M., Local 115, International Union of Operating Engineers; Local No. 1, Amalgamated Building Workers of Canada; Local No. 2, Amalgamated Shipwrights, Joiners, and Boatbuilders and Caulkers; Local 170, United Association of Plumbers and Steamfitters, and Local No. 3, Amalgamated Electrical Workers.

TO THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
PARLIAMENT BUILDINGS,
OTTAWA.

Honourable Mr. Mitchell:—

The Board of Conciliation and Investigation in this matter was appointed by you on June 28, 1943, and consisted of the following persons:

Mr. H. W. Herridge, M.L.A., nominated by the Unions;
Mr. F. W. Fearman, nominated by the Employers, and
His Honour John O. Wilson, Chairman, chosen by the nominees of the unions and the employers.

These members have duly taken oath and have conducted the proceedings according to law.

Meetings of the Board were held at Vancouver on the following dates: August 7, 9 to 13 inclusive, September 8, 9, 10, 14, October 12, 13, 14, 15, 16.

West Coast Shipbuilders Ltd. was represented by Knox Walkem, Esq., K.C., Hamilton Bridge (Western) Limited, by J. H. Lawson, Esq., K.C., and the unions by William Stewart, Esq., Frank Carlisle, Esq., and Lawrence Anderson, Esq.

A considerable volume of oral and written testimony was submitted and written briefs of argument were filed with the Board.

There are two employers concerned in this matter, West Coast Shipbuilders Limited and Hamilton Bridge (Western) Limited. The latter firm operates on premises adjoining those of West Coast Shipbuilders Limited, and is engaged almost entirely in fabricating steel used by the latter company in shipbuilding. Its operation is so closely integrated with the shipbuilding carried on by West Coast Shipbuilders Limited that it may be called a joint operation. Of the unions involved in this reference, all of which are represented among the employees of West Coast Shipbuilders Limited, four have members employed by Hamilton Bridge (Western) Limited, and represent the great majority of the employees of that concern. It is therefore proposed to deal with the two companies, for the purposes of this report, as though they were a unit. The facts and figures hereinafter cited are compiled and stated on that basis, and the recommendations made apply to both companies.

Eight unions are parties to the reference. Of these unions it may be said generally that six are craft unions, having as members only persons versed in one particular skill or craft. These are as follows: Machinists, Plumbers and Pipefitters, Operating Engineers, Painters, Shipwrights and Carpenters, Electricians. The remaining two unions, the Boilermakers and Iron Shipbuilders' Union of Canada, and the Dock and Shipyard Workers' Union of Vancouver & District are industrial unions, embracing in their membership persons of various skills and crafts.

The industries involved are distinctly war industries. West Coast Shipbuilders Limited did not exist prior to the war. By far the greater part of the operations of Hamilton Bridge (Western) Limited were called into being to meet the demand created by the war. The joint operations of the two companies are concerned with turning out merchant vessels to fill Government orders.

The employers have recognized the principle of collective bargaining, and are willing to enter into agreements with the Unions covering the terms of employment of their members. Every term of the written agreement attached hereto has been agreed to by both Employers and Unions except clause 31, which reads thus: "Only members of this organization will be employed and in the event of the union being unable to supply men, no man who is unfair to this organization will be employed." In parenthesis it should be said that the Unions interpret the expression "No man who is unfair to this organization" as meaning "No man who fails to join the union within a stated period after his employment." The employers refused to execute an agreement containing the said clause 31.

As a result of their refusal, a conciliator from the Department of Labour attempted to adjust the differences between the employers and the unions. This attempt failed. Following this, in compliance with the Industrial Disputes Investigation Act, the Unions caused a vote to be taken by their members on the following question: "If the Department of Labour refuses to grant a Board of Arbitration with regard to the dispute between your union and the company, do you wish to take strike action? Yes or No." 3,955 Union Members voted, 3,295 "yes", and 640 "no". Since over 83 per cent of those polled had voted "yes", an application was made to the Minister for the appointment of a Board, and the constitution of this Board resulted.

Every effort was made, both at the public meetings of the Board, and at private hearings where the representatives of each side were interviewed by the Board apart from their

opponents, to arrive at a settlement. The Employers were unwilling to agree to any form of restrictive employment agreement from the maintenance of membership condition to the closed shop. The Unions took just as arbitrary a stand, contending that they were entitled to exactly the same contract as given in the other Vancouver yards, which is admittedly the strictest form of closed shop agreement.

The table appended, submitted by the Unions, gives a fair picture of the membership of the unions among the employees of the companies concerned. It is not quite accurate in that there are, we believe, rather greater numbers of persons eligible for membership than shown on the tables, which would mean that the percentages shown by the unions of membership to persons eligible are slightly higher than they should be. However, the inaccuracy is so slight that it would not greatly affect the general picture shown on the table. It shows that the great majority, some 83 per cent of the employees, belong to the Unions.

There are in British Columbia seven shipyards, four in Vancouver, two in Victoria, and one in Prince Rupert. Of these, three, all in Vancouver, operate under closed shop contracts similar to clause 31 in contest here. Two, West Coast Shipbuilders Limited, and Prince Rupert Drydock Limited, operate under open shop conditions, and the two Victoria yards operate under what can only be called mixed conditions. For instance, the Boilermakers' Union has closed shop agreements with both yards. The Dock & Shipyard Union has a Union Preference agreement with both yards. The Machinists Union has a closed shop agreement with both yards. Neither the Plumbers, the Shipwrights and Carpenters, nor the Painters have closed shop agreements, nor have the Riggers or the Iron Moulders and Founders.

Generally speaking, the open shop prevails in British Columbia. It obtains in the lumber industry, in the pulp and paper industry, and in the greater part of the mining industry. There is no closed shop in the fisheries, nor in the railroads. Generally it can be said that the application of the closed shop principle in this Province is confined to certain craft unions. There are exceptions to this rule, of which some of the shipyards are among the most notable. Certain of the mining companies have also accepted the closed shop idea.

Other unions. In addition to the protagonist unions, there are other labour organizations having members employed in the shops

concerned in this dispute. These are as follows:—

(a) The United Welders, Cutters and Helpers, Local No. 1. This is a local organization, not affiliated with any national or international body. It is incorporated under the Societies Act of British Columbia. It has members employed in the shops in question. It competes directly for membership with the Boilermakers' Union. The Boilermakers' Union includes many crafts and skills, among them, welders, cutters and helpers. The Boilermakers' Union, as we are informed, is in process of forming a sub-union to take care of the special problems of welders, cutters and helpers. All the protagonist unions reject the claim of the United Welders, Cutters & Helpers to be recognized as a bona fide trade union. They condemn it specifically on two grounds, one, that it has no national or international affiliations, two, that it is incorporated, and hence liable to be sued, a form of organization repugnant to trade union principles. We doubt that this organization would qualify as a trade union under the definition given in the Provincial Industrial Conciliation and Arbitration Act, so as to enable it to take advantage of subsection 9 of Section 4 of that Act. However, it does not appear to be under any disability so far as Dominion legislation is concerned. The Federal Trades Union Act, R.S.C. 1936, Chap. 202, would prevent it, as an incorporated Society, from being registered as a Trade Union. But this is not a valid objection, since none of the protagonist unions are registered under that Act. Therefore, if a closed shop were to be instituted, it would probably be necessary to poll the employees in the yard eligible for membership to ascertain whether the majority of them would prefer membership in this union or in the Boilermakers. Since we do not recommend the closed shop, this necessity does not arise, and the existence and membership of this union are only interesting as indicating that there is not complete solidarity among the employees in the yard. We are not certain from the evidence whether the majority of the Welders, Cutters & Helpers are members of this union, or of the Boilermakers, although we are inclined to think that the Boilermakers would have a majority. At any rate, the United Welders, Cutters & Helpers' Union favours the closed shop, but insists that its own should be one of the unions to which the principle is extended, a contention which is vigorously rejected by the other unions. It should be added that Welders & Burners Unit No. 4 (Amalgamated Building Workers of Canada), formerly represented practically all welders, etc., and had an open shop agreement with the companies. This organization has now disintegrated, and its former members are now associated either with the Boilermakers or with the United Welders, Cutters & Helpers, Local No. 1.

(b) United Brotherhood of Carpenters & Joiners of America. The membership of this organization embraces from a quarter to a third of woodworkers employed in the yard. Its jurisdiction conflicts with that of the Shipyard Section, Amalgamated Building Workers of Canada, one of the protagonist unions. The other unions do not consider this an outlaw union, as they do the United Welders, Cutters & Helpers. This union has a subsisting open shop agreement with West Coast Shipbuilders

Limited. It has been in negotiation with the Shipyard Section of the Amalgamated Building Workers of Canada, with a view to working out an amicable arrangement for the resolving of jurisdictional differences if the closed shop is instituted. So far, the negotiations have not been successful. This organization has not asked for a closed shop.

(c) Local No. 661, Bridge & Structural Workers. The members of this union are generally known as the Riggers. The union has members employed in the yards in question. It is a bona fide trade union. Its right to recognition is disputed by the other unions. It does not ask for a closed shop. If a closed shop were recommended, it would probably be advisable to poll the riggers to see whether the majority of them wish to support this union or the Dock & Shipyard Workers Union, with which its jurisdiction conflicts.

The total membership of these three unions is not large, and the great majority of employees belong to the protagonist unions.

West Coast Shipbuilders Limited, has, from its inception operated as an open shop, and has had posted at its gate a notice to this effect. Therefore all persons accepting employment there have had full notice of the conditions under which they are to work.

A considerable part of the very excellent brief submitted by the Unions was devoted to a discussion of the legality of the closed shop. The authorities cited were American. With due appreciation of the assiduity with which this material was gathered, it can be said that the legality of the closed shop has never been disputed in Canada to the extent it has in the United States where both Federal and State constitutions contain provisions of a general and quasi-philosophical nature, unknown to our jurisprudence. Such decisions as we have on the matter arise from actions for damages against union officials by persons who have been deprived of their livelihood by the operation of the closed shop, and the more recent of them, from *Allen vs. Flood*, 1898 A.C. 1, to *Corbett vs. Canadian National Printing Trades Union*, 1943 (2) W.W.R. 401, all hold that no action lies where the closed shop is instituted in a bona fide effort to improve the status of union members.

So far as British Columbia is concerned, the closed shop agreement is expressly legalized by subsection 2 of Section 7 of the Industrial Conciliation Act, Chapter 31, Statutes of 1937. It has been held (*Hay v. Ontario Bricklayers Local Union No. 25*, 1929, 2, D.L.R. 336) that a closed shop policy, so long as it is to forward or defend a trade, does not offend against Sec. 498 of the Criminal Code. Therefore, under either jurisdiction, there does not appear to be much doubt as to the legality of a bona fide closed shop agreement.

A survey of the Canadian labour situation shows that while a large number of industries operate under closed shop conditions, the open shop is still the general rule in this country. All shipyards in Eastern Canada operate under open shop conditions.

Only one case (Davie Shipbuilding Co. vs. Boilermakers Union, Vol. XLIII, Canadian LABOUR GAZETTE, page 766) was cited to us, where a board such as this had recommended the closed shop. Admittedly the case was very similar to this one, involving certain shipyards in Quebec. However, the fact is that the recommendation was never implemented, and that the union concerned, the Boilermakers, is now operating under a written contract with the companies concerned, which contract contains no closed shop clause. The only case cited to us in which an American labour board or court has recommended the closed shop was that of the Bethlehem Shipbuilding Company at San Francisco. In that case, the closed shop was recommended to bring the company into line with all other shipbuilding companies in the United States Pacific Coast.

The industries herein concerned have been declared to be war industries, and as such come under Dominion rather than Provincial supervision during the war period. Accordingly, this Board has been set up under the Federal Industrial Disputes Investigation Act, rather than under the Provincial Industrial Conciliation and Arbitration Act. Nevertheless, we have considered both Provincial and Federal legislation in arriving at our decision. We have two reasons for doing this. One is that there would appear to be some doubt as to whether the fact that these are war industries would remove them from the application of the recent amendments to the Provincial Act providing for compulsory collective bargaining. The other reason is that both parties to the dispute appear to be mainly concerned with the post-war period, and there is no doubt that the industries in question will then cease to be war industries, and come under Provincial jurisdiction.

Many writers have classified the various forms of restrictive employment agreements creating or leading up to the closed shop condition. While there are many sub-classifications and modifications, it can be said that the main types of agreement are as follows:—

(a) The maintenance of membership agreement. Under this type of contract, all employees who now are or may hereafter become members of the union, are required, as a condition of employment, to maintain their union membership.

(b) The union shop agreement. This type of contract provides that the employer may hire whom he pleases but that the persons hired

must, as a condition of continued employment, join the union within a stipulated period, generally thirty days.

(c) The closed shop agreement, under which the employer covenants to hire only members of the union so long as it can supply men and, if it cannot supply men, and other persons are hired, that they must become members of the union. This is the type asked for by the Unions here.

British labour conditions were cited to us by both sides, in support of their arguments. The Unions claimed that the closed shop was well-nigh universal in Great Britain, while the Employers asserted that such a thing as a closed shop agreement was unknown there. Both contentions are approximately correct. So far as we can discover, no industry in the Old Country has entered into a written agreement binding itself to engage only members of a particular union or unions. On the other hand, labour there is so highly organized that instances of non-union men being employed in industries where union men predominate are practically unknown. It might therefore be said that British Labour has arrived at closed shop conditions without closed shop agreements. This condition seems to have come into existence with only a fraction of the strife and discord which have attended its attempted introduction in this country, and particularly in the United States. While British Trades Unions have gone through many and arduous struggles to establish themselves, it does not appear that the closed shop has ever been an issue between the unions and the employers to the extent that it has been on this continent. This is probably due to the greater homogeneity of the British working class. It would appear that from the institution of the various unions the employees eligible have joined practically en masse, so that the employers found themselves facing a condition rather than, as here, opposing a theory. The same condition would appear to have obtained in other European countries, such as Sweden and Germany prior to Hitlerism. One possible explanation is that there is a greater class consciousness in these older countries, where a man expects to live his life in the class into which he is born than there is on this continent, where society is more fluid, and men are constantly emerging from the employed into the employing classes.

The Board feels it necessary to deal specifically with the arguments advanced by the Unions as epitomized in the concluding remarks in their brief:

That the closed shop is democratic and a logical extension of the principle of collective bargaining. We do not agree that the argument advanced by the Unions is a tenable

one. The Unions drew an analogy between the operation of the closed shop principle and the ordinary workings of democratic governments. They said that since it is a first principle that the will of the majority shall prevail, it follows that where a majority of the employees belong to a union, the minority should bow to their will and also join the union. They compared this to the rule exercised by a majority party in political affairs. If, for instance, the Liberal Party commands the votes of a majority of the people of Canada, then its policies are enacted into law and obeyed by the minority, who may disagree with these policies.

Collective bargaining is the law of the land in British Columbia. The employer is bound to recognize any union which commands the support of a majority of his employees, and to bargain with that union as to wages and working conditions. The bargain so made is binding not only on the union but on all employees, so that the minority are as to the terms of their employment, bound by the will of the majority. So far we have a perfect analogy with the working of our political institutions, where the policy of a successful majority becomes the policy of the State, and must be accepted by the dissenting minority. But the unions want to go farther than this. They say that not only must the minority accept the policy of the majority, but that it must join the majority party. This is as though one of the Canadian political parties, after a successful election, were to insist that all dissentients should forthwith not only accept their rule, but join their party. Whatever may be the practical benefits to labour of the closed shop, it is not, in our opinion, an extension to the field of labour relations of the democratic principles used in government.

Collective bargaining is not only the law of the land, but a system which must appeal to any fair minded person. We cannot see that the compulsory closed shop is a logical consequence of collective bargaining, at any rate under the advanced legislation we have in British Columbia. We do concede that a total or almost total trade union membership is the logical result of collective bargaining as enforced in British Columbia. With the well-deserved advantages which are given to the employees and the unions, it would appear to us that the pressure to join the unions will be almost irresistible, and that those persons among the workers who do not now subscribe to trade union principles will, by a sane and untyrannical educational policy, soon be won over to the unions. The unions will then, as in Britain, have achieved the condi-

tion which they desire without imposing offensive restrictions on any man's right to make up his mind.

It is argued that in an open shop employees who do not join the unions secure all the advantages gained for the workers by union activities without paying any of the cost. There is a great deal of truth in this statement. Unions have accomplished great things for workers, and will doubtless continue to do so. This accomplishment doubtless imposes a moral obligation on a worker to join the union which represents his craft. There are in many other walks of life organizations which work for the general benefit of classes of society, such, for instance, as ratepayers associations, working in the interests of property owners, boards of trade, which plead the cause of business, and innumerable other associations representing special interests. These associations all try for and secure benefits for the classes they represent. There is probably a moral duty on all business men to belong to their local boards of trade. But no one has yet suggested that they be compelled to do so as a condition of carrying on their businesses. We have in some trades and professions an absolute closed shop. The physicians and surgeons, the dentists, the lawyers, the barbers, are required to belong to their professional and trade associations as a condition of carrying on their trades or professions. We have in British Columbia marketing associations for the selling of the products of farmers, which have exactly the same effect, since they effectively prohibit farmers from carrying on their business save as members of, and subject to the rules of the associations. Furthermore, these associations have power to police, discipline and tax their members by collecting fees. But these powers are statutory. They are conferred by the State can be taken away by the State, and are subject to modification, enlargement or amendment by the State. Any policy of arbitrary exclusion, of exorbitant fees, adopted by any of these associations can at once be checked by the State. This is not true of labour unions which have always strongly opposed any form of Government supervision. In this connection, it is interesting to note that none of the unions involved in this dispute have registered under the Federal Trades Union Act. This Act appears a beneficent one, imposing on the unions no greater obligation than that of filing financial reports, but even this degree of public supervision is apparently objected to by the unions.

We have already stated that the six craft unions involved in this dispute are now

enjoying conditions of employment very close to the closed shop. From this they argue that the employers may well recognize, by a written agreement, an existing condition. The employers say that, since the condition exists already, no written agreement is necessary. Throughout this arbitration the Unions have cited British Trade Union conditions to us as models. Here we have in regard to the craft unions, a condition similar to that in many British industries. The unions involved have supplied such a generally satisfactory class of labour, have maintained such high standards of craftsmanship that the employers do not go beyond their ranks in hiring men of the trades covered by the unions. In other words, a condition approximating the closed shop has been arrived at, as in England, by evolution rather than by compulsion. This being the case, why not follow the English parallel through, and let this satisfactory state of affairs continue as it does in England, without compulsion.

The gentlemen who very ably presented the Unions' case, were quite frank, when questioned by the Board, in expressing the view that closed shop conditions should prevail not only in the industries involved in this dispute but in all Canadian industry. This means that they contemplate with equanimity the prospect of a condition where no workman can secure employment unless he belongs to a union. The condition thus brought about would be directly analogous to that which existed in the darkest ages of the labour repression, when unions were outlawed and persecuted, and no union man could secure employment; except that the shoe would be on the other foot, and no non-union man could get a job. If such a discipline is to be imposed on the workers, it will inevitably result in the unions becoming subject to State control and, eventually, possibly instruments of the State. The powers which would then be wielded by unions of depriving any man of the right to a living are far too great to be left to the arbitrary decisions of an organization which is not subject to Government supervision.

The Industrial Conciliation and Arbitration Act of British Columbia makes collective bargaining compulsory. It provides that where a majority of the employees of a shop, or a majority of the group of employees belonging to a craft in a shop, are organized into a trade union, that trade union shall be recognized by the employer as collective bargaining agent for all the employees in the shop or the craft, and that a bargain made by them with the employer shall cover the terms of employment of all employees in the

shop or craft, whether they are members of the union or not. With a closed shop agreement in operation, this law would have the effect of perpetuating the rule of any union which first gained a majority of the employees as members. Thereafter, since all employees would be compelled, as a term of their employment, to be members of the union, and since any union commanding the allegiance of a majority of the members must be the sole collective bargaining agent, there would be no possible way in which the employees could avail themselves of the procedure set out in subsection 11 of Section 4 of the said Act for establishing another union as the collective bargaining agent. It has been argued before us that both employer and employee have everything to gain from the stability that such a condition would create, since it would eliminate jurisdictional labour disputes, and give the selected unions absolute security. There is considerable validity in this argument, but there is another side to the picture. The union so recognized and entrenched would be in an absolutely invulnerable position. No employee could resign from it, no other union could gain adherence in the shop in question. Such incentive as might be provided to the union management by the necessity of maintaining membership and by the fear of competition would be gone forever. No matter what sins the union committed, it could maintain its sway. This Board doubts whether the jurisdictional position of the unions, as disclosed on this inquiry, has sufficiently crystallized to make such a condition altogether a desirable one.

Looking at the matter from a purely practical, as opposed to a theoretical standpoint, it cannot be said that the case of the closed shop advocates, in the light of experience on this continent, is clearly proved. There are doubtless many instances in which it works very well. There indubitably are many instances in which the power given to union leaders by closed shop conditions has been notoriously and flagrantly abused and has led to almost open "racketeering". The unions which have been guilty of the abuses have not been outlaw unions but members of the great national labour federations. Neither can it be said that the institution of the closed shop brings an end to strikes and labour unrest. A notable instance is the current strike of coal miners in the United States, which follows on a long period of labour strife in the coal-mining industry. The coal mines in question are all closed shops. The Board does not presume to know who is right in the dispute between the miners and the

operators, but cites the condition that now prevails as proof that the closed shop is far from being a universal panacea to end labour troubles.

The National Selective Service Regulations would, the Board is told, permit of a workman, without his consent, being assigned to shipyard work. If this were the case, and he were assigned to a closed shop yard, he would presumably have to join a union willy nilly. The employers argued that this would, in the case of a man who did not believe in unions, be an invasion of his rights. Theoretically this is absolutely sound. Practically no instances were reported to the Board where this particular situation had created trouble.

The most cogent argument advanced by the proponents of the closed shop is this: That a man has a right to sell his labour where he wills, and that he has a right to refuse to labour with persons whom he considers obnoxious, in this case, non-unionists. This argument is stressed by the Webbs, Daugherty and all other labour advocates. The individual right to refuse to work with non-unionists implies the right to strike collectively against work with non-unionists.

The right to strike, subject to wartime controls, undoubtedly exists. But it cannot too often be repeated that the function of boards of this kind is not to tell people what they can or cannot do, according to law, but what they ought to do under the existing circumstances. If the questions to be determined were merely those of legal rights, there would be no necessity for the constitution of such boards, for the courts could take cognizance of the facts and enforce the law.

If in the case at hand the unions were faced with a condition where the resolute hostility of the employers, the conditions of the trades and, above all, the present state of the law, made it likely that their strength, failing a closed shop, could be undermined, they might be justified in invoking the right outlined above. The facts are otherwise. They have an overwhelming majority of the employees listed as members of their unions. There is no evidence that the employers have shown anything but the strictest impartiality as between union and non-union men. And finally, the unions are allowed by law to employ all legitimate tactics in soliciting membership, and indeed are in a position to bring almost irresistible pressure to bear on employees. This Board proposes to further re-enforce their already strong position by requiring that all present and future members of the unions shall be required as a condition of employment to continue their union membership. The law of British Columbia

provides that so long as they command a bare 51 per cent of the employees, they will maintain their position as collective bargaining agents for all the employees. Their wages and working conditions are, during the war, protected by Dominion regulation, and, after the war, will fall within the protection extended by the Provincial Minimum Wages and Hours of Work Acts and Regulations. As against this, the employers are enjoined by law (Sections 6 and 7 of the British Columbia Industrial Conciliation and Arbitration Act) from restricting their employment to non-union men, from threatening or discharging any person for joining any union, and from attempting to dominate, interfere with or sponsor any labour organization. When the Webbs and Daugherty wrote their textbooks, it might have been said that the dice were loaded against labour; now, so far at least as British Columbia is concerned, this cannot be said truly. The whole position is such that the unions ought, with fair and wise management, and without seeking to impose further conditions, to be able to achieve the condition desired by them where every employee belongs to his appropriate union. They may retain their legal right to strike, but their moral right to do so has been taken away by the fairness with which they have been treated.

This right of labour to decide where and when it will work, to refuse to work with persons obnoxious to it, formerly existed contemporaneously with an equally absolute right on the part of the employer to decide whom he would employ. He could, without fear of legal interference, and indeed with public approbation, refuse to employ unionists or persons who took part in labour activities. This was the condition that existed at the time that Daugherty and the Webbs wrote their theses. The employer's right to discriminate was not only coeval with the workman's, it was based on exactly the same sort of reasoning, the sort of reasoning that seeks to protect the interest of a class, regardless of the public weal. So far as the employer is concerned, the so-called right has now been taken away, in British Columbia, by statute. No longer dare he discriminate against, discharge, or even attempt to influence the unionist. With this abrogation of the employer's "rights", the whole case of the theoretical closed shop supporters falls to the ground. They cannot in decency claim for themselves a degree of freedom that is denied to the employer.

In a social organism, no one is wholly free. The only free man is the savage. We surrender reluctantly, and with due circumspection, part

of our freedom in order to assure the working of the organism which protects us and makes civilized life possible. We surrender because we hope to gain thereby. In this case the gain has preceded the surrender. The unions have gained by what amounts to a curtailment of the freedom of the employer—they have been given by this legislation a measure of security which demands on their part forbearance in the exercise of what may have been, under former conditions, their right.

To epitomize, we feel that under present actual and legal conditions the unions have no valid grounds to fear that they will lose their hold on the employees in these industries, and that the employers will thereby be enabled to worsen working conditions. We think that with the advantages given them by statute and by this award, the unions should soon achieve peacefully and without compulsion their goal of 100 per cent membership.

It might be said that where, formerly the employers wielded the weapon of anti-union discrimination, the unions were entitled to wear the armour implicit in their right to refuse to work with non-unionists. Since the weapon has been removed, the necessity for the armour no longer exists.

A great deal of evidence was given to prove or disprove that other Vancouver shipyards operating under closed shop conditions were more efficiently operated than the yard concerned in this inquiry. We do not propose to review this evidence at any length.

The only definite evidence was submitted by the employer and established the fact that some production records had been set up by West Coast Shipbuilders Limited. We do not make any findings as to the superior efficiency of any shipyard, but we do think it is clearly established that the efficiency of the West Coast Yard, under open shop conditions, is at least equal to that of the closed shop yards.

The unions contend that the establishment of a closed shop will eliminate workers' unrest, "quickie strikes", and labour troubles generally. The uncontroverted evidence submitted by the employers shows that there have been less man-hours lost through strikes and labour troubles in the West Coast Shipbuilders operation than in the closed shop yards. The following table, compiled from the LABOUR GAZETTE, shows approximately the man-days lost during the period from April, 1941, to June, 1943, in the four Vancouver shipyards.

Yard	Man-days lost
Burrard North.....	4,455
North Van Ship Repairs.....	9,205
Burrard South.....	8,696
West Coast.....	1,085

The facts seem to dispose pretty effectively of the union's contention in this regard.

Arising from this it is conceded by both parties to this dispute that no causes of dissatisfaction, other than the demand for a closed shop, exist at present. It is further conceded by the unions that their main concern in asking for a closed shop is not for the present but for the future. They have a present condition in which the great majority of employees eligible belong to the unions, in fact, in some cases, they have 100 per cent membership. There is no evidence whatever of any discrimination against the union or union employees. There is no evidence of the fostering by the companies of company or any other type of opposition unions. There is no evidence that general labour conditions in the yard are not just as satisfactory as in the closed shop yards. But the unions regard with concern the state of affairs which they conceive as likely to exist after the war, when shipbuilding business falls off, when large numbers of returned soldiers will be thrown on the labour market and when there will not be full employment available in the shipyards for all persons qualified to work therein. They distrust their employers to this extent: They think that their employers will take advantage of a flooded labour market to discharge union employees, replace them with non-union employees, and so break the power of the unions, with a consequent retrogression in wages and working conditions.

For the employers it can also be said generally that their objection to the closed shop is based more on the fear of its future operation than on dissatisfaction with its present effect as known in other yards. They return the distrust shown by the employees. They visualize a post-war condition where thousands of skilled workers will be discharged from the armed forces, and will compete with the present worker for the reduced number of jobs that will be available. Among these returned soldiers and sailors will be many former employees and skilled artisans whom they will wish to employ and toward whom they may feel they have a duty. They prophesy that under closed shop conditions it will be impossible for them to employ these men. They point out that the closed shop gives the union the last word as to who shall be employed, since the unions can always refuse an employee or prospective employee membership in the union concerned, and thus deprive him of the right to employment. They think that in a time of keen competition for shipyards, the unions will be bound, at the insistence of their members, to close their ranks and refuse admission to applicants where such admission might easily mean

the replacement of a union member in his job by the new applicant.

The union representatives have said that they have no intention of adopting a policy of exclusion in regard to membership in the post-war period. They say that they will always welcome new members; that they feel that their strength grows with their membership; that they will not set prohibitive initiation fees. We had at the time no reason to doubt the sincerity of their statements, but the fact is that they are merely present representatives of the union. The union policy in regard to membership is subject to change at any time.

So far as shipbuilding is concerned, we do not think that the most sanguine person would expect the industry to be maintained in the post-war period at its present level. Before the war, no major ships were built on the Pacific Coast of Canada. The tremendous industry now existing here is entirely the product of war conditions, of the necessity to transport and supply our troops, to provision Britain and to replace submarine losses. When the war ends, there will inevitably be a decline of employment in the shipyards.

This decline will coincide with the release of hundreds of thousands of men from the Armed Forces. Many of them will be skilled artisans, former shipyard workers. We hope and expect that private enterprise and Government work will provide jobs for all returned men. However, even taking this as a certainty, it is nevertheless equally certain that a great number of returned soldiers will seek work in the shipyards. Our present experience shows us that this class of work is preferred by working people. Even during the times of greatest labour shortage, it has been easier to attract men to shipyards than it has been to induce them to work at primary industries, such as logging, mining and fishing. The wages are high, the working conditions generally good, and the workers are able to be in the cities. There is no reason to suppose that returned soldiers will not show the same preference for shipyard work.

On the other hand, it is hard to imagine that the persons now employed in the yards are going to relinquish their positions to returned soldiers without a struggle. Giving them all due credit for patriotism and unselfishness, it does not seem likely that they will want to abandon their jobs and go into the woods to work if they can avoid doing so.

We can, therefore, visualize a considerable competition for these preferred jobs in the shipyards. If the field is left open, this will adjust itself naturally. The employer will want the best workman he can get. He may feel some special duty towards returned

soldiers formerly employed by him, but cannot be expected to go to the length of discharging a satisfactory employee in order to re-engage an incompetent one. Therefore, the condition should, in a short time, stabilize itself. The better old employees will be retained, the more capable returned soldiers engaged, and the yards will operate at a good level of efficiency to meet post-war competition.

Granted ideal, or rather idealistic union administration, this result could be achieved as easily under closed shop as under open shop conditions. Where it was proposed to replace a union member with a returned soldier, the worker would gracefully resign his post, the union would enrol the soldier, and the soldier would step into the job. But it is inconceivable that this will happen. The worker will fight for his job. If closed shop conditions prevail, the natural and obvious way for him to retain it is to get his union to exclude the returned soldier from membership. Human nature being what it is, it is almost inevitable under those circumstances that there will be very great pressure, on the unions for a policy of restricted membership. If a closed shop condition exists, this policy would effectively debar any returned soldier not already a union member from employment in the shipyards.

It may be said that this statement involves a grim view of post-war prospects for the shipyard worker. We think it inevitable that many of these workers will have to change their employment after the war. Such changes will entail some hardship. But the returned soldier must be considered. Granted he is a skilled worker, must he, after years of war service, go into the unskilled labour market while the man who has held his job during the war remains at his more congenial employment.

It might further be said that the point we have tried to establish, the infiltration into the yards after the war of non-union returned soldiers, is just what the unions fear will operate to break the strength of their organization. We do not think their fears are well-founded. We think that so long as they preserve a liberal membership policy, they will have no difficulty enrolling the new workers in their ranks. The law of British Columbia will operate to prevent any attempt by the most unscrupulous employer to proselytize or bring pressure to bear against the unions. So long as the union continues to represent a bare majority of the employees, it retains its collective bargaining powers.

The modern trade union is a unique form of organization in that it enjoys many of the rights of a body corporate, with few of the

corresponding responsibilities. In particular, its internal organization is not subject to statutory control. A corporation can only pass by-laws in accordance with its statutory powers, which may at any time be restricted or amended by Parliament. No such control is exercised over a union. Therefore, the union can, if they wish, adopt a policy of exclusion, resolutely closing their ranks against new members, without fear of interference by the State.

While this matter was before the Board, certain events occurred which shed some light on this phase of the argument, that is the possibility of the enforcement by the unions of a restrictive membership policy. In mid-September it began to appear likely that, due to improved shipping conditions, there would be a curtailment of production in the ship-yards, involving the laying off of large numbers of workers. The Boilermakers' Union, which represents over 50 per cent of the workers involved in this dispute, thereupon issued a notice to its shop stewards, business agents and other persons empowered to receive membership applications, instructing them, *inter alia*, that no new members were to be accepted in the closed shop yards, and that strict check was to be kept of all men who were in process of losing their membership through non-payment of dues, with a proviso that no dues payments, which might presumably have the effect of reinstating them, were to be accepted from such men. The said notice further provided "In the open shop yards, the rule being enforced in the closed shop yards is to be explained, and it is to be inferred that the same rule would apply in the open shop yards in the near future." A copy of the said notice is appended to this report.

The union representatives were confronted with this notice and asked to explain it. They stated that they felt it wrong to accept initiation fees and dues from persons who could not be sure of employment in the yards. This attitude is perhaps commendable, but it shows a certain confusion of mind on their part as to their function. The Board feels that it is the duty of the unions to accept as members all persons qualified for membership, irrespective of the abundance or scarcity of jobs. What a man should expect from his admission to the union is not a job, but the right to try to get a job in a closed shop yard. The union officials might well tell him, when they admit him to membership, that prospects of employment are poor, but they must, or should not refuse him membership. If they do so, they deprive him of the opportunity to apply for employment. It could well be that some applicants are better qualified for

jobs in the yards than certain persons now employed there. If so, they should have a chance to compete for these jobs. The closed shop and union membership must not be employed as an instrument to keep in employment, to the exclusion of other persons, union members, irrespective of the superiority or inferiority of their qualifications. The Board cannot help but be impressed by the fact that the largest of the unions has, at the first threat of curtailment of employment, invoked the very policy of exclusion which they had previously stated to the Board would not be invoked in the post-war period.

In this connection we should like to point out that some of the most ardent advocates of the closed shop policy stopped short of supporting it when it is allied to a policy of restriction of union membership. Sidney and Beatrice Webb, in their great and authoritative work, "Industrial Democracy", devote many pages, starting at p. 704, to a condemnation of this practice, which they conclude is a more maleficent form of monopoly than that enforced by great business trusts and cartels. Similarly, Carrol F. Daugherty in "Labour Problems in American Industry" says at p. 557, after a hearty condemnation of the anti-union shop, "The closed Union shop with closed union comes at the end of the scale opposite the closed anti-union shop, and is completely comparable therewith". And again at p. 561, "At the other end of the scale are the unions which demand a closed shop with a closed union, and in connection therewith artificially restrict their members by reason of restrictive membership and apprenticeship requirements. Here again such policies may be understood but hardly justified. If a union bars entrance to a trade by monopolistic practices and in doing so keeps out non-union men who might otherwise join, it alienates sympathy and classes itself with trusts and pools. Labour has just as much right to effect monopoly in its commodity as employers or doctors or lawyers in theirs, but all such methods, although explainable in terms of human nature, are unreasonable and unjustifiable from a social point of view".

The statement made in the last sentence quoted requires some examination. In the first place, so far as Canada is concerned, employers, in so far as many trades and industries are concerned, have no right to effect monopoly, but may, on the contrary, be punished for doing so. In the second place, the right which doctors, lawyers and engineers, and in British Columbia, barbers, hairdressers and chiropractors have to control membership in their professions or trades, is as we have already pointed out a statutory one, subject

to Governmental control. We would venture to suggest that the very persons who advocate an absolute closed shop for all boilermakers would be shocked at the suggestion that an association of doctors could, in the absence of some statutory authority, arbitrarily exclude their sons from the practice of surgery. We do not say that the Boilermakers should not have the same right to control membership in their trade that the surgeons have in respect of their profession, but we do say that if such power is to be given them, it must be given by statute, and be subject to statutory control, so that it may not be abused.

Another aspect of the closed shop which was discussed during the hearings was the implications of the affiliation of trades unions with political parties. The Boilermakers' Union, presently suspended from membership in the Canadian Congress of Labour, is normally a member of that body, and confidently expects that certain negotiations now under way will result in its being readmitted to membership. The Canadian Congress of Labour, at a recent convention, went on record as recommending to its affiliates the support of one of the great Canadian political parties, the Co-operative Commonwealth Federation. As this matter was explained to us at the hearing, the local unions affiliated with the congress are given complete autonomy in this matter, and may individually decide whether they want to support the C.C.F. However, the unions which do decide to follow the policy advocated by the central body commence at once to contribute to the coffers of the political party a stated sum of a few cents per month per member. It was not stated, and it is not important, whether this money is to be paid from the general funds of the union or raised by a special levy on the members. The fact is that once a union has by a majority decided to support the political party, each member of that union will thereafter directly or indirectly contribute a certain sum of money to the support of that party. Applying that condition to a closed shop, we could have a union member who, as a condition of his employment is required to maintain his union membership and pay his dues, but who does not believe in the policies of the political party in question. This man would then be confronted with the alternative of throwing up his job or of paying part of his wages towards the advancement of principles in which he did not believe. It is needless to say that the identity of the political party concerned does not affect the matter. The result would be equally objectionable if the party to be supported were the Liberal Party, the Progressive

Conservatives, or the Bloc Populaire. In England, such a contingency is expressly provided against by legislation protecting the dissident workman from being levied upon for political purposes, but no such protection exists in Canada. This Board is not aware of any principle of democracy or equity which would justify confronting a workman with such a choice as above outlined. But such a condition could certainly arise under the present Canadian law in industries where there are closed shop contracts.

The Board recommends that the Employers and the Unions enter into the form of agreement already negotiated with clause 31, establishing a closed shop, deleted.

The Board recommends that the following Union security clause be inserted in the agreements to be entered into between the Employers and the Unions: "The company agrees that any present employee who at the date of this agreement was a member of the union or who has become a member of the union since that date shall, as a condition of continued employment, maintain membership in good standing; and any employee who hereafter, during the life of this agreement, becomes a member or is reinstated as a member of the union, shall, as a condition of continued employment, maintain membership in good standing."

It may be said that in recommending any sort of restrictive clause, even such a comparatively mild and inoffensive one as the above, the Board is swallowing the camel of principle, while straining at the gnat of form. It is true that some, though by no means all, of the objections which the Board has cited against the closed shop would apply against a union security provision. The Board's reasons for the recommendation are as follows: During the negotiations before the Conciliator which preceded the appointment of this Board, the employers, in an attempt to effect a settlement, offered to enter into an agreement containing such a clause as we have recommended. On the hearings before the Board, the employers took the position that this offer, not having been accepted at the time, was now withdrawn, and that they were not bound by it. In ordinary legal or commercial dealings, where an offer can be made without prejudice and subject to revocation if it is not immediately accepted, this would be a perfectly sound position for them to take. However, the Board does not feel that the rules of conduct proper to lawsuits are applicable to dealings of this kind, and feels that the employers should make good on their previous offer. Hence the above recommendation. The Board is also

influenced by the further practical consideration that a similar type of agreement has, for a great many years, given rise to very satisfactory labour conditions in one of the great businesses of this Province, the pulp and paper industry, and that renewals of agreements between employees and employers in that industry containing a clause similar to the above have very recently been negotiated. It will also be noted that this sort of provision will not allow any union, by a restrictive membership policy, to deprive any person of the right to a job.

Mr. H. W. Herridge, M.L.A., the third member of the Board, dissents from these findings, and is filing a separate report.

Vancouver, B.C., November 1, 1943.

The whole respectfully submitted.

(Sgd.) J. O. Wilson,
Chairman

(Sgd.) F. W. Fearman,
Member.

Minority Report

In the Matter of the Industrial Disputes Investigation Act and of a Dispute between West Coast Shipbuilders' Limited, Hamilton Bridge (Western) Limited, and certain of their employees, members of various trade unions, as follows: Local No. 1 Boilermakers and Iron Shipbuilders' Union of Canada, Local No. 2 Dock and Shipyard Workers' Union of Vancouver, District Lodge 692, I.A.M. Local 115, International Union of Operating Engineers, Local No. 1 Amalgamated Building Workers of Canada, Local No. 2 Amalgamated Shipwrights, Joiners, and Boat Builders and Caulkers, Local 170 United Association of Plumbers and Steamfitters, Local No. 3 Amalgamated Electrical Workers.

TO THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA.

Sir:

Having had the honour of serving as a member of the Board of Conciliation and Investigation on the recommendation of the eight applicant Unions, and having had an opportunity to hear and study the evidence presented to the Board, I find myself in disagreement with the other members of the Board and therefore submit a minority report for your consideration.

I wish to take this opportunity to express my sincere appreciation for the courtesies and consideration at all times extended to me as

a member of the Board by my colleagues, Judge J. O. Wilson, Chairman, and Mr. F. W. Fearman, representing the employers.

FACTS NOT IN DISPUTE

(a) The above-mentioned 8 internationally affiliated unions have applied for a closed-union shop in the companies, West Coast Shipbuilders, Limited, and Hamilton Bridge (Western) Limited.

(b) According to the figures presented by the management the 8 Applicant Unions represented about 75 per cent of the employees at the two plants involved. According to the figures presented by the Unions they represented about 87 per cent of the employees. I believe I can fairly say that all the members of the Board agreed that the difference was a difference in the method of computation and that it was agreed among the Board members that at least 80 per cent of the employees in these two plants were members of the 8 applicant Unions.

(c) In the brief presented by the West Coast Shipbuilders, Limited, it was submitted that "the company is engaged solely in war-time contract and does not carry out any repairs or any other private work. In these various respects it differs from the Closed Shops of Burrard and North Vancouver. The Company has acquired its site on a lease-hold basis and the terms of the various leases obligate the company to remove its plant and equipment from the premises after the termination of its war and post-war contracts". Although this submission is worded rather ambiguously, the straight inference is that West Coast Shipbuilders, Limited, is a company which will do business only for the wartime and not after and much was made by the companies of this point in an attempt to differentiate between their yards and the other yards in the Vancouver area. The only logical reason for making this point is the inference I have mentioned; however, I reject in advance the fact as a reason for refusing to accept the Union Shop.

(d) It was further mutually agreed that of the four important yards engaged in ship building in the Vancouver area, three; namely, Burrard Drydock North Company and Burrard Drydock South Company and the North Vancouver Ship Repairs had Closed Shop agreements with the 8 Applicant Unions, but that union shop practice is actually in effect.

(e) It was further agreed that the applicant Unions asked for an Agreement based on the practice in the other Shipyards in the Vancouver area.

These other shipyards represent about 16,000 men out of the 20,000 odd employed in the industry in this area.

DEFINITION OF UNION

Another organization purporting to be a labour union; namely, The United Welders, Cutters and Helpers, Local No. 1, appeared before the Board, but throughout my report I do not recognize this a bona fide union for the reason that it is neither affiliated with any national or international union—it is in fact a chartered society under the Societies

Act, and it is not considered a union by the aforementioned 8 applicant Unions. Therefore, in my report, whenever I mention Unions, I shall be referring to the 8 bona fide applicant Unions and not the Society of United Welders, Cutters and Helpers, Local No. 1.

CLOSED SHOP AND UNION SHOP

Throughout the submission of the companies, there is constant reference to the closed shop. It must be noted at once that the applicant Unions do not ask for the closed shop, but as appears from their brief ask for a modification which is in reality the union shop. The difference may be briefly stated as follows:—

(a) The closed shop requires the employers to hire only union members.

(b) The Union Shop allows the employers freedom to engage both union and non-union men but after a stated period (mutually agreed upon by the company and the unions—30 days was suggested by the unions) all non-union men as a condition of employment must become members of the union.

It will be seen at once that some of the submissions presented by the companies therefore have little validity since they mistakenly apply to a closed shop condition. I shall refer to these company submissions below.

ANALYSIS OF COMPANIES' ARGUMENT

Both companies' and unions' contentious arguments revolved mostly around the 13 submissions of the company. I shall deal seriatim with the submissions and the replies given by the unions and I shall indicate my agreement in 12 respects with the unions' submission. As to jurisdictional disputes, I shall deal separately with the company submission.

1. *Companies Claim Right to Operate Open Shop.*—This is a claim long abandoned in Great Britain, Australia, New Zealand, and large sections of the United States. The so-called right claimed has no more validity than the so-called right claimed by employers 100 years ago to operate their mines at 14 and 15 hours a day, all in the name of freedom of the individual.

2. *Companies Claim Closed Shop a Denial of Right of Citizen to Work.*—There are undoubtedly a large number of individual rights which have been abrogated in the common interest in modern times. For example, the fundamental right of a citizen to operate a post-office, or cross the street wherever he may wish has been abrogated in the interest of the common good. However, I would particularly refer to the various professional groups who have through their endeavours

secured legislation to force their members to become members of their association. Lawyers, doctors, chiropractors, hairdressers, and nurses all have such legislation in British Columbia and this legislation was achieved with a minority objecting in most cases.

3. *Minority Rights.*—Both the union shop and the closed shop afford the employees the democracy of majority rule in the common good. In this instance where a union shop is asked for, the Companies have, as I have already stated, the right to first choose whatever workmen they wish. In regard to a minority who do not wish to join the Union, it is obvious that in this case such a group is very small, representing less than 20 per cent of the men employed at both plants. No parliament or no organization democratically constituted could operate if it were required to obtain unanimous support as a condition precedent to operation. For example, it could surely not be proposed that if a small group of fascists opposing democratic parliamentary institutions refuse to participate in elections that therefore we should not have a parliament for the welfare of the people as a whole. Again, the Legal Profession's Act and other such acts are examples of majority decision binding the entire occupation or profession. Perhaps some lawyers were originally opposed to the legal "Closed Shop", but nevertheless the majority were in favour of it and the Government has enforced such a "closed shop" through legislation. The same principle is here involved. I am in favour of similar legislation which will by law grant workmen the same rights as lawyers, doctors, hairdressers, barbers, chiropractors, nurses and agriculturists.

In the meantime, this Board in my opinion can and should recommend this progressive step which would carry out the patent purposes for which Collective Bargaining is intended. Indeed, most closed shops now enforced by legislation were first recommended by progressive trail-blazing Commissions or Boards.

4. *The Companies Claim the Closed Shop Would Repress Individual Initiative.*—In my opinion, this contention is completely unsupported by the evidence submitted. To the contrary, the Companies submitted evidence of its excellent production record with at least 80 per cent of their employees members of various Trade Unions. Furthermore evidence was submitted to the effect that Mr. Henry Kaiser, who has the most efficient shipbuilding plants in all history has a closed shop agreement with all the Unions in his yards.

5. *The Companies Claim the Closed Shop Would Prevent Them Exercising Selection of Workers.*—As I have stated before, only a union shop is asked for. The Companies may choose their workers freely from the labour market, so long as full employment continues.

6. *The Companies Claim The Closed Shop Enforces Monopoly of Labour.*—I have dealt with this in 5.

7. *The Companies Claim The Leaders of Labour Have No Control Over Their Membership.*—While some evidence was submitted that indicated some difficulties arose during the early stages of the organization of the present shipbuilding industry in the Vancouver Area, other very substantial evidence was submitted by the Union representatives that proved in my opinion without a doubt that Union Leadership played a very effective part in getting the production program rolling smoothly.

Taking into account the mushroom growth of the Shipbuilding Industry in the Vancouver Area, and the multiplicity of environments from which the employees have been drawn, I am impressed with the degree of Union stability developed to date, and in my opinion, the Companies' Claim in this respect is not supported by convincing evidence.

8. *The Companies Claim The Closed Shop Would Place Powers of Compulsion in the Union Which Belong to the Government.*—In my opinion the Union would have no more power than the benchers have over lawyers under the Legal Profession's Act, the Marketing Boards over agriculturists or various supervisory executives over nurses, hairdressers, etc.

9. *The Companies Claim They Would Be Used As A Club To Force Workers To Join Unions.*—I have already referred to the unanimous opinion of the Board that no less than 80 per cent of the employees belong to the Unions involved. Therefore, in my opinion, the will of the majority should prevail and no evidence was presented as to objections on this score on the part of the Companies operating under Closed Shop agreements in the other yards in the Vancouver Area.

10. *The Companies Claim The Spirit of The National Selective Service Act Will be Violated.*—I have already referred in my answer to submission Number 5, to the fact that actually only the Union Shop is asked for and violates neither the spirit nor the letter of the National Selective Service Act. In fact, evidence was presented to show there was effective co-operation between National Selective Service and the Unions in the matter of employment.

11. *The Companies Claim White Collar Employees Will Lose Rights.*—No evidence whatsoever was presented to support this submission.

12. *The Companies Claim a Closed Shop Would Prevent Returned Soldiers and Sailors From Obtaining Employment in the Post-war Period.*—I desire to deal at length with this submission since this goes to the very root of the sincerity of the companies' entire submission. This particular submission is developed at some length on page 10 of the company's main brief. It states: "Furthermore, this company intends to protect the hundreds of fine young men, who have left the employ of the company to join the Armed Forces and who are prepared to sacrifice their lives for those who remain at home, from being prevented, when they return, from working in the plant of this Company. The company does not propose to tolerate any situation where a returned soldier is barred from entering the gates of this company because he does not possess a union card. This is exactly what would occur if the company operated as a closed shop as no one is simple enough to believe that when these soldiers return, and when jobs are scarce, union men will voluntarily walk out of the yard and give their jobs to returned soldiers, nor will returned soldiers be admitted to union ranks as it is a well-known fact that when jobs are scarce union recruiting absolutely ceases and membership is closed."

This paragraph must be read in conjunction with the company statement presented at page 1 in the same brief which I requote: "The company is engaged solely in wartime construction and does not carry out any repair or other private work. In these various respects, it differs from the closed shops of Burrard and North Vancouver. The Company has acquired its site on a lease-hold basis and the terms of the various leases obligate the company to remove its plant and equipment from the premises after the termination of its war and post-war contracts." If the Company will not be in business after the war, then this submission is trifling in the extreme since it dwells on the natural concern that we all have for the returned men yet indicates no intention of re-employing these men since there will be no operation to employ them on.

If on the other hand, the ambiguous statement of the company as to post-war operations means that the company will continue nevertheless, the test of the sincerity of the company concerned would surely be a guarantee on the part of the company to employ

these men after the war. No such guarantee was given in evidence or any such suggestion made, I take it therefore, that this submission was presented for the purpose of mere window dressing since such concern is mere verbiage in view of the company's own submission that they will not operate after the war.

In this connection it might be well to note that many of the witnesses before the Board wore returned men's buttons indicating that they are veterans of the first World War. These men were in agreement with the principle of the closed shop.

The only point that could arise in this connection is whether or not there will be full employment after the war. If there is to be full employment as is the stated policy of the Government, then all men will continue to be eligible to join the union since there will be little point in barring men when jobs are available. I will not in this report contemplate mass unemployment since this cannot and must not be the result of this second World War. All suggestions of restrictions of union memberships can only be based on hypothesis of such mass unemployment.

A matter which concerned the Board was an exhibit called "Instructions to all Shop Stewards, Business Agents, etc." and was admittedly distributed by the Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1. The essence of the instructions is that no new members are to be accepted at this time in the aforesaid union.

First, it must be noted that this document was distributed on or about September 28, 1943. The date is important because only some days previous it was officially announced that ship building was to be curtailed in this area by the reduction of personnel and the extension of the time of building of ships. Obviously, under such a situation no union could honestly accept new members when no work was available and dues accepted from new applicants would indeed be taken under false pretences. This view was given in evidence by the Union spokesman. I take it, therefore, that this sheet of instructions is a temporary directive having regard to a temporary situation and in fact evidence given by the Unions before the Board and after the date of the issuance of these instructions show conclusively that these instructions have been since abrogated. The expected unemployment did not occur and in fact new members are again being taken into the Boilermakers' Union. It is obvious that this particular instance is but a part of the same question of full employment or unemployment. This Board cannot assume mass unemployment after the war and from

evidence presented, so long as there is employment members will be eligible to join all the Applicant Unions.

13. Companies and Question of Jurisdictional Disputes.—Of all the submissions presented by the Companies, although submitted in my opinion in exaggerated form, some merit may exist in this regard. In my opinion, there is usually little justification for jurisdictional disputes in this war against Fascism. Such disputes should be ironed out by the Unions. In fact, evidence was produced that would indicate that such was the case as between the Unions here involved. I shall therefore, in view of the necessity during the period of this war for the elimination of this type of dispute, make my recommendation in this regard separately in my concluding remarks.

Although the Unions' brief is an exhibit on file, it might be well for me to state the cardinal reasons for a Union Shop as seen by the men. First, the Unions see the Union Shop as essential to their security as Unions. Having once established the security of their very existence they can then proceed to the normal functions of a union in wartime which have to do with not only the benefits of the membership itself such as educational, cultural and community welfare, but the all-important question of effective co-operation with the management in the interest of the war effort. Complete co-operation cannot exist so long as the Union has to spend the greater part of its time fighting to preserve its very existence. It has been well stated by W. M. Leiserson, a member of the United States National Labour Board, thus: "These names (closed shop and open shop) however are but battle cries in the conflict between employers and labour organizations over the problem of unionization. They serve to obscure the essential point of contention which is whether the shops shall be union or non-union."

In this day of advancement to a better social order many progressive employers have accepted the union shop principle since this principle is the one desired by the men and already exists generally in Great Britain and other democracies as I have stated above.

In this day it should be obvious to all that when people as nations feel insecure, horrible wars result. This same principle pertains to the relationship between labour and management. If stable and friendly relations are to be achieved, they can only be so achieved in my opinion when security is granted the unions in the form of a closed shop. In this arbitration, the closed shop would actually be only a union shop.

TRADE UNION AFFILIATION

My colleagues deal at some length in their report with the question of trade union affiliation. Evidence was submitted to the effect that the Canadian Congress of Labour at a recent convention went on record as recommending to its affiliates the support of one of the great Canadian political parties. This is only a recommendation and no doubt before any union affiliates with any political party according to usual trade union practice, the overwhelming majority of the membership would have to endorse such a move. According to my understanding of the present situation, affiliation with a political party by any of the eight applicant Unions would mean a revision of their Constitutions and this usually requires a two-thirds majority.

While my colleagues evidence some concern over the possibility of Trade Union Affiliation with political parties, this has been an accepted practice in Great Britain for many years where Closed Shop conditions generally prevail and I am certain that should any Union decide to affiliate with any political party that decision will express the will of the majority and the arrangements made will be thoroughly democratic.

In view of the foregoing I recommend:

1. That the West Coast Shipbuilders, Limited and Hamilton Bridge (Western) Limited do grant a Closed-Union Shop (in effect a Union Shop Agreement as in practice in the

other Vancouver Shipyards) to the 8 Applicant Unions, to wit: Local No. 1 Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 2 Dock and Shipyard Workers' Union of Vancouver, District Lodge 692, I.A.M., Local 115, International Union of Operating Engineers, Local No. 1 Amalgamated Building Workers of Canada, Local No. 2 Amalgamated Shipwrights, Joiners, and Boat Builders and Caulkers, Local 170 United Association of Plumbers and Steamfitters, Local No. 3 Amalgamated Electrical Workers.

The above closed-union shop should in my opinion be granted on written undertakings being given by the 8 applicant unions to Judge J. O. Wilson, Chairman of the Board that no jurisdictional dispute will occur as between themselves and any other bona fide union during the duration of the war in the plants of the companies concerned.

2. I would further recommend in view of my experience on this Board the urgent necessity for a National Labour Relations Act to set forth in definite terms, the rights and responsibilities of both Union Labour and Management, so as to democratically allow where a majority so desires, the establishment of the closed shop in industry as the logical result of collective bargaining.

The whole respectfully submitted,

(Signed) Herbert W. Herridge,

Member of Board.

Conciliation Work of the Department of Labour

DURING November a total of 47 new industrial disputes, and 16 cases which had originated in earlier months were dealt with by Industrial Relations Officers of the Department of Labour. These disputes were distinct from those described on previous pages, which were handled under the provisions of the Industrial Disputes Investigation Act.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Sydney, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; two officers in Montreal

are assigned to the province of Quebec and two officers resident in Fredericton, N.B., and Sydney, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

In the article on the Conciliation work of the Department appearing in the November issue of the *LABOUR GAZETTE* (pp. 1518-1522) mention was made of the termination, on November 15, of the strike by coal miners in Western Canada. Certain other important disputes were also summarized up to the date of going to press about the middle of the month. The remaining cases in which mediation was required during November were not of a nature which calls for summarization in this issue.

Strikes and Lockouts in Canada During November, 1943

WHILE the number of strikes and lockouts in Canada recorded for November was nine less than in the previous month, the number of workers involved and the time loss in man working days increased sharply. As compared with November, 1942, there was one more strike but the number of workers and the time loss showed a decrease. There were 27 strikes during the month, involving 16,784 workers, with a time loss of 97,004 man working days, as compared with 36 strikes in October, with 5,923 workers involved and a time loss of 25,496 days. In November, 1942, the number of strikes was 26, involving 20,439 workers, with a time loss of 103,355 days.

During the month under review a general strike of coal miners in Alberta and British Columbia was responsible for about 50 per cent of the workers involved and over 90 per cent of the time loss. In November, 1942, a strike of motor vehicles factory workers accounted for more than 70 per cent of the workers involved and over 80 per cent of the time loss.

Three strikes, involving 645 workers, were carried over from October and 24 commenced during November. Of these 27 strikes, 25 were terminated during the month. Ten resulted in favour of the workers, nine in favour of the employer, two were compromise settlements and four were indefinite in result, work being resumed pending final settlement. At the end of the month, therefore, there were two strikes untermiated, namely: hotel employees at Edmonton, Alta., and rubber factory workers at Acton Vale, P.Q.

Information as to a strike of wholesale jewelry workers at Vancouver, B.C., which com-

menced on October 28 and terminated on November 18, 1943, was not received in time to include in the statistical table.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to one dispute of this nature, namely: fur factory workers, Quebec, P.Q., one employer, May 12, 1943, to August 31, 1943.

The following table gives information for November and October, 1943, and November, 1942.

Date	Number of strikes	Number of workers involved	Time loss in man working days
*November, 1943.....	27	16,784	97,004
*October, 1943.....	36	5,923	25,496
November, 1942.....	26	20,439	103,355

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The record includes all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to November, 1943				
MINING— Coal miners, loaders, Sydney Mines, N.S.	1	(a) 16	16	Commenced October 28, 1943; re payment for certain work; terminated November 1; return of workers pending settlement; indefinite.
MANUFACTURING— Metal Products— Aluminum plant workers, Shawinigan Falls, P.Q.	2	600	3,500	Commenced October 24, 1943; against return to winter work schedule for potmen; terminated November 6; return of workers; in favour of employer.
SERVICE— Business and Personal— Hotel employees, Edmonton, Alta.	1	29	700	Commenced October 1; for payment of wage increases for porters as approved by RWLB‡; untermiated.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1943*—*Continued*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establish- ments	Workers		

Strikes and Lockouts Commencing during November, 1943				
LOGGING— Bush workers, Dalton Mills, Ont.	1	53	159	Commenced November 4; for more meat and butter with their meals; terminated November 6; negotiations; in favour of employer.
MINING— Coal miners, River Hebert, N.S.	1	128	256	Commenced November 1; for levelling-up of wage rates as in neighbouring mine; terminated November 2; return of workers pending decision of NWLB‡; in favour of workers.
Coal miners, Alberta and British Columbia.	67	8,500	88,000	Commenced November 1; for increased wages, time and one-half for sixth working day in week and two weeks' vacation with pay; terminated November 13; referred to a Royal Commission; (increase in wages and two weeks' vacation with pay approved) compromise.
Metal miners (lead, zinc, etc.), Silverton, B.C.	1	36	36	Commenced November 5; against lack of sugar, jam, etc. with their meals; terminated November 6; negotiations; in favour of workers.
Coal miners, East Coulee, Alta.	1	158	158	Commenced November 10; for driver's pay for worker employed as both driver and pusher; terminated November 10; negotiations; in favour of employer.
Coal miners, Glace Bay, N.S.	2	1,450	1,450	Commenced November 19; against working with non-union workers; terminated Nov. 19; negotiations; in favour of workers.
Coal miners, loaders, Glace Bay, N.S.	1	35	35	Commenced November 24; re working conditions (unsafe condition of roof); terminated November 24; negotiations; (roof re-timbered) in favour of workers.
Coal miners, Three Hills, Alta.	1	35	70	Commenced November 25; against alleged irregularities in pay statement; terminated November 26; negotiations; in favour of workers.
Coal miners, shooters and loaders, New Waterford, N.S.	1	61	120	Commenced November 25; for payment for loading coal left on long wall following mechanical breakdown; terminated Nov. 27; negotiations; compromise.
Coal miners, Minto, N.B.	1	22	22	Commenced November 29; against working with a non-union worker; terminated Nov. 29; conciliation (federal); in favour of workers.
MANUFACTURING— Rubber Products— Tire factory workers, Kitchener, Ont.	1	57	35	Commenced November 13; for the night off (Saturday); terminated November 13; return of workers; in favour of employer.
Rubber factory workers, (footwear), Acton Vale, P.Q.	1	152	800	Commenced November 22; for union recognition and agreement; unternminated.
Animal Foods— Meat packing plant work- ers (fertilizer division), Saint John, N.B.	1	(b) 30	10	Commenced November 29; for increased wages; terminated November 29; return of workers pending decision of RWLB; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1943*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the July issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1942". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in September was 190 and 10 were still in progress from the previous month, making a total of 200 disputes in progress during the month; 89,700 workers were involved in the disputes

in progress during the month and the time loss was 327,000 working days.

Of the 190 disputes beginning in September, 57 arose out of demands for increased wages and 63 over other wage questions; 24 over questions as to employment of particular classes or persons; 31 over other questions as to working arrangements; 4 on questions of trade union principle; 2 were sympathetic stoppages. Final settlements were reached in 161 disputes, of which 26 were settled in favour of the workers, 98 in favour of employers and 37 resulted in compromises; in 20 other disputes, work was resumed pending negotiations.

New Zealand

The number of disputes in the first six months of 1943, was 33, involving 5,472 workers, with a time loss of 7,391 working days.

United States

The number of strikes beginning in October was 290, involving 215,000 workers, with a time loss of 975,000 working days for all disputes in progress during the month. More than half of this time loss was due to the scattered coal mining stoppages. Figures for the months of July, August and September are not yet available.

Report of Quebec Commission Established to Enquire into Paper Mill Disputes

Freedom of Association and Collective Agreements

LABOUR disputes in certain newsprint mills in the Lake St. John region were the subject of an inquiry by a Commission appointed by the Quebec Government on April 29, 1943.* The Commission, which consisted of Justices J. Alfred Prévost and Stuart McDougall of the Quebec Court of King's Bench and Garon Pratte of the Quebec Superior Court, was directed to investigate disputes between trade unions in the mills operated by Price Brothers and Company at Jonquière, Kenogami and Riverbend. On June 10 the inquiry was extended to similar difficulties in the Lake St. John Power and Paper Company's mills at Dolbeau.

The Commissioners, in a report which was submitted on August 23, made recommendations designed to settle the particular disputes

referred to them pending the enactment of legislation to provide a more satisfactory solution for the problem of collective bargaining in industries where there are rival unions.

Findings Concerning Disputes

The Commissioners found that, late in 1939 and early in 1940, the International Brotherhood of Paper-Makers and the International Brotherhood of Pulp, Sulphite and Paper-Mill Workers organized some of the workmen employed in Price Brothers' mills. These unions claimed that over 70 per cent of the men belonged to their organizations and the company entered into agreements with them. On renewal of the agreements in May, 1940, a clause was added to require preference in hiring to be given to union members and to require new employees, except those on temporary jobs, to join the appropriate union within 30 days. The agreements applied to all the employees and were to run from year

*An Order in Council of April 14 required collective bargaining with the syndicates or unions to which employees of pulp and paper mills belonged. The order was suspended on May 1. (L.G., May, 1943, p. 691.)

to year subject to termination by either party on notice given 30 days before the date of expiry.

At Dolbeau the company on July 7, 1941, made a similar agreement with the two international unions on petition signed by 151 of the 250 workmen in the mill.

In all the mills concerned there were workmen who were members of the National Syndicates affiliated with the Fédération Catholique des Employés de Pulperies et Papeteries du Canada, a member federation of the Confederation des Travailleurs Catholiques du Canada. On March 16, 1943, the National Syndicates in Price Brothers' mills, claiming to have a majority among the workmen, asked the company to negotiate an agreement with them. Receiving no reply, they applied to the federal Department of Labour for a board of conciliation and investigation. The application not being in proper form, it was returned to the signatories for amendment.

Meantime, the company notified seven men from each mill that they would be dismissed if within a stated time they were not in good standing with the international unions. The result was a strike, chiefly by syndicate members. The international union members, on their part, refused to return to work when it was suggested that, as a condition of calling off the strike, their agreements which were to expire on May 15, should not be renewed pending the report of the board of conciliation and investigation. Work was finally resumed on condition that the provincial Government provide for an inquiry into the whole matter and that the agreements with the international unions remain in effect provisionally, with the exception of the section which provided for preference in hiring to union members and for a "union shop".

The Commission investigating the dispute stated the "basic causes" of the dispute as follows:

- (1) The insertion in section 4 of the collective agreements of May 15, 1940, of paragraphs 3 and 4, quoted above, which converted into closed shops, for the benefit of the International Unions, mills in which there were important if not preponderant groups of workmen belonging to the National Syndicates, the whole in violation of all principles of freedom of association;
- (2) That part of clause 7 of the agreements which provides for their automatic renewal, without any provision for ascertaining if the International Unions still hold a mandate from the majority of the workers at the time of renewal. Naturally, the unions rely on their lists of members in good standing, but those lists are not conclusive, for they include all employees forcibly enrolled by the operation of the collective agreement.

To belong to a union by choice is one thing; to belong to it because one is obliged to do so in order to earn his living is another. Between the two lies all the difference that separates liberty from bondage;

- (3) The preference given by the Company to members of the Unions.

As regards the first cause, the Commission expressed its opinion thus:

Apart from the fact that the exclusive privilege granted to the unions is contrary to freedom of association, in the case under review there is no excuse for it. It might be justified to some extent if, in the agreement, the unions assumed the obligation to supply the workers required by the company during the term of the agreements, at the risk of any expense incurred in performing such obligation; but there is nothing of the sort. If the company needs more employees it must hire union members if there are any available who are competent; if not it must do its recruiting outside the unions and the newcomers are forced to join the unions and pay them tribute so long as their employment lasts. In these circumstances, the privilege has no other purpose than to swell the ranks of the unions and fill their coffers.

The Company advanced very plausible reasons for having decided to deal with the unions rather than with the syndicates. However serious those reasons may be, an employer cannot be permitted to arrogate to himself the right to choose mandataries to deal with him on behalf of his employees. Such a choice must be made by the will of the workmen, freely expressed.

The state cannot tolerate a system which obliges the head of an industry to make a collective labour agreement with an employees' organization which may not represent the majority of the workers.

Exact evidence as to the relative strength of the rival unions was not available to the Commissioners and they considered it inopportune to take a vote,

for in the period of unrest that follows a strike, it is not to be expected that a poll will reflect the unbiased wishes of the workers.

Among the paper-makers, the Commission believed, the International Brotherhood of Paper-Makers had a large majority. Of the other workers, the National Syndicate appeared to command a majority.

The Commission expressed its strong disapproval of the distribution by "syndicate sympathizers" of circulars making false charges against Price Bros. and the International Unions. The company was held in no way responsible for the strike and showed "scrupulous regard to its contractual obligations". Concerning the notice of dismissal given by the company to 14 men who were not members of the international unions, the Commission remarked:

In so acting the Company had merely complied with its contract. Since it was agreed that, with the exception already

noted, all employees must belong to the International Unions and remain in good standing with them in order to obtain permanent employment in the Company's mills, whenever a union struck an employee from its membership list for non-payment of dues, it called upon the Company to advise the employee concerned that he would be suspended unless he paid his dues to the union within a stated delay. The Company had no choice but to comply.

The history of the dispute at Dolbeau in the mills of the Lake St. John Power and Paper Company was, in the main, like that in the other plants.

The Commission held that a collective agreement is only valid when it is made with a union which "really represents the employees". The circumstances in which the agreements with the internationals were renewed "were such as to render them less worthy of respect than the principles of liberty which they flout", the Commission commented, in considering the employer's argument that "the sanctity of contracts" should deter the Commission from recommending any changes in the agreements with the international unions. A secret ballot was recommended to determine whether the workmen desired representation by the international unions or by the National Syndicate and since the men were already organized by trades the vote should be taken by trades in each mill. After the balloting, the employer should make an agreement with the union favoured by the majority of workmen in each case, since the "the principle of majority rule" had been followed by the unions in the past.

Proposals for Legislation

Specific recommendations were made by the Commission for legislation concerning freedom of association, collective agreements and a tribunal to administer the law. Such an enactment would, in the Commission's opinion, promote collective bargaining and, in industries where rival unions appeal for members to the same class of workers, would ensure freedom of association as far as possible.

The tribunal, it was suggested, might consist of three members "specially competent and free from any attachment either to workers or to employers", or it might be the Permanent Board of the Superior Labour Council of Quebec exercising its jurisdiction in litigious matters through a judicial committee of three members. These three would include a chairman who should be "an experienced jurist" and one representative each, chosen by the chairman, from the employers' and workers' representatives on the Permanent Board. The judicial committee might appoint assessors to sit with it on any

particular case or even refer a matter to the Board itself.

The tribunal would have power:

- (1) to settle disputes concerning the negotiation of collective agreements;
- (2) to deal with complaints from unions or groups of workmen which are not disposed of by a grievance committee or by arbitration, as to the non-observance of an agreement or of any statutory provision concerning an agreement;
- (3) to take the necessary steps to determine the membership of unions claiming the right to negotiate an agreement or to ascertain the opinion of the workers on any particular point;
- (4) to cancel permits obtained by fraud or issued in error or held by those who fail to comply with the tribunal's orders;
- (5) to make rules, subject to the approval of the Lieutenant-Governor in Council, to regulate the procedure for making, renewing or extending collective agreements and for their application and observance.

Other duties which the Commission would require of the tribunal include the final determination of disputes, the imposition of penalties and the enforcement of the criminal law concerning strikes and picketing.

Freedom of Association

In the opinion of the Commission, "no enactment will ensure the smooth operation of collective bargaining unless it admits the right of every workman to belong to a union of his choice or to belong to none."

The employer should not be permitted to make any arbitrary distinction or any unjust discrimination between his workmen by reason of their belonging to one or other union or to no union:

The right of the workman to choose for himself the union to which he wishes to belong must be respected in every case; and he must not be hindered in the exercise of that right except for reasons of public policy. No trade union worthy of the name has not fought for recognition of that right at one time or another. So it is a matter for astonishment that some unions, on over-coming a rival, force the members of the latter to join the ranks of the victors, even though such affiliation may be repugnant to their conscience, on pain of loss of employment; and it may well be asked by what aberration or for what avowable purpose workmen are led to deny to their comrades today a right they themselves quite properly fought for yesterday and will struggle to retain tomorrow. It seems to be overlooked, in certain quarters, that democratic principles, to which lip service is paid at convenience, are no authority for the suppression of minorities by majorities—quite the contrary! But since such lapses do occur, the law should intervene to protect the working classes against them.

There are of course cases in which it is expedient and even necessary to restrict freedom of association to some extent, but

that can only occur in exceptional circumstances which must not be left for appraisal to the mere whim of the parties to a collective agreement. The right to decide if it is expedient to insert in a collective agreement a clause which would have the effect of creating a closed shop, should be entrusted to a competent superior authority. For this reason, we suggest that no collective agreement should come into force unless approved by the tribunal which we recommend setting up. The tribunal would be competent to decide in each case if a closed shop should be permitted and on what conditions.

The right of a workman to belong to a union of his own choice implies the right to leave it. He is under no obligation to explain the reasons for his choice to any one. But in exercising his freedom of choice, he must not interfere with rights arising out of contracts he has made. Therefore, so long as a collective agreement is in force, the fact that some workmen may have left one union to join another since the agreement was signed should not be taken into account.

Collective Agreements

As regards collective bargaining, the Commission considered it should be made mandatory on any employer more than half of whose employees desired a collective agreement. But the Commission was impressed with the problem created by rival unions in Quebec and therefore, made recommendations for a system of collective bargaining which would take this problem into account and give to minority groups the protection to which they considered they were entitled.

In the first place, a union would be required to obtain authority from the tribunal before negotiating an agreement. Proof that its membership included the necessary proportion of members would have to be submitted and also evidence that it was not controlled by an employer or in receipt of financial assistance from an employer.

Where rival unions claim members among the same class of workers, the Commission considered that the proposed Act should provide for the negotiation and administration of agreements by a committee representing all the employees of the plant.

The negotiation of a collective agreement should not be entrusted exclusively to the majority group. The contract will not be a guarantee of peace unless it expresses the wishes of all the workmen rather than those of one group only. Experience has shown that majorities, when left to their own devices, tend to recognize no other law than their own interests. The rights of those who are not heard are generally neglected. A system founded on the will of a majority which denies the right of the minority to be heard is in no sense democratic; on the contrary, it is one of the worst forms of tyranny. Expression of minority opinions is essential to democracy. Under the democratic system, the majority does not crush the minority, but seeks its co-operation. The

will of the majority binds the people at large only because all the groups which go to make up the latter are permitted to express their views, so that it can be said that the voice of the majority is truly the resultant of all shades of opinion.

The practical problems involved in having all groups represented on a committee to draw up and administer an agreement led the Commission to make two suggestions: (1) that only groups comprising 20 per cent or more of the workmen in a plant should be taken into account and that they should be given equal representation; (2) that if all the unions do not agree on a joint bargaining committee "the opening of negotiations and the signing of the agreement be left to the majority union". Proportional representation on the committee, it was considered, would lead to unfair competition for members between the unions. To protect smaller groups where a majority union refuses "to collaborate in forming a bargaining committee", (and the Commission notes that there will be many such cases), it was recommended that the draft agreement should be communicated to the minority groups at least 15 days before it was submitted to the tribunal for approval. Objections to the agreement could be made within that time to the tribunal, or suggestions for its amendment.

Compulsory arbitration was recommended where an employer refused to negotiate or where the parties could not agree on the terms of an agreement. Arbitration by the tribunal on the application of either party would determine any or all of the terms of an agreement and make them legally binding on all parties.

Certain specific principles to govern collective agreements should be enacted. The Commission considered:

- (1) that a collective agreement should not be entered into or renewed without the permission of the tribunal;
- (2) that no collective agreement should be valid unless approved by the tribunal;
- (3) that no provision of an agreement should be valid if it prevented the juridical extension of any collective agreement under the Collective Agreement Act, or if it was contrary to any order of the Minimum Wage Commission or to any order under the Act respecting the Limiting of Working Hours, or contrary to any statute;
- (4) that the maximum term of an agreement should be one year but that the agreement might be renewed with or without change;
- (5) that in every plant governed by a collective agreement there should be a grievance committee to supervise the carrying out of the agreement and "the various workmen's associations which took part in negotiating the agreement" should be represented on the committee;

- (6) that every collective agreement should provide for the compulsory arbitration of any disputes arising during the life of the agreement which are not settled by the grievance committee. To ensure the effectiveness of this recommendation, the Commission suggested that provision for the arbitration of such disputes should be contained in the statute which would set out the procedure for arbitration.

Finally the Commission, considering that adequate provision would be made for settling disputes arising out of the negotiation, interpretation or application of a collective agreement, recommended that a strike or lockout occurring by reason of any such dispute should be made illegal save "in exceptional cases in which the tribunal thought fit to permit them in order to ensure the carrying out of its orders".

In conclusion, the Commission emphasized the fundamental importance of goodwill and intelligent cooperation on the part of employers and workmen;

In their relations with their employees, employers should be expected never to act arbitrarily; to have scrupulous regard for individual rights; to recognize willingly the unions chosen by their workmen and to deal loyally with them when occasion requires; to grant the legitimate demands of their employees without having to be prompted,

and to avoid doing anything that might give the impression that they recognize the rights of workers only under compulsion and grudgingly; to co-operate promptly and honestly in the settlement of such disputes as may arise; etc.

On their part, the unions should be expected to deal with employers in good faith, never forgetting that they are only instruments for the improvement of the lot of the working classes and not ends in themselves; to use their power for the common good rather than for the enhancement of their own prestige; to choose leaders who respect authority, who are conscious of their responsibilities and who are capable of representing them worthily, and, when necessary, to get rid of those whose zeal outrun their discretion and who have not sufficient judgment to control their words; to shun appeals to prejudice, bearing in mind that such appeals, being as dangerous as they are easy to utter, are the favourite weapon of the ignorant, the stupid and the evil-minded; to reprobate excesses on the part of their members; to follow the highest democratic principles, under which they have prospered; to endeavour honestly to reconcile their legitimate interests rather than to engage in quarrels amongst themselves which, whatever their outcome are bound to injure the cause they profess to champion; to abstain from unfair recruiting methods; to avoid aggravating, by the discussion of questions unconnected with the establishment of material working conditions, the difficulties which are inherent in the negotiation of collective agreements; to seek peace by conciliation rather than by force.

Rehabilitation of Handicapped Persons

IN a recent bulletin issued by the Industrial Accident Prevention Association of Ontario, it is stated that "of 681 vocationally handicapped cases referred to the Rehabilitation Department of the Workmen's Compensation Board during the years 1941 and 1942, 592 were closed as 'rehabilitated'." More than half of these were re-employed by their own firms.

It is asserted that many other employers have the impression that physically handicapped workers are more susceptible to injury

or otherwise constitute a liability as far as compensation is concerned. That this impression is erroneous has been demonstrated by "numerous studies of factual data on productivity, accidents, sickness, and pension plans, which show that the employment of handicapped workers presents no greater risk than does the hiring of the able-bodied". The bulletin concludes: "In fact, it has been amply demonstrated that, with proper placement, physically handicapped workers usually have splendid work records."

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Rubber Products

TORONTO, ONTARIO.—DUNLOP TIRE AND RUBBER GOODS CO. LTD. AND THE UNITED RUBBER WORKERS OF AMERICA, LOCAL 132.

Agreement to be in effect from July 20, 1943, to June 30, 1944, and thereafter from year to year until notice. The company recognizes the union as the sole collective bargaining agency. Employees may join or not join the union.

Overtime as established to apply on hours worked in excess of 9 per day. However, with the approval of the Regional War Labour Board, overtime to apply on hours over 8 per day when the schedule calls for three 8-hour shifts per day and for maintenance and engineering trades on a regular 8-hour day. Time and one-half for work on statutory holidays. Vacation: one week's vacation with pay. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Printing and Publishing

MONTREAL, QUEBEC.—PUBLISHERS OF AN ENGLISH DAILY NEWSPAPER AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 176.

The agreement summarized in the October issue, page 1379, was stated to have been signed by the publishers of one newspaper and verbally accepted by another. It has since been reported that the second newspaper did not verbally accept this agreement.

MONTREAL, OTTAWA, TORONTO, HAMILTON AND LONDON.—CANADIAN LITHOGRAPHERS' ASSOCIATION AND AMALGAMATED LITHOGRAPHERS OF AMERICA, LOCALS 27 (MONTREAL), 40 (OTTAWA), 12 (TORONTO), 42 (HAMILTON) AND 47 (LONDON).

Agreement to be in effect from January 1, 1943, to December 31, 1943, and thereafter from year to year, subject to notice. This agreement

is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, June, 1941, page 696. As provided in that agreement, hourly wage rates were increased from January 1, 1941, to make the weekly wage rate for a 44-hour week the same as the previous weekly rate for a 45-hour week.

Additional increases are now provided for feeders, feeder operators and helpers, subject to the approval of the Regional War Labour Boards of Quebec and Ontario. Vacation: subject to the approval of the Regional War Labour Board, employees with one year's service to be granted one week's vacation with half pay.

Manufacturing: Miscellaneous Wood Products

MATANE, QUEBEC.—PRICE BROTHERS & CO. LTD. AND LE SYNDICAT CATHOLIQUE NATIONAL DE L'INDUSTRIE DU BOIS DE MATANE (SAWMILL WORKERS).

Agreement to be in effect from September 20, 1943, to December 31, 1943, and thereafter from year to year, subject to notice. The Company recognizes the union as the sole bargaining agency for the union members. Preference in employment to be given union members.

Hours: 10 per day, a 60-hour week. Overtime: employees called back to work after their regular hours to be paid at time and one-half; double time for work on Sundays and holidays. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Metal Products

LACHINE (MONTREAL), QUEBEC.—DOMINION BRIDGE COMPANY AND EMPLOYEES MEMBERS OF THE UNITED STEEL WORKERS OF AMERICA, LOCAL 2843.

Agreement to be in effect from March 20, 1943, to March 19, 1944, or 1945 if no notice given in 1944. The union is to be the sole bargaining agency for its members as long as the union maintains a majority of employees. The Company agrees to allot a place within the plant for the collection of union dues. Neither the Company nor the union will discriminate against any employee because of his union membership or non-membership.

Hours and wage rates are not contained in the agreement but the union agrees to work with overtime rates for two shifts of 12 hours as long as necessary for wartime production. Overtime rates are to be paid for Sundays and holidays.

The union undertakes to co-operate with any management labour production committee. Provision is made for seniority rights and the settlement of grievances.

TORONTO, ONTARIO. — RESEARCH ENTERPRISES LTD. AND INTERNATIONAL UNION, UNITED STEEL WORKERS OF AMERICA, LOCAL 1039.

Agreement to be in effect from January 15, 1943, to January 14, 1944, or 1945 if no notice given for 1944. The Company recognizes the union as the collective bargaining agency for union members. No discrimination by the Company or the union against any employee because of his union membership or non-membership.

Schedules of hours of work, wage policy and job category classification form part of the agreement but were not received in the department. These are subject to negotiations between the parties as to amendments and alterations. Vacation: one week with pay to employees with at least one year's service. Provision is made for the use of labour management production committees and for seniority rights and the settlement of grievances.

HAMILTON, ONTARIO. — INTERNATIONAL HARVESTER Co. OF CANADA, LTD., HAMILTON HARVESTER WORKS, AND UNITED STEEL WORKERS OF AMERICA, LOCAL 2868.

Agreement to be in effect from June 28, 1943, to June 28, 1944, and thereafter subject to 30 days' notice. The Company recognizes the union as the sole representative of all employees. No discrimination by the Company or the union against any employee on account of union membership or non-membership.

Hours and overtime: Overtime at time and one-half is payable for all hours over 9 in a day or 45 in a week, but employees will not be regularly scheduled to work more than 10 hours in a day or 60 in a week, except in case of emergency. Time and one-half for work on Sundays and holidays. Vacation: one week with pay for employees with one and less than five years' service, two weeks for employees with five or more years' service. Apprentices are limited to 10 per cent of the total number of employees within any one of the skilled trades. Seniority rights and grievance procedure clauses are included in the agreement.

WINDSOR, ONTARIO.—TRUSCON STEEL COMPANY OF CANADA LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement to be in effect from April 1, 1943, to March 31, 1944 and year to year, subject to notice. The Company recognizes the union as the bargaining agent for employees who are members of the union. Employees are free to join or not join any union. The company or the union will not discriminate against any employee on account of his union membership or non-membership. Seniority rights and grievance procedure are provided for.

WINDSOR, ONTARIO.—DOMINION FORGE AND STAMPING Co. LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement to be in effect from May 10, 1943, to May 1, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agent for its employees who are members of the union; employees are free to join or not to join any union. No discrimination against any employee either by the company or the union because of

his union membership or non-membership. Provision is made for seniority rights and for the settlement of grievances.

SELKIRK, MANITOBA.—MANITOBA ROLLING MILL Co. LTD. AND SELKIRK ROLLING MILL WORKERS' FEDERAL UNION No. 120.

Agreement to be in effect from March 24, 1943, for the duration of the war and one year after and thereafter from year to year, subject to notice. The union committee to be the bargaining agency for union members. No discrimination against any employee by the Company or the union because of his union membership or non-membership.

Hours: the open hearth furnaces operate continuously 7 days a week, with hours for work at open hearth furnaces and electric furnaces, 8 per day with an average of 6 shifts per week. If on furnace repairs an employee works overtime, the ninth hour is payable at straight time and time and one-half for any further overtime. If an employee works an extra shift, the first 2 hours to be at straight time and time and one-half for all hours over the 50-hour average. However, when electric furnace department is running one or two shifts per day, the regular working shift for men is 9 per day, 5 days per week, except day shift who work Saturday morning as well. For work of shift and tonnage men in the mills, 9 per day, 5½ days per week. For all other employees, a 50-hour week, with overtime at time and one-half. All work on statutory holidays, at time and one-half. Seniority rights and grievance procedure are provided for.

MOOSE JAW, SASKATCHEWAN.—PRAIRIE AIRWAYS LTD. (AIRCRAFT DIVISION) AND SHOP EMPLOYEES, MEMBERS OF UNITED STEELWORKERS OF AMERICA, LOCAL 2688.

Agreement reached following an application for a board under the Industrial Disputes Investigation Act and later settlement through an Industrial Disputes Inquiry Commissioner (L.G., Nov., 1943, p. 1499, July, 1943, p. 923). Agreement, which is to be in effect from September 2, 1943, to September 1, 1944, and year to year subject to notice, is similar to the previous one with the workers' committee (L.G., Jan., 1943, p. 85) with these changes:

The Company recognizes the union committee as bargaining agency for all employees as long as committee represents a majority of employees.

Wages: journeymen tradesmen (tool and die maker, machinist, welder, moulder, etc.) 75 to 80 cents per hour; apprentice tradesmen 25 to 50 cents per hour; production workers—specialists 65 to 70 cents, class "A" 60 to 65 cents, class "B" 50 to 55 cents, class "C" (learners) 45 cents, beginners, 25 to 40 cents; stores department \$60 to \$150 per month; inspection department \$85 to \$175 per month, caretakers \$75 to \$100 per month. No mention is made of cost-of-living bonus. Vacation: one week's annual vacation with pay after a year's continuous service.

VANCOUVER, B.C.—BOEING AIRCRAFT OF CANADA LTD. AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 756.

The agreement which came into effect June 1, 1941, and was summarized in the *LABOUR GAZETTE*, December, 1941, p. 1566 and January, 1941, p. 68, was amended from July 15, 1943.

Hourly wage rates: toolmakers, electricians, metal spinners and pattern makers \$1.05, toolmakers (specialists) \$1, journeymen and journeymen maintenance men 90 cents, maintenance men (improvers) 80 cents, production

workers 50 to 80 cents, trainees (for three months) 40 cents, engineers 65 to 95 cents, janitors 60 to 70 cents, truck drivers 67 cents, bus and station wagon drivers 70 cents, labourers 60 cents; toolroom clerks, shop clerks, general stores clerks and stock chasers 50 to 85 cents, jeep and crane operators 65 to 80 cents, timekeepers 60 to 80 cents, supervisors 90 cents, inspectors 60 to 85 cents, senior inspectors \$1, supervisors \$1.10. The cost-of-living bonus as provided by government order is paid in addition to these wage rates.

Engineers working the second shift of 8 hours per day, 48 per week to be paid for 8½ hours, 51 hours per week; engineers working the third shift of 8 hours per day, 48 per week, to be paid for 9 hours, 54 hours per week.

Vacation: one week with pay to employees with one year's service. Smoking periods are permitted in accordance with company regulations.

Seniority provisions and grievance procedure were changed from the previous agreement.

Manufacturing: Shipbuilding

HALIFAX, N.S.—HALIFAX SHIPYARDS LTD. AND INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS OF CANADA, LOCAL No. 1.

The agreement which came into effect November 16, 1942 (L.G., Dec., 1942, p. 1482) was amended from October 1, 1943, to provide for one week's annual vacation with pay for employees with one year's service or proportionately fewer days if employees have not worked the full year.

HALIFAX, N.S.—PURDY BROTHERS LTD. AND INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS OF CANADA, LOCAL No. 1.

Agreement reached with the assistance of an Industrial Disputes Inquiry Commissioner of the Department of Labour (see p. 1651 of this issue). Agreement to be in effect from November 10, 1943, to November 10, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the sole bargaining agency for all employees of the company eligible for membership.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime is payable at time and one-half, with double time for work on statutory holidays. Wage rates are being submitted to the Regional War Labour Board. The cost-of-living bonus is paid in addition to the hourly wage rates. Charge hands are paid 10 cents per hour extra. Seniority rights and grievance procedure are provided for.

Construction: Buildings and Structures

TORONTO, ONTARIO.—GENERAL CONTRACTORS SECTION OF THE BUILDERS EXCHANGE AND CONSTRUCTION ASSOCIATION AND THE BRICKLAYERS, MASONS & PLASTERERS' INTERNATIONAL UNION, LOCAL No. 2 (BRICKLAYERS), AND LOCAL No. 26 (STONEMASONS).

This agreement which came into effect 1940, and which was renewed to Mar. 1, 1942 (L.G., May, 1941, p. 590, April, 1940, p. 386, June, 1939, page 624 and May, 1938, page 572) has again been renewed to March 1, 1944, with this change: Wages: the basic rate of wages for bricklayers and stonemasons is \$1.12½ cents per hour. The cost-of-living bonus is 5½ cents per hour from June 1, 1943, with provision for future adjustments.

CALGARY, ALBERTA.—CALGARY GENERAL CONTRACTORS' ASSOCIATION AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 1779 AND AMALGAMATED BUILDING WORKERS OF CANADA, CALGARY UNIT No. 1.

Agreements to be in effect from April 1, 1943, to March 31, 1944, are the same as noted in the LABOUR GAZETTE, October, 1942, p. 1208, September, 1941, p. 1157. Wages are 95 cents per hour plus cost-of-living bonus of 3 cents per hour. Hours: 8 hours shall constitute a shift with a 44-hour week.

Transportation and Public Utilities: Street and Electric Railways

HAMILTON, ONTARIO.—THE HAMILTON STREET RAILWAY CO. AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION 107.

This agreement came into effect April 1, 1936, and was amended June 1, 1941, to provide for an increase in wages as summarized in the LABOUR GAZETTE, Jan., 1942, p. 107, Aug., 1939, p. 858, and August, 1936, p. 748. From Feb. 1, 1943, the Regional War Labour Board ruled overtime should be paid at the rate of time and one-half for all time worked in excess of 8 hours daily, or 48 hours weekly, and for all time worked on the six statutory holidays.

Wage scale for operators: 58 cents per hour for first six months; 63 cents for second six months and 68 cents per hour at the end of one year; ticket clerks \$135.50 per month; blacksmiths 67 cents per hour; blacksmiths' helpers 60 cents per hour; painters 63 cents, electricians 69 cents, other trades 68 cents and 63 cents, car cleaners and placers 58 and 60 cents.

Transportation and Public Utilities: Water Transportation

GREAT LAKES, ST. LAWRENCE RIVER AND ATLANTIC OCEAN—CERTAIN STEAMSHIP COMPANIES AND THE CANADIAN SEAMEN'S UNION.

Agreement to be in effect from July 1, 1943, to March 15, 1944, and thereafter from year to year, subject to notice. The Companies recognize the union as the sole collective bargaining agency for all unlicensed personnel employed. Preference in employment to be given union members.

Hours: in laying up or fitting out, hours not to exceed 9 per day, 6 days per week. Crew members shall not be required to work for more than their regular watch except when paid overtime. A deckhand's day to be 12 hours with sufficient time off for meals. Between noon Saturday and 6 a.m. Monday and on statutory holidays, only necessary work to be done. All overtime is payable at 50 cents per hour. Crew members required to do longshoremen work to be paid the rate for longshoremen at that point (in no event less than 40 cents per hour) in addition to their regular wage.

Minimum monthly wages in addition to meals and sleeping accommodation (including a cost-of-living bonus of \$15.60 per month): wheelman \$104.20, watchman or lookout or patrol \$89.20, deckhand \$81.70, oilers \$104.20, firemen \$99.20, coal passers \$81.70, second cook \$84.20, first cook Canaller \$136.20, first cook Upperlaker \$146.20. The cost-of-living bonus included in the above is to be varied from time to time as determined by the National War Labour Board. The above rates do not cover self-

unloading colliers; increased amounts for this type of vessel are to be mutually agreed upon and submitted for approval to the National War Labour Board. On freight vessels, \$1 per day per person carried on board other than crew members and 20 cents per meal for repairmen not members of the crew to be paid and equally distributed between members of the steward's department. Crews of ships operating in war zone areas to be paid a bonus: \$1 per day while operating between the mouth of the Saguenay River and Sydney, Nova Scotia, and intermediate points, \$1.50 per day on foreign voyages between the mouth of the Saguenay River and ports outside Canada and while trading between ports in Atlantic coastal waters. Provision is made for the settlement of disputes.

*Transportation and Public Utilities:

BRITISH COLUMBIA.—BRITISH COLUMBIA ELECTRIC POWER AND GAS COMPANY LIMITED AND VICTORIA GAS COMPANY LIMITED AND THE GAS WORKERS' UNION, LOCAL 376 AND THE UNITED ASSOCIATION OF JOURNEYMEN, PLUMBERS AND STEAMFITTERS LOCAL 815.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN QUEBEC, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement and the amendment of two others all of which are noted below. Requests for amendment of agreements for ladies' hairdressers at Montreal,

Agreement to be in effect from May 16, 1943, to May 15, 1946 and thereafter subject to notice. The Company recognizes the union and will not discriminate against any employee because of his union connection. All present and future employees shall become and remain union members.

Hours: 44 per week, with exception of certain departments which work 48 hours. Overtime to be paid for at the rate of time and one-half. Wage rates per hour: plant operators 78½ to 81 cents, helpers 65 cents, blacksmiths 81 cents, helpers 67½ cents, machinists 81 cents, conveyer-men 62 and 66 cents, boiler firemen 65 cents; coke department drivers 58 and 68½ cents, swamper 58 cents, fitters 71 to 81 cents, troublemen 63½ to 73 cents, truck drivers 63½ to 66 cents, mains and services helpers 64 cents, labourers 58 cents, junior employees (16-20 years of age) 27½ to 49½ cents.

Vacation: All hourly paid men having one year's service shall receive two week's vacation with pay. Free transportation shall be granted to all employees at all times over all lines of Companies within the City in which they are employed. Provision is made for cost of living bonus, seniority rights and settlement of disputes.

clerks and accountants at Jonquière, garage employees at Quebec, barbers and hairdressers at Montmagny and retail stores at Magog, were published in the *Quebec Official Gazette*, November 6. Requests for amendment of agreements for barbers and hairdressers at St. John and Iberville and at St. Hyacinthe, manufacturing of corrugated paper boxes throughout the Province, construction industry at Quebec, printing trades at Montreal and building trades at Three Rivers, were gazetted November 20. Requests for amendment of agreement for building trades at Three Rivers and for a new agreement for building trades at Montreal were published in the November 27 issue.

Manufacturing: Fur and Leather Products

SHOE MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated November 19, and gazetted November 27, amends the previous Orders in Council for this industry (L.G., Oct., 1937, p. 1156, March, 1938, p. 335, June, p. 691, Dec., p. 1423; July, 1939, p. 728, Oct., p. 1065, Sept., 1940, p. 971, Dec., p. 1309; June, 1941, p. 703).

Enginemen working as first class chief engine-men to receive \$220 per month with no overtime pay, second class chief engine-men \$42 per week and 70 cents per hour overtime for each hour worked in one week over 60 hours; third class chief engine-men \$36 per week and 60 cents per hour for each hour worked over 60 in one week; second class engine-men, 66 cents per

hour, third class enginemen 55 cents per hour; fourth class enginemen 50 cents per hour; firemen 40 cents per hour. Wage rates for lowest paid of six classes of factory trades are replaced by: Zone I—15½ cents, Zone II—14 cents; Zone III—12 cents. Rates payable to employees not included in classified factory occupations, office employees or enginemen and firemen are: in Zone I, the lowest paid 20 per cent of the workers (male or female) at not less than 17 cents; in Zone II, the lowest paid 20 per cent of the workers (male or female) at not less than 15 cents; in Zone III, the lowest paid 20 per cent of the workers (male or female) at not less than 13 cents. Minimum hourly rates for certain of these same employees are: apprentices (class 2) 17 cents in Zone I, 15 cents in Zone II, 13 cents in Zone III, 12½ cents in Zone IV; for Class III, 14½ cents in Zone I, 12½ cents in Zone II, 12½ cents in Zone III, 12½ cents in Zone IV.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council dated November 19, and gazetted November 27, amends the previous Orders in Council for the industry (L.G., April, 1939, p. 528; Sept., p. 950; May, 1940, p. 496; Dec., p. 1310; April, 1941, p. 473; June, p. 704; Dec., p. 1572; Jan., 1943, p. 88). Hours of labour: the regular week shall consist of 50 hours. Overtime up to 55 hours inclusively

shall be paid at the rate of time and a quarter. Any work in excess of 55 hours per week shall be paid at the rate of time and one-half.

Service: Public Administration

MUNICIPAL EMPLOYEES, JONQUIÈRE.

An Order in Council, dated November 19, and gazetted November 27, makes obligatory the terms of a new agreement between the Municipal Corporation of the Town of Jonquière, and Le Syndicat national catholique des employés municipaux de Jonquière, incorporé. This agreement is to be in effect from November 27, 1943, to November 26, 1944, and thereafter from year to year subject to notice.

Hours: 8 per day; policemen, 11 per day for days, 13 for nights, with one day off per week. Wages: assistant-treasurer \$45 per week, book-keepers \$37 per week; meter reader \$37 per week, collector 1st year \$33, after 1 year \$37 per week; clerks, stenographers, typists, \$29 per week, engineer's assistant \$40 per week, roads foreman \$35 per week, labourers 45 cents per hour; carpenters and joiners 60 cents per hour, plumbers 60 cents per hour, electricians 45 to 70 cents per hour; policemen and firemen—chief \$40 per week, lieutenant \$35, sergeants \$34, policemen \$30 to \$32 per week. Vacation: employees on a monthly basis to have one week's vacation after one year's service, two weeks after two years' service; hourly paid employees, from 3 days with pay after one year's service, increasing to one week after four years' service.

War Emergency Training

Progress of Enrolment During October—Training in Industry— Rehabilitation Training

THE War Emergency Training Program provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the up-grading of persons already employed;
- (3) Training in plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

War Emergency Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

Progress of Enrolment During October

From the beginning of the program up to October 31, 1943, the gross enrolment in all types of projects has been as follows:

Training for Industry.....	189,564
Army	36,030
Navy	6,585
R.C.A.F.	56,544
Rehabilitation (discharged persons from the forces).....	1,947
University Students	4,053

294,723

New developments have been the inauguration of classes to train men or women in cheese making, butter making and dairy work. Classes have been arranged to be held at the Universities of Alberta and Saskatchewan, University of Manitoba, Agricultural College at Guelph and the Kemptville Agricultural College. A further class is being held at St. Hyacinthe in Quebec.

A new statistical table is shown for the first time in this issue of the GAZETTE; Table No. 4 which will deal solely with rehabilitation training of discharged members of the

forces. On account of the growing extent of this type of training it seemed advisable to show this under a separate table.

Training in Industry

Up to the end of October 115 plant schools had been approved. Of this number 57 were no longer in operation. Seven of these never commenced operations; two were cancelled for unsatisfactory performance and 48 others either completed their training program or had to be suspended owing to lack of trainees. The enrolment in the plant schools has dropped since the peak point in August.

The part-time classes to upgrade employed persons showed a seasonal increase with the coming of the fall months and stood at 3,108 on October 31.

The popularity of the Foremanship Training courses in industry has continued. A new unit in this series is now available to Canadian industry, Series No. 2, Job Relations Training. This is the same unit that has been put on by the Training Within Industry Branch at Washington.

Accident prevention has been well taken care of. That safety practices are adequately stressed in all the Vocational Schools is shown by the fact that the actual costs of Workmen's Compensation only amounted to \$11,420 for the period August 1, 1941 to March 31, 1943. During this time the average number of persons covered for compensation was approximately 7,000. This included the trainees and the instructional and maintenance staff.

Rehabilitation Training

The number of discharged persons taking rehabilitation training was 279 at the end of the month. This is the largest enrolment up to the present. Further preparations are being made to provide adequate vocational training for discharged men as the number applying for such training is expected to increase sharply during the coming year. With this end in view, a Teacher Training course was commenced at the Hamilton Teacher Training College with an enrolment of over thirty. Practically all those attending are veterans of this war or the last war with years of practical experience in a variety of skilled trades. The Teacher Training course is designed to give them a number of fundamental principles of teacher training and the operation of vocational classes in schools. The course will last from four to six months.

(1) Includes those graduates who, though actually placed prior to October 31, 1943, were not so reported until after October 1 1943.

Activities of the Unemployment Insurance Commission

Officials of Commission hold Conference on Post War Office Technique—Reprints of Unemployment Insurance Act and Regulations—Insurance Registration—Claims for Benefit—Unemployment Insurance Fund.

EARLY in December the Unemployment Insurance Commission held a series of staff conferences in Ottawa, under the chairmanship of Mr. L. J. Trotter, Chief Commissioner. Representatives of the five regional offices and the larger local offices across Canada were present. The general theme of the discussions was unemployment procedure under post-war conditions. Efforts were made to devise means for simplifying the procedure in the taking of claims for unemployment insurance and in the payment of benefit.

Recommendations made included: (1) the reduction by as much as six days in the time elapsing between the filing of a claim by an applicant and the receipt of his first benefit; (2) the decentralization of the adjudication and payment machinery; and (3) arrangements necessary to handle increased traffic in the local offices.

It is expected that the recommendations that were given approval will be put into effect early in 1944.

Reprints of Unemployment Insurance Act and Regulations

As a result of the several amendments made in the Unemployment Insurance Act, 1940, and also because of numerous changes made in the regulations since the Act came into force on July 1, 1941, it became necessary to reissue both the Act and the regulations in revised form.

The following have been completed: Unemployment Insurance Act, 1940, office consolidation (bilingual); Contribution Regulations, annotated edition (bilingual); Benefit Regulations, office consolidation (bilingual); Determination of Questions and Appeal Regulations, office annotated edition.

The pamphlets contain complete indexes and the annotations make them useful for ready reference. Owing to restrictions in the wartime use of paper the distribution is of necessity limited, but for those requiring them copies may be obtained in English or French or in bilingual form at local employment and selective service offices across Canada.

Claims for Benefits

The amounts paid in claims for unemployment insurance benefits during the period from

April 1, 1943 to October 31, 1943, was \$450,-496.26. In this period 13,875 claims were received at the five regional and four district offices by the Commission, of which 10,196 were allowed, 2,992 not allowed, with 393 pending. (See Table 2.)

An analysis of the 2,992 claims not allowed by insurance officers revealed the following reasons for non-allowance: 792 claims under Section 28 (i) in which the claimants had insufficient contributions; 151 claims under Section 28 (ii) in which 91 claims were not made in the prescribed manner and 60 of the claimants were not unemployed; 88 claims under Section 28 (iii) of which 68 were not capable of work and 20 were not available for work; 82 claims under Section 43 (a) for loss of work due to labour disputes; 46 claims under Section 43 (b) (i) for refusal of offer of work; 12 claims under Section 43 (b) (ii) for neglect of opportunity to work; 1 claim under Section 43 (b) (iii) for failure to carry out written directions; 1,788 claims under Section 43 (c) of which 183 were discharged because of their own misconduct and 1,605 for voluntarily leaving without just cause; 2 claims under Section 43 (d) for being under 16 years of age; 30 claims under Section 43 (f) of which 22 were in class "O" contributions and 8 for other reasons.

Appeals and References

During the period April 1, 1943 to October 31, 1943, there were 443 references and 94 appeals made by claimants to Courts of Referees. In addition, there were 11 references by insurance officers to Courts of Referees. Of the 658 cases (including 110 not heard at March 31, 1943), 569 had been heard, 32 had not been heard at the end of October and 57 had been withdrawn. The Courts of Referees allowed 142 claims and disallowed 427. (See Table 3.)

Appeals to Umpire

Thirteen claimants (including 2 not heard at March 31, 1943) sought permission from the chairman of Courts of Referees to appeal to the Umpire, under Section 58 (c) (iii); 5 other permits were asked for, either by claimants or associations of employed persons, under Section 58 (b) and 3 by an insurance officer under Section 58 (a). Of these, 11 were not

granted permission. Of the 10 granted, five were heard and five had not yet been heard. None of the appeals heard was allowed.

Unemployment Insurance Registration

Reports received from Local Offices of the Unemployment Insurance Commission showed that at December 1, 1943, 137,374 employers with insured employees were registered and 2,998,904 employees had been issued with insurance books.

A breakdown of employers and employees according to Regions in which registration took place is shown in the following table:—

Region	Employers' Establishments Registered	Insured Persons Registered
Maritimes	11,173	222,565
Quebec	36,132	942,307
Ontario	52,049	1,168,088

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of October, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

Information submitted by 14,026 establishments, employing 1,885,277 men and women, indicated a continued expansion in industrial activity at the beginning of October. On September 1, the staffs of the reporting establishments had aggregated 1,871,315.

The index number of employment (based on the 1926 average as 100) was 187.6 as compared with 186.2 in the preceding month and was 3.5 per cent higher than at October 1, 1942.

Incorporated in this article is information concerning payrolls which is furnished each month by the co-operating firms. The per capita average weekly wage, at \$31.48, showed a further increase, rising from \$31.30 at the beginning of September, as compared with \$29.51 at October 1, 1942.

Report on employment conditions for November.—A summary of employment conditions for the month of November has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment

and Selective Service Offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment; vacancies, and placements, October, 1943.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from the Employment and Selective Service Offices during the four weeks October 1, to October 28, 1943, showed little change in the daily average of placements recorded, both when compared with the preceding four weeks and the month of October a year ago, there being a slight decrease from September, 1943, and a nominal increase over October, 1942. Vacancies in the four-week period ending October 28, 1943, numbered 225,354, applications 194,306 and placements in regular and casual employment 143,230.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of November, 1943, the percentage of unemployment among trade union members was .3, which was identical with that recorded at the beginning of the previous month. At the corresponding date a year ago, the percentage of those without work was .7. The figure for November was based on reports compiled from 2,377 labour organizations, having a total membership of 478,705 persons.

The Employment Situation at the Beginning of October, 1943 as Reported by Employers

INDUSTRIAL activity continued to expand at the beginning of October, but, as at September 1, the increase in the number in recorded employment was decidedly smaller than at the same date in any recently-preceding year. It was also rather below-normal in the experience of the period since 1920. A combined working force of 1,885,277 persons was employed by the 14,026 establishments furnishing returns to the Dominion Bureau of Statistics, whose staffs at September 1 had aggregated 1,871,315.

Based on the 1926 average as 100, the unadjusted index number of employment rose from 186.2 at September 1, to 187.6 at the beginning of October, when it was 3.5 per cent higher than at the same date of last year. The latest figure is slightly higher than in any other month for which statistics are on record. Since the gain at the date under review was not equal to that usually indicated at the beginning of October, the seasonally-adjusted index showed a decline, falling from 179.0 at September 1, to 178.5 at the beginning of October.

The general increase in industrial employment at the beginning of October, 1943, was fairly evenly divided between the manufacturing and the non-manufacturing classes. The gain of 7,611, or 0.6 per cent, in the former was slightly above the average at October 1 in earlier years of the record; within this group, there were considerable advances in vegetable food, rubber, iron and steel, non-ferrous metal and electrical apparatus plants. On the other hand, curtailment was indicated in lumber, pulp and paper, animal food, chemical, electric light and power, and some other divisions.

Among the non-manufacturing industries, logging showed moderate seasonal improvement, on a scale below that usually indicated at the beginning of October. Considerable increases were recorded in trade and services. Transportation reported little general change, while the trend was downward in building, mining and communications.

Payrolls

The salaries and wages disbursed by the co-operating employers at October 1 aggregated \$59,343,323, as compared with \$58,573,431 at September 1. The increase was 1.3 per cent. The average weekly earnings per employee showed a further gain, rising from \$31.30 at the beginning of September, to \$31.48 at the date under review, as compared with \$29.51 at

October 1, 1942. In the year, the increase of 3½ per cent in employment has been accompanied by that of 9.2 per cent in the reported payrolls, while the per capita average has risen by 6.7 per cent. The gain in the latter is particularly interesting in view of the fact already stated, that the general rise in recorded employment in the 12 months has taken place wholly among women workers. The average per employee at October 1, 1941, had been \$26.37; information in regard to the sex of the workers at that date is not available.

Part of the increase in the average earnings from September 1 to October 1 (which, incidentally, is smaller than that noted in the same comparison in either 1942 or 1941), was due to the payment of wages and cost-of-living allowances at higher rates to employees in certain categories, notably in the heavy manufacturing industries.

If the statistics for the finance group be added to those given above for the eight leading industries, the latest survey shows a total of 1,950,131 persons in recorded employment at the beginning of October, as compared with 1,935,820 at the beginning of September. The latest weekly aggregate payroll was \$61,375,007, exceeding by 1.3 per cent that of \$60,582,681 reported at September 1. The per capita average in the nine leading industries advanced from \$31.30 at that date, to \$31.47 at October 1, as compared with \$29.55 at October 1, 1942, and \$26.46 at October 1, 1941.

Table 11 summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at September 1, 1943, and October 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 22.7 per cent, while the aggregate weekly payrolls of those workers are higher by 50.7 per cent. Including finance, the gain in employment from June 1, 1941, to October 1, 1943, amounted to 22 per cent, and that in payrolls, to 49.3 per cent. The explanation given in preceding reports for the much greater rise in the salaries and wages

than in the numbers employed may again be stated: (1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the payment of a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been increased on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted.

As a result of wartime conditions, there have been especially important gains in employment and payrolls in factories, in which the rate of

expansion in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 37.7 per cent from June 1, 1941, to October 1, 1943, and that of payrolls has advanced by 71.8 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

The production of durable goods¹ has shown particularly important gains from the beginning of the record of payrolls; thus the index of

¹ For list of these industries, see footnote to table 11.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

employment has risen by 60.3 per cent, while the salaries and wages distributed by the co-operating employers have advanced by 104.2 per cent from June 1, 1941, to October 1, 1943. Although there has more recently been a slackening in certain of the non-durable goods industries, the index number of employment in this group at the date under review was higher by 17 per cent than at June 1, 1941, since when there has been an increase of 37.5 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Employment and Payrolls by Industries

Manufacturing.—The trend of employment and payrolls continued seasonally upward in manufacturing at October 1; the advance in employment was considerably smaller than at October 1 in any of the first four years of the war, but was slightly above the average at that date in the period from 1920. The distribution of the gains continued to differ from the normal, those in the durable goods group being greater than usual, while employment in the production of non-durable goods showed an increase which was below-average.

The 7,835 co-operating manufacturing establishments employed 870,905 men, and 337,251 women at October 1, a total of 1,208,156 workers; in their preceding report they had indicated a personnel of 1,200,545. There was accordingly a gain of 7,611 persons, or 0.6 per cent, in the number in recorded employment in manufacturing, which reached a new all-time high at the date under review. The proportion of females, at 27.9 per thousand, was decidedly greater than that of 25.7 per thousand indicated at the beginning of October of 1942.

The weekly payrolls disbursed at the beginning of October amounted to \$39,087,128, or

Dec. 1.....						

1.7 per cent more than the sum of \$33,450,889 reported by the same firms at September 1. The per capita average showed a further gain, rising from \$32.03 in the last report, to \$32.35 at the date under review, as compared with \$30.15 at October 1, 1942. The continued concentration of workers in the more highly-paid heavy industries is partly responsible for the noteworthy increase in the payrolls reported at the beginning of October; the payment of wages and cost-of-living allowances at higher rates by a number of firms in this category

also contributed materially to the general gain in manufacturing.

The largest additions to the working forces were in the vegetable food and iron and steel divisions; partly due to a late season, the expansion in the former was rather above the average at October 1, but approximated that indicated at the same date in 1942. Increases on a much smaller scale were reported in rubber, tobacco, beverage, non-ferrous metal and electrical apparatus plants. On the other hand, the trend of employment was downward

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

in animal food, leather, lumber, pulp and paper, textile, chemical, clay, glass and stone and miscellaneous non-metallic mineral products.

Based on the 1926 average as 100, the index of employment in manufacturing at the beginning of October stood at 231.3; this figure was the highest in the record, exceeding by six per cent the October 1, 1942, index of 218.3. Since the increase from the preceding month slightly exceeded the average, the seasonally-adjusted index showed a further small advance, being 224.2 at October 1, as compared with 223.5 at September 1.

The co-operating manufacturers reported the disbursement of \$39,087,128 in weekly payrolls at October 1. This was an increase of \$636,239 over the weekly salaries and wages paid on or about September 1. The per capita average, at \$32.35, was the highest in the record going back to June 1, 1941. At October 1, 1942, the average had been \$30.15, while at the same date in 1941, it was \$26.80.

Based on the weekly salaries and wages paid by the co-operating establishments on or about June 1, 1941, as 100 per cent, the index of

payrolls at October 1, 1943, stood at 171.8, as compared with 169.0 at September 1, 1943, and 152.5 at October 1, 1942. The increase of 12.7 per cent in the reported payrolls at the date under review as compared with twelve months earlier, considerably exceeds that of six per cent in the number of persons employed by the co-operating manufacturers. The reasons for this disparity in the rates of gain have already been given. In the manufacturing industries, the upgrading of employees as they acquire experience is of particular and growing importance, tending to offset the effect of the large-scale dilution of labour consequent upon the shortage of workers which has become increasingly acute with the development of the war effort. As was pointed out in preceding reports, the changing industrial distribution of the wage-earners in recorded employment has also contributed materially to the relatively greater gain in payrolls, there being a growing proportion of workers in the more highly-paid heavy industries. At October 1, 1943, such industries provided work for 57.5 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at June 1,

Relative weight of employment by Provinces and Economic areas as at Oct. 1, 1943.	100.0	7.7	0.1	4.8	2.8	31.7	40.7	10.5	4.8	2.0	3.7	9.7

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

1941, the proportion was 49.7 per cent. The effect of this change in distribution is emphasized by the fact that the latest per capita average earnings of persons engaged in these classes stood at \$35.66, an amount which was higher by \$7.87 than at June 1, 1941, while in

the light manufacturing industries the October 1 average, standing at \$27.72, has risen by only \$4.42 in the 28 months.

During the period for which statistics of payrolls are available, there have been especially important increases in the salaries and

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

(The latest figures are subject to revision)

Industries	Relative Weight	Oct. 1 1943	Sept. 1 1943	Oct. 1 1942

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

² The industrial classification of certain large manufacturing firms has been changed commencing with the present report. These changes affect the chemical, iron and steel and non-ferrous metal industries, but not the total for manufacturing, nor the all-industries' total. Where necessary, the indexes have been recalculated from 1940.

* Revised.

wages reported in the non-ferrous metal, chemical, iron and steel, miscellaneous manufactured products, electrical apparatus and equipment and tobacco industries. These gains have been associated with important though relatively smaller advances in employment. In practically every case, the per capita average weekly earnings in the various branches of manufacturing are higher than they were at the beginning of October, 1942.

Many factors contribute to the differences that exist in the average weekly earnings in the various industries. Prominent among these is the sex distribution of workers, associated with the sex distribution is that of age, the women workers in general tending to belong in the younger groups, where earnings are usually lower than among the more experienced employees. Another important factor is the presence or absence of overtime work.

Logging.—Employment in logging showed a seasonal increase which was decidedly below normal for the season. The 505 co-operating employers reported 43,690 workers; this was 4,934, or 12·7 per cent more than at September 1. Employment generally was not so active as at the beginning of October in immediately preceding years. Although the latest index, at 146·0, was several points lower than that of 151·7 at the same date of last year, there was an increase of 16·4 per cent in the index of weekly payrolls during the 12 months. The indicated earnings at the latest date aggregated \$1,207,552; this was 10·1 per cent higher than the payrolls disbursed at the beginning of September.

The per capita average earnings at the date under review were \$27·64, as compared with \$28·31 paid on or about September 1. The October 1, 1942, average had been \$21·86. In considering the figures of aggregate and average earnings in logging, it must be recalled that they do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings; these differ greatly in various parts of the country, the average in British Columbia being decidedly higher than in any other province.

Mining.—The trend in mining continued downward, according to returns from 476 operators whose employees numbered 72,780, as compared with 73,918 at September 1. Rather greater activity was noted in coal-mining, but there was a slight decline in the production of other non-metallic minerals, and a substantial reduction in the metallic ore division. The index of employment in the

mining group at October 1, at 155·6, was 5·3 per cent lower than that of 164·3 at the same date in 1942.

The weekly payrolls reported at the latest date amounted to \$2,643,078, as compared with \$2,640,792 indicated at September 1. The small advance took place in coal-mining, and to some extent was due to the resumption of operations on a more normal scale following industrial disputes in eastern coal fields. The per capita average earnings in mining as a whole rose from \$35·73 at September 1, to \$36·32 at the date under review, as compared with \$35·52 at October 1, 1942. Since then, the index of payrolls has declined by 3·2 per cent.

Communications.—There was some curtailment in employment in the communication group as a whole at October 1, when the reported employees numbered 28,432, compared with 28,684 in the preceding month. The decrease was slightly larger than usual for the beginning of October. The indicated payrolls were also lower, standing at \$852,118, as compared with \$860,867 paid on or about September 1. The per capita average fell from \$30·01 at September 1, to \$29·97 at the first of October. Based on the 1926 average as 100, the latest index of employment was 106·4; this was fractionally higher than the figure of 105·9 at October 1, 1942, since when the index number of payrolls has risen by four per cent.

Transportation.—Little general change took place in transportation as a whole at October 1; steam railway operation and local transportation afforded more employment, but shipping and stevedoring were quieter. The staffs of the 595 firms and branches furnishing data totalled 151,583, as compared with 151,927 at September 1. The weekly salaries and wages disbursed were given as \$5,338,329, as compared with \$5,374,471 paid on or about September 1. The average per employee fell from \$35·38 at that date, to \$35·22 at the beginning of October; that at October 1, 1942, had been \$34·33. In the intervening 12 months, recorded employment has risen by 7·4 per cent, while payrolls have advanced by 9·7 per cent.

Construction and Maintenance.—There was a seasonal decline of 1,751 persons in this division, bringing the reported employees to 172,727 at October 1. Highway and railway work were more active, but building showed a considerable falling-off. The weekly payrolls reported by the 1,563 co-operating employers were lower by 0·8 per cent; the latest aggregate was \$5,217,299. The per capita average earnings rose from \$30·13 paid at September 1, to \$30·21 at the date under review.

The October 1 index in construction, at 136·9, was lower than that of 149·6 at the

beginning of October of last year, there being a falling-off of 8.5 per cent in this comparison. However, there was an increase of 1.9 per cent in the reported payrolls in the 12 months.

Services.—Employment in the service division showed contra-seasonal activity. The 647 employers from whom data were received indicated a staff of 44,478, as compared with 43,986 at September 1. Of the October 1 personnel, 25,819 were females. The payrolls disbursed at the beginning of October amounted to \$836,626, compared with \$825,535 in the preceding period of observation.

The index of employment was higher by 7.2 per cent than at October 1, 1942, while there was an increase of 12.5 per cent in the reported payrolls in the year. The per capita average earnings, at \$18.81 at the latest date, were higher by four cents than at September 1, also exceeding the October 1, 1942, average of \$17.92. Attention must be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 64 per cent of the total reported in the service division as a whole at the beginning of October.

Trade.—There was a considerable seasonal gain in trade at October 1. The improvement was rather above-average, according to the experience of the years since 1920. This was partly due to the employment of increasingly large numbers of part-time workers.

Information was received from 2,346 establishments, whose personnel was increased from 159,021 at September 1, to 163,426 at the date under review. Of the latter number, 80,238 were females. The sum of \$4,161,193 was paid at October 1 in weekly salaries and wages by the co-operating firms, whose payrolls at September 1 had aggregated \$4,066,201. The per capita average was \$25.46 at the latest date, as compared with \$25.57 in the preceding report, and \$24.58 at October 1, 1942.

The index number of employment in trade at October 1 stood at 156.3, as compared with 153.5 at the same date in 1942. The latest figure, therefore, showed an increase of 1.8 per cent in this comparison; the employment of greater numbers of part-time workers was partly responsible for the rise. The reported payrolls were higher by 3.4 per cent.

Financial Institutions.—The number of returns received from financial institutions was 757, showing a personnel of 64,854, of whom 32,958 were women. At September 1, these establishments had employed 64,505 persons. The weekly earnings disbursed at the date under review amounted to \$2,032,684, as compared with \$2,009,250 paid on or about September 1. The per capita weekly average was \$31.34, as compared with \$31.15 in the last report, and \$30.74 at October 1, 1942. In the latter comparison, employment in financial institutions showed an increase of one per cent, while the index number of payrolls was higher by three per cent.

Report on Employment Conditions for November, 1943

The following summary of employment conditions for the month of November has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

THE closing days of November found Canadian industry past the transition stage between summer and winter manpower needs, and settled to the consideration of its labour problems for the months ahead.

The conclusion of the agricultural season had proved of material advantage in alleviating shortages existing in logging and war industries, but the demand for bush workers continued to be heavy. To a lesser degree construction was making demands upon the manpower supply, but this labour shortage, while urgent and immediate, was the normal result of the speeding up of projects to completion before winter should set in, and would not be of any great duration.

As a result of the freezing order of September 20 and the falling off of seasonal activities and to a minor extent layoffs in various war plants, the over-all demand for labour eased considerably during the month.

Maritime Region

Agriculture.—The agricultural season in the Maritimes was practically over, and in spite of weather and manpower difficulties, only a small quantity of the two main crops—apples and potatoes—had not been harvested. The only vacancies presently existing throughout the region were for occasional farm hands and assistants on small dairy farms, and many farmers were going to logging and railway maintenance.

Fishing.—The fishing season, too, was almost over, with lobster trapping well advanced. Fewer men were reporting for the winter catch because of the high income received during the summer, which had rendered them

economically independent for the forthcoming season.

Logging.—Fishermen and farmers were helping to meet the shortage in the logging industry, and operators were canvassing for men at the discretion of the local office managers, but the labour demands of the timber areas were still far from satisfied. While it was hoped that there would be enough volunteers from the returned men of the Forestry Corps to relieve the situation, the labour demands of the industry presented a major problem.

Mining.—In the coal mines the situation continued to be unsatisfactory, with absenteeism at a high level. The release of experienced miners from the forces was affording some relief: these men are able and willing, and as a rule are local men who do not complicate already overburdened housing accommodation—consequently they are the best source of supply.

Manufacturing.—In the manufacturing field the labour freeze order had proved beneficial in stabilizing employment in the shipyards, aircraft plants, and in other high priority industries, but a labour demand existed in many plants. The need for skilled men in the shipbuilding yards had been somewhat alleviated by workers made available through the curtailing of activities in the Montreal area, and it was anticipated that the slowing down in the Quebec area, also, would soon afford further assistance. The aircraft industry was still suffering from shortage, and men were being referred from non-essential jobs wherever possible. Moreover, the complete shutdown of the sawmills throughout the region, in the immediate future, should release many men to other industries. The fish-processing plants, too, had for the most part completed their seasonal operations, except in Prince Edward Island and Halifax, where the unusual demand for fish had lengthened the processing operations. The labour story in the manufacturing field was one of layoffs as well as shortages, but every effort was being made to absorb all workers who were out of employment, and many of the men had already been directed to the lumber camps.

Construction.—The speeding up of construction work in a race against winter weather had naturally made the demand for skilled and unskilled labour more pressing, but throughout the region this shortage, while critical, was regarded as short-lived. In the Halifax area, with the exception of a few ships' carpenters, skilled jobs on high priority projects were being filled without difficulty. In the Halifax area the situation was

greatly alleviated through the use of the Longshoremen's Reserve Labour Pool, but at Charlottetown almost continuous rain made it hard to induce men to work as labourers on new buildings under construction, and Liverpool, too, was in urgent need of carpenters and labourers for work on wartime houses, with the prospect of filling orders remote.

Quebec Region

Agriculture.—In the Quebec region, as elsewhere throughout the Dominion, the agricultural season was practically at an end, with no demand whatsoever for farm workers. In a few localities fall ploughing and threshing were not quite finished, and some farmers were busy with fuelwood cutting, but there were many applications daily for winter work in the bush, or for war jobs.

Logging.—All over the province farmers were entering the logging camps in large numbers, but many thousands of loggers were still needed. The demand for workers was particularly heavy for pulpwood cutting, but it was felt that there was a good chance of supplying sufficient men to meet fuelwood cutting requirements.

In the city of Quebec active recruiting was going on for the lumber camps on the south shore, and one company had opened a training school for forest workers, under the aegis of the Youth Training Plan for essential war workers. Agents in Montreal were securing about 100 men weekly—but still shortage throughout the lumbering industry prevailed.

Mining.—In the mining field, the base metal output on the whole was reported as satisfactory: a small group of underground men was required at Campbell's Bay and some 500 for Rouyn. The gold mines, in the low priority brackets, were receiving little assistance, and operations were proceeding on a reduced scale.

Manufacturing.—Although the over-all situation was definitely easier, many of Quebec's manufacturing plants were still short of labour. Montreal packing plants were among those most affected, and a recruiting campaign was under way to aid the Montreal textile mills in procuring both inexperienced women and experienced part-time workers. Cotton, woollen and silk mills were operating at capacity, although short of experienced operators in most cases: Cowansville, Acton Vale and Farnham plants were reported to be slacking off because of shortages of material.

Only one aircraft plant in Montreal was still hiring skilled workers: elsewhere only trainees were in demand. Several war plants were laying off workers, but these

were all readily absorbed into other concerns. Plans for a further reduction of 300 semi-skilled men at Montreal were not causing any concern as to future placement. The lay-off of skilled tradesmen in Montreal's merchant shipyards was likewise continuing, with transfers to Maritime shipyards wherever possible. At Sorel, too, there had been a lay-off of 200 workers, mostly labourers, and further releases were expected. At Levis, conversely, many workers were needed, but there was a constant turnover of labour, and ship-building was retarded by housing conditions.

The housing shortage was also responsible for a lack of requisite women workers for the chemical plant at Granby, and a similar plant at Valleyfield was hard put to procure the needed quota of 200 female assistants, not available locally. Chicoutimi required twenty-five to thirty workers daily to take care of the turnover in potmen and labourers in the aluminum plant.

Construction.—Construction's manpower requirements in the region were somewhat reduced, although in Montreal plumbers, steam-fitters, etc., were in urgent demand. Carpenters were always called for, but were generally available, and some 250 shortly to be laid off at Arvida would be offered work available as labourers, or transferred elsewhere. Many labourers throughout the province were being laid off as construction terminated for the season, and the majority of these were taking work in the lumber camps. The Isle Maligne project, now completed, had released a further 300 men, and these labourers, too, were being directed to lumber operations.

Ontario Region

Agriculture.—With the fall apples all picked, and the fall ploughing and lifting of the root crop finished, the prolonged agricultural season was at an end. Many farmers were now free for bushwork and other essential industry, and already there had begun a steady movement as agricultural work tapered off. Reports from the areas where winter assistance on the farms was needed showed a scarcity of applicants.

Logging.—The most imperative labour need was for men to help out in the logging industry: demands for workers in all phases of pulpwood, logging and fuelwood operations—and in all parts of the province—far exceeded the supply of experienced bushmen. As in Quebec, the needs of fuelwood cutting were receiving first attention. At Hawkesbury pulp and paper mills had prevented a serious fuel shortage by allowing the townspeople to cut fuel on their limits at a very low cost. But even allowing for the exigencies of fuelwood

requirements, the logging operators found themselves faced with an apparently insoluble problem. At Kapuskasing, where upward of 1,500 men were needed, the camps were being partly filled through the co-operation of local farmers, while smaller companies in the Hearst vicinity were obtaining helpers from Quebec through contracts to various jobbers who agreed to bring in their own crews.

Mining.—Mining was not in such extremity of labour shortage except for the nickel mines. The fluorspar mines in the Madoc area had closed down, and the labourers thus released were busily engaged in alleviating the Belleville fuelwood deficiencies. At Kirkland Lake the silver and cobalt leases had amalgamated into one company, with a view to increasing local employment and production. The lime quarries at Ingersoll were still suffering from a lack of helpers, and underground miners were greatly in demand at Sudbury, where the chief difficulty was to secure men able to pass medical and X-ray examinations; part-time workers had been satisfactorily used, with absenteeism the only serious bottleneck.

Manufacturing.—The demand for labour in the manufacturing industry still continued in Ontario. At Kingston heavy factory labourers, skilled core makers and heavy floor moulders were needed. Some 60 of the 300 female workers needed had been transferred from outside points.

Brantford's labour requirements were notably heavy in its various manufacturing plants. The iron and steel plants were very short of good machinists and lathe hands. Foundry workers and labourers were needed in all foundries, but the textile plants made the heaviest calls on labour.

In Hamilton the employment situation was serious alike in foundries and textile plants. Four layoffs in one war industry had occurred since September—welders, fitters, painters and labourers for the most part—and about 80 per cent of these had been absorbed by other industries in Hamilton and the vicinity at lower wage rates. Ingersoll, with local help scarce, was trying to bring in Japanese labour. In London, the war industries were well taken care of, but non-essential industries, such as the hosiery factories, paper box plants, etc., were hard pressed.

At New Toronto the call was for skilled workers, with orders for semi-skilled and unskilled labour slackening off considerably, although a large number of unskilled, male factory workers could still be employed to advantage. Peterborough was experiencing great difficulty in filling its needs, partly because of the heavy work involved, which required men in robust health. A constant endeavour was made to fill the vacancies by

clearance orders and farmer canvass, and a recent drive had placed 350 women in part-time work.

Construction.—Continued open weather accounted for construction's requirements for labourers and carpenters, but the transfer of men from one project to another, as work was completed, was meeting the major needs of this industry, and it was anticipated that highway and similar construction work would soon be suspended until spring. The difficulty of finding men for track maintenance persisted, and the prospect of securing such workers was negligible, as the majority of men suitable preferred indoor factory work for the winter months.

Prairie Region

Agriculture.—The completion of the belated threshing marked the close of the agricultural season in the prairie region, and the only current demand was for choremen, who were not attracted even when \$50 to \$70 a month (plus board) was offered; domestic help for farm homes was equally unavailable. Arrangements were being made for the release of prisoners of war to aid farmers willing to accept this type of help, and in the Brooks district, near Medicine Hat, the placement of 150 German merchant seamen on irrigated farms had solved the local problem.

Logging.—With the harvesting over, agricultural workers were moving more freely into logging and other industries. This region, in common with all lumbering areas, was in great need of loggers, and even the referral of farmers in great numbers, especially in Alberta and Northern Saskatchewan, had provided far from an adequate supply. The Edmonton district alone was calling for 1,000 to 1,500 men for immediate service, with 3,000 to 4,000 needed before the close of the year, and in the Lethbridge area Japanese beet workers had been secured by one large operator.

In Northern Manitoba the heavy demand for loggers had been slightly relieved by help from the farmers. In the Fort Frances area the release of 150 workers, resultant upon the cessation of sawmill operations, had benefitted logging operators, who were also employing Indians from the neighbourhood, and Dauphin reported an increased demand for loggers, due to the establishment of fuelwood camps. Approximately 5,000 men were required by the timber companies in the Port Arthur area to bring crews to their full productive strength, and only a small fraction of this number was obtainable locally. In the Winnipeg district snow and cold weather had speeded up the placement of loggers, and most of the operators of the area had completed camp building and were rushing in supplies before the lakes froze.

Mining.—The coal mines in the Alberta and British Columbia fields had resumed operations on November 15, following the three weeks' strike dispute over wages. The need of certified miners was prevalent everywhere, and the housing situation presented a serious drawback to employment, especially in the Edmonton and Blairmore districts. Soldier miners released from the forces were especially welcome because they have homes in the area.

The labour needs of the base metal mines in Flin Flon are rapidly being met through transfers from Prairie offices. Housing conditions had been a serious drawback for some time, but this was being rapidly remedied. It was hoped that the production of copper and zinc ore this winter would reach an all-time record, but the gold mining situation showed only a modicum of improvement.

In the Turner Valley, there was a heavy demand for "roughnecks", derrick men and labourers for the oil wells. Contracts had been let for six new wells, with eighteen men to each crew, as well as labourers for construction and pipe line work; efforts were being made to transfer men on seasonal permits from agriculture, but a serious shortage still existed, and here again the lack of accommodation (none whatever for married men) militated against procuring the necessary manpower.

Manufacturing.—The manufacturing industry as a whole was not suffering excessively through lack of labour. The previous serious shortage in the packing plants had been met through the assistance of the Farm Help Service. Men skilled in the metal trades were still urgently required in shipbuilding at Port Arthur. At Fort Frances, too, further curtailment of operations at the local paper mill was anticipated, but here the men were to be transferred to other departments, thus releasing others willing to go to the pulpwood camps for the winter.

Medicine Hat's only labour shortage was in the brick plants. The utilization of female labour in manufacturing had greatly relieved the situation in this city, as elsewhere. In the Port Arthur area the sawmills were short-handed on account of the isolation of the communities where they are located. The only immediate answer to the problem was the possibility of Japanese labour, and the mills had applied for this. In Winnipeg there was a decided shortage of sheet metal workers, auto mechanics and machinists, very few of whom were obtainable.

Construction.—Although practically all construction work was far ahead of schedule owing to the fine weather, there was a continuing shortage of certain tradesmen, notably carpenters. Labourers too were very scarce. Hundreds of men, both skilled and unskilled,

were in demand for the Edmonton airport; building permits in that city totalled five and a half million as compared with two and a half million for the same period last year, and a consequently greatly increased need for labour existed.

Pacific Region

Agriculture.—Agriculture's sole requirement in the Pacific region was for year-round helpers for dairy farms, especially single men with milking machine experience,—but none were forthcoming.

Logging.—The freezing order had put a stop to men drifting from one logging camp to another, but throughout the coast region the need for loggers continued. Prince George's local labour supply was completely inadequate to cope with the heavy demand for all kinds of lumbermen.

At Cranbrook there was a general need for men capable of heavy physical labour. Farmers were giving odd days from their fall chores, but good, steady bushmen were conspicuous by their absence, and older men were forced to quit work on account of the increasing damp and cold. All the sawmills of the district were operating in conjunction with logging operations, and not one camp had its full crew. Many of the returning Forestry Corps men belong to the area, and it was hoped that they would shortly be available. Kamloops, too, was experiencing increasing difficulty in finding men suitable for lumbering duty, and all the companies there were running shorthanded. On the other hand, Courtenay reported that it had no large number of vacancies, and at Duncan the all-summer shortage of from 300 to 500 men had been somewhat relieved.

Fishing.—Fishing was prolonging its activities beyond the usual time on the Pacific coast, and a number of fishermen who habitually lay off during the winter were fishing for the fresh fish market. The salmon fishing season was over, however, and while the catch was appreciably lower than that of last year, prices were higher, and it was anticipated that the prosperous season would slow up the return of fishermen for winter employment, such as the herring fishing. An unusually good market for scrap fishing would keep many fishermen active for some time longer, thus again reducing the number available for customary winter activities.

Mining.—The coal miners in the Courtenay area and in the vicinity of Nanaimo and Vancouver had resumed operations after the three-week wage strike. The mines at Telkwa, in the Prince Rupert area, and the Merritt Coal Fields, which had not been affected by the strike, were continually short of labour. In the base

metal industry, the tungsten mine at Hazelton had closed down and the men transferred to other operations. The freezing order had enabled the mercury mines at Takla Landing and Pinchi Lake to maintain full crews, but the copper mine at Granby was running at approximately 60 per cent production, with a big demand for underground workers, though surface crews were adequate. Here, as also at Kimberley, housing conditions were responsible to a considerable extent for the lack of labour: while there was an ample number of rooms for single men, houses for family men were very scarce. On the whole, however, considerable improvement in placements in the base metal mines was noted.

Manufacturing.—The manufacturing industry was also reaping the benefit of the freezing order. Vancouver reported that on the whole the labour situation in the aircraft plants was satisfactory, with even some layoffs of female operators in subsidiary industries, and no immediate prospect of re-employing these. The shipyard situation in general was also improving, though several hundred men were still in demand. A shortage existed in the skilled trades. Lumbering and its allied industries were still considerably understaffed, but the recruitment of fishermen and farmers to the shingle and sawmills had been of material aid. It was continuingly difficult to get men for the outlying sawmills because of transportation difficulties. While the pulp and paper mills were in an improved position, some 300 labourers had yet to be procured to fill the manpower quota.

Prince George's larger sawmills had completed their seasonal cut and closed down on the first of November. The crews had been readily absorbed into smaller mills or transferred to logging operations in the southern part of the province, but it was found difficult to persuade men from the large, well-equipped mills to take employment in smaller ones with inferior equipment and working conditions. The only large sawmill in the Prince Rupert district was also short of semi-skilled and unskilled labour, and the small mills were getting along as well as possible with local labour and Indians. On the whole sawmills in the Duncan area were fairly well supplied with skilled labour, but there was an acute shortage of unskilled, such as car loaders, lumber pilers, green chain workers, etc.

The shipyards at Nanaimo reported a shortage of electricians, pipe-fitters and shipwrights, none of whom were available locally. The Prince Rupert dry dock and shipyard, too, had been continually short of semi-skilled and unskilled labour for the past six months; 400 men at least were required. At Victoria, all

the local industries were operating full-time, with an over-all shortage of experienced men, although employers and labour unions were unanimous in asserting that the freezing order was having a stabilizing effect. The shipyards were making a steady demand for first-class artisans, without response: several hundred brought in on clearance had proved only comparatively satisfactory.

Construction.—Although some defence construction work was approaching completion, the requirements of the construction industry were still substantial on account of new contracts awarded on various defence projects. Some large contracts had been let for war-time housing to relieve the housing shortages in the centres of war industry, with a consequent urgent need of both skilled and unskilled workers. Prince Rupert's wartime construction was handicapped by the lack of building labourers and carpenters; a navy contract and wartime housing work were seri-

ously delayed, and the building of the R.C.A.F. hospital was also badly held up. Crews on the Prince Rupert-Cedarvale Highway would soon be laid off for the winter, but these men had been recruited from the Prairies and Ontario, and were entitled to free fare home; the possibility that they could be held for other work in the region was remote.

Transportation and Services.—Throughout the Dominion the shortage of labour for transportation continued. The detailing of soldiers for track maintenance had alleviated the situation somewhat in so far as the railways were concerned, and a decrease in water transportation was also an ameliorating factor, but railways and steamships alike could readily absorb a large number of workers. The service industries, too, were continuously handicapped by the lack of even inexperienced applicants, and there was every indication that this condition would continue so long as war industry made heavy demands on the manpower supply.

Applications for Employment; Vacancies and Placements; October, 1943

DURING the four-week period October 1, to October 28, 1943, reports received from Employment and Selective Service Offices showed a very slight decline in the average daily placements when compared with the previous period September 3, to September

30, and a negligible increase in comparison with the month of October 1942.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each 100 applica-

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications——— Vacancies - - - - - Placements—o—o—o—o—o—o

tions for work registered at the Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed downward courses, the ratio of vacancies to each 100 applications being 115.9 during the four weeks ending October 28, in contrast with 117.9 during the previous four weeks and 107.3 during the month of October, 1942. The ratio of placements to each 100 applications during the period under review was 73.7 compared with 75.2 for the four weeks September 3, to September 30, 1943 and 63.8 during October last year.

The average number of vacancies reported daily by employers to the offices throughout Canada during the four weeks October 1, to October 28, 1943, was 9,798 compared with 11,315 during the preceding four weeks and with 10,428 in October a year ago.

The average number of applications for employment received daily by the offices during the four weeks ending October 28, was 8,448, in comparison with 9,594 during the four weeks ending September 30, and with 9,716 during October a year ago.

The average number of placements made daily by the offices during the four weeks October 1 to October 28, 1943, was 6,227 of which 6,083 were in regular employment and 144 in work of one week's duration or less, as compared with a total daily average of 7,212 during the previous period ending September 30, 1943. Placements in October a year ago averaged 6,208 daily, consisting of 5,977 in regular and 231 in casual employment.

During the four weeks ending October 28, 1943, the offices referred 198,083 persons to employment and effected a total of 143,230 placements; of these, the placements in regular employment were 139,905 of which 81,176 were of males and 58,729 of females, while placements in casual work totalled 3,325. The number of vacancies reported by employers was 176,481 for males and 60,472 for females, a total of 236,953, while applications for work numbered 194,306, of which 107,406 were from males and 86,900 from females. Reports for the period September 3, to September 30, 1943, showed 260,224 positions available, 220,650 applications made and 165,885 placements effected, while in the month of October, 1942, there were recorded 271,118 vacancies, 252,595 applications for work and 161,385 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year, from January, 1933 to date:—

Year	PLACEMENTS

Unemployment in Trade Unions at the Close of October, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are without work on account of sickness, a strike, or a lockout, or who are engaged at work outside their own trades, are not considered as unemployed. As reports from unions making returns vary from month to month, with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Returns were tabulated for October from 2,377 local trade unions, having a total mem-

evidence. The Dominion unemployment percentage of .3, as shown in September and continued for the month under review is the lowest to appear in trade union compilations since the figures were collected first, for the quarter ending December 31, 1915 and accordingly, the employment level prevailing for these classes of workers remained the highest in the trade union records.

The unemployment percentages for the provinces are shown in Table 1. It will be seen that in October these ranged from .2 in Nova Scotia to .4 in New Brunswick, Quebec and British Columbia. In comparison with September, moderately better conditions were

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

bership of 478,705 persons, of whom 1,636, or a percentage of .3 were listed as without work; the unemployment indicated in this period being the result largely of temporary conditions. The percentage of .3 remained identical with that of the previous month, while the figure for October a year ago was .7. Although conditions on the whole, were unchanged, there were some fluctuations within the various trade groups. Very slightly higher employment levels were observed for union members in the mining and service divisions. These changes were sufficient to offset a very minor employment contraction for those in the building trades and in the transportation and communication industries; the latter includes both telegraph and telephone workers. Among union members in other main divisions, few changes were in

apparent in Saskatchewan, while in New Brunswick, Quebec, Ontario and Manitoba the situation remained unchanged; in Nova Scotia, Alberta and British Columbia, there were minor employment recessions. In comparison with conditions in October, a year ago, appreciable betterment was observed in Nova Scotia, New Brunswick, Quebec and Alberta, while in Ontario, Manitoba and Saskatchewan, likewise, there were employment increases, although to a lesser degree. On the other hand in British Columbia, there was a slight contraction in activity.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province with the exception of Prince Edward Island. At the close of October these figures ranged from full employment in Saint John to .8 per cent

of inactivity in Halifax. In comparison with the September situation minor gains in work afforded were observed in Saint John, Toronto and Regina, while in Winnipeg the percentage of those without employment remained unchanged. On the other hand, union members in Halifax, Montreal, Edmonton and Vancouver manifested slight employment recessions. In comparison with conditions in October 1942, Saint John members registered an appreciable betterment, while the situation in Edmonton showed improvement also, although to a lesser degree. Slightly higher employment levels were reflected in reports received from unions in Montreal, Toronto, Winnipeg, and Regina. On the other hand, a tendency towards reduced activity, on a small scale, was manifested in Halifax and Vancouver.

The accompanying chart illustrates the trend of unemployment from January, 1938, to date. The curve in October continued at the same level as in the preceding month, when the lowest point for the year to date was reached. In comparison with that attained in October, 1942, the level of the curve in October, 1943 was appreciably lower, thus denoting a moderate expansion in employment since that time.

For the manufacturing industries 870 returns were tabulated, having a combined membership of 286,434 persons of whom 478 or a percentage of .2 were listed as idle. This figure was identical with that of September; in October a year ago the percentage of those without work was .5. Although the group percentage remained at the same level as in the previous period, fluctuations occurred within the various trades. Among garment workers, papermakers, and union members in the printing and publishing group, employment levels were slightly higher, while among unclassified manufacturing workers, a group having a comparatively small membership, a minor improvement was indicated. No unemployment was observed at either date among workers in the vegetable products division, which includes soft drink workers, etc., cigar and tobacco workers and bakers and confectioners, while among electric current employees, textile and carpet, hat, cap and glove, rubber, clay, glass and stone, mineral products and chemical workers, likewise, little or no unemployment was noted. For union members in the iron and steel trades and among non-ferrous metal workers, which group includes metal polishers, jewellery, aluminum and mine, mill and smelter workers, the percentages remained identical with those of September. On the other hand, a slight decline in activity was observed for members in the animal products group, in which are listed

butchers, meat and fish packers, leather and fur workers. In comparison with the situation in October a year ago, moderately higher employment levels were in evidence among papermakers and for union members in the printing and publishing trades. Among the smaller organizations, chemical and unclassified manufacturing workers recorded substantial betterment. In the iron and steel division the percentage remained unchanged; full employment was apparent at both dates among electric current employees, etc., textile and carpet, rubber and mineral products workers.

Returns were tabulated from 56 unions of coal miners, having a total membership of 20,362 persons. As in September, none of these members were listed as without work, while in October a year ago, the unemployment percentage was .5. In comparison with conditions at that period, members in New Brunswick and British Columbia were fully engaged at both dates, while in Nova Scotia and Alberta there were slight advances to full employment.

Reports were received covering 1,701 members in the metallic ores group and 3,923 workers in the non-metallic minerals division.

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

No unemployment was in evidence in either of these occupations, which was the case for September, also, for those in the non-metallic minerals group, while among employees in the metallic ores division, the percentage in the previous month was .3. Among non-metallic mineral workers, 2.7 per cent was listed as unemployed in October, a year ago, while there were no reports tabulated for workers in the metallic ores group.

Unions in the building and construction trades returned 206 reports, showing a combined membership of 35,340 persons, of whom 412, or a percentage of 1.2, were idle, in comparison with a percentage of 1.0 in September and 2.2 in October, 1942. In comparison with the situation in the previous month, slightly more work was available for unclassified building workers, while for plumbers and steam-fitters conditions remained unchanged. Full employment at both dates was reflected in reports received from bridge and structural iron workers, painters, decorators and paper-hangers and wood, wire and metal lathers. On the other hand, slightly less work was available for steam shovel men, bricklayers, masons and plasterers, electrical workers, granite and stone cutters, and carpenters and joiners. In comparison with conditions in October, 1942, unclassified building workers recorded a moderate employment expansion, while the level of available work which prevailed for carpenters and joiners, was appreciably higher also. On the other hand, minor employment declines were in evidence for steam shovel men.

In the transportation industries, 908 reports were tabulated, having a total membership of 87,346 persons, of whom 440, or a percentage of .5 were unemployed, as compared with percentages of .4 in September and .8 in October, 1942. The percentages among steam railway and street and electric railway employees remained unchanged, while among navigation workers there was a slight decrease

in available work; a very minor contraction was noted for teamsters and chauffeurs, etc. In comparison with the situation at the close of October, a year ago, a slightly higher employment level prevailed for steam railway employees, while among the comparatively small membership of navigation workers, a moderate improvement was recorded. Very slightly better conditions were noted for street and electric railway employees, while among teamsters and chauffeurs, etc., the situation remained unchanged.

As in September, union members in the retail and wholesale trades continued to be reported as fully employed; this was the case also in October, 1942. In the services group, which includes such occupations as hotel and restaurant employees, theatre and stage employees, barbers, stationary engineers and firemen and unclassified workers, the situation, on the whole, was slightly better although, as will be seen in Table II, very little unemployment was indicated by returns received for these members. On the other hand there was a minor recession in activity, when comparison was made with conditions in October, a year ago.

Reports were received from unions of fishermen and lumber workers and loggers covering total memberships of 269 and 5,324, respectively. In October, as in the preceding period and in October, a year ago, no unemployment was apparent among lumber workers and loggers, while employment contracted moderately for fishermen, in both comparisons.

Table I shows by provinces the average percentage of union members who were unemployed each year from 1932 to 1942, inclusive, and also, the percentage of unemployment for October of each year, from 1932 to 1941 inclusive, and from October 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in Table I.

Conventions of Labour Organizations

DURING the autumn conventions were held by three of the great labour organizations of the English-speaking world. The British Trades Union Congress convened at Southport, England, in September; the American Federation of Labor assembled at Boston, Massachusetts in October; and the Congress

of Industrial Organizations at Philadelphia, Pennsylvania, in November. The deliberations of the three bodies were in large measure centred in wartime activities and the social structure that would be created after the war. Summaries of the proceedings of all three conventions are given in the following pages.

British Trades Union Congress

Trade Unions and the War, General Theme of Annual Session at Southport, England

THE seventy-fifth annual convention of the British Trades Union Congress was held at Southport, England, September 6 to 9, 1943. There were 760 delegates in attendance, representing 230 organizations, having an approximate total membership of 6,024,000, including 1,219,500 women. This total was an increase of about 592,000 over the total membership represented at the annual convention in 1942. For the first time, the President of the Congress was a woman, Dame Anne Loughlin, D.B.E., Chairman of the General Council.

Address by Congress President

In her presidential address, Dame Loughlin stated: "Congress stands pledged, and that pledge we renew, to prosecute the war to a victorious conclusion; to execute justice on those who were responsible for the war and the atrocities that have been committed, particularly against helpless civilian populations during the war; and we also pledge ourselves to the winning of the peace by the adoption of every necessary measure of relief and rehabilitation and the establishment of conditions of political and economic security...."

She further asserted that: "Through co-operation and collective effort we have surmounted the great task which confronted our nation when the war began ... machinery of regulations and control ... is working, on the whole, to produce conditions of social justice, equality and well-being."

Mr. Bevin's Speech

The Congress was addressed on the second day of its convention by the Right Honourable Ernest Bevin, Minister of Labour and National

Service. He referred to the special assistance he had received from particular unions in circumstances of emergency. He hoped that one result of war conditions would be the development in the trade union movement of willingness to accept greater responsibility and at times, a little more discipline. He asserted that he had tried to vindicate the principle of self-government in industry and, if there was to be a development of collective ownership, he suggested that this principle be maintained. Mr. Bevin recommended that every new agreement the trade unions made should be based on the assumption that the school-leaving age would be raised and continued education provided.

Speaking of future developments, he said that Russia, the United States and Great Britain would loom large in the shaping and maintenance of peace, but that he, personally "would never be a party to any device that was going to crush the culture and the fair opportunity of smaller nations." "We want", he said, "... to develop the United Nations into a World Order."

Report of General Council

The General Council in its report dealt with many problems that served to illustrate an expansion of activity and influence since the outbreak of war. One evidence of this was the very considerable attention given to details of the work of Government departments in the prosecution of the war. Then too, it was noticeable, from a long term point of view, the steps that were taken "to enable the Trade Union Congress to give regular and continuous examination to problems of post-war reconstruction". This was a logical result of the

principle enunciated by the General Council at the Blackpool Congress in 1942, which declared that "the trade union movement should be associated with the bodies responsible for detailed planning of post-war policy".

"The Trade Union Congress", it was reported, "is already represented on a number of bodies appointed to deal specifically with reconstruction matters, including the Labour Party's Central Committee on Reconstruction Problems, the Advisory Panel on Domestic Reconstruction ... the Consultative Panel of the Ministry of Works and Buildings" and a number of other committees in regular contact with Government departments that deal with particular aspects of post-war reconstruction.

Then too, it was asserted that "the General Council took the initiative in conjunction with the Federation of British Industries and the British Employers' Federation in securing the establishment of a Reconstruction Joint Advisory Council" which provided a medium for a mutual exchange of views on important phases of policy between representatives of industry and labour and the respective administrative departments of government.

It was pointed out that "certain features of this post-war transitional period cannot as yet be clearly foreseen. It can only be said at this stage ... that its length is likely to be prolonged ... The main task in the transitional period" in the General Council's view "will be the transfer of resources no longer needed for the production of war materials to the production of the requirements of peace". During this process of transfer, it was claimed, "the country would face comparative shortages of materials, capital equipment, consumer goods and to some extent of man-power". Hence, the Council claimed, it was essential that the change over from a wartime to a peacetime economy should be as speedy as possible, and that shortages, dislocations and uneconomic distribution be avoided as much as possible.

It will be quite impossible to achieve these purposes, the Council's report stated, "unless there is maintained in the transitional period, and for as long as circumstances require, measures of public control over prices, production, distribution and consumption at least equal in effectiveness to those established and maintained during the war itself".

Congress Resolutions

The War Situation:—A resolution moved on behalf of the General Council expressed a tribute to all the men and women engaged in the war effort in all of the United Nations. It urged the establishment of additional fronts

in Europe wherever there were good prospects of successful attack and claimed for the Congress a voice in the terms of peace.

World Conference of Organized Workers:—The Congress requested its General Council to "give immediate attention to the possibility of convoking a world conference of organized workers, as soon as war conditions permit, with the object of considering the most pressing problems of policy and organization affecting the interests of working people and thereby to promote the widest possible unity in aim and action of the international trade union movement."

Post War Reconstruction:—The Congress authorized the General Council "to prepare and circulate with the aid, if necessary, of a special levy on the affiliated unions, a general plan for the post-war reconstruction of the industries of the country." The resolution stipulated further, that the plan should have specific regard, among other things, "to the maintenance of full employment and to the place and responsibility of trade unions and the Trade Union Congress in such a plan."

Amendment to Disputes and Trade Union Act, 1927:—The General Council was commended by the Congress for continuing to urge that the *Disputes and Trade Union Act, 1927*, Sections 5 and 6* be amended and reproached the Government for its failure to accept the appeal of the Trades Union Congress in this matter. The Congress was urged to press for the repeal of the whole Act.

Essential Work Orders:—A resolution was carried demanding the amendment of the Essential Work Orders in certain respects so as to introduce further safeguards for the interests of workers in scheduled undertakings. In particular, the General Council was asked to press that decisions of Appeal Boards should be communicated to the parties concerned and be binding on all parties—worker, employer and National Service Officer.

In another resolution the Congress asked the General Council to consider further the proposal of the 1942 Congress for legislation to provide that "in any undertaking where a substantial proportion of the workers are members of a bona fide trade union, appropriate machinery shall be set up for settling disputes by means of trade union negotiation."

*Section 5 prohibits established civil servants from being members of any organization whose primary object is to effect changes in remuneration or the conditions of employment of its members. It penalizes individual civil servants who join such organizations by disqualifying them as offenders from being members of the Civil Service.

Section 6, among other things, makes it unlawful for any local or public authority making it a condition of employment that the worker shall, or shall not, be a member of a trade union. (L.G., 1927, p. 944.)

The Problem of India:—Two resolutions urged the Government to resume free and friendly discussions with representatives of the people of India with a view to reaching a satisfactory settlement of the questions in dispute as soon as possible.

Post-War Germany:—The atrocities carried out by the Nazis in the occupied countries of Europe were condemned by the Congress. It was agreed that it would be the first duty of the international trade union movement after the war to see that the trade unions in the occupied countries, and in enemy countries as well, were restored to their "full freedom and independence."

The Beveridge Report:—The resolution adopted on the Beveridge report stated that "the Congress deplored the hesitating attitude shown by the Government towards the implementation of the report" and demanded that legislation should be prepared immediately to give effect to the principles of the report with the least possible delay.

Other Discussions and Resolutions:—A number of questions of a domestic nature were discussed, following which the General Council was requested to investigate the matter of overlapping and competition between trade unions and to suggest to Congress possible desirable amalgamations to provide for greater trade union efficiency.

It was suggested further that consideration be given to setting up trade union machinery in commercial, industrial or other undertakings in which a substantial portion of the employees were members of bona fide trade unions.

It was also decided to rescind the action taken by the Congress in 1934 in which members of the communist party were debarred as delegates to bodies controlled by the Trades Union Congress.

Mr. Ebby Edwards, General Secretary of the Mine Workers' Federation of Great Britain was elected President of the Trades Union Congress for the ensuing year.

Convention of the American Federation of Labor

Report of Sixty-third Annual Meeting Held at Boston, Massachusetts

THE American Federation of Labor held its sixty-third annual convention in Boston, Massachusetts, October 4 to 14, 1943. More than 500 delegates were in attendance, representing 5,939,021 workers, a gain of 456,440 in the last year; the largest membership being that of the International Brotherhood of Teamsters, 602,900, and the United Brotherhood of Carpenters next, with 600,000 members.

Report of Executive Council.—The Executive Council in its report advocated international machinery to eliminate the causes of war and to "mould a world-will for peace." It expressed the hope that procedures of consultation and co-operation already developed by the United Nations could be made permanent and broadened in practice to cover needs and interdependent responsibilities of democratic peoples.

The council emphasized that the AFL had stood solidly behind President Roosevelt and his responsible assistants for the winning of the war and disclosed, for the first time, its reasons for refusing to agree to expansion of the Anglo-American Trade Union committee to include the Soviet Trade Unions or the Congress of Industrial Organizations and the unaffiliated railway brotherhoods. It declared that, while it was aware of the contribution

made by Russia in defeating the Axis, it was unwilling to recognize the Soviet Trade Unions as other than Government agencies.

On the domestic aspect of post-war problems the Council declared that labour would not tolerate mass unemployment, or a revival of a public works program at relief rates. It declared its objective "as the negotiation of wages for the 40-hour week equivalent to those earned now under the longer wartime work-week which includes overtime pay."

The report stated that more than 1,000,000 members of the AFL were in the armed forces and that the Federation had more than fulfilled its pledge to purchase \$1,000,000,000 in war bonds this year.

Presidential Address.—In his keynote address, President Green pointed out that War Production Board officials had announced that more than 85 per cent of war materials was being produced by union labour. He quoted reports of the National Safety Council to show that casualties in civilian industry since Pearl Harbour were much greater than in the armed forces. He emphatically opposed a national compulsory service act, favoured labour representation at the peace table where, he said, it would "insist that the peoples of the world shall be made free—free from Prussian militarism, free from fascism and free from Japanese savagery. This war has taught us," he

continued, "that America cannot isolate herself from the rest of the world. As a nation we face a new era of international relations when the war ends."

President Roosevelt's Message.—In a message to the convention, President Roosevelt strongly commended the part that labour had played in the national war effort and asked for its continued help "in all aspects of the war effort and in the effort to stabilize the domestic economy. We anticipate a good deal of success in the roll-back of prices which will stabilize and reduce the cost of living in essentials," the message added. The President referred appreciatively to "the co-operation of labour in a no-strike policy and in the stabilization of wages to steady our economy."

Addresses by Government Labour Officials.—Miss Frances Perkins, Secretary of Labor for the United States, in addressing the convention said that "labour's no-strike pledge and management's no lock-out pledge have been kept at a rate of better than 99 per cent. Both the AFL and CIO," she declared, "have co-operated with the War Labour Board and the conciliation service of the Department of Labour in bringing about settlement of differences. However when men are fighting and suffering and dying that we may have peace and well-being, and when there exists, as at present, fair and proper machinery for settlement of disputes, no strike is justified. Blame for work stoppages of the very few," she said, "was sometimes visited on the whole labour movement."

The Chairman of the Federal Social Security Board at Washington, Arthur J. Altmeyer, urged the need of a federal unemployment insurance system. He attacked the operation of "so-called employer experience-rating laws" and asserted that "there was no statistical evidence to prove that employer experience-rating had resulted in any general stabilization of employment." He asserted that the merit-rating system carried with it a strong inducement for every employer to contest every claim for benefits.

Mr. Paul V. McNutt, chairman of the War Manpower Commission at Washington, in his address to the convention offered the following six-point program of "things that have to be done" to improve the man-power situation:

- "(1) Workers must stay on their jobs. Turn-over has not been solved.
- "(2) Employment in war production must be increased and employment in less essential activities must be cut.....
- "(3) Production per worker needs to go up. (Efficient labour) utilization must become an action program in every plant.

"(4) We are not getting and holding the people we need in the hot, stuffy, unglamorous, disagreeable and relatively less paid jobs.

"(5) We are not getting enough women workers. The ones we get quit too often.

"(6) Withholding of contracts from tight labour areas needs to be accepted and understood."

Labour-management teamwork and incentive programs were discussed by Mr. J. D. Keenan, Vice Chairman for labour production of the War Production Board. He called upon industry to "give labour proper credit for what it had accomplished and to take a no-squawk pledge and observe it as faithfully as labour has respected the no-strike pledge." He deprecated the conscription of labour, at least until "every other course, such as labour-management co-operation was tried." He pointed to the "magnificent labour-management team work in Britain" as an illustration of the benefit to be derived from such co-operative organization.

Mr. Keenan's formula for increasing war production called for the use of suitable plant-wide incentive programs, "as an emergency measure". However, the convention opposed the use of "incentive plans" lest they should be merely "speed-up schemes".

Fraternal Delegates.—Mr. Harrison, who represented the British National Union of General and Municipal Workers, William Bayliss of the British Mine Workers Federation and Joseph Matte of the Canadian Trades and Labour Congress address the convention as fraternal delegates.

One of the most tense sessions of the convention occurred when W. H. Atherton, commander of the American Legion, in the course of his address said:

"If it is treason for the man at the front to refuse to use his gun, then too, it should be treason for any person fortunate enough to be here on the home front to do the things that keep him from getting that gun." Mr. Atherton stated that there had been "a great loss in production from 1,855 strikes affecting 1,900,000 men since January 1," and mentioned the loss of coal and steel production in particular. "These interruptions gave labour a black eye," he asserted.

President Green, in his reply pointed out that President Roosevelt had praised labour for the manner in which it had adhered to the "no strike pledge". He quoted Mr. Roosevelt as saying "men, you have kept that pledge 99.9 per cent." "I maintain", Mr. Green continued, "that it is an amazing record made good in an imperfect world." He claimed that

delays in adjudicating disputes made employees restive and made it very difficult for the Federation to convince members in some places, of the necessity of observing the no-strike pledge.

Manpower Problems.—The labour requirements of essential industries and the estimated national labour force required up to January 1944 was reported upon by the Executive Council. At that time it is expected that the nation will reach the peak of its industrial effort with a total of approximately 65,900,000 workers.

The organization of "representative management-labour committees by districts and areas with the machinery to appeal to the highest authority" was approved. It was held that the key to manpower is the consent of the individuals, while the key to production is co-operation. On the recommendation of the executive council the Convention urged "that the maintenance of voluntary decentralized administrative machinery and that study be given to improving this kind of machinery rather than compulsory methods or a National Service Act."

The executive council attributed labour turnover to: (1) lack of adequate housing and transportation, (2) stabilization of wages within industries (3) inadequate shopping facilities and services to sustain community needs (4) fatigue caused by long hours (5) inadequate medical services and schools (6) separation of families, etc. It was urged that the "U.S. Employment Service should welcome trade union co-operation" in correcting these deficiencies.

The problems arising from the importation of workers and the employment of prisoners of war were discussed and approval given to the suggestion that safeguards be created to prevent the exploitation of foreign workers and that prisoners of war be treated strictly in accordance with the Geneva Convention, and that they should not be employed on vital war projects.

Social Security

The convention went on record to do all it could to have the United States Social Security Act amended to provide "retirement pay from the Federal Government to qualified persons" beginning at age 60 instead of at age 65, as provided in the present Act and also to "provide benefits equal to the American standard of living."

Accident Prevention

A resolution was endorsed requiring that "no effort or expense shall be spared in the promotion of accident and fire prevention, until

deaths and injuries occurring in homes, traffic, public and industrial accidents shall be reduced to the point of elimination" and that the Federation employ competent safety engineering and consultant services to assist in the formulation and direction of the Federation's safety program.

Returned Service Men

The convention stressed the need of the appointment of a Federal Committee "composed of equal representation of labour, management and the Congress of the United States" to study a program for the rehabilitation of returning service men, during the post-war period.

Price Ceilings

A resolution enjoined the OPA to obtain an adequate staff so that it could enforce ceiling commodity prices effectively and abolish black markets.

Little Steel Formula

The abolition of the "Little Steel Formula" was demanded and the NWLB be required to approve negotiated increases in wages agreed upon between labour unions and employers. As an alternative it was urged that the 15 per cent increase in basic wages permitted under the formula be increased to 25 per cent.

International Labour

Reorganization of the International Federation of Trade Unions was suggested to supplement the activities of the ILO. The latter was urged to call an international meeting "at the earliest possible moment".

Compulsory Service

Strong opposition was voiced in a resolution dealing with what was termed "the twin evils of compulsory control of labour (through 'directives') and government through discretionary authority".

NLRB Criticized

The National Labour Relations Board was criticized in a resolution, and the executive council was urged to continue its efforts to defend trade union rights before the Board and to study possible amendments to the Labour Act.

Re-Admission of UMW

Following a lengthy debate, the convention adopted a committee report vesting full auth-

ority in the executive council to arrange for the re-admission of the United Mine Workers to the American Federation of Labor. It was also agreed to continue the AFL unity committee, "so that no effort to establish unity with the CIO may be overlooked". The International Association of Machinists which had withdrawn from the AFL in May, 1943, was also readmitted.

Other Resolutions Adopted

Action was also taken by the delegates in passing the following among other resolutions.

That the Executive Council of AFL select a commission of nine members, to make enquiry into the problem of jurisdictional disputes between unions and to prepare a complete report to be presented at the next annual meeting of the Federation.

That the membership of the Federation organize an "emergency campaign of political

activity" to prevent the Smith-Connally Bill "from hamstringing American labour".

That the trade union fellowships provided at Harvard University be commended and that affiliated bodies be urged to establish similar programs whenever and wherever practicable.

That the members of the Federation study carefully the school systems in their several States and communities with a view to securing competent education for every child and to make sure that the salaries paid to teachers are adequate.

That the Federation's committee on education make a study of part time work for high school students, subject to the general standards of the Federal Departments of Labour and Education.

At the concluding session President William Green, Secretary-Treasurer, George Meany, and the entire executive council were re-elected for the ensuing year. The Federation will hold its next annual convention in New Orleans, Louisiana, in November, 1944.

Congress of Industrial Organizations

Report of Sixth Constitutional Convention, Held at Philadelphia, November 1-5, 1943

THE sixth Constitutional Convention of the Congress of Industrial Organizations was held in the city of Philadelphia, Pennsylvania, November 1 to 5, 1943. There were 518 duly accredited delegates in attendance, representing a dues-paying membership asserted by the President to be 5,285,000 not including 1,150,000 in the armed forces, who are exempt from dues while they are on active service. The Canadian Congress of Labour was represented by A. R. Mosher, Alex. McAuslane and Pat Conroy, its President, Vice-President and Secretary-Treasurer respectively.

Presidential Report

In his annual report, President Philip Murray declared that the CIO had "religiously maintained our no-strike pledge", a pledge that had been given "without any qualification or conditions". He stressed the importance of each member and each leader of organized labour discharging "with scrupulous care this solemn obligation" to avoid and prevent strikes. "Labour's prime interest is to stop wars", he said, and "if any contribution can be made in the field of international labour collaboration toward the attainment of this objective then the effort will be worth while".

Referring to the problem of manpower, President Murray declared that the CIO "has been opposed and will continue to oppose the enactment of any National Service legislation". He continued, "apart from the evils inherent in the attempt to resort to compul-

sory labour, the approach embodied in the national service legislation is ineffectual and actually contains dangers of further complicating rather than aiding our manpower situation". He declared that "inadequate housing and transportation were the cause of much wasteful labour turnover and loss of man hours". He urged the establishment of facilities for the care of children to enable more women to assist in wartime production, the discontinuance of provocative and unfair practices against negro workers and the prevention of labour hoarding. He emphasized "the vital necessity for bringing labour and management into closer relationship."

Speaking of the functions of the National War Labour Board, he stated that the Board "should give heed to the needs of basic and mass production industries . . . so that wage adjustments could be made within such industries on the basis of equal pay for like work". Continuing, he said that, "the CIO will oppose any attempt by any government agency to impose a national wage incentive system. This problem must be solved through collective bargaining in specific cases between the union and the employer effected", he declared.

Growth of CIO in Canada: The President stated that the CIO is showing remarkable growth. The Canadian Congress of Labour, which he defined as an instrument comprising CIO unions and Canadian national unions, represents a membership in excess of 200,000. The membership in Canada has doubled within the last year and there are "splendid oppor-

tunities for further growth", the President asserted.

Social Security after the War: "The burden of post-war readjustments must not be permitted to fall too heavily on any family," he continued. "The millions of soldiers and war workers must be provided jobs, but if efforts to that end fail they must be assured an adequate income," Mr. Murray asserted. He discussed legislation that would provide health insurance and make available to everyone "the wonders of modern medicine". The need for a federal system of unemployment insurance was emphasized to cope efficiently with the nation-wide character of the employment problem and the migration of workers across state lines.

"Prosperity today comes only by planning. Foresight, boldness and initiative are needed as much in peace as in war. Planning must start now. . . . The nation must work unitedly for peace and for war." The President urged that "unity of American labour is essential to victory." He discussed in some detail the attempts that had been made to compose jurisdictional differences between the CIO and the AFL and referred to the influences which, he said, sought to keep the two organizations apart and thus weaken the nations' war effort. He referred also to the advantages to be derived from the unity of labour from an international standpoint and outlined the differences existing between the CIO and the British Trades Union Congress. He urged that steps be taken at once to arrange a conference with the leaders of the labour movement in Great Britain, the Soviet Union and the Latin-American countries "to weld the unity of labour, the government and the people of the United Nations . . . and to assure the establishment of the four freedoms in the peace".

Several hundred resolutions were submitted to the Committee on Resolutions. These were consolidated by the committee for presentation to the convention. In all, 43 such resolutions were duly presented to the convention.

Resolution on Canadian Workers

The following resolution with respect to the "rights of workers in Canada" was passed unanimously.

"Whereas, (1) There is no effective federal legislation in Canada guaranteeing the right of workers to bargain collectively and to protect them against discrimination for union activity.

"(2) Extension of organization among Canadian workers is imperative to create industrial harmony for a maximum war effort, to maintain and strengthen democratic institutions in Canada and to safeguard the gains made by labour throughout the American continent. Now, therefore, be it

"Resolved: That the CIO endorses and pledges support wherever possible to the efforts of the Canadian labour movement:

- (1) to secure adequate representation on governmental boards and agencies;
- (2) to mobilize its political strength in the interests of the Canadian people;
- (3) to raise Canadian wage rates nearer to the United States level; and
- (4) to induce the government of Canada to enact legislation which will protect the right to organize and bargain collectively and outlaw company unions".

No-strike Pledge

The convention by unanimous rising vote reaffirmed "its solemn pledge without any qualifications or conditions that for the duration of the war there must not be any strike or stoppage of work. Each member and each leader of organized labour must make it his responsibility to discharge with scrupulous care this sacred obligation. Any leader of organized labour who deliberately flouts this obligation and any employer who seeks to provoke or exploit labour are playing into the hands of the enemies of our nation".

This resolution further declared that "for the duration of the war, issues in dispute between labour and management must be adjusted through the peaceful means of collective bargaining, mediation, or through disposition by the National War Labour Board", and asserted that "organized labour has the task of mobilizing the people on the legislative and political fronts behind a win-the-war program designed to meet the basic economic problems arising out of the war and to protect the interests of the common people".

Political Action

Approval was given the Executive Board of the CIO in formulating a program of political action. Attempts to organize labour as a third political party were to be discouraged. The primary task of labour in the political field today, it was asserted, "is to weld the unity of all workers, farmers and other progressives behind candidates, regardless of party affiliations, who are committed to our policy of total victory, and who support the measures necessary to achieve it and to lay the basis for a secure, peaceful, decent and abundant post-war world."

Labour Unity

The convention reaffirmed the policy of the CIO in seeking to intensify labour unity "in support of a win-the-war program, embracing such vital issues as total war mobilization, economic stabilization, manpower, anti-labour legislation and political action".

Racial Discrimination

Following a lengthy debate, the convention reiterated the firm opposition of the CIO to any form of racial or religious discrimination and renewed its pledge "to carry on the fight

for protection in law and in fact of the rights of any racial or religious minority group to participate fully in our social and political life".

Rescue of Jews

A report of a Committee that had considered the problem of persecuted Jews was given unanimous endorsement. The report considered the position of the Jews in most portions of the world and pledged the CIO to extend "its full support to the Jewish people in their battle for equal rights" and "to do everything in its power to help put an end to the un-American plague of anti-semitism".

U.S. Foreign Policy

Following a lengthy debate on American foreign relations, the convention went on record as condemning individuals or trends that would create disunity among the allied nations; reaffirmed the purposes of the world fight for freedom; urged President Roosevelt to intervene with a view to obtaining the release of imprisoned political leaders in India; and called upon the State Department to appoint labour attaches to American Ambassadors to foreign countries.

Oriental Exclusion

Concerning the exclusion of Orientals from the United States, the CIO reaffirmed its position, "heretofore taken before Congress and urges Congress to enact legislation repealing the Oriental Exclusion Act as it affects our Allies and eliminating all racial bars to citizenship".

Manpower

In the preamble of the resolution on manpower it was stated that "the manpower problem has not been due to any basic shortage of available manpower" but rather "from a failure to attend to such problems as . . . a central planned administration and control of all factors necessary for full production," . . . lack of adequate housing, child care, transportation, etc., the failure of employers to undertake up-grading programs, prejudice and discrimination against negro workers; failure to use more effectively, millions of "white collar workers" and the enactment of National Service legislation.

The convention in the resolution declared its opposition to any National Service legislation and urged that the office of War Mobilization should perfect plans for the unified direction on a national level of all factors including available manpower. To do this "there must be effective labour representation . . . in the office of War Mobilization". Further, employers must be required to utilize

fully and efficiently, negroes, aliens and women workers. The War Manpower Commission was called upon to avoid interference with the development of area employment stabilization programs which are administered by joint labour-management committees and which should incorporate provisions for protecting the seniority rights of transferred workers.

Other Resolutions Adopted

Action was also taken by the delegates in passing the following among other resolutions:

That an "unremitting struggle" be carried on against state legislation designed to weaken labour unions.

That support be given to governmental forces aimed at controlling the prices of cost-of-living commodities and where necessary providing subsidies to protect the farmer and small business-man.

That efforts be continued to extend co-operation and better understanding with the CIO unions of Latin America.

That the President of the CIO be authorized to approach the AFL Railroad Brotherhoods and labour movements in other countries with a view to summoning an international trade union conference of labour representatives from the United Nations.

That the appropriate federal agencies be urged to prepare demobilization plans immediately, so that full post-war employment might be achieved and the seniority and other rights of ex-service men might be safeguarded.

That child-care programs be further developed and that federal funds be made available for the care of infants with a view to increasing the available supply of women workers and checking juvenile delinquency.

That the responsible governmental authority be urged to issue necessary directives to make sure that adequate nourishing food be provided to workers on midshifts in American industrial plants.

That the remainder of the federal appropriation for wartime housing made available early in 1943 be applied immediately and that the appropriation for the fiscal year 1943-1944, be increased by 300 million dollars.

That the CIO commend the OPA for rigidly controlling rentals and that it condemn attempts to break down or relax the program.

That the National War Labour Board of the United States be commended for its work in the field of industrial relations and urging that its services be made available in all labour disputes.

That the National war effort be strengthened by the inclusion of direct and effective labour representation in the formation and administration of policies in all agencies of the government.

That, as a result of "Congressional failure to stabilize the entire national economy" through adequate price control and other measures, the "Little Steel" formula be abolished, and unions allowed to secure wage increases through collective bargaining to maintain health, morale and efficiency.

President Philip Murray and Secretary-Treasurer James B. Carey were unanimously re-elected to their respective offices for the ensuing year.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

Pensions—Housing—Seamen—Stationary Engineers in Alberta—Hours in Alberta and British Columbia—Minimum Wages in Alberta, British Columbia and Quebec—Saskatchewan Health Regulations

THE wartime increase in old age and blind pensions has been extended to pensioners in the Northwest Territories. To relieve the housing shortage in Vancouver and Victoria, the Minister of Finance has been authorized to acquire additional houses for conversion into apartments. Owners of foreign ships employing Canadian seamen are now required to guarantee the costs of repatriating such seamen. The Minister of National Revenue has been empowered to refund taxes deducted at the source to non-taxable persons without application being made by the person concerned.

In the provincial field, Alberta has relaxed its regulations regarding the issue of temporary certificates to stationary engineers to overcome a scarcity of qualified engineers. It

has also rescinded the minimum wage order governing the logging industry, and again passed the annual orders exempting certain classes of workers in lumber camps from the maximum hours and weekly rest-day provisions of the Hours of Work Act. British Columbia has issued its usual Christmas season orders authorizing overtime in shops and fixing rates for temporary employees and for overtime hours. Quebec has made a new minimum wage Order governing hospitals and charitable institutions, revised the Order applying to the wholesale food trade in Quebec City and district and renewed a number of other orders. Regulations under the Saskatchewan Public Health Act including those relating to camps have been re-issued.

Dominion

Old Age and Blind Pensions

The provisions of Order in Council P.C. 6367 (L.G., Sept., 1943, p. 1295) providing for a wartime increase not exceeding \$5 a month in old age and blind pensions have been extended to the Northwest Territories by P.C. 8341 passed October 28 under the War Measures Act. The Dominion Old Age Pensions Act provides that pension schemes may not be extended to the Northwest Territories until two of the adjacent provinces have adopted the scheme. This condition has been fulfilled by the provinces of British Columbia and Saskatchewan signing supplementary agreements with the Minister of Finance conforming to the draft agreement attached to P.C. 6367. Most of the other provinces have also signed similar agreements.

Housing

The Government's scheme for relieving the housing shortage in Vancouver and Victoria and contiguous municipalities by converting large dwellings into multiple housing units

has been expanded by two recent Orders in Council. The original Order in Council, P.C. 4579 (L.G., June, 1943, p. 859) authorized the Minister of Finance to lease 50 houses and incur a liability up to \$250,000. P.C. 7889 of October 12 provided for the leasing of additional dwellings and an additional liability of \$500,000. P.C. 8305 of October 26 authorized the leasing of 100 more buildings and a further liability of \$500,000.

The scheme has also been put into effect in Ottawa, Toronto, Windsor, Sarnia, Halifax, Moncton, Saint John, Edmonton, Calgary, Hamilton, St. Catharines, Brantford, Montreal and Quebec. (L.G., July, Sept., Oct., 1943, pp. 1031, 1295, 1418.)

Seamen

By P.C. 8592 passed November 9 under the War Measures Act, the owners of foreign ships employing Canadian seamen are now required to furnish the Department of Transport with a written guarantee that they will pay the repatriation costs of such seamen if the seamen are found in distress outside of Canada. The

Canada Shipping Act and the Distressed Seamen Regulations passed in 1937 under it stipulate that all Canadian seamen on ships of Canadian registry or on foreign ships who are left behind or otherwise discharged outside of Canada must be provided with return passage to a Canadian port, and with clothing, maintenance and hospital care if necessary until departure for such port, or in the case of death, with burial. A Canadian seaman for the purpose of these regulations is defined as "any seaman whether subject to His Majesty or not who has been domiciled in Canada for at least 12 months immediately before the commencement of the voyage". The arrangements for repatriation are made by the local official designated to act in this capacity at each port and the expense is borne by the Government of Canada which later recovers the amount from the shipowner. However, during the war the number of cases of distressed seamen has greatly increased and difficulty has been experienced in recovering the expenses of repatriation from foreign ship-owners.

The new regulations provide that any principal or agent who hires a Canadian seaman for a ship not of Canadian registry must submit in duplicate to the Customs Officer before clearance is issued a written undertaking to reimburse the Government of Canada for repatriation expenses. A Canadian seaman from a foreign ship who wishes to claim repatriation must make application to the designated local official within one month of his discharge from the ship. The Distressed Seamen Regulations permitted application within three months.

Income War Tax Act

Order in Council P.C. 121/8660 passed November 10 under the War Measures Act authorizes the Minister of National Revenue to make refunds of amounts deducted at the source for national defence or income taxes in cases where he ascertains that the taxpayer is not liable to pay the amounts which were withheld. The Act provided for refunds only after application had been made by the person concerned. (L.G., 1942, p. 923; Sept., 1943, p. 1294.)

Alberta Boilers Act

The Chief Inspector of Boilers in Alberta has been authorized by an Order in Council gazetted November 30 to take steps to overcome the shortage of properly certificated stationary engineers which is threatening to restrict the operation of some steam plants. The regulations governing engineers' and fire-

Other Orders in Council

A new Wartime Wages Control Order (P.C. 9384) was issued December 9. It replaces P.C. 5963 (L.G., 1941, p. 1368; 1942, p. 778) and is dealt with on p. 1602 of this issue.

A consolidation of the National Selective Service Civilian Regulations (L.G., Jan., 1943, p. 19) with amendments up to October 15, has been issued. Four recent amendments are summarized in the Manpower section of this issue p. 1614, P.C. 7763, October 7, authorizing the compulsory transfer of workers from one industry to another; P.C. 8309, October 26, defining nurses who are exempt from the regulations; P.C. 8561, November 6, providing for the payment of soldier coal miners during temporary lay-offs; P.C. 8746, November 13, authorizing a Selective Service Officer to require a worker to undergo a medical examination in certain cases. Compulsory Employment Order No. 7 was issued November 15 under the regulations.

Other labour supply measures also summarized in the Manpower section are P.C. 8197, October 22, authorizing the employment of members of the Canadian Army in lumbering and logging operations; P.C. 8217, October 26, providing for the employment of members of the Canadian Army of low medical category in railway work; P.C. 9041, November 30, amending the National Selective Service Mobilization Regulations (L.G., Jan., 1943, p. 153) to permit the calling up of men for custodial duties in penitentiaries.

P.C. 8021, October 14, prohibiting strikes and lockouts in coal mines for the duration of the war is dealt with in the Industrial Relations section, p. 1647.

P.C. 9600, December 14, revokes P.C. 8021, p. 1646.

P.C. 8020, October 14, appointing a Royal Commission to examine the wage rates of coal miners in Alberta and British Columbia and P.C. 8620, November 10, giving the Commission the powers of a Regional War Labour Board were referred to in the November LABOUR GAZETTE (pp. 1495, 1520). The General Order of the National War Labour Board, issued November 3, providing for an increase in cost of living bonuses also appeared in the November Gazette, p. 1458.

Provincial

men's certificates (L.G., 1942, p. 584) authorize the Minister charged with the administration of the Boilers Act to issue temporary certificates valid for three months in cases where the services of properly qualified engineers are not available. In no case, however, may a temporary certificate permit a person to operate an engine, boiler or steam plant exceeding

100 horse-power unless the person holds an engineer's certificate not less than one grade below the certificate required for the installation. The new regulations allow the Chief Boiler Inspector to waive this restriction on the issue of temporary certificates and to grant authority valid for 12 months to approved applicants to operate steam plants.

Alberta Hours of Work Act

The exemption of cooks, cookees, bull cooks, night watchmen and barn bosses employed in the lumbering, logging and railway tie industries from the provisions of the Hours of Work Act requiring a weekly rest day and limiting hours to nine a day and 54 a week (L.G., March, 1943, p. 391) has been extended to October 31, 1944, by Orders 28 and 28A gazetted November 15 and 30. The exemption now also applies to blacksmiths. It is restricted, as before, to operations more than 10 miles from a city or in towns or villages of less than 1,000 inhabitants.

Alberta Male Minimum Wage Act

Order 18 governing the logging industry (L.G., 1941, p. 1382) was rescinded by an Order in Council gazetted October 30. It applied to saw-mills, planing-mills, box factories, woodworking plants and logging and railway tie contractors, operating more than 10 miles from any city or in towns or villages of less than 1,000 inhabitants. The rescinding Order states that the logging industry is now paying wages equal to or above the minimum rates fixed in Order 8 which applies to all male workers covered by the Act except those specifically exempted from the Order. All the operations mentioned above were exempted from Order 8 when it was passed (L.G., 1939, p. 674). Order 8 fixes a minimum rate of 33½ cents an hour for all workers over 19 years of age paid by the week or a longer period, or on a commission or piece-work basis. Workers over 19 paid in any other manner must receive 40 cents an hour. Lower rates are set for employees under 19.

British Columbia Factories and Shops Acts

By proclamations gazetted December 2, Monday, December 27, has been declared a public holiday which must be observed by all factories and shops governed by the Factories Act and the Shops Regulation and Weekly Half-holiday Act.

British Columbia Hours of Work Act

The annual order permitting shop employees to work overtime during the Christmas rush

was gazetted December 2. It is identical with the order issued last year (L.G., Jan., 1943, p. 154.) Those employed in Vancouver, Victoria or their suburbs may work two hours in excess of the legal maximum of eight hours a day on the Saturday and Thursday before Christmas, and those employed elsewhere in the province are allowed three hours overtime, provided total hours for either group do not exceed 48 in the week ending December 19.

British Columbia Minimum Wage Acts

The annual supplementary orders governing payment for Christmas overtime permitted under the above Order and fixing rates for temporary help employed between December 2 and December 31 were also gazetted December 2. Order 24, Supplementary (1943) under the Female Minimum Wage Act is the same as the one issued last year (L.G., Jan., 1943, p. 154) except for the addition of a clause waiving for temporary employees the daily guaranteed wage of \$1.60 prescribed for all part-time employees who work four hours or less a day. The supplementary order stipulates that overtime must be paid at one and one-half times the regular rate and fixes minimum rates of \$12.75 a week for temporary workers whose week exceeds 40 hours, and 35 cents an hour for those with a shorter work-week. The same rates are prescribed in Order 24 (L.G., 1935, p. 634) for workers over 18.

Order 59, Supplementary (1943) under the Male Minimum Wage Act has the same provisions regarding the payment of overtime and the waiving of the daily guaranteed wage but fixes a single rate of 35 cents an hour for all temporary employees regardless of age or hours worked. Last year's Order (L.G., Jan., 1943, p. 154) stipulated that temporary employees were to be paid the rates fixed by Order 59 (L.G., 1938, p. 1235), which are 40 cents an hour for employees over 21 who work less than 37½ hours a week and \$15 a week for those with a longer work-week. Lower rates are set for employees under 21.

Quebec Minimum Wage Act

Hospitals and Charitable Institutions.—

Order 11, 1943, governing charitable institutions, hospitals and homes in Quebec was gazetted October 30 and is effective from that date. Hospital employees, not members of religious institutions and not working in Quebec, Levis or adjacent counties, were formerly governed by a minimum wage order passed in September, 1938, but it was repealed in January, 1939 (L.G., 1938, p. 1098; 1939, p. 397).

In 1941 a Provincial Commission of Inquiry was appointed to examine the position of

hospitals in Quebec. In its third report, issued in June, 1943, the Commission considered the conditions of work of hospital employees and recommended the fixing of minimum wages for this class of worker pending the conclusion of collective agreements between employers and workers' organizations in the industry. A draft minimum wage order was included in the report and it has now been made law.

Charitable institutions to which the Order applies include convalescent and rest homes, hospitals of all kinds, institutions for the insane, alcoholics and orphans, and any other public charitable institution recognized under the Quebec Public Charities Act. The Order does not apply to persons employed in doctors' offices, clinics or dispensaries connected with commercial and industrial establishments or established by charitable associations or with the assistance of municipalities. Employees exempt from the Order include members of the clergy or of a religious community, physicians, surgeons, dentists, pharmacists, students in these fields, student-nurses, patients and inmates.

The Order divides the province into four zones with different rates for each zone. Workers are classed in 18 categories and most categories are sub-divided into classes with different rates for each class. A specified percentage of the workers must be placed in each class, the number to be determined by use of the Tables of Percentages issued by the Minimum Wage Commission.

Zone 1 includes all municipalities entirely or partly situated on the Island of Montreal or within a five-mile radius of the Island. Zone 2 covers the cities of Hull and Quebec, the parishes of Notre-Dames-des-Anges and Sacré-Coeur-de-Jésus and all municipalities on the north shore of the St. Lawrence River which are entirely or partly included within a 10-mile radius of Quebec City. Zone 3 includes the cities of Chicoutimi, Granby, Joliette, Lévis, Salaberry-de-Valleyfield, Shawinigan Falls, Sherbrooke, Sorel, St. Hyacinthe, St. John's, Thetford-Mines, Trois-Rivières, and the town of Iberville. The rest of the province is placed in zone 4.

All workers not included in other categories are placed in category 1. The minimum rates for men in this category are \$14, \$13, \$12, \$11.50 a week depending on the zone. At least 80 per cent of the women must be paid \$13, \$13, \$12, or \$11 while 20 per cent may be paid a dollar less. Temporary male employees must receive 35 cents, 30 cents, 30 cents or 25 cents an hour in the four zones and temporary female employees, 26 cents, 24 cents, 24 cents or 22 cents.

There is no distinction between zones in the rates for graduate nurses (category 2), order-

lies (category 3) and guards in asylums (category 4). At least 60 per cent of the nurses must be paid \$23 a week, 25 per cent, \$21.50 and 15 per cent, \$20. For orderlies and male guards the rates are \$22 a week for 60 per cent, \$20.50 for 25 per cent and \$18.50 for 15 per cent. In the case of women guards, the same percentages are to receive \$18, \$16 and \$14 respectively. Temporary graduate nurses, orderlies and male guards must be paid \$4 a day and temporary female guards, \$3 a day.

Office workers, and assistant technicians in the laboratory, pharmacy, X-ray and dietary departments are assigned to category 5. Short-hand-typists and clerks with at least a year's experience must be paid \$16.50, \$15, \$14, or \$13.50 a week, according to the zone. The rates for other employees with a year's experience, are \$14, \$13, \$12 or \$11. For those with less than a year's experience, they are \$3 lower. Temporary employees must be paid \$3, \$2.75, \$2.50 or \$2.50 a day according to the zone.

Of the seamstresses (category 6), at least 70 per cent must receive \$16.50, \$16, \$15 or \$14 a week depending on the zone; 20 per cent must be paid \$15, \$14.50, \$13.50 or \$12.50; and 10 per cent, \$14, \$13.50, \$13 or \$12. The rates for temporary employees are \$3 a day in zones 1 and 2 and \$2.50 in zones 3 and 4.

Among laundry employees (category 7), the chief launderers must be paid, according to zone, weekly rates of \$27, \$27, \$23.50 or \$22. At least 70 per cent of the other male workers are to receive \$16 in zones 1 to 3 and \$14 in zone 4; 20 per cent may be paid \$2 less; and 10 per cent, \$4 less. Of the female employees at least 30 per cent must receive \$14, \$13, \$13 or \$12.50 depending on the zone; 40 per cent, \$13, \$12, \$12 or \$11; 20 per cent, \$11.50, \$10.50, \$10.50 or \$9; and 10 per cent, \$10, \$9, \$9, or \$8. The rates for temporary male employees are \$3 a day in zones 1 to 3 and \$2.50 in zone 4, and for temporary female employees they are \$2.50 in zones 1 and 2, \$2.25 in zone 3 and \$2 in zone 4.

Female domestics and helpers in the wards, linen-room, dining-room, and sewing room comprise categories 8 to 12. At least 80 per cent must be paid \$13, \$13, \$12 or \$11 according to the zone and 20 per cent a dollar less. Temporary employees are to receive 26 cents, 24 cents, 24 cents or 22 cents an hour.

Of the cooks (category 13), regular chief-cooks must be paid \$32, \$32, \$27 or \$25 a week depending on the zone, and temporary chief-cooks, \$6, \$6, \$5 or \$4.50 per day. Regular assistant chief-cooks and bakers are to receive \$27, \$27, \$23.50 or \$22 a week in the four zones, and temporary ones must be paid \$5, \$5, \$4.50 or \$4 a day. For regular cooks, the rates are \$16.50, \$16.50, \$14 or \$13.50 a

week and for temporary cooks, \$3 in zones 1 and 2 and \$2.50 in zones 3 and 4.

For regular motor-vehicle drivers (category 14), the rates are \$20, \$20, \$18 or \$16 a week according to zone and for temporary drivers, 40 cents, 40 cents, 35 cents or 30 cents an hour. Regular helpers are to receive \$14, \$13, \$12 or \$11.50 a week and temporary helpers, 35 cents, 30 cents, 30 cents or 25 cents an hour, depending on the zone.

Gardeners and their helpers, labourers and grounds maintenance men are included in category 15. The rates for regular gardeners are \$16.50, \$16.50, \$14 or \$13.50 a week in the four zones and for temporary gardeners \$3 in zones 1 and 2 and \$2.50 in zones 3 and 4. Gardeners' helpers, grounds maintenance men and labourers must be paid \$14, \$13, \$12 or \$11.50 a week according to zone. Temporary employees are to receive 35 cents, 30 cents, 30 cents or 25 cents an hour depending on the zone.

Cleaners, charwomen, elevator operators and watchmen (category 16) must be paid 35 cents, 30 cents, 30 cents or 25 cents an hour depending on the zone.

Maintenance men (category 17) who hold a certificate of qualification are to receive \$32.40, \$29.70, \$29.70 or \$25.92 depending on the zone, and unqualified workers must be paid \$24.30, \$21.60, \$21.60 or \$19.90. Temporary employees are to be paid 60 cents, 55 cents, 55 cents or 48 cents if qualified and 45 cents, 40 cents, 40 cents or 35 cents if unqualified.

Stationary enginemen and firemen comprise category 18. First-class chief enginemen are to be paid \$51 a week in all zones; second-class chief enginemen, \$42, \$40, \$40 or \$38 depending on the zone; third-class chief enginemen, \$36, \$34, \$34, or \$32. Second-class enginemen are to receive 66 cents, 63 cents, 63 cents or 60 cents an hour third-class enginemen, 55 cents, 53 cents, 53 cents or 50 cents; and fourth-class enginemen, 50 cents, 48 cents, 48 cents or 45 cents depending on the zone. Firemen must be paid 40 cents, 38 cents, 38 cents or 35 cents. Stationary enginemen and firemen, including those in territory to which Order 6 does not apply, are to be governed by all the provisions of Order 6 (L.G., July, 1943, p. 1034) except those relating to wages.

For most classes of workers covered by this Order the regular work-week is to be 54 hours. For nurses it is 57 and for orderlies, guards, stationary enginemen, firemen, vehicle drivers and their helpers it is 60. A worker must be paid the full weekly minimum rate even if his hours are less than the regular work-week, provided he works six days a week. If he works less than six days a week, he is to

receive one-sixth of the weekly wage for each day he works, or the full weekly wage if he works at least 45 hours during the week. Workers paid by the day must receive the full rate for any number of hours up to 10, and for each hour over 10 they are to receive one-tenth of the daily rate.

Workers whose hours exceed the regular work-week or who are employed over 12 hours a day or for more than 12 consecutive hours extending over more than one day must be granted a paid holiday equivalent to one and one-half the hours of overtime. Such holidays must be granted within the quarter of the year in which they are earned. The overtime of stationary enginemen and firemen is to be compensated as provided in Order 6. For first-class chief enginemen, chief cooks, temporary employees, cleaners, charwomen, watchmen or elevator operators, no provision is made for overtime compensation.

All workers must be granted 24 consecutive hours off duty each week or two periods of 12 consecutive hours. Workers who have completed a year's service are to be given paid holidays and must be notified 15 days in advance of the date of the holiday period. Graduate nurses are to receive two weeks and all other workers except maintenance men and stationary enginemen and firemen must be granted one week. First-class chief enginemen are entitled to a week.

If uniforms are required, the employer must furnish them, and must either make provision for their maintenance or pay his workers an extra 50 cents a week or one cent an hour. Employers are not required to furnish uniforms for graduate nurses or cooks but must pay the costs of maintaining such uniforms. They do not have to maintain temporary nurses' uniforms. If deductions for board and lodging have been agreed to, the amount deducted for meals may not exceed 20 cents per meal or \$4 a week. For lodging, deductions are limited to \$2.75, \$2.35, \$2.35 or \$2.10 a week depending on the zone, or 40 cents, 35 cents, 35 cents, or 30 cents a day. Deductions for board and lodging may not exceed \$6.50, \$6.25, \$6.25 or \$6 a week in the different zones. Employers may also make deductions for lodging furnished to married employees and their families provided such lodging is located in the same municipality as the plant or in an adjacent municipality.

The provisions of general Order 4 (L.G., 1942, p. 586, Jan., 1943, p. 154) which are not inconsistent with this Order apply to workers governed by this Order.

Wholesale Food Trade.—A revised Order 33 was gazetted on November 23 applying to establishments in Quebec, Levis, Quebec-

West and Lauzon which are engaged in wholesaling or storing foodstuffs and feeding stuffs or in manufacturing feeding stuffs. The revised Order is effective from December 8, 1943, until January 1, 1945, and it replaces an earlier Order 33 (L.G., 1939, p. 1113; 1940, pp. 243, 447). The former Order did not apply to the manufacture of feeding stuffs.

The Order fixes both minimum and maximum rates. The maximum rates are the highest which an employer may pay under a Finding and Direction of the Quebec Regional War Labour Board. However, if on November 15, 1941—the date at which wages were stabilized under the federal wages control policy—an employer was paying a higher rate than the maximum fixed by this Order, or if he was subsequently authorized to pay a higher rate, he must continue to pay it regardless of this Order.

Under the old Order higher rates were payable in Quebec and Quebec-West than in Levis and Lauzon. These differentials have now been abolished and the same rates are payable throughout the area covered by the Order. Moreover, the method of classifying employees has been completely changed in the new Order. It is therefore impossible to make any satisfactory comparison of the new rates with those formerly in effect.

The minimum and maximum rates set by the new Order, which are weekly rates unless otherwise specified, are as follows: for accountants and executive employees of higher rank than general foremen, \$25 and \$31.25; for cashiers, \$22 and \$27.50; for office messengers, \$7 and \$8.75 or \$10 and \$12.50 depending on whether or not they are under 17 years of age; for other office employees, \$12 and \$15, \$14 and \$17.50 or \$16 and \$20, depending on whether they have had less than one year's less than two years' or more than two years' experience; for general foremen and head-shippers, \$25 and \$31.25; for assistant general foremen, head shippers' assistants, heads of departments, butter-reworkers, cheese-processers and egg-graders, \$22 and \$27.50; for handlers of unopened cases and butchers making prepared meat, \$17 and \$21.25 or \$19 and \$23.25, depending on whether or not they are under 17; for male handlers of goods from open cases, butter-cutters, butter-wrappers and egg-packers, \$10 and \$12.50 or \$12 and \$15, depending on whether or not they are under 17; for stationary enginemen and firemen, rates ranging from 38 and 48 cents per hour to \$50 and \$62.50 per week, depending on the qualifications of the engineer; for motor-vehicle drivers, \$21 and \$26.25; for carters and stable-men, \$20 and \$25; for poultry-

pluckers, 30 cents and 37½ cents per hour and for labourers, 25 cents and 31 cents per hour. For employees not listed above, the rates are as follows: for men regularly employed, \$15 and \$18.75 or \$17 and \$21.25, depending on whether or not they are under 17; for women regularly employed, \$10 and \$12.50 or \$12 and \$15 depending on whether or not they have had less than six months' experience; for men temporarily employed, 35 cents and 44 cents per hour, and for women 25 cents and 31 cents.

In the case of accountants, general foremen, poultry pluckers, labourers and temporary employees, the rates do not apply to any specified number of hours per week. For stationary enginemen, motor-vehicle drivers and carters, the rates apply to a 60-hour week. For all other employees they apply to a work-week of 53 hours, except that from the beginning of the first week of January until the end of the week including April 1, the work-week is 48 hours.

All time worked in excess of the regular work-week is overtime. Moreover, in the case of handlers of unopened cases, butchers making prepared meat, male handlers of goods from open cases, butter-cutters, butter-wrappers, egg-packers, and motor-vehicle drivers, overtime must be paid for time worked on Sundays, or before 7 a.m. or after 6 p.m. on week-days (1 p.m. on Saturdays). In the case of motor-vehicle drivers, however, work may continue until 7 p.m. or 2 p.m. on Saturdays before it is counted as overtime. For stationary engineers, overtime is determined according to the provisions of the special order governing this class of worker (Order 6, L.G., July, 1943, p. 1034).

Overtime work is to be paid at one and one-half times the minimum rate. For workers whose minimum wages are based on a regular work-week of 53 hours or 48 hours depending on the season, the minimum hourly rate is to be considered as one-fiftieth the minimum weekly rate. For employees whose rates are fixed for a 60-hour week, the minimum hourly rate is one-sixtieth the weekly-rate.

An employee who works less than the number of hours comprising the regular work-week is nevertheless entitled to the full weekly wage if he works every working day. This is true even during weeks in which there are public holidays.

The provisions of Order 4, where not inconsistent, apply to workers covered by the present Order. Employees who are engaged during any work-period in more than one type of work are to be paid at the rates fixed for the class of work at which they spend the greater time.

Levy on Employers.—Under By-law B 1 Revised (L.G., 1941, pp. 31, 653; Feb., 1943, p. 267; July, 1943, p. 1034) a levy of one-eighth of one per cent of payroll is imposed on employers for the administration of the Act. An amendment in this by-law which was gazetted on November 27 provides that charitable institutions, etc., which are covered by Order 11 (see above) are exempt from the provisions of the by-law.

Tables of Percentages.—Three new tables of percentages for determining the number of workers to be placed in each of the several classes for which different rates are provided in a number of minimum wage orders were gazetted on October 30. In addition, Table 1 which applies to cases where workers are divided into three classes on a 60, 25 and 15 per cent basis (L.G., 1938, p. 1097) has been re-issued and was gazetted on the same date. It now goes up to 104 instead of 103, and as before, instructions are given for computing percentages for figures above 104. The three new tables are numbered 23, 24 and 25, and they apply to cases where workers are divided into groups of 80 per cent and 20 per cent (Table 23), 70, 20 and 10 per cent (Table 24) and 30, 40, 20 and 10 per cent (Table 25).

Renewals.—The following Orders have been renewed to January 1, 1945, by Orders gazetted on November 27: Order 7 (Revised) relating to the manufacture of shoe counters (L.G., 1938, p. 1350); Order 26A governing taxi-cabs and automobiles for hire in the city and district of Montreal (L.G., 1941, pp. 435, 960); Order 31 applying to tailors and dressmakers in Quebec City (L.G., 1939, p. 1232); Order 32 governing the mattress and upholstering industry in Quebec, Levis and Quebec-West (L.G., 1939, p. 1232); Order 34 applying to the ice industry in the city and district of Quebec (L.G., 1939, p. 1233); Order 36 relating to foundries in Hull (L.G., 1940, p. 22); and Order 39 governing forest operations (L.G., Feb., 1943, p. 268).

Saskatchewan Public Health Act

The regulations under this Act have been re-issued and were gazetted on November 23. Most of them are designed to protect the public generally, but there are some provisions which affect workers directly or indirectly. These provisions are summarized here.

Camp Regulations.—The Camp Regulations apply to sawmill, lumber, mining and construction camps where men are employed and housed in quarters other than their homes.

They replace regulations issued on November 14, 1928, and amended on March 2, 1934 (L.G., 1928, p. 1339; 1934, p. 338).

The new regulations are identical with the old regulations as amended. They set forth detailed requirements regarding the sites of camps, water supply, drainage, bunk houses, bunks, cook houses and latrines. They also provide in detail for the medical care of employees. The employer must obtain the services of a doctor and for that purpose he may deduct not more than three cents per day or 75 cents per month from the wages of each employee. He must also provide a hospital according to specified requirements, and, in case of an epidemic, an isolation hospital.

Other Regulations.—Various regulations require persons handling food or milk or working in premises where food is manufactured, prepared or sold to be cleanly in their habits, to wear clean washable clothing and to be free from communicable diseases. The regulations governing the medical examination of certain employees in hotels and other places provide that every employee engaged in handling food in a place where prepared food is sold to the public must present to the owner a certificate from the medical health officer stating that he is free from communicable disease. The certificate is valid for not more than one year and the medical health officer may cancel it at any time. The medical health officer may not charge any fee for examining an employee for this purpose or for issuing a certificate.

The regulations governing bakeshops require all bakeshops to be provided with washrooms and toilets which must be in good repair, clean, well lighted and well ventilated. The use of common towels by employees is prohibited and approved individual towels must be provided. The regulations governing public hotels, boarding houses and restaurants provide that where towels are furnished for guests or employees there must be a separate towel or towels for each person.

The regulations governing fumigation with hydrocyanic acid gas require the fumigator and any assistants he may employ to use an approved type of gas mask from the time the gas is about to be released until after they leave the premises. Refills for the masks must be available at each fumigating job and accurate records must be kept of the length of time the gas mask canister has been used. When the period for fumigation has ended, the fumigator must wear a mask when re-opening the premises.

Recent Legal Decisions Affecting Labour

Montreal Employee wins Claim for Retirement Pension

THE Pension Fund Commission of the City of Montreal had directed that a retired employee of the city whose services had been interrupted should be considered for pension purposes as if he had been continuously employed. Later, the Commission had annulled this decision, believing on the basis of a report of its auditor and of a legal opinion that it had exceeded its authority. The employee brought action to establish his rights as they had originally been determined by the Commission, and on January 15, 1943, Acting Chief Justice Bond of Montreal Superior Court upheld the action.

The relevant city by-law provides that the Commission has full discretionary power to accept or reject an application for a pension or to settle any related question. The Court therefore decided that the Commission was acting within its power when it had granted the plaintiff's request to have his service regarded as continuous. When it had later changed its decision on the belief that it had exceeded its powers, it had acted on an erroneous principle and the Court was therefore bound to intervene. *Chartrand v. City of Montreal* (1943) *Rapports Judiciaires de Québec, Cour Supérieure* 323.

Court Holds that Wartime Powers of Australian Government do not include Regulation of Factory Conditions

The Australian Industrial Lighting Regulations passed July 8, 1942, under the National Security Act, 1939-40, have been declared invalid by the High Court of Australia in a decision rendered last August. The regulations applied to all industrial premises where two or more persons were employed. They contained a schedule of minimum standards of illumination for different types of work to which all new installations or alterations must conform. In addition they empowered the Minister of Labour and National Service to prescribe lighting standards for all or any class of establishments and to exempt any establishment from the regulations (*LABOUR GAZETTE*, 1943, page 1299).

Decisions of the Labour Court of Ontario

National Association of Technical Employees Held to Have Collective Bargaining Among its Objects

On September 24, Mr. Justice Roach ordered a vote to be taken to determine if the employees of the Engineering Department of the Canadian Bridge Company, Limited, wished to be represented for purposes of collective bar-

Last December an order was issued under the regulations requiring certain establishments to conform to a specified standard of lighting within six months. Some of the firms complained that compliance with the order would involve heavy expenditure and that they could not obtain skilled labour to make installations. The Victorian Chamber of Manufacturers and others challenged the validity of the regulations which were passed under the section of the National Security Act empowering the Governor-General to "make regulations for securing the public safety and the defence of the Commonwealth" and to prescribe all matters "which are necessary or convenient to be prescribed for the more effectual prosecution of any war."

The Court held that the Commonwealth Government had no power under the National Security Act to pass the Industrial Lighting Regulations. The Chief Justice, Sir John Latham, declared that

... the defence power should be regarded as enabling the Commonwealth Parliament to make such laws as have a real connection with defence. In my opinion the Industrial Lighting Regulations do not have a real connection with defence.

The other members of the Court agreed with this view. Mr. Justice McTiernan considered that the regulations could not produce any condition which would be likely to assist or remove any condition which would impair the war effort. Sir John Latham stated further:

No doubt good lighting is conducive to industrial efficiency and industrial efficiency is important for the purpose of the effective prosecution of the war. But the same might be said of any prescription of standards in factory conditions, or in almost any other conditions affecting human life and well-being. For example, the provision of food, clothing, housing and recreation for war workers is required for full industrial efficiency. But, in my opinion, the existence of war does not result in handing over to the Commonwealth general control of these subjects. The existence of war enables the Commonwealth . . . to deal with war problems and with war-created problems, but it does not produce the result that the Commonwealth Parliament is empowered to legislate upon all subjects whatever. *High Court of Australia*, August 17, 1943.

gaining by the Windsor Branch of the National Association of Technical Employees, which is affiliated with the Trades and Labour Congress of Canada. There was no intervener.

The question arose as to whether the Association had collective bargaining among its objects, as required by the definition of "collective bargaining agency" in the Act.

Sec. 2 of its constitution provides that its purpose "shall be to procure and maintain for Canadian technicians those conditions of employment and standards of living commensurate with their services," and Sec. 17 provides that "collective bargaining on behalf of any membership group shall be guided by the program of the Association." The Court expressed the opinion that the language was not as specific as might be desired, but it decided that at least one of the methods of attaining the objects referred to in sec. 2 was collective bargaining. Other means such as a strike could admittedly be used, but there was nothing in the constitution to show that the Association limited itself to that method or that it excluded collective bargaining as one of its methods. *Windsor Branch, National Association of Technical Employees v. Canadian Bridge Company, Ltd.*, Sept. 24, 1943.

Court Reaffirms Principle that Vote will be Held only if Applicant Gives Reasonable Evidence that it Represents Majority

Judgment was delivered by Mr. Justice Roach on October 1, 1943, in a case in which the United Electrical, Radio and Machine Workers of America applied to be certified as the collective bargaining agency of the employees of York Arsenals Limited. Following the decision rendered in *Canadian Furnace Ltd.* (L.G., Oct., 1943, p. 1422), the Court refused to order a vote and dismissed the application on the ground that the applicant union had not made out a *prima facie* case that it represented the majority of the employees.

The Court found that there were approximately 2,200 employees who were entitled to be represented by a collective bargaining agent. 907 applications for membership in the union were produced in evidence, but when these applications were compared with the company's payroll of September 25, it was found that only 515 were signed by employees of the company. Counsel for the union urged that 515 was a substantial part of the total number of employees and that the Court should therefore direct a vote to determine the wishes of the remaining workers. The Court rejected this suggestion, stating that however meritorious it might be, there was no support for it in the Act.

The Court was of the opinion that under the Act a vote should be held in any case where the applicant produced evidence to show that it represented such a proportion of the total number of workers that there was a reasonable probability that it represented the majority but did not establish beyond question that it represented the majority. To accept the argument of the applicant union

in the present case would be to adopt the quite different principle that the Court should order a vote whenever an applicant showed that it represented a substantial number of the workers.

In making out a case that there was strong reason to believe that it represented a majority, an applicant could produce evidence to show that it represented a proportion which was somewhat less than a majority. If it did so, however, it would have to adduce some other circumstances, such as, for example, the fact that the employer had demonstrated definite hostility to the union and thus had discouraged some employees from joining. In the present case there was nothing in the evidence to show that the company had adopted such an attitude. On the contrary, it had entered into negotiations with the union on several occasions. *United Electrical, Radio and Machine Workers of America v. York Arsenals*, Oct. 1, 1943.

Branch of Union Entitled to Appear Before Court

In a case in which a local branch of the United Automobile, Aircraft and Agricultural Implement Workers of America applied to be certified as the collective bargaining agency in the Electric Auto Lite Company, Ltd., Mr. Justice Mackay decided on October 5 that a *prima facie* case had been made and he therefore ordered a vote. He excluded certain specified groups of employees.

As regards an objection that the local could not be regarded as a separate entity since the applications for membership were made to the International and not to the local, the Court was of the opinion that the local was "an integral part of the International or, in other words, the agency by which the International draws itself before the Court." Concerning a further objection that the local branch was part of "an amalgamated unit" and therefore not entitled to appear in Court, the Court's opinion was that the local branch was an autonomous unit under the constitution of the union and that as far as the employees of Electric Auto Lite were concerned there was autonomy. *Local 456, United Automobile, Aircraft and Agricultural Implement Workers of America v. Electric Auto Lite Company, Ltd.*, Oct. 5, 1943.

Employees' Council Certified as Bargaining Agency in Aluminum Plant at Toronto

On October 16, Mr. Justice Roach ordered certification of the Employees' Council of the Aluminum Company of Canada Limited and Aluminum Goods Limited as the collective bargaining agency for employees of the

Aluminum Company of Canada Limited and Aluminum Goods Limited, Toronto. The Council had intervened in a case in which a local of the Aluminum Workers of America had applied to be certified as the collective bargaining agency.

Before November, 1942, the employees of the companies were not organized, but towards the end of that month the United Steelworkers of America began to organize them. According to the organizer, whose evidence was accepted, the employees were first enlisted in the United Steelworkers as a "pool local" and in due course they were transferred to and became members of the local of the Aluminum Workers which was making the application. The Court therefore treated the employees who had signed applications for membership in the United Steelworkers as though they had from the beginning been members of the applicant union.

Cards filed as evidence showed that the applicant union had 334 members, but when these cards were compared with the payroll of September 11, 1943, it was found that only 215 of these members were on the payroll of the respondent companies. The total number of employees varies between approximately 900 and 1,000.

The Court conceded that the number of members was not the only gauge in determining whether the applicant represented the majority of the employees, but it nevertheless was of the opinion that it was an important factor. In any case, the relatively small number of members was particularly significant in view of the fact that the union had been striving to increase its membership. Circular letters of July 14 and August 23, 1943, from the organizer to the stewards, in which the present application was forecast, emphasized the necessity of increased membership and stated that initiation fees and membership dues were suspended temporarily. There was some evidence that there were employees who indicated their desire to join the union but feared discrimination if they did so. The Court suggested that this was hearsay evidence and in any case decided that the number of such employees was small.

The Court was satisfied that the efforts of the United Steelworkers' organizer to establish a union in the plant led to the formation of the intervening Employees' Council. A petition dated December 4, 1942, was drawn up at a meeting of employees, and after being signed by 617 of the 1,004 employees then on the payroll, was presented to the management. It expressed the desire of the employees "to form an association within the plant to deal with the company on matters of mutual

interest." A statement which was attached to the petition set forth the purposes of the proposed council, which included "full bargaining rights for the employees of the plant, in regard to rates of pay, shop conditions and seniority" and the negotiation of an annual agreement with the management. The management publicly indicated its approval of the scheme and on its suggestion spokesmen were appointed by the employees of each shift in each department. At a meeting held subsequently with these spokesmen the management again expressed its sympathy with the proposal and told them in effect that the facilities of the plant were at their disposal for organizing purposes. The Court emphasized that at this point the management withdrew from the meeting and thereafter took no part in the activities of the Council.

On December 18 the employees on each shift in each department elected a shop steward. On that date there were 1,037 employees and 797 ballots were cast. Certain stewards were elected by acclamation and the number of employees in the shifts concerned was 125. A constitution was adopted by a committee of the stewards, and before its adoption copies of it were posted and the comments of the employees were received by the stewards. The constitution provides that either the Council or its executive Board may be dissolved by vote of the majority of the employees qualified to vote at elections, but in spite of this provision the Court found no evidence of any effort on the part of the employees to have the Council dissolved.

The activities of the Council were fully communicated to the employees through a written report, and the problems it considered were varied and numerous. On January 21, 1943, it entered into an agreement with the respondent companies, and though this agreement was not submitted to a vote by the employees, it was made available to them in a printed booklet and there was nothing to indicate that the employees were critical of any of its terms.

One further point on which the Court laid considerable stress was that before the constitution of the Employees' Council was adopted, the chairman of the Council, who was a member of the United Steelworkers, attended a meeting of the Steelworkers' local at which about 50 men were present, and he testified that the proposed constitution and agreement received the approval of those present. Moreover, at a meeting held on March 7 between representatives of the Council and the Union, the latter "proposed working with the Council."

On the basis of the above evidence, the Court came to the following conclusions: (1) that the applicant Union had not made out a prima facie case which would have justified a vote, and (2) that the intervening Council in fact represented the majority and was therefore entitled to be certified without further inquiry. *Local 34, Aluminum Workers of America v. Aluminum Company of Canada, Limited, and Aluminum Goods Limited*, Oct. 16, 1943.

*Court Certifies Agency Receiving Majority of
Vote when more than Half the
Employees Vote*

Three unions were involved in a case which was decided by Mr. Justice Gillanders on October 20. The Glass Bottle Blowers' Association of the United States and Canada had applied to be certified as the collective bargaining agency for the hourly and piece-rate employees in the plant of the Dominion Glass Company at Wallaceburg. The American Flint Glass Workers Union and the United Automobile, Aircraft and Agricultural Implement Workers of America both intervened, the former claiming to represent a small group of highly skilled employees and the latter claiming to be the agent of all the hourly and piece-rate employees in the plant.

The Flint Glass Workers had had a local in the Wallaceburg plant for more than 35 years. Membership had been confined to the mould-makers in the mould-making department and the skilled glass workers in the furnace department, in all, about 40 employees. The Glass Bottle Blowers had conceded the right of the Flint Glass Workers to represent this group but the Automobile Workers had refused to do so.

The Glass Bottle Blowers also had had a local established in the plant for a number of years, but until 1942 the membership had been confined to glass blowers. In that year the union had enlarged its scope and on June 1 had 370 fully paid-up members. The total number of employees in the plant was said to have been 633 on July 2.

The Automobile Workers had started to organize the plant in July, 1942, and by November 1 had 450 members. In the same month they had claimed recognition but the company had refused it. During the next few months both the Glass Bottle Blowers and the Automobile Workers had carried on active organizing. On January 30, 1943, the latter had called a strike to gain recognition and a large percentage of the employees had participated.

Meantime, on November 2, 1942, the company at its head office in Montreal had entered into an agreement with the Glass Bottle

Blowers' Association recognizing it as the bargaining agent for the hourly and piece-rate employees in all its plants, including the Wallaceburg plant. In February, 1943, shortly after the strike had been called by the Automobile Workers, the company had agreed to recognize the Glass Bottle Blowers as the exclusive bargaining agency, and had entered into a written agreement which included a "closed shop" provision. An agreement embodying these terms had been concluded in the Wallaceburg plant on May 3, 1943. From time to time some of the workers who had gone on strike were re-employed and on July 1, 1943, there were 553 employees in the plant.

This was the situation when the Glass Bottle Blowers' Association applied to the Court to be certified as the collective bargaining agency in the Wallaceburg plant. The application was heard on July 12 and 13 and the Court at that time decided that, in view of the confusing nature of the evidence, it was necessary to have the further evidence which could be obtained from a vote. It was therefore ordered that votes be conducted (1) among the mould-makers and the skilled glass workers to determine if they wished to be represented by the Flint Glass Workers or the Automobile Workers, and (2) among the remaining employees to determine if they wished to be represented by the Glass Bottle Blowers or the Automobile Workers.

The results of the balloting were as follows: Among the mould-makers and skilled glass workers there were 36 eligible voters and all 36 voted in favour of the Flint Glass Workers. Among the remaining workers there were 502 eligible voters excluding 12 whose eligibility had been challenged. Of these, 232 had voted in favour of the Automobile Workers and 228 in favour of the Glass Bottle Blowers.

With regard to the first group there was no difficulty, and the Court ordered the certification of the Flint Glass Workers' Association as their bargaining agency. It was more difficult, however, to determine the proper agency for the other workers. The Automobile Workers had received a majority of the votes cast but somewhat less than half of the total possible number of votes. The question, then, was whether it was proper to certify the Automobile Workers.

The company and the Glass Bottle Blowers' Association, however, claimed that the written agreement entered into by them barred the Automobile Workers' application for certification. The Court pointed out that the Automobile Workers had been organizing the plant for some months before the agreement was signed and had been claiming to represent a majority of the employees. Before it had entered into the agreement, the company had

made no effort to determine whether the Glass Bottle Blowers' Association had authority to act on behalf of the employees. The Court stated its appreciation of the happy relations existing between the Company and the Association for many years and of the company's natural desire to continue these relations. It added, however, that "the matter of selecting a bargaining agency is one for the employees themselves to decide," and since no effort had been made to determine the wishes of the employees the agreement was not a bar to the present proceedings.

In interpreting the meaning of the vote referred to above, the Court considered first the provisions of the Act. Paragraph (b) of sec. 13 (5) provides that, after an application for certification of an agency has been received, the Court may "certify that a collective bargaining agency represents a majority of the employees" in the appropriate unit. Paragraph (d) authorizes the Court to ascertain what employees are entitled to vote and to conduct a vote among these employees. The Court considered that under paragraph (b) it was its clear duty to be satisfied, before it certified an agency, that that agency represented a majority of all the workers. There was nothing, however, to specify how the results of a vote should be interpreted.

The Court stated that on first consideration it was impressed with the view that before one could conclude on the evidence of a vote that an agency represented a majority, that agency would have to receive the votes of a majority of all the employees eligible to vote. On further consideration, however, the Court decided that the matter was open to another view. In *The Mayor, Constables and Company of Merchants of the Staple of England v. The Governor and Company of the Bank of England* (1887) 21 Q.B.D. 160 at 165, it was held that

The Acts of a corporation are those of the major part of the corporators, corporately assembled..... This means that, in the absence of special custom, the major part must be present at the meeting, and that of that major part there must be a majority in favour of that act or resolution.

The Court considered that this principle applied in determining what acts could be regarded as the acts of an appropriate bargaining unit, even though such a unit was not a corporation. The same principle had been applied by the National Labor Relations Board in the United States, where the statutory provisions on the matter have some similarity to those in Ontario. Moreover, experience with votes taken by the U.S. National War Labor Board indicated that to require the vote of an absolute majority might in some cases give undue weight to the indifference of a small minority.

It was not to be inferred, however, that an agency would necessarily be certified merely because it received a majority of the votes cast when a majority of the employees voted, for example, in extreme cases if 26 per cent of the employees voted in favour of it. It was clear from the Act that a vote was merely one of several sources of evidence on which the Court could rely. If more than half the employees voted and an agency received more than half these votes, there was a presumption that this agency represented the majority of all the employees. This presumption would then have to be considered in the light of any other available evidence.

In the present case, a large majority—460 out of 502—of the employees had voted and had thus indicated that they desired collective bargaining. The Automobile Workers had received a majority of the votes cast, and though the majority was small, all the evidence taken together supported its claim for certification. This union was therefore certified.

The reasoning on which this decision was based was followed by Mr. Justice Gillanders in three other cases which he decided on the same day. *Glass Bottle Blowers' Association of the United States and Canada v. Dominion Glass Company Ltd.* (1943) Ontario Weekly Notes 652.

***Employees Engaged in Railway Work in
International Nickel Company Held
Not to Constitute Separate
Bargaining Unit***

Mr. Justice Greene on October 28 rejected the claim of the Brotherhoods of Railroad Trainmen and of Locomotive Firemen and Enginemen to represent for purposes of collective bargaining certain small groups employed by the International Nickel Company at Sudbury. The point arose when the two Brotherhoods intervened in a case in which the Sudbury local of the International Union of Mine, Mill and Smelter Workers applied to be certified as the bargaining agency of the employees of the company in the Sudbury area. The respondents in the case were the company and an association of employees called the United Copper Nickel Workers.

All the parties had agreed to a vote being taken and neither the applicant union nor the respondent United Copper Nickel Workers were contesting the right of the Brotherhoods to represent their small groups. The company, however, insisted that before they could appear on the ballot they would have to show that the unit they claimed to represent was appropriate for collective bargaining within the meaning of the Act.

The Court found that this was not an appropriate unit. The workers concerned were

not, with minor exceptions, completely and finally allocated to the work in which they were employed. If there was a layoff they did not necessarily lose their jobs but were given the opportunity of reverting to other classes of employment. There was no reason to believe that they could not be properly represented by whichever of the two other agencies was certified, and the Court was convinced that all the employees of the Company in the Sudbury area formed the proper unit. The following reservation was added, however:

My conclusions in this matter are based on the particular circumstances in the plant of the International Nickel Company of Canada Limited, and are not intended to lay down any general principle as to the proper bargaining agency to represent employees engaged in railway work in the yard of an industrial company.

As far as the other two agencies were concerned, the Court ordered a vote to be taken in accordance with the agreement already arrived at. *Sudbury Mine, Mill and Smelter Workers Union Local 598, Affiliated with the International Union of Mine, Mill and Smelter Workers v. International Nickel Company of Canada, Ltd., and United Copper Nickel Workers*, October 28, 1943.

Union Denied Right to Intervene in Certification Case because no Evidence of Employee Support

In a case in which the Kerr-Addison Employees' Association applied to be certified as the collective bargaining agency for the employees of Kerr-Addison Gold Mines Limited, a local branch of the International Union of Mine, Mill and Smelter Workers, which had not been notified of the application, applied to the Court for the right to intervene. In an oral judgment rendered on November 12, Mr. Justice Chevrier refused this latter application.

The Union based its claim on sec. 13 (4) of the Act which provides that an agency which is applying to be certified must serve notice of the application on any other collective bargaining agency affected, and on sec 3 (2) of the Rules of Practice of the Court which provides that the summons must be served on all persons known to the applicant to claim the right to bargain collectively for any of the employees affected by the application. The Union claimed to represent the employees in the present case and argued that the applicant Association should have known of its claim. The Court, however, pointed to the applicant's Statement of Facts, verified by affidavit, which stated that the applicant knew of no other person who was claiming to represent the employees.

In any case, the Court found no evidence of any kind to indicate that the would-be intervenor represented or had the sympathy of any of the employees.

If there was any suggestion of that kind, then I think it might be proper to allow them to intervene; but after all, as I have said before, this is the Supreme Court of Ontario, and we have to deal with these matters in the way in which they are presented on the material filed, and upon that material filed in this matter I have no hesitancy whatever in coming to the conclusion that these people do not in any way represent the employees, and are not entitled at this stage anyway, to intervene.

Kerr-Addison Employees' Association v. Kerr-Addison Gold Mines Ltd., Nov. 12, 1943.

Second Vote with Revised Ballot-form Ordered when Results of First Vote Found Inconclusive

On November 23, Mr. Justice Roach decided a point in connection with the interpretation of a vote which was somewhat different from that involved in the *Dominion Glass Co.* case (see above). The Lakeshore Workmen's Council had applied to be certified as the collective bargaining agency for the employees of Lakeshore Mines, Limited, and a local branch of the International Union of Mine, Mill and Smelter Workers had intervened. On October 24, the Court had ordered a vote to be held, in which the ballot offered the employees three choices: the Council, the Union or neither. In the ensuing vote the number of ballots cast for neither agency, though small, was sufficient to prevent either the council or the Union from obtaining a clear majority. On November 23, therefore, the Court directed that another vote would be held in which the Council and the Union would be the only alternatives offered.

In the first hearing the Court took it as proved that a large majority of the employees desired to be represented by some collective bargaining agency but found the evidence inconclusive as to which of the two agencies was preferred. The organization of what ultimately became the Workmen's Council began in November, 1941, just after the majority of the employees of the company had voted in favour of a strike in support of the intervening Union. The Council did not impose fees but it accepted voluntary contributions, and such contributions were received from 206 members in 1942 and from 169 in 1943. Of the latter number, 14 were members of the Union at the time the case was heard. At the annual election of representatives to the Council in 1942, 62 per cent of the surface workers and 50 per cent of the underground employees voted. In 1943 the representatives of the underground workers were elected by

acclamation and of the 230 surface employees 60 voted. It could not be concluded that those voting in these elections indicated their preference for the Council, since they had no choice of agencies. The evidence did not show the number of workers at the time of either of the above elections, but on September 25, 1943, there were 492, excluding foremen, etc., of whom 216 were members of the Union. Since the evidence was unsatisfactory, the Court decided that it needed the further evidence of a vote on which to determine which agency the employees preferred.

As against this course, the Council and the Union each argued that the other was not a collective bargaining agency within the meaning of the Act. The Council and the employer also argued that there was already a collective agreement between them and that this was a bar to certification of the Union.

The arguments in support of these contentions and the considerations which led the Court to reject them were similar to those in other cases (*Babcox-Wilcox, International Nickel, Canada Machinery Corp., L.G., Sept., 1943, pp. 1304-6; Massey-Harris, L.G., Oct., 1943, p. 1421*). The Union's contention that the Council was improperly influenced by the company was rejected on the ground that though the company through its officers "openly and indeed vigorously" indicated its preference for the Council, yet there was nothing in its actions which could be said to have interfered with the decision, judgment or action of the members. In any case, the Court decided that even if it was wrong in this, a secret ballot would give the workers an opportunity to indicate their choice without fear. The Council argued that the local branch of the union was not a bargaining agency within the meaning of the Act because the constitution of the International Union provided that all agreements entered into by locals had to be approved by the Executive Board of the Union. The Court decided, however, that even if under this provision the Executive Board could thwart the wishes of a local in any particular case, it did not follow that it would necessarily do so. The argument that the existing agreement between the company and the Council barred the certification of the Union was rejected on the ground that this agreement had never been ratified by the employees and there was no evidence from which to infer that it had the approval of the majority.

The vote was taken by the Registrar on October 26 and 27. There were 489 eligible voters and 461 ballots were cast of which two were rejected. The result showed 217 votes for the applicant Council, 222 for the intervening Union and 20 for neither.

When the case was resumed, counsel for the respondent company argued that neither the

applicant nor the intervener should be certified. Of the 459 ballots which were allowed there were, counting the ballots cast for neither agency, 242 votes against the applicant Council and 237 against the intervening Union, whereas only 217 votes were cast in favour of the former and 222 for the latter. Counsel for the applicant Council admitted that it could not be certified itself, but, using the same reasoning as was urged by the Company, submitted that the intervener should not be certified either.

On behalf of the intervener it was argued that the twenty who voted "neither" indicated thereby that they were opposed to any collective bargaining agency but that if there was to be one they were indifferent as between the applicant and the intervener. The intervener had obtained the majority of the remaining votes and was, therefore, entitled to be certified.

The Court rejected the arguments of all three parties. To the claim of the company and the applicant Council it replied that to adopt their reasoning would be to give effect to the wishes of a mere 20 employees and to thwart the desires of the 439 employees who by voting for one agency or the other clearly indicated that they wanted some collective bargaining agency. To the Union's argument it replied that the twenty votes for neither agency could not be interpreted as indicating indifference as between the two agencies but merely as meaning that the employees who so voted were not in favour of the principle of collective bargaining.

In the opinion of the Court, it was clear that a collective bargaining agency should be certified for the employees of the company. The only solution seemed to be to hold another vote in which all the eligible employees would be given an opportunity to express their preference for one or the other of the competing agencies. Such a vote, therefore, was ordered to be held within 15 days.* *Lake Shore Workmen's Council v. Lake Shore Mines, Limited*, Nov. 23, 1943.

* According to press reports, Mr. Justice Roach, at a special session of the Court held on Nov. 27, rescinded the order calling for a second vote and ruled that no vote should be taken before Feb. 1, 1944. This action was taken because the International Union had circulated among the employees of the mine a pamphlet containing union propaganda. The Court believed that this pamphlet would have a disturbing effect and would thus vitiate the result of any vote which was held immediately.

Counsel for the company alleged contempt of court on the part of the union organizer who had been responsible for the circulation of the pamphlet, since in this as in other cases the Court had issued an order prohibiting electioneering and organizing activity pending the holding of the election. The Court, however, accepted the organizer's explanation that he did not know of the Court order. The organizer further explained that the pamphlet had been directed towards the employees of four other companies which the union was organizing.

Prices and Price Control

Price Control in Canada, July to September, 1943

Activities of Wartime Prices and Trade Board During Quarterly Period— Price Ceilings, Rationing, Subsidies, Simplification and Conservation

DURING the last quarterly period the Wartime Prices and Trade Board took action in several fields of particular concern to the public. The rapidly rising prices for fresh fruits led to the imposition of ceiling prices for peaches, pears, plums, grapes and apples, in spite of the unusual difficulties inherent in such action. The shortage of preserves, arising from the small amount of fruit for jam combined with the general increase in civilian demand, led to rationing of preserves and canned fruits.

Another step of importance to the consumer was the setting of standard prices for beef related directly to the carcass cost, one purpose being to ensure reduction of retail prices should wholesale prices decline. In addition, subsidies were arranged to prevent the higher prices of fresh fruits and vegetables from affecting the prices of canned fruits and vegetables.

A further significant development was the revision of the system of prices and subsidies on lumber. To prevent payment of subsidies on sales for defence purposes or to industrial users able to absorb increased costs, subsidies were cancelled at the producer and distributor levels and corresponding price increases were authorized. However, such consumers as farmers, fishermen, and other individuals requiring lumber in their personal trade and civilians generally using lumber for maintenance or repair purposes were protected by subsidy payments in the form of a discount on the invoice price.

The rental regulations were revised extensively and new measures were taken to assist in meeting the acute housing problem in some congested areas. The Board's program of simplification and conservation was extended to several additional metal products and to a number of paper products, saving materials and expense. In a few cases, however, an improved supply position permitted the easing of restrictions, notably the removal of the ban on two-pants suits and trouser cuffs. Another development of interest was

the introduction of a labelling system for women's coats and suits designed to provide an effective means of identification at the retail level, thus giving further protection to the consumer.

Foods

Fresh Fruits.—From the viewpoint of the ordinary consumer, one of the most striking developments in the field of price control during the quarter was the fixing of prices for certain fresh fruits and the announcement that ceilings would be instituted for vegetables in the Fall. Fresh fruits, and also fresh vegetables, were exempted from the ceiling soon after the price ceiling policy came into effect. They were exempted because of the unusually great administrative difficulties in controlling the prices of products which varied so widely in supply and costs. So long as such prices did not rise unduly, it was not desirable to impose ceiling control. But when prices did increase sharply in a number of important instances, the Board has extended the ceiling (potatoes in Feb., 1942; onions in March, 1943; bananas and oranges in Dec., 1942).

The sharp increases in the prices of fresh fruit led the Board to tackle the problem on a wider front. Maximum prices were fixed for peaches, pears, plums, grapes and apples. Crops were below normal and the prices fixed were considerably above last year's level, but they were still, of course, at a level at which demand tended to outrun supply and undoubtedly much lower than would have occurred without control.

The problem was to develop a price structure which would distribute available supplies as equitably as possible between the different regions, without causing any wastage of these highly perishable products. For peaches, pears and plums a system of uniform prices was adopted on sales by growers, and a uniform level of markups was set for licensed shippers, wholesalers' agents and truckers to be added to their cost and transportation charges. In

fixing maximum prices for grapes and apples, however, zoning systems were adopted to differentiate between producing regions. And in the case of apples, provision was made for monthly price increases from December to April to cover storage and shrinkage costs.

At the end of October, price control was extended to a number of fresh vegetables. Carrots, cabbage, beets, parsnips and turnips were covered by an order issued on October 30, which set maximum prices to growers and wholesale and retail markups.

Canned Fruits and Vegetables.—The rise in prices of fresh fruits and vegetables which took place before ceilings were imposed represented an increase in costs to processors and canners. Rather than allow prices of canned fruits and vegetables to increase to the consumer, the Board arranged for subsidy to be paid. In addition to continuing the subsidy paid last year on certain canned fruits, a new subsidy was announced to be paid to growers through the processors on purchases of peaches, pears and plums for canning and preserving. The subsidy paid last year on certain canned vegetables is also to be continued, but higher rates were arranged for tomatoes and tomato juice to encourage increased production.

Preserves.—After being in short supply for some time, preserves were added to the list of rationed commodities early in September. The main factor responsible for the small pack of jams was the shortage of fruits, and this led to an increase in demand for alternatives, such as honey, threatening serious maldistribution throughout the preserves field.

The method of "alternative rations" was used in view of the large number of alternatives serving roughly the same purpose. This method was first used in the case of tea and coffee and later applied to meat rationing. Two "D" coupons in the consumer's ration book were to become valid every four weeks, and the alternative values for one coupon were as follows: one-half pound of jam, jelly or marmalade, fountain fruits, apple butter, maple butter, honey butter, honey, maple sugar, or sugar, or ten fluid ounces of canned fruit, molasses, or maple syrup, or one pound of corn syrup, cane syrup or blended table syrup.

After a month's experience with the rationing, adjustments in coupon values were made. It was found that in certain areas stocks of honey and molasses were accumulating on dealers' shelves and the amounts obtainable per coupon were doubled so as to enable more of these commodities to be consumed in the areas where demand was normally substantial.

The ration of syrups was raised in order to bring the amounts into line with container sizes now in use.

Improved shipping conditions made it possible to increase the tea and coffee ration in September. While coupon values were not changed, the increase was effected by having two coupons become valid every three weeks instead of every four, as formerly.

Meats.—Many of the pricing orders issued by the Board have the purpose of simplifying the price structure and of facilitating the observance and enforcement of ceiling prices. This becomes particularly necessary when, as in the case of meat, there is a substantial increase in demand for a limited or declining supply, leading to considerable pressure on a complicated and varied price structure. The most usual method of strengthening the price structure is to substitute standard prices for individual basic period ceiling prices.

In September the retail beef price structure was revised and standardized, and extended to all areas. Before this a system of standard retail cuts and prices had been in force in a number of cities, while in other areas, retail prices were determined by adding the retailer's basic period markup to the standard wholesale prices. Under these systems there was no assurance that retail prices would fall in line with wholesale prices if the latter fell below the maximum. The purpose of the new system is to ensure that in the event of any decline in wholesale beef prices the benefit would be passed on to the consumers. Under this system, retailers' prices are to vary weekly according to the actual weighted average carcass cost of beef of the same quality bought by him in the previous week.

A system of standardized retail cuts of lamb and standard retail lamb prices was introduced in October and it is intended to extend this system to veal and pork.

Clothing

An interesting new development in price control in the clothing field was introduced during the quarter—that of labelling. In the industry producing women's, misses' and juniors' suits, coats and sport jackets, the manufacturer is required to label each garment showing his name or Wartime Prices and Trade Board licence number, or his registered trade mark for the garment, and also the style number and size of the garment. The labelling requirements were adopted because of the multitude of different fabrics used and the lack of uniformity in styles and price ranges. By providing an effective means of identification at the retail level, the label-

ling system will give further protection to the consumer.

The method of pricing in this field of clothing, which was established last December, provided that no garment could be sold by the manufacturer until particulars of its style, material, cost and proposed selling price had been submitted to the Administrator for approval. Under new regulations, which strengthened the Administrator's control over prices, a manufacturer, before selling any garment, is to submit to the Administrator a cost sheet, as well as a sample of the cloth used in producing the garment and a sample of the cloth used in manufacturing a similar garment in the corresponding season of 1942. The Administrator will then issue a written authorization stating the maximum price at which the article may be sold.

Simplification measures in the textile industry have been dictated mainly by the changing import situation and the shortage of labour in the spinning and weaving trades. Simplification orders during the quarter affecting sheets and pillow cases, towels and bathmats were necessitated by the shortage of cotton textiles and heavy wartime demands on the industry. The methods used in simplification were the elimination of "frills" and style freezing.

Some restrictions were relaxed during the quarter owing to improved supplies and reduced demands of the armed services. With an improvement in the civilian supply of woollen textiles, the Board was able to relax some of the restrictions pertaining to trousers and suits. The prohibition of cuffs on trousers and ladies' slacks and the ban on two-pant suits were removed. Restrictions on the length of trousers were lifted and vests were permitted for boys' suits.

Rentals

"Deficiency Areas".—The shifts in population occasioned by the war have made it necessary for the Board not only to be concerned with the control of rents and evictions, but also to take active steps to increase the available amount of housing accommodation in "deficiency areas". While the situation in places like Halifax and Ottawa has long been critical, in Toronto and on the West Coast the shortage has become increasingly acute in recent months. In all these areas, except Halifax, there are housing registries, operated by the Consumer Branch of the Board in co-operation with other local organizations, which attempt to make the fullest possible use of available accommodation.

Toronto.—In Toronto measures to alleviate the housing shortage were worked out by the Real Property Administration in co-operation with the Municipal Council. Owners of housing accommodation that has been vacant for three months are required to register with the local Housing Registry. The Administrator is empowered to require landlords to let this accommodation on a monthly basis. In cases where owners of housing accommodation wish to subdivide it but are obstructed by by-laws, the Special Committee on Residence Conversion (appointed by the City Council) and the Administrator have agreed that the obstructing by-law should be rendered inoperative by an Administrator's Order.

West Coast.—The expansion of industrial and military activity on the West Coast has considerably increased the pressure on housing accommodation and eating places in Vancouver. The shortage of eating places (in relation to the greatly increased population) was increased by the tendency of boarding houses to go out of business. The rates of boarding houses in operation on the basic date October 11, 1941, were frozen at the levels then in force and in view of the higher cost of food and its preparation many of these establishments were unable to continue to provide meals. On the other hand, those boarding houses that came into operation later were able to establish higher rates from the start.

To remedy the situation new regulations were established for rooming accommodation let at a rate per person in Vancouver and North Vancouver. The regulations freeze "per person" rates at the level of July 1, 1943. However, a landlord may apply to the local Examiner for an increase in maximum rates, if his rate per person "is lower than the rate per person generally prevailing for similar occupancy of similar accommodation in the neighbourhood". In this way landlords in operation on October 11, 1941, will be able to raise their rates to the level of those established later, and it is expected that this will enable them to continue to provide meals.

Housing and Rooming Accommodation.—Regulations governing housing and rooming accommodation, commercial accommodation and hotel accommodation were revised and published as three separate orders which came into effect on October 1. The order dealing with "Housing" and "Shared" accommodation revised the administrative machinery, the regulations governing changes in maximum rentals, and the conditions respecting the termination of leases.

The administration of the regulations is put into the hands of Rental Appraisers, appointed

for different areas who replace the former Rentals Committees. The machinery for appeals was decentralized, the single Administrator of Rental Appeals being replaced by a number of regional Courts of Rental Appeals whose decisions are not subject to appeal to any higher authority.

Among the changes in the regulations governing the variation of maximum rentals for housing accommodation were provisions designed to ensure that rentals varied in accordance with the services provided. Some changes were made in the grounds on which an increase in the maximum rental could be sought. Regulations governing the termination of leases were simplified in the new order, and adjustments were made to reduce inconvenience caused to both landlords and tenants. The same order also regulates maximum rentals for rooming accommodation though no provisions are made regarding the termination of leases, which remains subject to provincial law.

Commercial Accommodation.—Revised regulations for commercial accommodation were contained in a separate order. Previous regulations had protected tenants from eviction in the same way as tenants of housing accommodation. The new order omitted all regulations governing the termination of leases so that they are governed only by provincial law. While special protection had to be given to tenants of housing accommodation, owing to acute shortage, the supply of commercial accommodation is not in such a critical condition.

Hotel Accommodation.—In the case of hotel rates no provision had been made for the setting of maximum rates for accommodation coming into operation after the basic date (October 11, 1941). This omission was corrected in the revised regulations which required all hotels, including those for which maximum rates had not been fixed, to file their current rate schedules with the Administration. Provision was made for the setting of maximum rates for any new accommodation by a Hotel Rates Committee appointed by the Board.

Lumber and Wood Products

The pricing problems in the field of lumber and wood products (including paper products) reflect the continued upward pressure on prices, typical of an economy so largely geared to war. Most of the pressures take the form of rising costs, and these have arisen from shortage of labour, greater labour turnover, dilution of labour skills, the use of substitute materials, reduction in the volume of output, and uneven flow of supplies.

In adhering vigorously to the ceiling policy, the Board makes every effort to see that increases in costs are absorbed before they reach the retail level. In many cases it has been possible to reduce costs by simplification measures and elimination of frills and unnecessary services. (Simplification measures also serve the purpose of conserving the use of critical materials and labour. For an example, see "Paper Products" below.) Where such measures become inadequate to absorb or offset the "squeeze" and where continued supply of the goods in question has been regarded as necessary, carefully controlled subsidies have sometimes been paid. In some circumstances the alternative method of permitting price increases has been used, though its application has been strictly limited and confined mainly to articles which are purchased only at long intervals or which are of negligible significance in the consumers' budget.

Rising costs of lumbering and pulpwood production have increased pressure on the prices of wood and paper products. In some instances the Board has introduced subsidies, but precautions have been taken to ensure that, generally speaking, subsidies are paid only on essential goods and essential uses of goods. In the past quarter increased costs of newsprint made necessary the payment of subsidies on scribbles and counter cheque books, while higher lumber costs were reflected in subsidies on apple barrels and other wooden containers. In addition, the existing subsidy arrangements on lumber have been revised so as to restrict payment of subsidy to essential civilian consumers' supplies.

Lumber.—In paying subsidies to offset rising costs in the lumber industry, the Board has been faced with difficulties arising from the fact that lumber has a large number of different uses, only some of which are eligible for subsidy under the Board's policy.

In order to obtain necessary production of softwood lumber in the face of increased costs, increases in the prices paid to primary producers have from time to time been authorized by the Timber Controller. These increased prices were formerly offset before reaching the consumer's level by subsidies such as those paid to retailers on spruce and other softwood lumber produced in northern B.C., the southern interior region of B.C., and the Prairie area, as well as those paid producers of softwood lumber, lath and shingles in the B.C. Coastal area. Under such arrangements however, the end use of the lumber on which subsidy was claimed could not readily be established. A large proportion of total sales are for defence purposes which do not require subsidy, or to industrial users whom the Tim-

ber Controller considers able to absorb the increased costs. To ensure that no subsidy is paid on such sales, the Controller cancelled subsidies at the producers' and retailers' levels effective August 16, and authorized corresponding price increases. These were permitted to be reflected in retail prices on and after September 1. For certain other users, however, a new arrangement was put into effect whereby a subsidy is payable in the form of a dealer's discount on consumers' purchases of softwood lumber, lath, posts and shingles. The present discount rate of 10 per cent on the invoice value of lumber sold is to be adjusted from time to time by the Timber Controller. Subsidy is limited to purchases by persons signing a certificate of essentiality, and is restricted to such users as farmers, fishermen, trappers, fruit and vegetable growers and other persons requiring lumber for the pursuit of their personal trades, or civilians generally for maintenance and repair purposes. Sales to industrial users and contractors, and lumber for building or improving dwellings are not eligible for subsidy.

Wooden Containers.—In the production of fruit containers and similar woodenware, subsidies were necessary. In Ontario and Quebec the ceiling price of apple barrels on sales to growers will be held at last year's level by means of a subsidy payable at the rate of 15 cents per barrel, with corresponding rates on staves, hoops and heading. Subsidy will be paid to the Nova Scotia Apple Marketing Board and the New Brunswick Fruit Marketing Board to the extent that the cost of apple barrels purchased in 1943 exceeds the cost in 1942, but will be limited to 15 cents per barrel. Manufacturers of tight cooperage (barrels, kegs and kits) will be enabled to sell at the same price as last year, as a result of a subsidy equal to the excess of costs of production after January, 1943, over costs of production in February, 1942. This subsidy is subject to profit control. A further subsidy announced in the quarter is payable on milk kegs and powdered milk barrels.

Paper Products (Subsidies).—As in the case of lumber, pulpwood costs have increased owing to the critical shortage of labour in the industry. In addition, curtailed production, owing to shortage of pulpwood, has raised overhead costs of newsprint production. In consequence the maximum price of newsprint was raised by \$4 per ton in September. The increase is not sufficient to offset the total in-

crease in costs since March, 1943, when newsprint prices were last fixed. At that time the maximum price was increased by \$4 per ton over the basic period level.

Owing to these increases in newsprint prices, manufacturers of certain paper products have not been able to continue production for sale under their ceilings, and subsidies have been arranged. Newsprint mills are paid a subsidy on sales to manufacturers of scribblers and counter cheque books, and are required to reduce their prices to these customers by the amount of the subsidy. On newsprint for scribblers the rate of subsidy is \$8 per ton, the total increase in price over the basic period, but manufacture of counter cheque books will be subject to a squeeze of \$4 per ton.

In the newsprint field further restriction of the consumption of newsprint was achieved by extending the system of quota rationing to publications other than newspapers and magazines. The order, issued in July, applies to publications having the style or format of a newspaper or periodical or distributed in the same way as a newspaper or periodical, or issued at intervals and containing advertising matter. Publications affected by the order must have a permit and may be assigned a quota by the Administrator in the same way as newspapers and periodicals. The main factors to be taken into account by the Administrator in allocating quotas are: (a) total available supply of newsprint paper, (b) methods of sale and distribution, (c) use of newsprint paper prior to November 1, 1942, (d) circulation changes prior to November 1, 1942, (e) minimum requirements and total volume of use, and (f) potential economies.

The labour shortage in the pulpwood industry has affected the supply of all types of paper, and necessitated the tightening of restrictions on both the manufacture and the use of various papers. Inventory control of book, writing and specialty papers was tightened in August, since a decrease in supplies was expected. Considerable revisions were made in the specifications set out in previous orders for the production of these papers. Restrictions in the manufacture of solid fibre-board and corrugated paper cartons were designed to increase production in the face of a critical labour shortage. Other simplification orders dealt with beer bottle cartons and cake cartons.

Prices, Retail and Wholesale, in Canada, November, 1943

Cost of Living, Prices of Staple Articles and Index Numbers as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index rose one-tenth of a point to 119.4 (1935-39=100) in November, to equal its previous war-time peak reached in September. The increase was due entirely to the food index which advanced 0.2 to 133.1 on higher seasonal quotations for eggs and butter, and scattered increases for meats. These outweighed small declines in fresh fruits and vegetables. Other main groups remained unchanged between October and November at index levels of 111.9 for rentals, 113.3 for fuel and lighting, 121.1 for clothing, 118.2 for home-furnishings and services and 108.3 for miscellaneous items.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table III) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of

the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Québec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table II is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The cost-of-living bonus provided for by the Wartime Wages Control Order (P.C. 5963, July 10, 1942, replacing P.C. 8253) must be based on the official cost-of-living index as adjusted to base 100.0 for August, 1939. For each rise of one point in the index the amount of the bonus or its increase shall be:— (1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized quarterly in the LABOUR GAZETTE under the title *Price Control in Canada*.

Wholesale Prices

The Dominion Bureau of Statistics composite wholesale prices index advanced a further 0.5 points to 102.4 in November, supported by price gains for agricultural and forestry products. In the vegetable group higher quotations for wheat, rye, potatoes, hay, rosin, lemons and oranges accounted for an advance of 0.7 to 94.8 for November, while a rise in animal products of 0.1 to 109.7 was influenced by increases in steers, hogs, butter, whitefish and lower grade eggs. These overbalanced weakness in eastern lamb and certain other meats, notably beef. Higher export prices for eastern spruce and hemlock lumber and western cedar shingles were reflected in a gain of 1.9 points to 115.8 in the composite index for this group. Other groups remained unchanged at 91.9 for fibres, textiles and textile products; 115.8 for iron and its products; 79.7 for non-ferrous metals; 100.5 for non-metallic minerals and 100.3 for chemicals and allied products.

Canadian farm products paralleled the rise in general wholesale prices to record an increase of 0.6 points to 104.2 in November. Higher prices for grains, potatoes, onions and hay advanced field products 0.5 to 91.3 while animal products moved up 0.7 points to 125.7 on strength in live stock and grade "C" eggs.

TABLE I—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939 =100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week. †Commodities in the cost-of-living index excluding rents and services.

(c) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the change indicated by these reports.

(d) Rents marked (d) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Union Wages and Hours in Printing Trades in the United States

FOLLOWING a practice established in 1907, the Bureau of Labour Statistics of the United States Department of Labour has made extensive annual surveys of union wages and hours in the printing trades in selected cities. Originally the study covered only 39 cities, but this number has been increased to the 75 cities in 40 States and the District of Columbia which are included in the current survey (Bulletin No. 739).

Wage Rates

It is stated in the Bulletin that the average union rate per hour for all printing trades in the 75 cities covered by the survey was \$1.255 on June 1, 1942. The average for the book and job trades was \$1.176 and for the newspaper trades \$1.408. Almost three-fifths of the union members in the printing trades had rates between \$1.10 and \$1.50 per hour—56.6 per cent in the book and job trades and 62.7 per cent in newspapers. Over 23 per cent of the book and job workers had scales of less than \$1 per hour in contrast to only three per cent in the newspaper trades.

The index of union rates in the printing trades increased 4.3 per cent in the year under review, raising the index to 119.00 (1929=100). The book and job group raised its index 4.2 per cent and the newspaper branch 4.3 per cent. Over 78 per cent of the quoted scales provided for some raises, benefiting more than 80 per cent of the members.

Hours of Work

Union agreements in the printing trades provided an average maximum work week of 38.8 hours in the cities covered by the survey. In the book and job trades the average was 39.4 hours; the 40-hour week was specified for 86.9 per cent of the membership. The newspaper trades had an average of 37.4 hours; almost half of the workers operated on a 37½ hour basis. Very few changes in hour schedules were made during the year ending June 1, 1942.

The indexes for all trades combined declined by one-tenth of one per cent to 87.4 (1929=100). The book and job index (89.4) showed no change, but the newspaper index was reduced by one-tenth of one per cent to 84.2. Overtime in the printing trades is practically always paid for at the rate of time and one-half.

The study now includes 11 book and job occupations and 8 newspaper occupations. It is pointed out that the union scale usually fixes the minimum wages and the maximum hours, and that more experienced and skilled workers may earn more than the union rate, especially during periods of prosperity. Further, as the study covered only contract scales with union members and as union strength varies from city to city and trade to trade the prevailing scale for any one occupation in any one city, may or may not coincide with the union scale. If practically all the workers in a particular trade belong to the local union the union scale will be equivalent to the prevailing scale. On the other hand, if the proportion of craftsmen belonging to the union is small, the union scale may not be the actual prevailing scale. It is stated too, that scales for apprentices, or for strictly supervising foremen or for persons paid unusual rates for some personal qualification, are not included in the study.

The following is an abstract from a table giving indexes of union hourly wage rates in all printing trades covered by the survey, by five-year periods, 1907-1942 (1929=100).

Year	Hourly Wage Rate		
	All Printing	Book and Job	News- Paper
1907.....	30.0	39.2
1912.....	40.7	39.3	46.0
1917.....	44.4	43.2	49.2

WARTIME WORK OF THE DEPARTMENT OF LABOUR

I.—Introduction

THE Department of Labour of the Dominion Government was established in 1900 under the authority of the Conciliation Act. From 1900 to 1909 the Department was administered by the Postmaster General, who was also Minister of Labour. It was constituted a separate Department under the Labour Department Act, 1909.

Between 1900 and 1939

At the outset the chief duties of the Department were: the administration of the Conciliation Act, designed to aid in the prevention or settlement of disputes; the administration of a fair-wage policy for the protection of workmen employed on Dominion Government contracts and on works aided by grants of public funds; the collection of statistical and other information on labour matters, and the publication of a monthly periodical—the *Labour Gazette*.

The work of the Department was greatly increased in 1907 by the passing of the Industrial Disputes Investigation Act. At the outbreak of the war in 1939 the Department was also administering an Act passed in 1918 known as the Employment Offices Co-ordination Act, the Government Annuities Act of 1908, the Technical Education Act of 1919, the Vocational Education Act of 1931, the Fair Wages and Hours of Labour Act of 1935, the Combines Investigation Act of 1923 as amended in 1935 and 1937, and the Dominion relief legislation. The Department was also responsible for collecting information relating to labour conditions in Canada for the use of the International Labour Organization of the League of Nations.

Conciliation and Labour Act, 1906

The Conciliation Act, under which the Department of Labour was created, was consolidated in 1906 with the Railway Labour Disputes Act of 1903. The Act was designed to aid in the settlement of labour disputes by making available the services of conciliators wherever there were differences between employers and workpeople which they themselves were unable to compose. The Act contemplated

the active friendly intervention of the Department in an effort to adjust them. No compulsion was to be applied to any party. The Department acted only on the request of a party to the dispute.

Industrial Disputes Investigation Act, 1907

This Act was passed after a stoppage of work in the Alberta coal fields in 1906 had emphasized the hardship imposed upon the community by stoppages in such vital industries. It gave full powers of investigation of a dispute to a Board of Conciliation and Investigation composed of three members representatives of the employers, the workers and the public. A notable feature of the Act was its prohibition of a strike or lockout until after the Board has submitted its report and recommendations. Limited in its application to employers of 10 or more workmen engaged in the operation of mines, railways, shipping, telegraphs and other agencies of transport or communication, and of gas, electric power and water works, the Act is based on the principle that industries vitally affecting the public interest should not be permitted, because of a labour dispute, to deprive the community of their products or services until an attempt has been made to bring the parties together and, failing settlement, until an inquiry has been made into the dispute and the public has been informed concerning the issues at stake and the recommendations made to resolve them.

Combines Investigation Act

Industrial combines which acted to the detriment of the public came within the purview of the Department of Labour under a Combines Investigation Act passed in 1910. This Act was replaced in 1919 by other measures aimed to give the Dominion Government power to control prices. This was at a time when wartime prices were pressing heavily on consumers, but the legislation was declared by the Privy Council to be outside the powers of the Dominion Parliament in time of peace.

In 1923 a more effective Combines Investigation Act was passed and its administration entrusted to the Minister of Labour. The numerous inquiries by the Registrar and the more formal investigations by commissioners appointed under this Act, some of them resulting in prosecution and conviction of offenders, have undoubtedly had a salutary effect, have kept the market open to a healthy competition and protected the consumer from unduly high prices.

Employment Offices and Technical Education

The war years 1914-18 revealed the need for inter-provincial clearance of information concerning jobs and unemployed workers, for more public employment offices than the provinces had provided, and for increased facilities for technical training. The Employment Offices Co-ordination Act, 1918, and the Technical Education Act, 1919, were designed to meet those needs. The former provided for grants to the provinces on a fifty-fifty basis for the maintenance of free employment offices, for the inter-provincial clearance of labour through two centres at Winnipeg and Ottawa, and for an information service on the labour market by the Dominion. Under the Technical Education Act the sum of \$10,000,000 was set aside for ten years to assist the provinces to extend their technical education facilities. As some of the provinces did not avail themselves of their share of the fund within the ten years, the statute has been re-enacted in subsequent years.

International Labour Organization

Another outcome of the last war which added to the responsibilities and usefulness of the Department of Labour, was the International Labour Office established as part of the League of Nations by the Treaty of Versailles in 1919. Canada had a seat on the Governing Body of the organization until the United States joined the I.L.O. in 1935. The Minister of Labour occupied this seat during those years. Since Germany withdrew from the I.L.O. Canada has again been represented on the Governing Body.

Canada's membership in the I.L.O. has been fruitful. Attendance at the annual conferences of representatives of government, employers and workers, and the publications of the I.L.O. have greatly enlarged knowledge of labour problems and made available information concerning methods of dealing with them in other countries.

Other Responsibilities

In 1922 the administration of the Government Annuities Act was transferred to the Minister of Labour. In 1927 the Old Age Pensions Act was passed and added to the Minister's responsibilities, but in 1935 its administration was transferred to the Minister of Finance.

Changes in Fair Wages Policy

During the thirties, the outstanding labour problems in Canada were unemployment and the low wages and poor working conditions which are likely to obtain in bad times. Such conditions were revealed by the Royal Commission on Price Spreads in 1934-35. One result of these revelations was a change in the Fair Wages policy in its application to contracts for government equipment and supplies. Previously, such contracts, like contracts for public works, contained a clause requiring contractors to pay wages which were current in the district for the sort of work required or, where there were no "current" rates, then fair and reasonable rates as determined by the Minister of Labour. But with the drop in wages in the early thirties, "current" wages in many manufacturing industries no longer were "fair and reasonable". Accordingly, the Government required contractors to pay at least 30 cents and 20 cents per hour to men and women over 18 years of age working on government supplies, and to pay the rates fixed by provincial authorities to those under 18. Above this wage-floor, higher rates were determined by the class of work done.

No change was made in the Fair Wages policy in relation to workers on government construction jobs except that in 1930 a statute replaced the order in council setting out the policy. The building trades were well organized in trade unions and the Government did not intervene in the wage field but continued under the statute to require payment on government work of "current" rates. In the matter of hours on government construction, however, the statute of 1930 limited the working day to eight hours except when exemption was permitted by order in council or, in case of emergency, by the Minister. Five years later the Fair Wages and Hours of Labour Act provided also for a 44-hour week for public works.

Industrial Relations

As business began to expand in the late thirties, the desire of workers to organize in trade unions and the refusal of some employers to recognize the unions in negotiations for agreements to cover wages and working conditions had occasioned many disputes. Several

provinces, under their legislative power over civil rights and hence over contracts of employment, had declared it unlawful for an employer to dismiss or threaten to dismiss workers on account of union membership or union activity. The Dominion Parliament's power was limited, but in 1939 it went as far as it could validly go in this field by inserting a section in the Criminal Code declaring it to be a criminal offence to dismiss or threaten to dismiss a worker, or discriminate against him in any way solely on the ground of union membership or activity.

In the years immediately before the outbreak of the Second World War, the Department of Labour was becoming increasingly concerned with the problem of collective bargaining. From 1936 onward the question of union recognition and the resentment over dismissals of workers for union activity outweighed all other factors in causing prolonged stoppages of work. Intensifying this situation was the knowledge on the part of labour that many American employers in the mass-production industries, steel, automobiles, farm implements, textiles, meat-packing and other industries, had accepted collective bargaining either voluntarily or under pressure of the U.S. National Labour Relations Act.

Wages and Standard of Living

With the start of the depression period in 1930 wages began to fall and continued to fall until an upward movement in hour wage-rates beginning in 1934 gradually brought them back to the level of 1930, which had been the highest since 1901 except in the boom year of 1920 when the high cost of living had neutralized the value of high wages. About the only major exception was in the building trades where higher rates had prevailed in 1926-1932.

According to the Dominion Bureau of Statistics the real value of average yearly earnings in factories in 1939 was almost 10 points higher than in 1931, while in 1931 it was 17 points above 1917. Thus, the increased hourly rates plus the greater number of hours worked in the manufacturing industries combined to raise earnings in 1939 considerably above the depressed level of the earlier thirties and actually to push them to the highest point in Canadian history. This statement relates, of course, to the general level. There were still a number of plants and areas where wages had not fully recovered from the low point of the depression years.

Unemployment

During the depression of the thirties relief to the unemployed and aid to the distressed agricultural areas was given by way of Dominion Government grants to the provinces.

A National Employment Commission was appointed in 1936 to study the problem of unemployment and make recommendations for coping with it. Some recommendations of the Commission were acted on while it was still sitting; others were given effect to after publication of its final report in 1938.

A Youth Training Program was set up in 1937 for unemployed persons between 18 and 30 years of age. The scheme was a co-operative one between the Dominion and the provinces with certain financial assistance where necessary to trainees. The Youth Training Act, 1939, gave statutory effect to the scheme.

Considerable slack in the building and ancillary trades was taken up by a Home Improvement Loans scheme suggested by the Commission, and by the operation of the National Housing Act of 1938.

Other recommendations by the National Employment Commission acted upon by the Government were the construction of highways in connection with mines, tourist traffic, etc., a farm placement scheme and alternative plans to provide winter employment in the primary industries for single, homeless men.

Unemployment Insurance and Employment Offices

One of the National Employment Commission's proposals was for the setting up by the Dominion Government of a system of unemployment insurance, also for the reorganization of the Dominion-Provincial employment service which had been in operation since 1919 under authority of the Employment Offices Co-ordination Act already referred to.

Employment offices, of course, play a very necessary part in any nation-wide system of unemployment insurance. So in 1939 the Dominion Government embodied the two proposals in an Unemployment Insurance bill and then set about getting an amendment to the constitution to give the Canadian Parliament authority to pass it. This authority was obtained in 1940, and the Unemployment Insurance Act was passed without further delay.

The Act provided for a nationally operated and nation-wide Employment Service to take the place of the service which had been operated by the provinces and assisted by grants from the Dominion treasury. It is, of course, the business of the Employment Service to try and find a suitable job for every employable person who applies to it. If such a job cannot be found, then the Act provides that the unemployed applicant shall become eligible for unemployment insurance benefits.

It should be interjected here that though the Employment Service was designed for peacetime purposes, it becomes of great value in wartime. Its local offices distributed throughout the country are indispensable in the carrying out of any manpower policy. The Department of Labour made every effort, therefore, to get this service going without undue delay. In 1940 there were in Canada only 75 employment offices, with staffs totalling about 425, operated by the provinces. In March 1942, there were 109 employment offices in operation with staffs totalling 1,570 persons. Today there are local offices at 211 points as well as Regional offices in 5 cities across Canada, with a total staff of 4,560 men and women all of whom have either received or are still receiving special training for the work. Much of this staff increase has been due to the introduction of National Selective Service which will be referred to later under the heading of Manpower.

The Unemployment Insurance Act is administered by a Commission of three members, one of whom was appointed after consultation with organized labour and one after consultation with representatives of employers. There is also an Unemployment Insurance Advisory Committee of from 5 to 7 members, of which one member at least must be appointed after consultation with organized labour and an equal number after consultation with employers' organizations. The Commission is under the general control of the Minister of Labour.

Employers and employees contributed to an Unemployment Insurance Fund, and the Dominion government makes a grant of one-fifth of these aggregate contributions, and also defrays the cost of administration.

The Act provides for Courts of Referees consisting of a chairman and one or more members chosen from panels representative of employers and the same number of panels representative of insured persons. The Courts are empowered to give decisions on all claims for benefits referred to them by Insurance Officers and appeals by claimants.

The benefits of unemployment insurance apply to all persons who are employed under a contract of service or apprenticeship, with certain exceptions. These exceptions include workers in agriculture and forestry, fishing, lumbering and logging, transportation by air or water, stevedoring, private domestic service, and workers earning more than \$2,000 a year.

On September 1, 1943, this wage "ceiling" was removed for persons employed on a weekly, daily, hourly or piece rate basis, and for those employed by the month or year it was

raised to \$2,400. An Order in Council in 1942, had already adjusted the "ceiling" for persons whose earnings have increased because of war conditions.

This extension of the coverage of the Act emphasises the post-war importance of the Unemployment Insurance Fund and the machinery of the employment offices. For the unemployment that is bound to occur in some measure in the transition from war to peace the operation of the Unemployment Insurance Act will ease and shorten, if not eliminate, the out-of-work period for many workers.

Second World War, 1939

At the outbreak of the war in 1939 the Department of Labour had a staff of 210 persons in Ottawa and an outside staff of 35. The outside staff included conciliation officers at Montreal, Toronto and Vancouver whose chief responsibility was mediation in labour disputes with certain added duties arising out of the Fair Wages policy.

The development of Canada's war labour policy necessitated the setting up of many new branches of the Department and of boards acting under authority of the Minister of Labour. This involved continual additions to the staffs with the result that to-day after four years of war the Department's personnel numbers more than 7,000 officers and employees located in Ottawa and distributed throughout the country.

War Labour Policy

Three major factors affected the determination of a Canadian war labour policy. One of these was the division of authority between the Dominion and the provinces. Most "protective labour legislation," as it is called, is provincial. Such legislation includes laws regulating employment in factories, shops and other work-places and providing for their inspection. Such legislation also regulates the work of young persons and women, fixes minimum wages and maximum hours of work, at least for women and juveniles. Laws of this kind are to be found in all the provinces, except Prince Edward Island; but their provisions vary from province to province.

Another factor was the fact that the war production departments of the Government approached industrial matters from a point of view somewhat different to that of the Department of Labour. It was natural that those departments so vitally concerned with war contracts should want them completed with the

utmost possible speed. They, on the one hand, felt that long-established labour standards should give way to the exigencies of war. The Department of Labour, on the other hand, administers laws and regulations which embody rights that labour has gained over the years and which the Department was loath to have set aside except as vital necessity required.

Recognition of the fundamental rights of labour in this respect was incorporated into successive wage control orders which declared that any changes in labour agreements or practice would be fully restored after the termination of the war.

The third factor had to do with the divergent interests of employers and employees. It has not always been easy for the Dominion Government to get a clear expression of these interests. References are sometimes made to the practice of the British Government and of British employers of consulting on vital issues with the British Trades Union Congress. However, it should be pointed out that it is

one thing for the British Government to formulate a policy after consultation with the Trades Union Congress and another thing for the Canadian Government to do the same thing on the basis of the sometimes conflicting attitudes and advice of the three principal Canadian trades union organizations. The policies, objectives and methods of Canadian labour bodies are not always parallel; and so far as securing the viewpoint of employers is concerned, there is in Canada no precise equivalent to the Federation of British Industries.

A further problem grew out of the concentration of industry in the two central provinces, which made it difficult to spread wartime employment evenly over the country so as to absorb all those still unemployed as a result of the depression years.

For the purposes of this article Canada's war labour policy has been summarized in the following pages under four main headings: Wages Policy, Manpower, Industrial Relations and Post-War Projects.

II.—Wages Policy

As stated in the introduction, the wages situation in 1939 was, in general, favourable and real earnings, due to greater volume of employment, were higher than ever before. There were, however, some plants, some classes of workers and some areas in which wages were relatively low.

The Government's policy, therefore, was directed: (1) to maintaining the wage level and ensuring as far as possible against increases in the cost of the basic necessities of life by controlling prices and by other measures, and, (2) to adhering to its fair wages policy so that workers on Dominion Government contracts should have "current" or fair and reasonable wages and hours.

Wages Stabilization

Causes of Inflation

Promptly on the outbreak of war, the Government announced its intention to combat the inflationary forces which were bound to be set in motion by the diversion of the nation's resources and manpower from civilian uses to war purposes. The Government was mindful of the experience of the last war and its aftermath, when prices soared while wages failed to keep up with them and then both slumped

disastrously as industry struggled to recover from the dislocation caused by the war and the temporary boom of 1920. The production of munitions and war supplies and the amount of foodstuffs exported to the Allied Nations have been far in excess of the production in 1914-18. All this vast war production involved a corresponding expansion of employment and earnings. But it also involved a much greater diversion from civilian production than in the last war, and as shipping losses and the fortunes of war seriously curtailed the import of goods, a scarcity of many commodities was created which was unparalleled in 1914-18. Therefore, with plenty of money available for spending and fewer goods to spend it on, prices, if uncontrolled, were certain to rise rapidly. Uncontrolled, these inflationary tendencies would bring hardship to many, and benefit only the profiteer.

To the wage- or salary-earner inflation means an increased cost of living resulting in the deterioration of the real value of his wages and of his savings, pension or insurance. To the employer it means a drastic reduction in the value of his investments. In order to check inflation it was considered necessary to impose some measure of control over prices, purchasing power and the distribution of goods,

materials and services. Wages and salaries represent a very large part of the purchasing power in the country. They are factors, too, in the cost of production and distribution. If, therefore, production and distribution of goods are to be continued at controlled prices, it is regarded as essential that control must be exercised also over salaries and wages.

Government Policy

To ensure as equitable a distribution as possible of the economic sacrifices which war demanded was the basis of the Government's policy in this field. It was designed to control in some measure the income available for spending on civilian goods, to ensure an adequate supply of men and materials for the needs of the war and of the community, and as far as possible to protect all against the day when the war would be over. The control of prices, profits, wages and salaries, higher taxes on incomes, encouragement of loans to the Government through the medium of war savings certificates and bonds, and, later, the introduction of a compulsory savings scheme and the rationing of certain commodities were all part of the program devised to carry out this policy. The program was put into effect by stages as conditions warranted.

Initial Control Measures

In the first two years of the war, prices of selected commodities were controlled, excess profits were taxed, the corporation income tax was greatly increased and the personal income tax sharply increased in successive stages. War savings certificates and bonds encouraged the turning back to the Treasury of part of the rapid increase in earnings. As regard wages, workers were urged not to press for increases except where rates were unduly low, and in December, 1940, boards of conciliation and investigation considering disputes over wages were instructed not to recommend increases in basic rates above the highest rates in effect during the high wage-rate period 1926-29, but to recommend that, where the cost of the necessities of life was found on quarterly investigations to have risen by at least 5 per cent, the employer should pay a flat cost-of-living bonus, the same for all workers, on a scale set out in an Order in Council (P.C. 7440).

By the fall of 1941 the situation called for more drastic action. There was already a shortage of some commodities and evidence that a broad inflationary rise in prices was developing. The rapid expansion in the industrial program after the fall of France, the growing scarcity of labour, the excess profits tax and the necessity under the circumstances

of letting contracts on a "cost" basis were major factors in continued wage and price increases.

Controls Extended

An Order (P.C. 8253) under the War Measures Act in October, 1941, established, with some exceptions, an overall price "ceiling" and stabilized wages. Shortly after, salaries were stabilized (P.C. 9298). Later, the excess profits tax was amended to prevent any company retaining more than 70 per cent of its pre-war profits.

The prices of goods and of most services were fixed at the highest prices at which they had been sold during the four weeks from September 15 to October 11, 1941, unless increases were permitted by the Wartime Prices and Trade Board.

Wages of all workers who received less than \$175 a month or who were not above the rank of foreman were stabilized at the rates in effect on November 15, 1941, but provision was made for a cost-of-living bonus. Salaries were held to the level of November 15. Provision was made whereby wages and salaries could be increased within the limits of the range in effect at the time of the order, adjustments could also be made when a higher or lower grade of duties was assumed, and, in the case of wage-earners, with the approval of a War Labour Board, an increase in basic rates could be granted where existing wages were found to be lower than the prevailing rates for the particular occupation in the locality or in a comparable locality.

Adjustments in the cost-of-living bonus are made quarterly by order of the National War Labour Board. When the cost-of-living index of the Dominion Bureau of Statistics rises or falls by one point, the bonus is increased or reduced by 25 cents per week in the case of adult male workers and all others receiving \$25 a week or more, and by one per cent in the case of males under 21 employed at less than \$25 and of women and girls working for less than \$25 a week.

War Labour Boards

The Wartime Wages Control Order, of July, 1942, (P.C. 5963) consolidated the order of 1941 and its amendments. Like its predecessor, it is administered by a National War Labour Board and a Regional Board in each province. Until February 11, 1943, these Boards, made up of an equal number of representatives of employers and employed, were presided over by the Dominion and provincial Ministers of Labour. On that date, the National Board was reconstituted as a three-man body on a full-time basis, (P.C. 1141). Shortly afterwards, it was

decided to allow, under certain circumstances, appeals to the National Board against decisions of the Regional Boards and to permit interested parties to put their case before the National Board. The representative members of the first National Board now act as an advisory War Labour Committee to the permanent Board.

To avoid the expense and duplication which would have resulted had a large staff of inspectors been appointed to enforce the Order, arrangements were made to utilize the services of the inspectors of the Unemployment Insurance Commission to report apparent violations to the War Labour Boards. Under a co-operative scheme between the Dominion and the provincial Departments of Labour the provincial inspection services also assist in enforcing the wages stabilization order and the fair wages policy.

The National Board was empowered to inquire and report to the Minister from time to time, as it deemed advisable, on matters pertaining to labour relations in Canada, and one of the first official acts of the reconstituted Board was to arrange for a public inquiry into all phases of the subject.

In May 1943, provision was made for setting up a Western War Labour Board to have jurisdiction over defence projects in Alberta, British Columbia and the Yukon and Northwest Territories. As in the case of the other War Labour Boards, representatives of both employer and employee interests will sit on the Western Board.

Effectiveness of Controls

It is of interest to note the influence which price and wage controls have had on the cost of living. From the beginning of the present war to October 1941, during which period partial measures of control were being tried, the cost of living rose 14.6 per cent. Between October 1941, when more positive measures of price control and wage stabilization were put into effect, and September 1943, the cost of living rose only 3.4 per cent. This represents a total rise of 18.5 per cent after 48 months of war. Under the uncontrolled economy of the First Great War the cost of living after 48 months of war had risen 54.5 per cent.

It is contended that had it not been for the price and wage controls of the present war, Canada would be experiencing in even greater measure some of the evils of inflation, and the problems of present war financing and post-war reconstruction would unquestionably have become much more difficult.

Fair Wages Policy

During the war, changes have been made in the fair wages policy to give greater assurance that fair wages will be paid and to raise the minimum rates for workers in factories engaged on government contracts.

As regards minimum rates, it was stipulated in May, 1941, that men and women working on government supplies should be paid not less than 35 and 25 cents an hour respectively, an increase of 5 cents. Lower rates were fixed for learners and for those under 18. Later in the year, these rates were made applicable to all the workers in plants where government contracts were being carried out and further protection was given to young workers by fixing a minimum of 20 cents for all under 18.

The National War Labour Board was made responsible for investigating claims for wages by workers on both contracts for construction and contracts for manufacturing supplies. Definite procedure was laid down for settling claims.

In connection with its enforcement of the fair wages policy the National War Labour Board has taken over from the Department of Labour the work of providing (a) fair wage schedules to all Government departments making construction contracts, and (b) prevailing rate schedules for civilian employees of Government departments who are not members of the Civil Service. The annual survey of wages paid by representative firms in all Canadian industries which has been conducted for many years by the Statistics Branch of the Department is now made by the Board and the data are collected from a greater number of employers. They include the regular and overtime rates of wages for the main occupations, the hours of labour, the amount of the cost-of-living bonus and the number and sex of the workers.

III.—Manpower

This section opens with a general review of the Dominion Government's manpower policy. It traces briefly the policy's growth and refers chronologically to the various branches and services it has been found necessary to set up within the Department of Labour as the policy took definite shape and the manpower needs developed.

Following and growing out of the National Registration taken in 1940, these branches and services include War Emergency Training, Wartime Bureau of Technical Personnel, Employment Service, National Selective Service, an Agricultural Division, a Labour Priorities Division, organizations for utilizing the labour of prisoners of war and evacuated Japanese, a Women's Welfare Division, and a Military Mobilization Division. Each of these branches and services is dealt with in the latter part of this section under its own sub-heading.

General Review

Canada's manpower policy developed gradually. When war broke out there were about 400,000 Canadian workers unemployed. Thus there was for a time a substantial reserve of unemployed manpower upon which both the armed forces and industry could draw. But during 1940, particularly after the fall of France, heavy voluntary enlistments and expansion of our war production cut heavily into this reserve. Employers began to bid against each other for workers, particularly skilled workers. Labour turnover was high. To ease the situation an order in council was passed in November 1940, prohibiting employers from advertising for or offering jobs to workers who were already engaged in war industry.

In the summer of 1940, in anticipation of manpower shortage, a National Registration was conducted to obtain full information about all persons 16 years of age and over. At the same time an over-all estimate was made of the country's manpower requirements for the armed services, war production and essential civilian production. The results showed not only the obvious shortage of skilled workers but a threatening shortage of semi-skilled workers as well. This led to the development of the War Emergency Training program which was grafted onto the existing administration for the training of unemployed youth. Under this program the Dominion Government, in co-operation with

the provinces, made use of all the facilities of vocational and technical schools for the pre-employment training of semi-skilled workers.

Canada's rapidly expanding war effort created a heavy demand for trained technical personnel. Early in 1941, therefore, the Wartime Bureau of Technical Personnel was established. This Bureau may be roughly described as a specialized employment inventory for engineers, chemists, and other professional technicians. Administered by the Department of Labour in co-operation with the professional societies, it was at first simply a facility offered to those who wished to use its services; but it has developed into an agency for the control of such personnel under regulations which set the pattern in some degree for general manpower policy.

In 1940 and 1941 employment offices were set up throughout the country under the Unemployment Insurance Act, 1940. Although not actually passed until after the outbreak of the war, this Act is really a peacetime measure. The employment service, therefore, has been briefly reviewed in the section of this article dealing with pre-war activities of the Department. It should, however, be stated here that on the work of the employment offices the whole success of Canada's manpower policy depends.

In March, 1942, following a series of studies in 1941 the National Selective Service policy was announced and began to be applied in a series of gradual steps roughly in pace with the development of the Employment Service and the setting up of local employment offices.

The heart of the policy is a schedule of labour priorities with steadily increasing control over the movement and allocation of labour. Under its regulations numbers of workers have been directed from non-essential jobs to take essential employment elsewhere. Employers in civilian industries have been instructed to release men between the ages of 16 and 40 who for medical or other reasons are not in the armed forces, and such men have been assigned by Selective Service Officers to essential jobs. Workers who are unemployed for more than two weeks may be directed to take any suitable essential job. All men between the ages of 18 and 64 who have had experience in coal-mining, and all men in Nova Scotia and New Brunswick who were formerly longshoremen may be directed back to employment in the mines or on the

docks as the case may be. A system for ensuring a supply of longshoremen at Halifax has been carefully worked out. Any man between 16 and 64 may be directed to accept employment in cutting wood fuel, fishing or fish processing.

Special arrangements apply to agricultural workers, whose importance has increased as the war has advanced. Shortly after National Selective Service was established in 1942 an Agricultural Division was set up to give special attention to farm labour requirements. In 1943 arrangements have been made to use prisoners of war and Japanese evacuated from British Columbia in farm work and in the cutting of wood fuel.

In the Spring of 1942 a Labour Priorities Division was set up to draw up a definite labour priority classification as a guide for Selective Service Officers when directing workers from one kind of employment to another of greater essentiality.

In September, 1942 a Welfare Division of the National Selective Service was set up to study and deal with the welfare problems connected with the recruitment of many thousands of women into industry, and into jobs formerly done by men only.

In December, 1942 the mobilization machinery for the army was transferred from the War Services Department to the National Selective Service branch of the Department of Labour. With the transfer, both military and civilian manpower needs have been co-ordinated under one authority. In this connection it should be stated that the National Registration taken in 1940 is being kept up to date by the Department of Labour, and is serving as a basis for the military call-up.

Since 1939 it has been necessary for the Department to extend the activities of its Research and Statistics Branch. The work of this branch in connection with research and statistics on manpower is briefly described at the end of this section.

National Registration

In August, 1940, a National Registration in Canada was carried out by the newly-created Department of National War Services. The purpose was to register the potential manpower resources of the country and to provide a means of identification of individuals. All persons residing in Canada of every nationality, sixteen years of age and over, were required to register. The total registration was 7,862,920 persons, consisting of 3,979,680 males and 3,883,240 females.

In March, 1942, the National Registration together with all its records and personnel

was transferred to the Department of Labour. Much use has since been made of these records for purposes of Selective Service. The names and addresses of men experienced in the heavy metal trades, of coal miners, and of stevedores and dock-workers, have been listed. Information has been furnished to the Dominion Bureau of Statistics in connection with a survey of the movements of the population. In July, 1942, the names and latest addresses of 10,813 doctors were supplied to the Director-General of Army Medical Services. Lists of names and addresses of boys of ages 16, 17 and 18 have been supplied to organizers of Sea Cadet corps.

In December, 1942, the public was reminded by radio and by newspaper advertising of the importance of keeping their registration up-to-date in respect to change of address, and so on, and at present brief radio announcements on the subject are being made at intervals. All employers are required to see that their employees possess National Registration certificates.

A staff of about 350 employees is required to keep the registration up-to-date and to furnish the information required by the National Selective Service and other government departments.

War Emergency Training

The Department of Labour's program for War Emergency Training grew out of the vocational training scheme for unemployed young people (generally known as Youth Training) which was started in 1937, when Parliament voted \$1,000,000 for that purpose. A further \$1,500,000 was voted in 1938, and agreements made with the provinces for various types of training to be undertaken, the cost to be on a fifty-fifty basis except that each province would bear its own administration cost. In 1939 the Youth Training Act was passed setting aside \$1,500,000 a year for the next three years. (In 1942 the Youth Training Act was replaced by the Vocational Training Co-ordination Act, which will be referred to later.)

The Youth Training scheme covered many forms of training for young men and women between the ages of 16 and 30 including training for industry, home service for women, forestry, mining, prospecting, and many forms of agricultural training.

Following the outbreak of war revisions were made in the projects carried on under the Youth Training scheme, many of the former ones being discontinued and others started which would be more useful to the

war effort. Early in 1940 the co-operation of the provinces was obtained in inaugurating training for tradesmen for the armed forces and for prospective workers in war industries. Arrangements were made to use the vocational shops of the technical schools throughout the country during the summer vacation period, with the Dominion government bearing almost the full cost of the training.

A scale of subsistence allowances was adopted for those enrolled in full-time classes, higher amounts being allowed when trainees were living away from home. Later these subsistence allowances were increased in order to swell the number of trainees. Certain travelling expenses were also allowed.

From the beginning every effort was made to maintain the closest contact with employers to ensure that the training given was in line with their requirements. Employers were encouraged to sponsor individual trainees and whole classes.

Under this War Emergency Training program the original minimum age of 16 was retained but no maximum age was set. At the outset nearly all the trainees were men, but in 1942 the number of women trainees increased substantially. During the first half of 1941, trainees were graduated from the schools more quickly than they were being absorbed in industry; but practically all of them were later placed in employment. At no time has there been a shortage of training facilities to meet the demands of industry. Since the end of 1942 there has been a marked decrease in the monthly number of men trainees and some of the training centres which have served their purpose have been closed. At present there are about 110 training centres in operation.

Training in War Industries

Special mention should be made of the consideration which has been given to the aircraft manufacture and overhaul industry. As far back as 1938, more than a year before the Germans invaded Poland, under the Youth Training program certain provinces were asked to start classes to train workers in aircraft manufacture. After war was declared there was a tremendous jump in the number of trainees in this type of work. Following conferences with the Director General of Aircraft Production in January, 1942, certain key men selected from the various aircraft industries were sent to a special school in California for three months' training. A home study course also was given to over 1,100 key employees. One half the cost of this special training was borne by the Department of Labour.

The shipbuilding industry has been given special attention by means of pre-employment classes, part-time classes and plant schools for shipyards engaged in naval as well as merchant ship construction. Special training centres for this industry have been established with particular success on the Pacific Coast. This training project has been worked out in co-operation with the management of the yards and the trade unions concerned.

Craftsmen in Armed Forces

The original Youth Training scheme and its successor, the War Emergency Training, have both been of service to the Royal Canadian Air Force. In the spring of 1939, six months before war was declared, at the request of senior officers of the R.C.A.F., arrangements were made, with the co-operation of provincial governments, to train ground mechanics for the Air Force. The first centres were opened in June, 1939, and from then on there has been a continuous expansion in this type of training. In the fall of 1941, special centres were opened to provide educational training, chiefly in science and mathematics, for pre-aircrew personnel. These schools have been carried on ever since.

Classes for Army tradesmen were started in the fall of 1940 at the request of local commanding officers. In 1941 at the request of Army Headquarters, a regular plan was put into effect for providing three months' training in a wide range of Army trades. Early this year the Army inaugurated a plan to train boys between 17 and 18 as tradesmen and asked War Emergency Training to provide the facilities.

The Navy was the last of the three armed services to request trades training. Early in 1942 classes were held in five or six Navy occupations. The courses lasted from 3 to 8 months. As in the other two services, all trainees are enlisted Navy personnel and referred to the centres by the Navy for training.

From the beginning of War Emergency Training up to June, 1943, more than 253,000 men and women have received training. This figure includes over 84,000 tradesmen already in the armed forces. During the same period more than 80,500 are known to have been placed in employment, while nearly 2,000 are known to have joined the armed forces after taking their training.

Rehabilitation Training for Ex-Service Men

In August, 1942, the Vocational Training Co-ordination Act was passed, replacing the Youth Training Act. The new Act provides for carrying on any training essential to the war effort either for the armed forces or for industry. It also provides for rehabilitation

training for discharged members of the forces, for the continuation of projects formerly carried on under Youth Training, and for such other forms of training as may become necessary in the post-war period. This will make the Act a powerful instrument of post-war rehabilitation and reconstruction.

The Vocational Training Co-ordination Act provides for a council to advise the Minister of Labour. This council of 17 members represents employers, organized labour, technical schools, women's organizations, war veterans and agricultural organizations.

The training of discharged members of the armed forces began on a small scale during the fiscal year 1942-43, but is now beginning to increase in volume. Suitable procedure governing the responsibilities of the Department of Pensions and the Department of Labour regarding this type of training has been worked out. Recently a procedure has been devised to provide supervised training in industrial and commercial establishments.

Foremanship Training

The rapid expansion of many companies created problems in foremanship and labour supervision, so steps were taken in co-operation with provincial governments to provide some intensive courses for this type of personnel. Three classes of training were set up, namely, Job Instructor Training, Job Relations Training, and Job Methods Training. These classes are put on from time to time in various Canadian industrial centres and are made available to all industries engaged in war production. Up to the present time some 29,000 certificates from one or more of the classes have been issued to foremen, charge hands, and others in a supervisory capacity in industry.

Assistance to University Students

Reference should be made here to financial assistance given to university students who had attained good academic standing but who were unable to continue their university courses without financial help. After the Youth Training Act was passed in 1939 contributions on a fifty-fifty basis between the Dominion government and certain provinces were made in a limited number of cases. In the fiscal year 1942-43, in co-operation with the Wartime Bureau of Technical Personnel and the Department of National Defence a comprehensive plan for aiding needy students was worked out, designed particularly to assist students in engineering and science, also students (other than first year students) in medicine and dentistry who had agreed to make their services available when required for the war effort. Schedules were adopted on a

fifty-fifty basis in all provinces except Ontario, special Dominion funds being made available to Ontario universities. In addition, financial assistance has been given to universities which have re-arranged their programs in order to accelerate their medical and dentistry courses. During the fiscal year 1942-43 assistance was given to 2,154 students. Since then provision has been made to assist certain other students, such as nurses in training, social workers and forestry engineers.

Wartime Bureau of Technical Personnel

Early in the war a critical shortage of engineering, scientific and technical personnel developed due to heavy enlistments in the armed forces. Therefore in 1941, with the aid of the professional engineering societies, there was established in the Department of Labour the Wartime Bureau of Technical Personnel. The Bureau works under the guidance of an Advisory Board composed of representatives of the engineering, mining and chemical institutes, the universities and the Canadian Manufacturers Association.

The Bureau's task was to find the engineers and chemists needed for Canada's rapidly expanding war effort. It, therefore, set about finding out (1) the actual need for technical men, (2) the total number of such men available, (3) the training and experience of each individual, (4) the essentiality of the work they were engaged in, and (5) their willingness to transfer to more essential duties.

From the records of the National Registration taken in 1940, a list was soon prepared of men who had registered themselves as engineers, architects and chemists. To such men questionnaires were sent and in due time routines were developed for classifying and indexing questionnaires, for handling inquiries for additional technical staff and directing available men to suitable employment, for advising individuals and organizations as to the essentiality of occupations, for assisting National War Services Boards in dealing with the cases of technical men called up for military training, and for securing as complete a register as possible of the available technical personnel in the country. During 1941 valuable assistance was given to war industries in their search for additional technical staff to an extent that would have been quite impossible if such record had not been compiled.

As operations expanded it became advisable to have representatives of the Bureau assigned to various Canadian industrial centres where they would be available locally for personal interviews. Suitable men were chosen, brought to Ottawa for training, and then

assigned to various cities. At present there are representatives in Halifax, Montreal, Toronto, Hamilton, Winnipeg and Vancouver. There are also honorary representatives at Quebec and in the Maritime Provinces outside of Halifax. These representatives secure specific information, as required, about individuals and about employers, and they furnish advice and information regarding government policy as it affects technical personnel. About one-half of the 11,731 interviews recorded during the fiscal year 1942-43 were conducted by regional representatives, and many engineers and scientists were advised as to how they might best be employed to serve the national interest. During the fiscal year 1942-43, the Bureau received 1,078 inquiries from employers for technical personnel, and 899 civilian placements were made. In addition the Bureau assists the armed forces in their search for engineers and scientists needed as technical officers. In August, 1942, the Department of National Defence seconded an officer to the Bureau, and by July, 1943, no less than 272 candidates referred by the Bureau had been accepted for technical appointments in the armed forces. In addition, out of 1,360 male students in the 1943 graduating classes in science and engineering, no less than 531 had been appointed up to July 31 as technical officers in the armed forces. Of the remaining graduates, 525 have taken essential civilian employment, while 111 are returning to the universities to engage in instructional and research work.

As the main source for new supply of technical men is the output of the engineering and science faculties of the Canadian universities, the Bureau has taken a definite interest in such matters as the numbers of students and the methods of training in science courses. In this connection the Department of Labour in 1941 made arrangements for financial assistance to be given to needy students of good academic standing. This resulted in the enrolment for the university session 1942-43 of more than 500 students in first-year science courses* who otherwise would have been unable to attend.

In order to further the professional training of science undergraduates during summer vacations, war industries were circularized in the winter months with the result that in the summer of 1942 some 2,500 openings were found for undergraduates. Information regarding these openings was compiled and posted

in the universities for the benefit of their science and engineering students. Similarly, over 4,600 openings were found for the summer of 1943. During the summer of 1942 a number of third-year students were enrolled in the army for training, returning to the universities in the autumn. This saved time in preparing them for service as technical officers after graduation. This procedure was repeated last summer, both for the army and the navy.

Another field in which the Bureau assists the armed forces involves the best use of technically trained men already serving, but in a non-technical capacity. Both from individual records and from notices of cessation of civilian employment which reach the Bureau, such cases are often discovered. In the case of the army they are referred at once to the Directorate of Personnel Selection so that an army examiner may test the man's suitability for a technical appointment.

The Director of the Bureau is Mr. H. W. Lea, a graduate of McGill University in civil engineering, who is on leave of absence from his company, Automatic Electric (Canada) Limited. Other officers of the Bureau are in most cases on leave of absence to the Department of Labour from the universities and industrial corporations, and are well qualified by training and experience for the work they are doing.

Training for Personnel Work

The sudden expansion of plants from a few hundred workers to several thousands at once created a great demand for trained personnel workers. In order to meet this problem, early in 1942 the Department of Labour in co-operation with seven universities sponsored short, practical courses in personnel management. Ten such courses of four weeks' duration have been given to over 500 students, nearly all of whom are now actually engaged in employment and personnel work. The courses have helped to broaden the understanding and application of sound principles to this field.

Mr. W. H. C. Seeley of the Toronto Transportation Commission has served as director of Personnel Training.

National Selective Service

The purpose of National Selective Service, which came into effect in March 1942, was to make possible "the orderly and efficient employment of the men and women of Canada for the varied purposes of the war." It provided for the direction of the country's

*In addition, there were more than 1,600 other students who received financial help through the War Emergency Training program.

utmost effort on three fronts—the active service front, the industrial and labour front, and the agricultural front.

The primary responsibility for this extended scheme of manpower control was placed upon the Minister of Labour, while the administrative responsibility was vested in a Director of National Selective Service.

To carry out a program of National Selective Service full use would have to be made of employment offices. In order to avoid duplication of services it was decided to use the offices and staffs of the Unemployment Insurance Commission for the purposes of National Selective Service for the duration of the war.

The operation of Selective Service through the employment offices fell into four stages. The program could not move more rapidly than the existing administrative machinery could take up the load. Heavy increases in operating staffs were necessary, and men and women trained in such work were becoming harder to find. Then, too, the program could not be pushed too far ahead of public opinion. In industry, compulsion is limited in value. It must have proper support. From March 1942 to July 1942, therefore, action was limited to prohibiting men between 17 and 45 from entering certain restricted occupations without written permission of a Selective Service Officer, also to preventing agricultural workers from leaving their work (except to join the armed forces or take compulsory military training) without such permission.

During the second stage, from July, 1942, to September, 1942, it was ordered that (except in agriculture and certain other occupations) no employer should take any person into his employ except through an employment office. During these two stages employers and workers had a chance to become familiar with the employment offices, which had been increased in number.

In the third period, beginning in September, 1942, a schedule of labour priorities was established which assessed for the first time the relative importance of all labour requirements. Industries as a whole and selected firms were classified as having either very high, high, low or no labour priority. Before this schedule was set up placement officers could direct labour only by personal impressions of relative values.

The requirement that employers generally could not engage workers who had not received a permit to seek employment gradually compelled employers to advise the offices of job openings. Similarly, all job seekers compelled to register at the offices got into the

habit of using them. The control of advertising helped to check labour "poaching". A requirement that employers or employees must give seven days' notice of separation from employment helped to reduce labour turn-over. This requirement does not apply during the first month of probationary employment nor to employment in building construction.

In December, 1942, administration of regulations under which men may be called up for compulsory military training was transferred from the Minister of National War Services to the Minister of Labour. The stage was now set for putting into effect an all-embracing manpower program. In December and January two main sets of manpower regulations were passed. One of these was the National Selective Service Mobilization Regulations, providing for the call-up of men for the armed forces; the other was the National Selective Service Civilian Regulations, governing the allocation of manpower in industry. These two sets of regulations, which have been amended as circumstances have required, give effect to the present manpower policy.

The fourth stage began in May, 1943, when the National Selective Service began the compulsory transfer from non-essential employment to agriculture and highly essential industries. This action was taken under Section 210 of National Selective Service Civilian Regulations whereby the Minister of Labour was given power to issue orders forbidding employers in specified industries to continue the employment of men in designated age groups after a specified date unless a special permit was obtained.

The first of such Orders, issued on May 4, covered men from 19 to 25, married or single, and certain men from 26 to 40, who were employed in certain industries listed as non-essential or who were following certain occupations. Each man was to report to the nearest Employment and Selective Service Office where, if there was no higher priority work available, he would be given a special permit to continue his old employment on a temporary basis. If, on the other hand, more essential employment was available, he would be directed to such employment.

Four further orders of this character were issued at intervals, and in August, 1943, was issued the Sixth Compulsory Employment Transfer Order. This Order affects all men in a lengthy list of employments who are between the ages of 16 and 40 (both ages inclusive) irrespective of marital condition and whether covered by the mobilization regulations or not. Under this Order it is illegal for any employer to continue to employ any man covered by the Order except under special

National Selective Service permit, and employees affected must register and be available for transfer to higher priority work.

Future compulsory transfer orders will cover all males from 16 to 40 (both ages inclusive) who are working in the occupations listed in the particular order.

In August, 1943, a re-organization of National Selective Service took place for the purpose of broadening and decentralizing its administration as much as possible. The present set-up may be summarized as follows: The Director of National Selective Service, who is responsible to the Minister of Labour, is in charge of administration. There is an Administration Board of full time personnel of which the Director of National Selective Service is the Chairman and which consists of Associate Directors in charge of various specific aspects of the work. These members of the Board are also members of the Selective Service Advisory Board which is composed of representatives of Dominion Government departments and agencies as well as of industry and labour. There are also five Regional Directors, one for each of the Employment Regions, whose duties are, as far as practicable, to deal with matters within their regions which otherwise would have to be referred to Ottawa. Within each Region there is also a Regional Selective Service Advisory Board.

Local administration of the civilian side of the program is carried on through Selective Service officers who are stationed in the local Employment and Selective Service Offices. Appeals from decisions of Selective Service Officers may be made to local Courts of Referees composed of equal numbers of representatives of employers and workers. A worker may appeal personally or through a representative of his trade union.

Administration of the military call-up is described below under the heading "Mobilization".

Agriculture

As the war has advanced agricultural manpower has assumed increasing importance. This has been due to the progressive depletion of the farm working force and to the need for greater food production.

During 1940 local shortages of farm labour occurred due both to enlistments and to the higher wages offered in other occupations. Farm production, however, kept well ahead of demand and the general labour supply was sufficient. But by 1941 a general shortage began to be apparent. The armed services were calling for greater numbers of men, and the farmers were in no position to compete with the munitions factories in the matter of wages.

In 1941 provision was made for granting postponement of military training to farm workers who applied for it, and where Mobilization Boards considered it was warranted. This was a definite recognition of the manpower needs of primary food production. Full co-operation is being obtained from Mobilization Boards in granting postponements where they can be shown to be helpful to agriculture.

The exodus of workers from the farms in Ontario caused a temporary Farm Service Force to be organized in 1941 to assist farmers in the fruit areas, the expenses of which were borne jointly by the Dominion and Ontario Governments.

In March 1942, an Agricultural Division of the National Selective Service was set up to give special attention to the labour needs of agriculture.

Dominion-Provincial Farm Labour Agreements

Early in the summer of 1942, anticipating shortages of labour for peak harvesting periods in the Eastern as well as the Prairie Provinces, the Dominion Government through the Department of Labour negotiated agreements with all the provinces except Quebec, New Brunswick and Prince Edward Island, for the sharing of expenses incurred in the organization, recruitment and placement of temporary farm labour. Under these agreements the Dominion Government paid half the cost of transferring labour within the provinces, and the full cost of moving labour from one province to another. Through these agreements labour was moved from Ontario and Quebec to help harvest the 1942 record crop of the Prairies. In all, over 5,000 men were selected and sent west without any disorganization of work in the Eastern provinces and much of the Western harvest which could not otherwise have been gathered was saved.

This year agreements have been made with all the provinces which involve the Dominion Government in commitments of over \$500,000 with a further \$300,000 for the movement of workers from province to province. There have been two large-scale interprovincial movements of farm workers during the past summer. The first of these involved some 700 Saskatchewan farmers who were transferred to Ontario farms to help with haying. The second was of some 4,000 experienced farm workers from Ontario to the Prairie Provinces to work in the harvest fields.

In each province a Provincial Director has been named, also a Dominion-Provincial Farm Labour Committee. Under these are local

committees of farmers who act with the provincial agricultural representatives in finding and placing labour locally. In this work, and also that of recruiting students and men and women from urban centres and other outside sources of labour, close contact is maintained with the local Employment and Selective Service Offices.

Work Permits for Farmers

In the fall of 1942 the Civilian Regulations of the National Selective Service were amended to allow farmers to take work in other industries outside of urban centres for 30 days without having to obtain a permit. In the winter this was extended to 60 days. The purpose of this was to free these men when they were not needed at farming so that they could help relieve the shortages which also existed in other primary industries. To inform farmers on this and other points a pamphlet "A Message for Farmers" was prepared and distributed by the Agricultural Division. In the spring of 1943 it was found that of about 175,000 men who had gone into other industry during the fall and winter, practically all of them had returned to the farms. Plans have now been made for recruiting farm workers who can be spared from agriculture to accept employment in other essential industries during the coming winter.

Soldiers Detailed to Farm Duty

In the spring of 1943 compassionate leave was granted to some men in the Army under certain conditions. But this source of help was not sufficient so arrangements were then made with the Department of National Defence to detail soldiers to farm duty. Though only certain classes of soldiers were available about 2,500 were added for harvesting across Canada. Under an extension of the Compassionate Farm Leave plan, over 6,000 soldiers were also made available to work on their own home farms.

Other Measures

Men being withdrawn by Compulsory Labour Transfer Orders from the less essential industries are being placed on farms by local Employment and Selective Service Offices if they have had farming experience and are fit for the work.

In Alberta the farm labour supply has been increased through the use of prisoners of war. During the past summer about 500 of these men were used in gangs on the sugar beet farms. Under a recent Order in Council other groups of war prisoners are being used, and in

certain conditions are being allowed to live at the farms instead of being billeted in camps.

Many Japanese who had been moved from the coastal areas of British Columbia have been re-transferred from labour camps to farms throughout the country. At the present time there are between 5,000 and 6,000 of these men on farms, most of them being in the beet-growing areas of Alberta and Manitoba.

Labour Priorities

In the Spring of 1942 it was recognized that in order to avoid waste of manpower a definite labour priority classification was needed as a guide to be followed in diverting and directing workers to more essential employment and in providing all essential industries with at least their minimum labour requirements. Previous to that, however, representatives of the Department of Munitions and Supply, the Wartime Prices and Trade Board and the National Selective Service had been working together to build up a labour priority schedule. Later in 1942 a carefully worked out analysis of Canadian industries was prepared and issued for the use of Employment and Selective Service offices under the title Industrial Classification Manual. This Manual now serves as the basis on which the relative importance of industrial activities are determined.

The Minister of Labour's authority to classify industries and occupations is exercised by the Labour Priorities Division of National Selective Service. Contact with the Department of Munitions and Supply and the Wartime Prices and Trade Board is maintained through regular meetings of an Interdepartmental Labour Priorities Committee. On application to the Priorities Division, or on recommendation of government departments and of manufacturing interests, individual firms are considered by the Priorities Committee for special ratings. The authenticity of claims are investigated, and, when justified, each firm is specially named with a higher rating, depending on the proportion of essential production carried on by it.

Local Selective Service offices concerned are at once advised of such priority revisions by means of Revision Lists forwarded to them each week. These offices then refer available labour to the highest priority vacancy for which it is suitable.

Welfare and Related Services

Canadian women have played a very large part in the country's war effort, not only by replacing men in the lighter civilian industries

and releasing them for the armed forces and for work in essential war industries but by working beside them in the war industries themselves. In August, 1939, there were about 144,000 women employed in factories and industrial work in Canada. To-day there are over 419,000 women so employed of whom more than 260,000 are in war industries.

Such a rapid influx of women into industrial establishments, many of which had never employed women before, created certain welfare problems. It was to study these problems and to make recommendations and take action in connection with them that in September, 1942, a Welfare and Related Services Division was set up by the National Selective Service.

Matters concerning hours and conditions of work in factories normally come under the jurisdiction of the provincial governments. But Dominion and provincial government representatives have had many conferences to discuss wartime industrial developments and the safeguards which should be set up for the protection of the large new army of women workers. It has been necessary to insist on certain facilities being installed in all industries where women are employed; and it should be stated that commendable arrangements have been made by employers generally, many of whom have women on their payrolls for the first time.

Welfare officers on the staff of National Selective Service visit war industries from time to time to investigate and advise. All large industries are encouraged to set up welfare departments with trained persons in charge. In co-operation with National Selective Service, courses for welfare officers are being given through the War Emergency Training branch of the Department of Labour. In these courses due attention is given to nutrition and health.

The recruitment of women workers from their home localities to war industries in other parts of the country is receiving the attentions of the Welfare Division. Detailed instructions governing such transfers have been sent out to all Employment and Selective Service offices. No girl under 19 years may be transferred except under special circumstances.

The value of proper relaxation is stressed and in communities lacking recreational facilities adequate for a large number of women workers the Dominion Government will give financial assistance in co-operation with the government of the province.

Day Nurseries

The need of providing adequate care for the children of mothers engaged in essential industry was early recognized as a responsibility of the Department of Labour. Many more married women would seek employment in essential industries if their children could be properly cared for during the hours of work. The Dominion Government has agreements with the provinces of Ontario and Quebec which provide for: (1) Day nursery care for children, 2-6 years old, (2) school supervision outside of school hours for children over 6 years old, (3) foster home care for children under 2 years. The costs of such services are on a fifty-fifty basis.

Nineteen day nurseries are now in operation, 13 in Ontario (8 in Toronto) and 6 in Montreal. On the average, each nursery can take care of from 40 to 50 children. In view of the drive to secure some two to three thousand more women workers in Toronto, the Ontario Department of Public Welfare has been asked to plan for opening 12 additional day nurseries in that city. Nurseries are being planned by local committees for many points in Ontario, and employment office records show that the development is keeping pace with the need as shown by applications for such care.

As the need for women workers increases day nurseries will have to be established in other provinces. Inquiries have lately been received from Edmonton, Winnipeg and Vancouver, and data are being gathered from the Women's Divisions in the Employment Offices in those cities and from the provincial governments concerned.

Sixteen school units have been provided to date, twelve of them being in Toronto. During the summer there was little demand for the school facilities offered, but it is expected that during this fall the sixteen units will again be in full operation, with such other units as may be needed.

The Bureau is under the direction of Mrs. Rex Eaton, whose services for this purpose have been loaned by the British Columbia Department of Labour.

Mobilization

To co-ordinate the allocation of manpower between industry and the armed forces, the administration of the National War Services Regulation, 1940 (Recruits) under which men may be called up for compulsory military training, was transferred from the Minister of National War Services to the

Minister of Labour on December 1, 1942. Since that date the call-up of men for compulsory military service has been carried out under the National Selective Service Mobilization Regulations administered by the Department of Labour.

For the purpose of carrying out the regulations Canada is divided into 13 Administrative Divisions. Each Division is under the jurisdiction of a Mobilization Board. The chairman of these boards are judges and the other members are prominent citizens of the community. The administrative officer in each Division is the Registrar.

The staff concerned with compulsory mobilization throughout Canada numbers 1,843 at the present time.

Method of Call-up

From time to time the Minister of Labour receives from the Minister of National Defence requisitions for a stated number of men in stated medical categories to report on a certain date to specified training centres. In order to meet the requisitions, registrars serve "Orders-Medical Examination" on designated men in their Divisions requiring them to attend before a physician for medical examination. The physician places the men examined in medical categories. Men not granted postponement are ordered by the Registrar to report for military training.

Postponements

Applications for postponements come under three main headings: (1) men essential in agricultural operations; (2) men essential in war industry, essential industry and public utilities; (3) men whose departure for military training would cause extreme hardship to their dependents.

Mobilization Boards hear applications for postponements, and decisions of the Boards are final. Representatives of agriculture and of the National Selective Service, Civilian Section, as well as representatives of the Department of National Defence attend and make representations at meetings of Mobilization Boards.

Under the regulations, bona fide students of colleges and universities taking certain courses are allowed to continue their studies undisturbed, provided that if medically fit they take the military training prescribed, and also pass their scholastic examinations.

Orders—Military Training

Men ordered to report for training are supplied with transportation, lodging and subsistence warrants as required. Upon report-

ing at military training centres they are again medically examined and, if found fit, are taken on the strength and enrolled. They then cease to be under the jurisdiction of the Department of Labour.

Work of Administration

During a recent 12-month period the number of address changes notified to national registration authorities was 779,278, or over 60,000 a month. This entails a great amount of detailed organization work. Many missing men have to be traced. Delinquents have to be prosecuted. About 150,000 men have had to be re-examined by army medical boards, and approximately 35 per cent of these have been found fit to be sent for military training.

Requirements for 1943-44

The Minister of National Defence has announced that the man-power requirements of the armed services for the fiscal year 1943-44 amount to 177,000 men, of which 100,000 are for the Army, 24,000 for the Navy, and 53,000 for the Air Force.

Japanese Evacuation and Placement

Following upon the declaration of war against Japan in December, 1941, National Defence authorities declared the coastal areas of B.C. as "protected areas" for defence purposes and in the national interest required the evacuation therefrom of persons of the Japanese race resident therein. The Minister of Labour was made responsible to carry out the evacuation program and to provide for the subsequent welfare and placement of the Japanese so evacuated. For the purpose of carrying out this program the British Columbia Security Commission was appointed in March, 1942, by Order in Council P.C. 1665. This Commission, acting under the direction of the Minister of Labour, was charged with the task of removing over 21,000 Japanese from the protected areas of British Columbia and for their settlement elsewhere. The Commission consisted of Mr. A. C. Taylor, of Vancouver, Chairman; Assistant Commissioner F. J. Mead of the R.C.M.P. and Assistant Commissioner Shirras, British Columbia Provincial Police.

Over 2,000 men were despatched at once to Mines and Resources road construction camps in the interior of British Columbia and in Northern Ontario, and while many of these were subsequently sent into commercial employment, about 700 were until recently employed building strategic highways.

From the coastal islands and the Northern Pacific Coast, as well as the Vancouver City

area, 8,000 Japanese were gathered at Hastings Park assembly centre (Vancouver) and were sent inland by train. Thousands more were sent directly from their Fraser Valley homes to the interior of British Columbia, and 3,700 to the sugar beet areas of Alberta and Manitoba. Four hundred Japanese-Canadian men, mostly young single men, worked on Ontario sugar beet farms from June to November, 1942.

By November, 1942, most of the Japanese were out of the restricted area. At least 5,000 left the area as individuals or in family groups to engage in self-supporting and individual projects in British Columbia, or to employment in various centres, as far east as Montreal.

The Commission in June, 1942, faced the problem of establishing temporary housing centres for 12,000 Japanese in the interior of British Columbia, and decided to renovate abandoned buildings in old mining towns for this purpose, at Greenwood, Slocan, New Denver, Rosebery, Sandon, and Kaslo. Two new towns were created at Tashme (near Hope) and Lemon Creek (near Slocan) on leased land.

With the bringing of 100 tuberculosis patients from Hastings Park to New Denver in March, 1943, the evacuation was finished. Even before this, on February 5, 1943, Order in Council P.C. 946 dissolved the Commission, appointed its members among others to an Advisory Committee, and appointed Mr. George Collins of Winnipeg as Commissioner of Japanese Placement under the direction of the Minister of Labour.

The employable men and women among the 21,000 Japanese evacuated from the protected area of the Pacific coast are being gradually placed in employment wherever they will be of most use.

The production of foodstuffs has absorbed many thousands of these people, and will absorb many more this season. In every province from British Columbia to Quebec farmers are applying for Japanese labour, especially in regions where they proved themselves in this work last year. The present sugar ration is partly dependent on the labour of 4,000 Japanese in 1942, and again in 1943 in the sugar beet areas of Alberta, Manitoba and Ontario.

The fruit growers of British Columbia and Ontario are using several hundred Japanese, and want many more this season. Over a thousand Japanese were employed last year in British Columbia, Alberta and Ontario in raising cannery crops—tomatoes, corn, beans,

peas, etc.—and in the actual canning operations. Market gardeners, especially in southern Ontario, have utilized their services, and dairy, poultry, tobacco, and grain farmers are also applying for Japanese farm hands. In all, between 5,000 and 6,000 Japanese men, women and children are now working on Canadian farms.

In lumbering and fuel-cutting the Japanese are also filling an urgent need for labour. During the last winter, almost one thousand Japanese men were employed in logging camps and sawmills from the interior of British Columbia to northern Ontario.

In addition fuel wood-cutting operations are being carried on on a large scale by Japanese in British Columbia under the direction of the Department of Labour to provide needed fuel for British Columbia residents.

Prisoners of War

The use of prisoners of war in essential employment outside internment camps was authorized by Order in Council on May 10, 1943. Under this Order the Department of National Defence makes prisoners available to the Minister of Labour, who assumes responsibility for their employment, security and welfare. The Minister enters into contracts with employers and places prisoners in labour camps operated by the employer near the scene of the work project. The employer assumes full responsibility for the running of the camp under regulations laid down by the Minister respecting the living accommodation, security, working conditions and the welfare of the prisoners. Close supervision is exercised on behalf of the Department of Labour by the Director of Labour Projects (P. of W.), Lt.-Col. R. S. W. Fordham, and his staff.

Variations of this general procedure have been made as the labour situation demanded. Thus, prisoners have been taken from an internment camp for seasonal work on nearby farms, being returned to internment at the end of each day. Again, under authority of an Order in Council of July 4, 1943, prisoners have been placed singly or in groups to reside upon the premises of the employer. This procedure is designed to meet the requirements of farm labour.

In making financial arrangements for prisoner-of-war labour the Department has kept in view the interests of all three parties concerned. Contracts with employers provide the labour at a rate somewhat less than that prevailing for free labour in the particular industry because productivity of prisoners is less. A maximum payment to the prisoner

of fifty cents per day has been authorized. The balance on operation of the labour camps is paid to the Receiver-General.

Allotment of prisoner-of-war labour has been made whenever possible according to the priority rating of industries. At the end of three months prisoners are being used in agriculture, fuel-wood cutting, splitting hardwood for chemical manufacture, and logging. Arrangements are under way for their employment in railway right-of-way maintenance, pulpwood cutting, peat moss production, the tanning industry, and medical serum production.

Conditions governing the use of prisoner-of-war labour are such that results must be estimated on a different basis from that used for free labour. Several months' experience shows that in no case does production equal that of free labour. As the prisoners become familiar with the work, however, there is a steady rise in production. Employer complaints are few. The number of employers making application and the number of prisoners applied for are increasing daily.

Shiploading

Early in the war it was realized that every hour a cargo vessel remained in a Canadian port was an hour lost in the movement of war materials to the fighting fronts; also that our peacetime methods of shiploading were quite inadequate to meet war conditions in which ships in large numbers arrive and depart together thus creating peak loads and making heavier demands on longshore workers than the available labour supply could possibly meet.

The peacetime method of hiring longshore labour in the port of Halifax, which is roughly typical of all Canadian ports, was for stevedoring companies to hire men each day at the dock gates and dismiss them the moment they were no longer required. Workers had no advance notice of where or when they might expect another job, and there was no central place from which they could get this information. The result was that for many men longshore work was merely an intermittent occupation engaged in when nothing better offered.

Such a system of utilizing longshore labour was bound to seriously delay wartime loadings and sailings. Therefore, in February, 1941, at the instance of the Minister of Labour, the Halifax Longshoremen's Association entered into agreement with the stevedoring companies to provide for the admission into the Association's membership of enough men to permit 24-hour operations at the port of Halifax. This provided some relief but complaints continued to be made, more particularly after Canada's

war effort got into its stride. Therefore, early in 1942, after consultation with the longshoremen's union and the companies, the government launched a plan under which the activities of all companies concerned with shiploading operations were co-ordinated by a Controller of Loading Operations. Associated with this official was a Port Loading Superintendent and a Chief Dispatcher to administer a Central Dispatching Agency (or Hiring Hall, as it is now called). Mr. Vincent C. MacDonald, K.C., Dean of Dalhousie Law School, held the position of Controller of Loading Operations until his appointment a few months later as Assistant Deputy Minister of Labour.

Under this plan, which has been approved by the longshoremen's union for the duration of the war, the regular longshore working forces consist almost entirely of union men who are hired through the Central Dispatching Agency. But it has been necessary to go further in endeavouring to assure a full supply of men at times of peak loadings.

In June 1943, the government ruled that no longshoreman at Halifax should give up his occupation without a special permit to do so from the National Selective Service. Similarly, no employer could release a longshoreman without permission. At the same time the government provided for the setting up of a Reserve Labour Pool of Longshoremen at Halifax to supplement regular staffs when necessary. Since September, 1943, a guaranteed minimum weekly wage, equal to a 48-hour week at the prevailing day rate, has been paid to all regular longshoremen as well as to all men in the Pool. But to qualify for this guaranteed wage a worker must report for work at stated intervals each day and must accept the work offered him. Men in the Reserve Pool are sent to longshore work only when there are not enough regular longshoremen to handle any given rush of work. During slack periods Pool men are released temporarily to National Selective Service which may direct them to any other type of work in Halifax.

Research and Statistics on Manpower

Faced with rapidly expanding demands for more men for the armed services, for wartime industry and for essential civilian industry, it was necessary for the Department of Labour to develop a system of statistics that would enable inventories of the distribution of our manpower resources to be taken from time to time.

To meet this need the Research and Statistics Branch of the Department of Labour has expanded its staff and has acquired a modern set-up of statistical machines to handle the

heavy volume of work. By a survey of employment among employers, which is kept up to date, basic information was obtained regarding the age, marital status and sex of all workers in Canada with the exception of those in Government service, in agriculture and in domestic service. This general survey, supplemented by surveys conducted in conjunction with the Department of Munitions and Supply, and other data available in Ottawa, has enabled the Department of Labour to present a picture of the current distribution of Canada's manpower resources. This picture includes those in the armed forces, those in industry directly related to the war effort, those in high priority industries and in other categories, as well as those in agriculture, those not gainfully occupied and those unemployable. This general information has been an essential instrument in the planning of manpower policy.

In order to divert the limited manpower resources of the nation into the most effective channels, a system of labour priorities was developed. A new Industrial Classification Manual was prepared which provided a detailed system of classification of industries by which every business in Canada employing help was first registered and then classified. Following this, each industry was given a certain labour priority and the Local Employment and Selective Service Offices were provided with a system whereby as an order for new employees came in from an employer, the labour priority of that employer could be quickly determined and his needs met in accordance with his status.

A new method of weekly reports was instituted in the Local Employment and Selective Service Offices. The purpose of these new reports was to provide accurate and detailed information with respect to the supply of and demand for labour in the various communities. The new reports are made according to industry and occupations so that the number of workers required by various industries and the number of workers available according to occupational skills are obtained. In this way, the facts with regard to manpower supply and demand are made available in a form that is most useful. The statistics are utilized for purposes of planning and administration in the Local Offices, in the Regional Offices and

in Ottawa. Specific uses include analyses of labour shortages in high priority industries, checking the efficiency with which Local Offices are matching labour supply and demand and determining areas in which Clearance Orders for labour should be placed. The weekly reports also enable the responsible officials to see how effectively the various steps which have been taken to control manpower are working in practice.

The Research and Statistics Branch is also responsible for compiling reports sent in by Local Offices which show how Compulsory Employment Transfer Orders are operating.

Special reports and studies are made as the need arises. There was, for example, a registration made of all women in Canada between the ages of twenty-one and twenty-four. Similarly, when the shortage of nurses became acute, a detailed registration of all graduate nurses was taken and made available to the authorities. The employment situation in the coal mines is being followed with the closest interest to see how the operation of the Order in Council with respect to ex-coal miners is working. Recently a study was made of the labour demands of logging firms.

In the above ways a co-ordinated system of manpower records has been set up to determine the facts with respect to the utilization of Canada's manpower and to create the administrative set-up which enables the transfer of workers either from one part of the country to another or from a less important to a more important industry. This system will be invaluable after the war.

An important service performed by the Research and Statistics Branch is the preparation of data obtained from the Occupational History Survey of the armed forces. Every person upon enlisting completes a questionnaire setting forth his date of birth, education, occupation, experience, what his plans are for the end of the war and related facts. These forms, running into several hundreds of thousands, are analyzed and tables are prepared setting forth the most important facts. Those responsible for planning for the demobilization and rehabilitation of the members of the Armed Forces have found a mine of information in the Occupational History Survey.

IV.—Industrial Relations and the War

In dealing with industrial disputes, the Industrial Relations Branch is performing now, during the war years, an important function of the Department of Labour since its inception. But the great industrial expansion demanded by the War has added greatly to its responsibilities. While employers and labour have gone far in submerging their opposing interests in furtherance of the country's war effort, it was inevitable that frictions and irritations would arise out of working conditions in new and rapidly expanding plants, when production was being pressed to an unprecedented extent, where the materials used and the articles to be produced were unfamiliar to both management and labour, where hastily gathered staffs were inexperienced, and where many of the workers were quite new to industry.

In the early weeks of the war the field of the Industrial Relations Branch was greatly enlarged by the extension of the Industrial Disputes Investigation Act to all industries producing supplies or services needed in the prosecution of the War. This action, which was advocated by the trade unions, was taken under the War Measures Act.

A comparison of the statistics related to certain activities of the branch will indicate the pressure of work during the war years over that of peace time:

Strikes and Lockouts

Year	No. of Strikes
1935	120
1936	156
1937	278
1938	147
1939	122
1940	168
1941	231
1942	354
1943*	236

Applications for Boards of Conciliation and Investigation

Year	Number
1935	23
1936	23
1937	24
1938	33
1939	44
1940	66
1941	143
1942	106
1943*	110

The steadily increasing industrial activity arising out of the needs of war is reflected in the steadily increasing number of strikes and applications for Boards of Conciliation and Investigation requiring the attention of the Branch.

There are, of course, a great number of disputes which do not find expression in strikes or applications for Boards, and, while no statistics are in existence with regard to such disputes, it can be stated definitely that their increase during the war years is proportional to the figures given above. Stated simply, the problem which the war posed was how best to cope with the increased number of disputes with the minimum loss of time and production. The increased work and the necessity for speed have been met in the following manner:

- (1) The reorganization and centralization of the mediatory services of the Department.
- (2) The addition of mediatory personnel, both full-time and part-time.
- (3) The adoption of various orders in council.
- (4) The use of new methods in settling disputes.

In addition to these methods of facilitating the increased work of the Branch, a new and distinct wartime duty has devolved upon the Branch through the creation of various governmental agencies, each of which has issued regulations affecting labour. A discussion of this particular phase of Branch activity follows the treatment of the four points mentioned above.

(1) Reorganization and centralization of mediatory services.

While the actual reorganization and centralization of the mediatory services of the Department of Labour under a Director of Industrial Relations did not take place until August, 1942, plans to that end were formulated late in 1940. The conciliation service, which had been under the direction of a Chief Conciliation Officer stationed in Ottawa, and the administration of the Industrial Disputes Investigation Act, which had been in the hands of the Assistant Deputy Minister of Labour, were brought together in one branch under a Director of Industrial Relations and

*First seven months of 1943 only.

Registrar of Boards of Conciliation and Investigation established under the Industrial Disputes Investigation Act. The advantages of this step were obvious; henceforth, the usual conciliation services and the more formal mediatory procedure under the Act were unified under one head and in one branch. Not the least of the advantages gained through this single administration were the economy in time and the application of a consistent policy to the disputes confronting the Department.

(2) *The Addition of Personnel*

When plans for the reorganization of the mediatory services were formulated in 1940, steps were also taken for the placement of additional personnel which, it was realized, would be necessary in order to deal effectively with the increasing volume of work requiring the attention of the Department. At the request of the Department, the Civil Service Commission advertised for Industrial Relations Officers, graded from 1 to 5, and Industrial Relations Specialists. In all, 14 positions were created, and the idea was the establishment of a service which would not only deal with disputes but would work actively to prevent their developing to the point where labour relations were disrupted. It was planned that the lower-graded positions would be filled by young men who would be trained to meet the more exacting requirements and duties of the advanced grades, to which it was intended they should succeed. In this latter regard, the plan looked beyond the immediate war needs insofar as staff was concerned.

At the outbreak of war, seven Conciliation Officers under a Chief Conciliation Officer located in Ottawa served the Department. These men, operating from Ottawa and from local offices in Montreal, Toronto and Vancouver, formed the nucleus of the staff when the Industrial Relations Branch was established. At the present time, the Department is served by twenty-one Industrial Relations Officers and Specialists working under the direction of a Director of Industrial Relations at Ottawa. In addition to those cities mentioned above, offices have been opened in Fredericton and Winnipeg in order to deal more effectively with disputes in these areas. It must also be mentioned that officers are transferred from district to district according to the requirements of the industrial situation which, of course, varies from time to time. In this connection, the larger staff attached to headquarters at Ottawa is used to assist the staff in the field and to handle special assignments.

In addition to the 200 per cent increase in the full-time staff of the branch, Industrial Disputes Inquiry Commissioners, appointed under the provisions of P.C. 4020 (discussed below), investigate specific industrial disputes at the direction of the Minister of Labour. These men, usually judges, lawyers, professors or other specialists, are compensated on a per diem fee basis as specified in Section 52 of the Industrial Disputes Investigation Act. The specialized service rendered by these Commissioners has been most valuable in dealing promptly with industrial disputes and the aforementioned Order in Council can be said to have answered quickly and economically the problem of personnel without the creation of a much larger full-time staff. Industrial Relations Officers, too, are often given the powers of an Industrial Disputes Inquiry Commissioner, and one full-time Commissioner has been engaged.

(3) *The Adoption of Orders in Council to Meet War Problems*

To the end that production of munitions and supplies of war would not be impaired and that there would be a minimum amount of industrial unrest, which, it was realized from the experience of the last war, would follow from the rising industrial activity, a number of Orders in Council most of which were based upon the War Measures Act were promulgated.

In June, 1940, following a report of the Minister of Labour, the Governor in Council passed P.C. 2635 which was a declaration by the Government of certain principles for the regulation of labour conditions and the avoidance of industrial unrest during the war. The Order declared, among other things, that fair and reasonable standards of wages and other conditions should be established; that right of workmen to organize in trade unions and to bargain collectively should be recognized, and that disputes should be settled by negotiation or with the assistance of the Government conciliation services or through the provisions of the Industrial Disputes Investigation Act.

The declaration of the Government was sought and made for the purpose of facilitating the production of munitions and supplies of war, endangered by the industrial unrest which, it was realized, would accompany the upswing of industrial activity and the rise in prices. While the declaration had moral force only, it was of great service to the war effort in providing a guide for those employers and employees amenable to reason and suggestion and willing to follow the

expressed wish of the Government. Conciliation Officers and Boards of Conciliation and Investigation have repeatedly brought the principles to the attention of disputants and have thus obtained in many cases settlements of industrial disputes.

Very early in the war, in November 7, 1939, the first important Order in Council was passed when, by P.C. 3495, the Industrial Disputes Investigation Act was made applicable to disputes between employers and employees engaged in the production of munitions of war and supplies. In this way the machinery of the Act and the conciliation services of the branch were made available to a vast number of disputes, formerly within provincial jurisdiction. In other words, the "cooling off" period and the controls embodied in the Industrial Disputes Investigation Act were extended to the vital war industries.

The extension of the Act to war industry resulted, as will be seen above, in a very great increase in the number of applications for Boards, many of which had reference to disputes where the establishment of a Board appeared to be unnecessary. To take care of such cases, and to cope with the increased number of applications, P.C. 4020 was passed which authorized the appointment of Industrial Disputes Inquiry Commissioners to make preliminary investigations of disputes with a view to a prompt settlement, or, failing which, a recommendation for the establishment of a Board. Originally, a Commission was to consist of three members, but an amendment adopted at a later date provided that a Commission might consist of one or more members, each having the powers of a Commissioner under the Inquiries Act. As mentioned above, the Commissioners, usually professional men, give prompt and specialized service in dealing with industrial disputes and it may be said that by means of this Order in Council a war problem of the Industrial Relations Branch was answered and a distinct war service performed. This is clearly revealed by the statistics which show that from June 6, 1941, when the Order in Council was passed, down to March 31, 1943, some 170 Board applications were referred to the attention of Industrial Disputes Inquiry Commissioners; 52 of these disputes were settled by the Commissioners without the establishment of Boards, 53 were referred to Boards, and in 25 cases the Commissioner found a Board unwarranted. The remaining 40 cases were dealt with otherwise or were pending at that date.

With the great increase in employment in war industry and the consequent increase in union activity, a large number of protests

were received concerning the alleged dismissal of persons for union membership or activity. This problem was met by an amendment to P.C. 4020 which provided that an Industrial Disputes Inquiry Commissioner should investigate the allegations and make recommendations to the Minister of Labour who would issue whatever order he deemed necessary to give effect to them. By the terms of the Section the employer was bound to comply with the order of the Minister and a still later amendment provided a penalty for non-compliance.

A large number of dismissal cases have been investigated and in certain cases the reinstatement with back pay of the employees affected has been ordered. (It is interesting to note here that Section 502A of the Criminal Code, passed in 1939, provides only for a fine if a conviction against an employer is registered in a case of dismissal for union activity or membership, the dismissed employee being forced to take civil action if he wished redress for his wrongful dismissal.) In addition to providing a full measure of relief to the employee, the provisions of the amendment to P.C. 4020 have had the effect of keeping the wheels of war industry turning where cessations of work were likely because of the strong feeling engendered by such dismissals.

The same amendment which provided for an investigation of allegations of discrimination against workers for trade union activity also made possible an investigation of charges that workers were being coerced into joining or refraining from joining a trade union. Another amendment provided for an investigation by a Commission into any situation which appeared to the Minister of Labour detrimental to the most effective use of labour in the war effort.

To summarize, it may be said that each of the amendments to P.C. 4020 was designed to deal with problems in industrial relations encountered as the war progressed.

The Industrial Disputes Investigation Act makes it unlawful to go on strike or declare a lockout until a report has been made to the Minister by a Board of Conciliation and Investigation. An Order in Council, P.C. 7307, passed in September, 1941, made it unlawful to go on strike even after a Board has reported unless, in a vote conducted by the Department of Labour, a majority of the workers affected by the dispute indicate that they are in favour of a strike.

This further restriction was the answer of the Department and Government to the problem raised by long-standing disputes which had passed, without settlement, through successive investigations by Industrial Disputes Inquiry Commissioners and Boards of

Conciliation. The Order is valuable to the war effort in that, before a vote is taken, one last strong effort is made by the Director of Industrial Relations to settle the dispute by the arrangement of conferences which usually take place in Ottawa. The statistics reveal that, during the fiscal year 1942-43, of the nine applications for strike votes received following the reports of Boards of Conciliation, only one vote was taken, and not one strike took place, the disputes being settled without cessation of work.

• With the direct participation of Government in industry through the creation of Crown companies, the problem presented by the desire of the employees of such companies to have the right to organize in trade unions was met by the passage in December, 1942, of Order in Council P.C. 10802 which declares that employees of "Crown Companies" are free to belong to trade unions, and prohibits any officer of such a company from taking part in or interfering with the activities of union or from discriminating against a worker for union membership. The order provides that a collective agreement may be negotiated with the representatives of any union whose membership includes a majority of the company's employees or a majority of the workers in one or more of its plants or in a single craft. By means of P.C. 10802 the Industrial Disputes Investigation Act is extended to Crown companies for all disputes except those relating to matters affecting representation and jurisdiction. The records of the Department reveal that to date four Crown companies with more than 18,000 employees have agreements, while four others are negotiating agreements, with their employees as members of a trade union. As may be seen, the effect of P.C. 10802 has been to lessen and control disputes in those very important industries where the Crown has for war purposes become an entrepreneur.

When the National War Labour Board was set up in October, 1941, the problem of wage and bonus rates and increases as a source of dispute was removed to a great extent from the purview of the Industrial Relations Branch. While a great many strikes and disputes did occur over the question of remuneration, the efforts of Conciliation Officers were confined to directing the disputants to the appropriate National or Regional War Labour Board. Where applications for Boards of Conciliation concerned wages only, the policy of the Registrar has been to refer the applicant to the appropriate War Labour Board.

Prior to October, 1941, however, the problem of controlling wages was met by the passage

of P.C. 7440 in December, 1940. This order merely set forth a policy to be followed by Boards of Conciliation and Investigation in their recommendations made with respect to wages. In this respect, it came within the scope of the Industrial Relations Branch, as then constituted, until the passage of the Wartime Wages and Cost of Living Bonus Order, P.C. 8253, on October 24, 1941.

As the problem of wage control as a part of the comprehensive Government program against the inflationary tendency of high war-time employment, the increased national income and the huge expenditures for war purposes, is dealt with elsewhere, no further mention of this problem need be made here.

(4) The Adoption of New Methods to Settle Disputes

The fourth means whereby the increased number of disputes were handled, and handled quickly to the advantage of the war effort, was by the use of improved methods of mediation and the adoption of new techniques. As has already been mentioned, the centralization of all conciliation services and the administration of the Industrial Disputes Investigation Act under one head brought about a consistency of policy in handling disputes from their beginning through all stages of proceedings under the Industrial Disputes Investigation Act. To further this single policy all Industrial Relations Officers across the Dominion received a common course of instruction.

In addition, new methods of obtaining information quickly with regard to incipient disputes were devised in order that preventative action might be taken by the branch. To this end, the co-operation of various branches and departments of Government was enlisted. A unified system of recording and reporting disputes was also devised and made applicable across Canada.

As was mentioned above, the extension of the Industrial Disputes Investigation Act to cover disputes arising on war industries has led to the development of a system of co-operation between the various provincial authorities and the Dominion industrial relations service. Under this arrangement, provincial officials are requested to assign their officers to specified situations requiring mediation. Naturally this co-operation is more highly developed in the more industrialized provinces, and at the present time in Ontario both provincial and federal officers are assigned to disputes coming within federal jurisdiction as the need arises.

The increased employment of labour in war production resulted in a great deal of trade union organizing by the various central bodies. Consequently jurisdictional disputes became more numerous and, by their nature, proved very difficult of settlement thus threatening adversely in some instances the production of munitions and supplies, or vital services.

To meet such disputes, a mediatory technique was adopted whereby the employees affected would choose by balloting the organization which they desired to represent them in bargaining collectively with their employer. This method, which the United States authorities have been using for a decade, was not used in Canada before the war. Its use was facilitated by the adoption of P.C. 4020, for this Order in Council, in giving a Commissioner certain powers through the Inquiries Act, made possible, in those cases where an application for a Board of Conciliation was made, the taking of votes, under certain circumstances, even where one of the rival organizations or the employer objected.

In those jurisdictional disputes where the provisions of the Act have not been invoked, the policy of the branch is not to lend its services to the taking of a vote if any one of the interested parties raises an objection.

Where votes are taken, the branch has devised the practice and outlined the principles to be followed by its officers, all of which conform rigidly to general electoral practices with respect to scrutineers, ballot casting and counting.

The statistics indicate that balloting has proven of great value in the prompt settlement of industrial disputes, much to the advantage of the war effort. From January, 1940, to April, 30, 1943, 114 votes were taken by the branch both as a conciliation service and in proceedings under the Industrial Disputes Investigation Act. In those votes taken as a conciliation service, the prerequisite that all parties be in agreement before the vote was taken indicates that a settlement based on the result of the vote had been reached. In those votes taken in connection with the In-

dustrial Disputes Investigation Act, where unanimity with regard to the taking of the vote is not required under certain circumstances, it has been found that in 51 votes settlements of the disputes resulted in 31 cases, while the application for a Board was rejected and the dispute considered closed in 11 instances where the applicant organization failed to obtain a majority vote of the employees affected by the dispute. In only 9 cases did the vote not affect the settlement of the dispute favourably.

Co-operation with Branches and Departments of Government

With the development of Governmental agencies, branches and Departments to handle the needs and problems of a nation at war, there have come into effect a multitude of new regulations which affect labour and industrial relations. It has been one of the war-time problems or duties of the branch to interpret Departmental policy with regard to industrial relations to these new Governmental agencies so that the regulations, when drafted, will not violate policy and so create new problems to the disadvantage of the war effort. While this function is largely in the hands of the Director of Industrial Relations working through inter-departmental committees, the staff of the branch has taken an active part later in interpreting the new regulations to the public and applying them to industrial situations which develop.

One of the most active inter-departmental committees, and one from which direct benefit to the war effort are expected, is that devoted to the formation of joint Labour-Management Production Committees in industry. It is planned that each factory, mine or service, the operation or production of which is considered essential to the war effort, will have a committee, jointly formed by management and labour, which will work toward the solution of production problems. The promotion and establishment of these committees has been placed in the hands of Industrial Relations Officers of the Branch.

V.—Post-War Planning and Rehabilitation

Of major importance to the Department of Labour is the employment problem which will face Canada at the end of the war. The re-employment of men and women now in the armed forces, the transformation of war industry and its personnel to civilian industry entail decisions relating to international trade, the tariff, fiscal policy, banking policy, etc., by which the volume of employment is largely determined. Through representation on various inter-departmental and other committees, the Department is making its own contributions as well as keeping in touch with new developments.

Employment Statistics and Planning

Good statistics are absolutely necessary for sound planning in the field of employment. In the Occupational History Survey of the armed forces, being carried on by the Department of Labour, the educational status, industrial experience and occupational preference of every member are being carefully tabulated.

Similarly, in order to plan for the change-over from war industry to peace industry, periodic surveys are being conducted by the Department of Labour in conjunction with the Department of Munitions and Supply.

Surveys of employment among all employers in Canada, excluding farmers, conducted by the Research and Statistics Branch, have given the Department of Labour and other Departments interested a comprehensive picture of the labour force of the country as it is distributed among various industries. This information has been summarized for each province and for local areas within the provinces and is being studied by three provincial reconstruction committees at the present time.

In the section on Manpower the improved system of weekly reports of local employment conditions has been described. The purpose of these reports is to provide accurate and up-to-the-minute information regarding the supply of and demand for labour in the area covered by each local Employment and Selective Service Office throughout Canada. The information is gathered according to industry and occupation, so that the Department of Labour knows not only how many workers are required by employers in a

certain area, but what kinds of workers are required. Similarly, those seeking work are registered in the Local Offices according to occupations, and summary figures are reported to Regional Offices and to Ottawa weekly on the supply of labour available. Although this new system was devised to meet the needs of war, its value in the post-war period can be appreciated.

The Research and Statistics Branch of the Department of Labour have thus prepared the basic facts and procedures upon which employment policy is being planned for the reconstruction period.

Social Security

The Department of Labour is, of course, vitally interested in the various plans for Social Security that are being put forward. It recognizes that the best form of Social Security is full employment but that other steps must also be taken to provide a well-rounded scheme of Social Insurance and Social Assistance for the people of Canada.

Officials of the Department have been meeting regularly for several months discussing the problems connected with a programme of Social Security. The work of the Advisory Committee on Health Insurance, the work of the Advisory Committee on Reconstruction and the Proceedings of the three Parliamentary Committees—the Senate Committee on Re-establishment and Social Security, the House of Commons Special Committee on Reconstruction and Re-establishment and the House of Commons Special Committee on Social Security—have all been followed with close attention. Two members of the staff of the Department of Labour were assigned to give some assistance to Dr. L. C. Marsh in the preparation of his well-known Report.

Plans for Social Security in Canada are still in the exploratory stage, but the Department is studying such subjects as the extension of Unemployment Insurance to groups not now covered; the creation of a system of Unemployment Assistance for those who are not covered by Unemployment Insurance or who exhaust their benefits under Unemployment Insurance; the relation of Health Insurance to Workmen's Compensation and Unemployment Insurance; relations between a system of Disability Insurance and Unemployment Insurance; the effect upon the

labour force of a contributory system of Retirement Pensions; Family Allowances and their relation to Social Security as well as the constitutional questions involved.

Rehabilitation

In June 1941, at the instance of the Minister of Labour, an order in council was passed providing for the reinstatement of men discharged from the Armed Forces in their former employment.

In the summer of 1942 the Reinstatement in Civil Employment Act was passed giving legislative effect to the order in council. The Act required employers of persons accepted for certain war services to reinstate such persons in employment at discharge and, as far as possible, under conditions not less favourable than those which would have been applicable to them had they remained in their employment. The Act applied to persons on active service in the present war in the naval, military or air forces (including the Canadian Women's Army Corps), to members of the Corps of (Civilian) Fire Fighters for Service in the United Kingdom, to persons called out for training or service under the National Resources Mobilization Act, and to merchant seamen who are British subjects and citizens of Canada and who were employed on a ship of any of the Allied Nations.

Three main obligations imposed upon an employer were (1) to reinstate his former employee after discharge from the Armed Forces with full seniority rights, the period of service with the Armed Forces to count in determining pension rights and other benefits, (2) not to discharge an employee before he is accepted for the Armed Forces in order to evade the obligations of reinstatement, and (3) not to discharge a reinstated employee without cause, the burden of proving good cause being upon the employer if the discharge occurs within six months of reinstatement.

The Act affords five grounds of defence to an employer prosecuted for a violation of his obligations.

In August 1942, by order in council, the field of persons who could avail themselves of the Reinstatement in Civil Employment Act was widened to include any employed person induced or directed to other employment by a National Selective Service Officer.

In January 1943, another order in council entitled National Selective Service Civilian Regulations further extended the Act to apply also to employees whose employment had been terminated by their employers under an order by the Minister of Labour.

Administration and enforcement of the Reinstatement Act has been carried out by the Employment Service of the Unemployment Insurance Commission. The Legal Division of the Unemployment Insurance Commission has handled all the cases of disputed reinstatement coming to the attention of the Department of Labour concerning ex-Service men as well as employees requested or directed to other employment. The number of such cases has not been large, but as discharges from the Armed Forces increase, the number of disputed cases will likely increase correspondingly. The general experience so far has been that employers seem anxious to comply with the Act, and that as yet no prosecutions have had to be taken. Cases handled to date indicate a lack of knowledge of the provisions of the Act rather than refusal to comply with them.

Post-war Training

Reference has been made in another section to the Vocational Training Co-ordination Act, which was passed in August 1942. As stated, this Act provides for rehabilitation training for discharged members of the Armed Forces, and for such other forms of training as may become necessary in the post-war period.

The training of discharged members of the Armed Forces began on a small scale in 1942, but it is now beginning to increase in volume. Suitable procedure respecting this type of training has been worked out by the Department of Labour and the Department of Pensions and National Health. The latter department is responsible for the selection of those to be trained, but representatives of the War Emergency Training attend meetings of the district rehabilitation boards and assist in directing them into the right type of training. Provision has been made for vocational training to be given in the regular War Emergency classes, regular classes for vocational schools, classes opened specially for discharged persons, and in private business colleges. A procedure has been worked out to provide supervised training in industrial and commercial establishments.
